Taylor, Newell E., O52031.

To be lieutenant colonels, Women's Army Corps

Abbott, Elenor P., L315.
Butler, Miriam L., L111.
Elderdice, Eunity F., L114.
Harllee, Frances E., L532.
Kehrer, Marie, L263.
Lane, Mary C., L124.
Lawton, Rosa T., L254.
Long, Margaret A., L127.
Reece, Ruth S., L134.
Schuchart, Martha F., L317.
Simpson, Maribeth T., L106.
Sorrough, Irene M., L112.
Todd, Sarah B., L259.
Weible, Elsie L., L320.
Woodworth, Charlotte I., L137.

To be major, Chaplain

Edens, Allen C., Jr., O67567.

The following-named officers for promotion in the Regular Army of the United States, under the provisions of title 10, United States Code, sections 3284 and 3298:

To be first lieutenants

Bacon, Donald D., O93020.
Bennett, Roger M., O94045.
Brown, Larry D., O93367.
Cramer, Ronald P., O93380.
Davis, Alexander D., O93384.
Denzler, Ancil L., O93387.
Heipp, William A., O91866.
Kleiber, Richard L., O84206.
Koger, Ronald G., O93451.
Langendorff, Herbert E., Jr., O85598.
Lewis, Tedd McC., O93458.
Macci, David K., O85613.
MacDonald, Robert W., O85206.
Malave-Garcia, Samuel, O83943.
O'Hara, Francis G., Jr., O89364.
Pearce, William L., O91665.
Williams, Phillip J., O93540.

To be first lieutenant, Women's Army Corps

Kelly, Jacquelin J., L601.

The following-named persons for appointment in the Regular Army of the United States, in the grades specified under the provisions of title 10, United States Code, sections 3283, 3284, 3285, 3286, 3287, and 3288:

To be lieutenant colonel

Hoover, Gerald B., O329035.

To be captains

Beekman, Gerald R., O1925278.
Carson, Howard E., O1925293.
Cromley, David J., O2020402.
Fisher, George E., Jr., O4001710.
Harron, Dennis J., O4006946.
Hudlin, Irving C., O987533.
Hysinger, Jim, O976429.

Leikam, Norman A., O4010123.

Trunkes, William J., O5304164.
Vaughan, Frederick C., O4045377.
Weathers, John T., O2266128.
Whittle, William E., O4059847.

To be second lieutenants

Baldwin, Joseph A., O5850069.
Becker, Harvey A., O5213420.
Bonner, John E., O5006624.
Brennan, Patrick M., O5510506.
Corley, Thaman N., O5404215.
Doukas, James W., O5405340.
Freihube, Gary R., O5209957.
Griffith, Jerry R., O5405344.
Isaacson, Roy W., O5505415.
Kirk, William M., Jr., O5209146.
Ladner, Donald A., O5401279.
Liberatore, Samuel N., O5208206.
Mirkovich, Richard S., O5704803.
Patterson, Robert J., O5704441.
Pott, Robert G., O5704286.
Sherard, John H., IV, O5307911.
Smith, Horace M., O5310945.
Spann, Juan W., O5308133.
Steed, John H., O5309187.
Straight, Kaye R., O5703876.
Vermette, Robert E., O5000336.
Waghelstein, John D., O5209009.
Woolcock, Miles A., O5210920.
Yeomans, William A., O5308514.

The following-named persons for appointment in the Regular Army of the United States, in the grades and corps specified, under the provisions of title 10, United States Code, sections 3283, 3284, 3285, 3286, 3287, 3288, 3289, 3291, 3292, and 3294:

To be major, Dental Corps

Paul, John K.

To be captain, Dental Corps

Grisham, William K., O2240691.

To be captain, Medical Corps

Barnhart, Roger A., O2265278.

To be captain, Medical Service Corps

Plewes, William J., O535029.

To be first lieutenant, Army Medical Specialist Corps

Walker, Hilda L., M2295611.

To be first lieutenants, Army Nurse Corps

Konstanski, Maria R., N2297660.
Widman, Jean L., N5207850.

To be first lieutenants, Judge Advocate General's Corps

Esposito, John J., O5002657.
Moreland, Joseph A., Jr., O5205719.
Otto, Wilbur M., O5204951.
Stewart, Ronald B., O2299087.

To be first lieutenant, Medical Corps

Wiitala, Walter W.

To be second lieutenant, Army Nurse Corps

Clifton, Mary R., N5407244.

The following-named distinguished military student for appointment in the Regular Army of the United States in the grade of second lieutenant, under the provisions of title 10, United States Code, sections 3283, 3284, 3285, 3286, 3287, and 3288:

Jones, Donald H.

EXTENSIONS OF REMARKS

Robert Ellsworth Gross

EXTENSION OF REMARKS
OF
HON. EDGAR W. HIESTAND
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 6, 1961

Mr. HIESTAND. Mr. Speaker, this is a tribute to Robert Ellsworth Gross, industrialist, philanthropist, and patriot.

Robert Gross, born in Roxbury, Mass., graduate of Harvard, died Saturday at a hospital in Los Angeles.

In 1932 Robert Gross, his brother, Courtland, and a group of associates bought the bankrupt Loughead Aircraft Co. for $40,000. Today Lockheed, as it is now known, employs 66,000 people and has a net worth of $548 million, all in 27 years. It manufactures airplanes, ships, electronics, and does research and development in these and allied scientific fields.

Robert Gross, who was chairman of the board since 1934, was president from 1934 until 1956, when he was succeeded by his brother, Courtland.

We knew Bob Gross as a fine citizen, an able executive, a church leader, and genuine friend. He was known for his extreme fairness to employees, his appreciation of the worth of others, his indefatigible energy, his great modesty, his spirit of team play. He was truly an enlightened employer.

Extremely conscious at all times of his responsibility to his community, his State, and his country, he spared no effort in doing his duty, as he saw it.

Burbank, Los Angeles City and County, the State, and Nation have lost a great citizen and many hundreds have lost a true friend.

His memory, however, will prove an inspiration to many thousands.

Today, memorial services will be held in St. Alban's Church in Westwood, Calif., in final tribute to a distinguished American.

Taxes Related to Corporate Activity

EXTENSION OF REMARKS
OF
HON. ESTES KEFAUVER
OF TENNESSEE
IN THE SENATE OF THE UNITED STATES
Wednesday, September 6, 1961

Mr. KEFAUVER. Mr. President, my distinguished colleague, the Senator from Tennessee [Mr. GORE], delivered a thoughtful and interesting speech before the Tax Executives Institute in Detroit, Mich., of this year which deserves the consideration of Congress. The speech was printed in the Tennessee Law Review, volume 28, summer 1961, No. 4. Because I know it would be helpful to Members of Congress I ask unanimous consent to have it printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

TAXES RELATED TO CORPORATE ACTIVITY

(Address by Senator ALBERT GORE, of Tennessee, before Tax Executives Institute, Detroit, Mich., May 24, 1961)

A modern State has political purposes and social and economic goals all its own. Political, social, and economic goals should be mutually compatible and mutually supporting, the more so the more viable, and perhaps the more enduring, the society will be. In a modern democracy, certain generally accepted ends are pursued on a continuing basis. Among these ends, in a free society, is a proper distribution of the fruits of the economy, for political democracy and the nonstratification of society will hardly survive without it.

In the United States, it is desirable that economic gains be widely shared. Deep poverty, on the one hand, and the accumulation of untoward amounts of wealth by any individual, on the other, are equally to be shunned. Equality of opportunity is to be preserved. A meaningful regard for future generations as well as our own must be kept in mind. The process of raising up the bottom layers of society is a continuing one. Only if we follow these guidelines can the extremes of power, so inimical to democracy, be avoided. Only on this basis can political democracy be preserved for ourselves and for our children, or so it seems to me.

Taxation is a vital part of the foundation of our whole national structure. Indeed, the tax system is one of the primary tools used by a society, through its government, for achieving the goals that society has set for itself. If this view is accepted, taxation has functions other than revenue. Sufficient revenue must, of course, be obtained and this is the primary purpose of taxation, but it must be obtained in such a way as to further the general aims of society, not to hinder their fulfillment.

I think we have no particular difficulty in agreeing on the other generally accepted principles of taxation. Most of us, for example, would readily agree that we must adhere closely to the principal of ability to pay. Few people today seriously support the benefits received theory. Of course, there are always exceptions. Some may refer to the ability to pay principle as a soak the rich scheme. But even Adam Smith recognized the correct application of the principle. You will recall that he started the section on taxation in his classic "Wealth of Nations" with this statement: "The subjects of every state ought to contribute toward the support of the government, as nearly as possible, in proportion to their respective abilities; that is, in proportion to the revenue which they respectively enjoy under the protection of the state."

I doubt if there is any widespread objection to using taxation for the accomplishment of specific social and economic purposes, in principle, so long as the purposes themselves receive widespread public support. The taxation of oleomargarine is a case in point. We also have a graduated estate tax in an effort to prevent the accumulation of too much economic power in the hands of any one person. We could go on for hours discussing principles of taxation, and succeed, perhaps, in developing wide areas of both agreement and disagreement. What we are really interested in are specifics which violate our subjective judgment as to what is equity. In my view, our tax laws are so riddled with instances of tax favoritism that our system is not now equitable. It certainly cannot be said that equal incomes are today bearing equal tax burdens. Realizing that one man's loophole is another man's equitable adjustment of properly taxable income, we will neither begin nor end in wholehearted agreement. I assume, however, that since you invited me here, you are interested in some of the views held by me and by others of like mind in the Congress.

Many of you, I am told, are associated with corporations. So, although there are many inequities in the individual tax field, perhaps I should concentrate on the corporate tax structure, and taxes directly related to corporate activity. Among the most frequently discussed topics in this area today are the treatment of depreciation and depletion allowances, the taxation of income earned abroad, and means by which corporations compensate their "key" officers and employees at a reduced rate of effective taxation.

I. DEPRECIATION AND DEPLETION ALLOWANCES

First, let us look at depreciation and depletion. The corporate tax rate of 52 percent is high. Everyone will admit that. But it is also admitted that revenue is needed, and no serious attempt has been made recently, and none will be made this year, to lower the corporate rate. This will not be done until we have some overall tax reform or world conditions change drastically. This "temporary" rate of 52 percent will be extended again this year without any hard fight in the Congress. What has been done, and what will be attempted from time to time, is to lower the effective tax rate on corporations by liberalizing depreciation allowances. This is a kind of back-door-type reduction.

You are familiar with the arguments on this point. Some of you, perhaps, have gone before the Ways and Means Committee or the Finance Committee at various times to testify in favor of liberalized depreciation. Some will say that depreciation is merely a recovery of capital and has no bearing, no matter how liberal, on the effective tax rate. In my view, this is not good logic, under growth conditions. As long as the economy is growing, and a corporation is growing along with it, expenditures for plant and equipment are going to continue to increase. And, as long as this is the case, liberalized depreciation has the effect of lowering the effective tax rate. In other words, this is not tax deferral we are talking about, but tax reduction.

Mr. John B. Madigan, an officer of the Hartford Electric Light Co., has put this about as well as anyone. He stated, in an address before the National Conference of Electric and Gas Utility Accountants at Chicago in 1959, that by "using liberalized depreciation in our company we reduced our Federal income tax by 14 percent in 1957 and as much as 30 percent in 1958." He went on to say that "with very few exceptions the annual tax bill will continue to be less under accelerated depreciation than under straight-line" and "the cumulative amount of tax savings will be still growing at the turn of the next century." In considering any type of liberalized depreciation, then, let us bear in mind that we are actually talking about reducing the effective tax rate for those corporations able to take advantage of the liberalization.

President Kennedy has proposed a tax credit based on above normal capital expenditures. This is a new form of liberalized depreciation. This method of tax reduction favors some types of enterprises over others. Industrial corporations, for the most part, are pretty much in the same situation vis-a-vis investment in plant and equipment. But what about the corporation which uses relatively little capital equipment or machinery, such as financial institutions or research organizations? Even the industrial corporation which has invested heavily in modern plant and equipment during the past few years, and whose long-range program now calls for a slowdown in purchases of new equipment for 3 or 4 years, will be at a disadvantage.

Then, too, the type of tax credit President Kennedy has recommended may work somewhat counter to the built-in stabilizers in our tax system. In years, such as 1957, when demand is sparked by plant expansion, there will likely be good profits and high taxes, and therefore there will be a desire to take advantage of a tax credit. This may serve to bunch expenditures even more in a peak year. On the other hand, in years of recession when plant expansion should be encouraged, profits will be low, with reduced tax liability. But cash flows will continue to be relatively high due to high depreciation allowances for past expenditures. There will be little incentive to try for a tax credit, and capital expenditures will therefore not be encouraged. As a member of the finance committee, I am continuing my study of this recommendation, as well as of our existing depreciation provisions. At the present time, I have reservation about increasing depreciation allowances.

I said I was going to discuss depreciation and depletion. Perhaps there is no need to say very much about depletion. Percentage depletion is, in my opinion, one of the most unjustified tax gimmicks ever perpetrated on the taxpaying public. Depletion, like depreciation, is designed to allow the taxpayer to recover the value of a capital investment tax free. Our system of percentage depletion, however, bears no relationship whatsoever to the cost, or even to the value at any stage of development, of the capital asset. Cost may be recovered many times over, and still this tax deduction continues to run.

The argument most often advanced is, of course, that a big so-called depletion allowance is necessary to encourage expensive exploration. Put in this way, this type of allowance is nothing more than a subsidy. Moreover, it is, under present law, a continuing subsidy after there is no longer any relationship between the subsidy and any possible developmental incentive. Of course, percentage depletion is available to those who do no exploration. To these, it serves as a tax reduction, pure and simple, and without justification. I am hopeful that the administration will join those of us in the Congress who wish to move next year against percentage depletion. To date, this decision has apparently not been made.

II. TAXATION OF INCOME EARNED ABROAD

Let us now move to another aspect of corporate taxation in which most of you, I am sure, are interested, that is, the taxation of income earned abroad. Private foreign investment is getting to be a problem of rather serious proportions. It is getting to be serious because our tax laws continue to be heavily weighted in favor of foreign investment, as against increased domestic investment, and world conditions have, in the last 3 or 4 years, changed sufficiently to begin to make this tax favoritism effective in siphoning off capital and increasing the volume of its flow to Europe and other industrially developed areas.

Let me hasten to say that I am not against foreign investment. I am just in favor of taxing its profits. Now every time anyone begins to talk about foreign investment, someone will rush to its defense with the argument that, in the first place, increased foreign investment increases our exports, and in the second place, we get back more in dividends than we send abroad in new money. Let us see about this.

If a company is exporting machinery to Italy, let us say, and it finds that it needs to manufacture spare parts, or make final assembly, or do servicing in Italy, does it need a tax concession to encourage it to set up a small operation in Italy? Will such a company turn its back on this export source of profit because it is required to pay taxes on that part of its profit earned in Italy? I hardly think so. And do we really get back more in dividends than we send abroad in new money? We may if dividends from subsidiaries and profits from branch operations are combined, although even this is doubtful. Branch profits are repatriated because they are taxed currently, although sometimes very lightly. As you know, much of the foreign operations carried on in branch form are in the petroleum and mineral area, and many of the companies concerned, when they combine the foreign tax credit with the depletion allowance, pay practically no U.S. tax whatsoever. Naturally there is no inclination on the part of these companies to try to hide their profits in a subsidiary in Liechtenstein.

What I am really concerned about in this field are subsidiary operations. This is where the big tax avoidance lies. This is where you will find the tax haven abuses. When an American company doing export business in Latin America collapses its Western Hemisphere trade subsidiary in favor of a Swiss subsidiary which, in turn, fronts for a Liechtenstein subsidiary, which, in turn, performs no function whatsoever except to receive a 20-percent commission on all corporate exports—and these exports are actually sold by outside agents—then things have gone too far. This sort of thing is happening daily.

Now, some may say that we should not tax all subsidiaries, but instead we should plug up these various kinds of tax haven loopholes as they are discovered. This is easier said than done. In the first place, it is hard to discover the true facts. Liechtenstein, for example, has such a tight economic espionage law that our Internal Revenue agents working in Europe face the prospect of a long jail term if they go inquiring in Liechtenstein to find to what American-owned subsidiaries are up to. And once a particular type of operation is discovered, it is sometimes difficult to devise specific legislative language to stop it.

Consider the rather limited field of reinsurance. We find at least three variations. In one case, an American operating company will reinsure with a dummy subsidiary in a tax haven, with the reinsurance treaty rigged so as to pull most of the profits into the tax haven. As a variation on this, a foreign company may set up an American operating subsidiary with a reinsurance treaty which pulls the profits of the American company into its parent abroad, or into a tax haven subsidiary of that foreign parent. A third variation is to have an American company set up a subsidiary in a tax haven which, in turn, sets up an operating subsidiary abroad. The reinsurance treaty can be so rigged that the losses of the foreign operating company are paid by the U.S. parent out of funds earned but untaxed in the United States, while the profits of the foreign operating company go into the tax haven subsidiary. The only sure way to cure

these abuses is to tax all subsidiaries currently on their profits.

III. RESTRICTED STOCK OPTIONS

As to special means of compensating certain "key" corporation employees, the restricted stock option plan is a favorite. The restricted stock option is a loophole which affects both the corporation and the individual beneficiary. I classify it as a loophole because, as it has been used by many companies and insiders, it amounts only to a scheme for transforming what is in fact ordinary income into a type of income which the tax code recognizes as being entitled to a capital gains tax treatment, if taxed at all.

Here is a case which has been called to my attention. It does not involve a Michigan company, I am glad to say. In this particular company, reportedly almost 5 percent of the shares of stock outstanding were set aside for options. Those insiders who were able to take advantage of the situation have made a profit of about 500 percent on the arrangement. Even worse, when the options were exercised, in at least some cases, the company accepted a note from the officers exercising the options for 95 percent of the purchase price, with a rate of interest so low that the dividends would pay the interest on the loan. What a free ride—500 percent profit without capital, without risk, and with very little tax liability.

But the ordinary stockholder can do nothing. The stock exchanges require fairly full disclosure in proxy statements, but that is, perhaps, all they can do. No Government agency has any authority to review these plans, in most instances.

The root of the trouble lies with the Congress. Because of faulty legislation, this sort of thing has been encouraged until it is now at the point of becoming a national scandal. The only way to put a stop to this sort of thing is to correct the laws. I am trying to accomplish that during this session of Congress.

You know, people have short memories. Just last December the Wall Street Journal ran a wrap-up article on restricted stock options, and the headline, believe it or not, was "Options on the Wane." During the period covered by the SEC March report, officers and directors of the companies listed on the major exchanges reported 358 separate purchases of stock under options, with a market value—based on the closing prices for May 8, 1961—of $27,144,000. Restricted stock options are anything but "on the wane." Every time the market goes up, both sales and purchases increase.

So far as I am concerned, the restricted stock option is wholly unjustified. I am told that corporate executives need stock options to encourage them to do a conscientious job. I don't believe it. Would you quit your job if the law were changed? If you did, what would you do? Would you be less conscientious in your work if you did not have stock options? Of course not.

I am working for greater tax equity. I would also like to see lower tax rates. But the only way we can have lower rates and more equity is to eliminate special tax favoritism, only a few instances of which I have mentioned tonight. When that is done, we can begin to treat equal incomes, from whatever source, equitably, and with some possible preference to earned income.

The Agricultural Act of 1961

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1961

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks, I include a very interesting and informative letter received from Hon. Orville L. Freeman, Secretary of Agriculture, conveying to me, as I assume he has done to other Members of Congress that "the recently approved Agricultural Act of 1961 is the most constructive and promising farm legislation in many years," and "it is a significant step toward a healthier farm economy, and will therefore strengthen the economy of the entire Nation."

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, August 25, 1961.

Hon. JOHN W. McCORMACK,
House of Representatives.

DEAR CONGRESSMAN: I am certain the great majority of farm families across the Nation share my appreciation for the constructive interest the Congress has demonstrated in agriculture during the current session. The recently approved Agricultural Act of 1961 is the most constructive and promising farm legislation in many years. It is a significant step toward a healthier farm economy, and will therefore strengthen the economy of the entire Nation.

The act recognizes both the principle of expanding our use of agricultural products and the necessity for adjusting our abundant production to quantities that we can use. Its provisions for wheat and feed grains will make for higher farm incomes, and at the same time provide substantial savings to taxpayers by reducing storage costs that would otherwise occur. Its expansion of marketing order programs will bring about greater and more effective use of this self-help method of increasing farmers' bargaining power. Better farm incomes can also be expected as a result of provisions in the new act that expand and improve the supervised credit service of the Farmers Home Administration. Supervised credit will now be more useful in meeting credit needs of young farmers struggling to get started and a more powerful instrument in eliminating rural poverty, strengthening family farms, and revitalizing rural communities.

The U.S. Department of Agriculture will seek to carry out its responsibilities under the new programs with maximum concern for their success. We shall seek to consult and cooperate with farmers wherever appropriate, and to welcome suggestions from producers and groups of producers who seek to improve programs that affect their economic welfare. We shall seek effective implementation of the intent of the Congress as expressed in this act. We expect to learn from our experience under these programs, to the end that they may be improved and perfected. We welcome your suggestions.

We regard the period immediately ahead as an opportunity for further study and evaluation of proposed policies and programs, and most particularly for further efforts to build greater public understanding of the farm situation. We regard it as a challenge to formulate the next steps in seeking to reach our goals: continued improvement of farm income without exploitation of consumer or taxpayer, and thus contributing to a healthy national economy; and continued efforts toward greater use of our agricultural productivity to meet human needs at home and to contribute to the advancement of progress and freedom abroad.

Sincerely yours,
ORVILLE L. FREEMAN,
Secretary.

President McKinley Fatally Wounded 60 Years Ago

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1961

Mr. BOW. Mr. Speaker, this is a sad and significant anniversary in our history.

Sixty years ago, on September 6, 1901, President William McKinley was fatally wounded while attending the Pan-American Exposition, at Buffalo, N.Y.

Interest in the martyred President is very much alive in his hometown and mine, Canton, Ohio, and I have just received a very moving account of the assassination from George R. Bechtel, of Canton, an admirer of the late President and collector of McKinleyana. The repository of Canton also has taken note of this anniversary.

SENATE

THURSDAY, SEPTEMBER 7, 1961

The Senate met at 9 o'clock a.m., and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Thou who art the light of man's mind, with eyes of wonder we have greeted again the eternal miracle of a new day; as dawn has conquered the darkness, so rise, we pray Thee, with morning light upon our souls.

Even through the terror and tumult of these darkened days may we discern the shining pathway which is leading upward to the City of God as obediently and patiently we follow the kindly light.

Pressed by the practical problems which crowd our hours and cry for solution, we would keep ever clear in our vision and faith the eternal things that cannot be shaken amid the tempests of the temporal.

Giving of our best ability to the people's good, may we rise above life's bitterness by an unshakeable belief in the shining splendor of humanity.

In the Redeemer's name we ask it. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, September 6, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on September 6, 1961, the President had approved and signed the following acts:

S. 85. An act for the relief of Maria Dolores Villar Salinas, Angela Cassanova Cabello, Carmen Guenaga Anchustegui, and Flora Casals Pons;

S. 304. An act for the relief of Anna Lekos;

S. 561. An act to amend the act relating to the small claims and conciliation branch of the municipal court of the District of Columbia, and for other purposes;

S. 570. An act for the relief of Giuseppa Alonzi;

S. 713. An act for the relief of Anastasia Stassinopoulos;

S. 722. An act for the relief of Aideh Kobler;

S. 880. An act to amend section 216 of the Merchant Marine Act, 1936, as amended, to authorize the Secretary of Commerce to accept gifts and bequests of personal property for the U.S. Merchant Marine Academy; and

S. 1908. An act to provide for a national hog cholera eradication program.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 157. An act to change the name of the Playa del Rey Inlet and Harbor, Venice, Calif., to the Marina del Rey, Los Angeles, Calif;

H.R. 2292. An act to authorize the Secretary of the Treasury to issue certificates of honorable discharge in lieu of certificates of disenrollment to certain persons who served as temporary members of the U.S. Coast Guard Reserve during World War II;

H.R. 4357. An act to increase monthly disability and death compensation payable pursuant to the War Hazards Compensation Act;

H.R. 4939. An act to provide for the conveyance of all right, title, and interest of the United States in a certain tract of land in Jasper County, Ga., to the Jasper County Board of Education;

H.R. 6535. An act to validate the salary overpayments made to certain officers and employees incident to the salary adjustment provisions of the Federal Employees Salary Increase Act of 1955, and for other purposes;

H.R. 6630. An act to amend the act of May 25, 1920, relating to conveyances of certain parts of rights-of-way by railroad companies;

H.R. 6729. An act to provide for the disposal of certain lands held for inclusion in the Cape Hatteras National Seashore Recreational Area, N.C., and for other purposes;

H.R. 7037. An act to amend section 3238 of title 18, United States Code;

H.R. 7477. An act to repeal section 409 of the Public Buildings Act of 1949, requiring the submission of a report to the Congress concerning eligible public building projects;

H.R. 7854. An act to modify the project for the Duluth-Superior Harbor, Minn. and Wis., to provide for the abandonment of the 21st Avenue West Channel, and for other purposes;

H.R. 7888. An act to amend the Flood Control Act of 1958 to extend the time within which land in certain reservoir projects in Texas may be reconveyed to the former owners thereof;

H.R. 7890. An act to authorize the Postmaster General to dispose of certain land, and for other purposes;

H.R. 8038. An act to amend section 491 of title 18, United States Code, prohibiting certain acts involving the use of tokens, slugs, disks, devices, papers, or other things which are similar in size and shape to the lawful coins or other currency of the United States;

H.R. 8236. An act to authorize the use of funds arising from judgments in favor of any of the Confederated Tribes of the Colville Reservation;

H.R. 8320. An act to amend the Freeport Harbor project, Texas;

H.R. 8490. An act to amend the act of September 2, 1958, establishing a Commission and Advisory Committee on International Rules of Judicial Procedure, as amended;

H.R. 8632. An act to amend section 510(1) of the Merchant Marine Act, 1936, relating to the exchange of vessels;

H.R. 8719. An act to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard;

H.R. 8762. An act to amend the Small Business Act to increase the amount available for regular business loans thereunder; and

H.J. Res. 358. Joint resolution authorizing the President to issue annually a proclamation designating the third week in March as National Poison Prevention Week, in order to aid in bringing to the American people the dangers of accidental poisoning.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 157. An act to change the name of the Playa del Rey Inlet and Harbor, Venice, Calif., to the Marina del Rey, Los Angeles, Calif.;

H.R. 7477. An act to repeal section 409 of the Public Buildings Act of 1949, requiring the submission of a report to the Congress concerning eligible public building projects;

H.R. 7854. An act to modify the project for the Duluth-Superior Harbor, Minn. and Wis., to provide for the abandonment of the 21st Avenue West Channel, and for other purposes;

H.R. 7888. An act to amend the Flood Control Act of 1958 to extend the time within which land in certain reservoir projects in Texas may be reconveyed to the former owners thereof; and

H.R. 8320. An act to amend the Freeport Harbor project, Texas; to the Committee on Public Works.

H.R. 2292. An act to authorize the Secretary of the Treasury to issue certificates of honorable discharge in lieu of certificates of disenrollment to certain persons who served as temporary members of the U.S. Coast Guard Reserve during World War II; and

H.R. 8632. An act to amend section 510(1) of the Merchant Marine Act, 1936, relating to the exchange of vessels; to the Committee on Commerce.

H.R. 4357. An act to increase monthly disability and death compensation payable pursuant to the War Hazards Compensation Act;

H.R. 6535. An act to validate the salary overpayments made to certain officers and employees incident to the salary adjustment provisions of the Federal Employees Salary Increase Act of 1955, and for other purposes;

H.R. 7037. An act to amend section 3238 of title 18, United States Code;

H.R. 8038. An act to amend section 491 of title 18, United States Code, prohibiting certain acts involving the use of tokens, slugs, disks, devices, papers, or other things which are similar in size and shape to the lawful coins or other currency of the United States;

H.R. 8490. An act to amend the Act of September 2, 1958, establishing a Commission and Advisory Committee on International Rules of Judicial Procedure, as amended; and

H.J. Res. 358. Joint resolution authorizing the President to issue annually a proclamation designating the third week in March as National Poison Prevention Week, in order to aid in bringing to the American people the dangers of accidental poisoning; to the Committee on the Judiciary.

H.R. 4939. An act to provide for the conveyance of all right, title, and interest of the United States in a certain tract of land in Jasper County, Ga., to the Jasper County Board of Education; to the Committee on Agriculture and Forestry.

H.R. 6630. An act to amend the act of May 25, 1920, relating to conveyances of certain parts of rights-of-way by railroad companies;

H.R. 6729. An act to provide for the disposal of certain lands held for inclusion in the Cape Hatteras National Seashore Recreational Area, N.C., and for other purposes; and

H.R. 8236. An act to authorize the use of funds arising from judgments in favor of any of the Confederated Tribes of the Colville Reservation; to the Committee on Interior and Insular Affairs.

H.R. 7890. An act to authorize the Postmaster General to dispose of certain land, and for other purposes; to the Committee on Post Office and Civil Service.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour, for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Juvenile Delinquency Subcommittee of the Judiciary Committee was authorized to meet during the session of the Senate today.

On request of Mr. KUCHEL, and by unanimous consent, the Committee on the Judiciary was authorized to meet during the session of the Senate today.

On request of Mr. MANSFIELD, and by unanimous consent, the Subcommittee

on Constitutional Amendments of the Committee on the Judiciary was authorized to sit during the session of the Senate this afternoon.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Subcommittee on Antitrust and Monopoly and the Subcommittee on Constitutional Amendments, of the Committee on the Judiciary, be permitted to sit while the Senate is in session today.

The VICE PRESIDENT. Is there objection?

Mr. DIRKSEN. Mr. President, I object.

The VICE PRESIDENT. The Senator from Illinois objects.

Mr. DIRKSEN. Mr. President, I have been requested to object.

The VICE PRESIDENT. The Senator from Illinois states he has been requested to object.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JACKSON, from the Committee on Interior and Insular Affairs, with an amendment:

S. 970. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Mid-State reclamation project, Nebraska, and for other purposes (Rept. No. 884).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 1274. A bill for the relief of the widow of Julian E. Gillespie (Rept. No. 889);

H.R. 2816. An act for the relief of CWO James M. Cook (Rept. No. 890);

H.R. 3606. An act for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air force (Medical Corps) (Rept. No. 891);

H.R. 3863. An act for the relief of Woody W. Hackney of Fort Worth, Tex. (Rept. No. 892);

H.R. 4369. An act for the relief of Henry James Taylor (Rept. No. 893);

H.R. 5182. An act for the relief of Charles P. Redick (Rept. No. 894);

H.R. 5559. An act for the relief of Ralph E. Swift and his wife, Sally Swift (Rept. No. 895);

H.R. 6996. An act for the relief of Harry Weinstein (Rept. No. 896);

H.R. 7264. An act for the relief of M. C. Pitts (Rept. No. 897); and

S. Res. 201. Resolution providing additional funds for the Committee on the Judiciary in connection with the internal security of the United States; and, under the rule, referred to the Committee on Rules and Administration.

By Mr. FONG, from the Committee on the Judiciary, with an amendment:

S. 521. A bill for the relief of Charles J. Utterback (Rept. No. 898).

By Mr. DIRKSEN, from the Committee on the Judiciary, without amendment:

H.J. Res. 109. Joint resolution designating the 17th day of December 1961 as Wright Brothers Day (Rept. No. 885).

By Mr. McCLELLAN, from the Committee on the Judiciary, without amendment:

H.J. Res. 499. Joint resolution authorizing a celebration of the American patent system (Rept. No. 886).

By Mr. JOHNSTON, from the Committee on the Judiciary, without amendment:

H.R. 176. An act to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States (Rept. No. 887); and

H.R. 6690. An act to amend section 332 of title 28, United States Code, in order to provide for the inclusion of a district judge or judges on the judicial council of each circuit (Rept. No. 888).

By Mr. JORDAN, from the Committee on Rules and Administration, without amendment:

H.R. 6667. An act to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities (Rept. No. 902); and

S. Con. Res. 40. Concurrent resolution authorizing the printing as a Senate document of the 40th biennial meeting of the Convention of American Instructors of the Deaf; and providing for additional copies (Rept. No. 901).

By Mr. JORDAN, from the Committee on Rules and Administration, with an amendment:

S. 2488. A bill to increase the number of apprentices authorized to be employees of the Government Printing Office, and for other purposes (Rept. No. 900).

By Mr. JORDAN, from the Committee on Rules and Administration, with additional amendments:

S. Res. 105. Resolution to create a Special Committee on National Fuels Study (S. Rept. No. 899).

TAX TREATMENT OF CERTAIN CLAYS AND SHALE—REPORT OF A COMMITTEE—MINORITY VIEWS (S. REPT. NO. 903)

Mr. BYRD of Virginia. Mr. President, from the Committee on Finance, I report favorably, with amendments, the bill (H.R. 7057) relating to the application of the terms "Gross income from mining" and "ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products" to certain clays and shale for taxable years beginning before December 14, 1959, and I submit a report thereon. I ask that the report be printed, together with the minority views of Senators DOUGLAS and GORE.

The VICE PRESIDENT. The report will be received and the bill will be placed on the calendar and, without objection, the report will be printed, as requested by the Senator from Virginia.

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL EMPLOYMENT AND PAY

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal employment and pay for the month of July 1961. In accordance with the practice of several years' standing, I ask unanimous consent to have the report printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN EXECUTIVE BRANCH, JULY AND JUNE 1961, AND PAY, JUNE AND MAY 1961

PERSONNEL AND PAY SUMMARY

(See table I)

Information in monthly personnel reports for July 1961 submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures is summarized as follows:

Total and major categories	Civilian personnel in executive branch			Payroll (in thousands) in executive branch		
	In July numbered	In June numbered	Increase (+) or decrease (−)	In June was	In May was	Increase (+) or decrease (−)
Total [1]	2,435,804	2,419,104	+16,700	$1,171,937	$1,202,582	−$30,645
Agencies exclusive of Department of Defense	1,392,621	1,376,609	+16,012	648,606	664,600	−15,994
Department of Defense	1,043,183	1,042,495	+688	523,331	537,982	−14,651
Inside the United States	2,277,043	2,260,057	+16,986			
Outside the United States	158,761	159,047	−286			
Industrial employment	559,665	569,235	−9,570			
Foreign nationals	168,659	170,196	−1,537	24,789	[2] 24,460	+329

[1] Exclusive of foreign nationals shown in the last line of this summary.

[2] Revised on basis of later information.

Table I breaks down the above figures on employment and pay by agencies.

Table II breaks down the above employment figures to show the number inside the United States by agencies.

Table III breaks down the above employment figures to show the number outside the United States by agencies.

Table IV breaks down the above employment figures to show the number in industrial-type activities by agencies.

Table V shows foreign nationals by agencies not included in tables I, II, III, and IV.

TABLE I.—*Consolidated table of Federal personnel inside and outside the United States employed by the executive agencies during July 1961, and comparison with June 1961, and pay for June 1961, and comparison with May 1961*

Department or agency	Personnel				Pay (in thousands)			
	July	June	Increase	Decrease	June	May	Increase	Decrease

FOREIGN NATIONALS

Table V segregates and accounts for certain categories of personal services rendered to the U.S. Government overseas, which cannot be regarded as ordinary direct employment.

This personal service is rendered to U.S. agencies overseas under agreements with the foreign governments. In most cases the employment is indirect. The foreign governments hire the employees. The U.S. military agencies in most cases administer or direct the activity.

Personnel hired and used under such circumstances cannot be properly considered in the same category as regular employment, but they are used and should be counted for what they are.

For this reason the Joint Committee on Reduction of Nonessential Federal Expenditures counts employees of this type along with, but separate from, regular U.S. employment overseas.

STATEMENT BY SENATOR BYRD OF VIRGINIA

The cost of civilian employment in the executive branch of the Federal Government reached its alltime high in fiscal year 1961 which ended June 30, although employment over the full 12 months averaged less than in fiscal year 1960.

The increase in payroll costs reflected the general pay raise which became effective July 1, 1960. Federal civilian payroll costs during the year totaled $13,684 million, plus $285 million in U.S. pay for foreign nationals not on the regular rolls. The personal service cost of the Government exceeded $1 billion a month for the third consecutive year.

The payroll cost for employment by civilian agencies in fiscal year 1961 was $7,622 million and for civilian employment in military agencies was $6,026 million.

Figures by fiscal years since 1955 follow:

Annual Federal expenditures for civilian payroll, executive branch, fiscal years 1955–61

[In millions of dollars]

Fiscal year	Civilian agencies	Department of Defense [1] (civilian employment)	Total
1955	$4,921	$4,700	$9,621
1956	5,359	5,167	10,526
1957	5,602	5,399	11,009
1958	6,040	5,415	11,455
1959	6,564	5,766	12,330
1960	6,877	5,760	12,637
1961	7,622	6,026	13,648

[1] Excludes U.S. pay for foreign nationals not on regular rolls.

Average employment by civilian agencies of the Government increased during the year despite conclusion of the 18th decennial census; but this increase was more than offset by a reduction in the average civilian employment by military departments.

Employment by executive branch agencies during fiscal year 1961 (ended June 30) averaged 2,372,445 as compared with an average of 2,386,345 in the previous year. Employment by civilian agencies averaged 1,835,089, an increase of 3,484 as compared with an average of 1,331,605 in the previous year. Civilian employment by military agencies average 1,037,356, a decrease of 17,384 as compared with an average of 1,054,740 in the previous year.

Average employment by fiscal years since 1955 follows:

Average civilian employment by Federal agencies, executive branch, fiscal years 1955–61

Fiscal year	Civilian agencies	Department of Defense [1] (civilian employment)	Total
1955	1,182,663	1,184,627	2,367,290
1956	1,189,458	1,174,584	2,364,042
1957	1,219,835	1,174,263	2,394,099
1958	1,242,941	1,104,403	2,347,344
1959	1,266,566	1,085,676	2,352,242
1960	1,331,605	1,054,740	2,386,345
1961	1,335,089	1,037,356	2,372,445

[1] Excludes foreign nationals not on regular rolls (averaging 173,427 during fiscal year 1961).

JULY 1961 EMPLOYMENT

Monthly reports on personnel certified to the Joint Committee on Reduction of Nonessential Federal Expenditures showed civilian employment by executive agencies of the Federal Government during July totaled 2,435,804 an increase of 16,700 over the previous month.

Civilian agencies reporting the larger increases were Post Office Department with 5,635; Treasury Department with 1,778, Veterans' Administration with 1,663, Department of Health, Education, and Welfare with 1,509, Agriculture Department with 1,198 and Interior Department with 775. The increases in the Departments of Agriculture, Interior, and Post Office were largely seasonal.

Total employment inside the United States in July was 2,277,043 an increase of 16,986 as compared with June. Total employment outside the United States in July was 158,761, a decrease of 286 as compared with June.

Employment by civilian agencies in July totaled 1,392,621, an increase of 16,012 over June. Civilian employment by military agencies in July totaled 1,043,183, an increase of 688 as compared with June.

FOREIGN NATIONALS

The total of 2,435,804 civilian employees certified to the committee by executive agencies in their regular monthly personnel reports includes some foreign nationals employed in U.S. Government activities abroad, but in addition to these there were 168,659 foreign nationals working for U.S. agencies overseas during July who were not counted in the usual personnel report. The number in June was 170,196. A breakdown of this employment for July follows:

Country	Total	Army	Navy	Air Force	National Aeronautics and Space Administration
Australia	1				1
Canada	35			35	
Crete	49			49	
England	3,299		25	3,274	
France	21,079	17,816	9	3,254	
Germany	79,461	66,638	87	12,736

Total	168,659	110,626	16,156	41,876	1

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FONG:

S. 2509. A bill for the relief of Richard Chin Kai Young (Kai Leong); to the Committee on the Judiciary.

By Mr. McCARTHY:

S. 2510. A bill for the relief of Rollo Oskey; to the Committee on the Judiciary.

By Mr. MUSKIE (for himself and Mr. PELL):

S. 2511. A bill to provide for the production and distribution of educational and training films for use by deaf persons, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. MUSKIE when he introduced the above bill, which appear under a separate heading.)

By Mr. THURMOND (for himself and Mr. JOHNSTON):

S. 2512. A bill to authorize the Secretary of the Navy to accept H.M.S. *Seraph* as a gift from the United Kingdom, for the purpose of redonating it to The Citadel of Charleston, S.C.; to the Committee on Armed Services.

By Mr. YARBOROUGH (for himself and Mr. KERR):

S.J. Res. 133. Joint resolution to provide for the coinage of a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives; to the Committee on Banking and Currency.

(See the remarks of Mr. YARBOROUGH when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. SYMINGTON (for himself and Mr. LONG of Missouri):

S.J. Res. 134. Joint resolution to authorize the President to proclaim the month of May 1962 as National Clean Up-Paint Up-Fix Up Month; to the Committee on the Judiciary.

CONCURRENT RESOLUTION

ANNUAL SINE DIE ADJOURNMENT OF THE CONGRESS

Mr. ALLOTT submitted the following concurrent resolution (S. Con. Res. 43); which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That section 132 of the Legislative Reorganization Act of 1946 is amended to read as follows:

"SEC. 132. (a) Effective with the second session of the Eighty-seventh Congress, except in time of war or during a national emergency proclaimed by the President after September 30, 1961, the two Houses shall adjourn sine die not later than the last day (Sundays excepted) in the month of July in each year unless otherwise provided by the Congress.

"(b) The consent of the respective Houses is hereby given to an adjournment of the other as specified in subsection (a)."

RESOLUTION

EXPENDITURE OF ADDITIONAL FUNDS BY COMMITTEE ON GOVERNMENT OPERATIONS

Mr. HUMPHREY submitted the following resolution (S. Res. 205); which was referred to the Committee on Rules and Administration:

Resolved, That S. Res. 26, agreed to February 13, 1961, authorizing the Committee on Government Operations, or any duly authorized subcommittee thereof, to conduct a study and investigation of all matters pertaining to interagency coordination, economy, and efficiency, is amended on page 2, line 20, by striking out "$75,000" and inserting in lieu thereof "$90,000".

PRODUCTION AND DISTRIBUTION OF EDUCATIONAL AND TRAINING FILMS FOR THE DEAF

Mr. MUSKIE. Mr. President, the distinguished junior Senator from Rhode Island [Mr. PELL] and I introduced, for appropriate reference, a bill to provide for the production and distribution of educational and training films for use by deaf persons. This legislation amends Public Law 85-905 (72 Stat. 1742) which established the captioned films for the deaf program. The amendment expands that program to include research in the use of educational and training films for the deaf, the production and distribution of such films, and the training of persons in the use of films for the deaf. I believe this modest proposal could have a major impact on our educational efforts on behalf of handicapped persons.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2511) to provide for the production and distribution of educational and training films for use by deaf persons and for other purposes, introduced by Mr. MUSKIE (for himself and Mr. PELL), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first section of the Act entitled "An Act to provide in the Department of Health, Education, and Welfare for a loan service of captioned films for the deaf", approved September 2, 1958 (72 Stat. 1742), is amended to read as follows:

"That the objectives of this Act are—

"(a) to promote the general welfare of deaf persons by: (1) bringing to such persons understanding and appreciation of those films which play such an important part in the general and cultural advancement of hearing persons, (2) providing, through these films, enriched educational and cultural experiences through these films, enriched educational and cultural experiences through which deaf persons can be brought into better touch with the realities of their environment, and (3) providing a wholesome and rewarding experience which deaf persons may share together; and

"(b) to promote the educational advancement of deaf persons by: (1) carrying on research in the use of educational and training films for the deaf, (2) producing and distributing educational and training films for the deaf, and (3) training persons in the use of films for the deaf."

(b) Section 4 of such Act is amended to read as follows:

"SEC. 4. There are hereby authorized to be appropriated for each fiscal year such funds as may be necessary to carry out the objectives of this Act."

Mr. MUSKIE. Mr. President, the captioned films program involves new techniques in communication and education of the quarter of a million citizens who suffer the isolating handicap of deafness. The film service for the deaf, inaugurated in 1958 under Public Law 85-905, is presently limited to the circulation of a few older Hollywood moving pictures. After slightly more than a year of operation as Government distributor of films, captioned films for the deaf have had more than 80,000 viewers. Some 600 groups of deaf persons are registered for loans of roughly 40 film titles now available. Forty-five additional titles are in preparation and are scheduled for completion early this fall. Despite the fact that schools are the largest users of captioned films, no educational films have been offered to date. Now, negotiations are in process to add a dozen educational films in the area of science. Many schools are presently using a film a week, and the demand is even greater. It is obvious that until we make substantial improvements in the program, particularly in the field of education, we shall be doing a very limited job for those who need our help.

The present limitations of the program result in part from financial restrictions. The authorization under the existing act is $250,000, but the appropriation for fiscal year 1961 was only $185,000. The appropriations bill for 1962, as enacted by the House, provided an appropriation of $185,000. The Senate increased that amount to $250,000. It is my hope that the full amount will be provided in the conference report. But even if we are successful in expanding the funds available for the program, it is obvious that the great gap will still exist in the educational field.

Knowledgeable people, working with the deaf, see the captioned film service as a powerful, but underdeveloped tool that could help break through the communication barriers that surround the deaf. To do so would require considerable research and the development of the program as an educational medium rather than a limited form of entertainment.

Helen Keller, recognizing the unusual severity of deafness as an educational handicap, says that if she had her life to live over she would devote more attention to assisting those who are deaf. I believe that this is an area in which we could move most effectively in providing a needed service for an all-but-forgotten-group in our society.

During the past several years I have been interested in the potential of modern educational techniques. Because of this interest, I have consulted with experts in the field of audiovisual aids and other teaching devices. The more I have studied this field, the more I have been convinced of the tremendous possibilities in revolutionary improvements in educational programs, especially in such specialized fields as the training of the deaf.

The bill which Senator PELL and I have introduced would enable us to expand and improve the existing program of captioned films in the area where the need is greatest.

As U.S. Commissioner of Education Sterling M. McMurrin wrote to me earlier this year, with reference to the captioned film program:

> We believe that this program offers great potential. Its contribution could be greater yet if careful research could be undertaken on the extremely complex problems involved in using films for educational purposes with deaf children. In addition, there is need for research in the area of films for adult education and training, for teacher training, for social workers, vocational rehabilitation officers, psychologists, and audiologists who work with deaf children and adults. These are virtually unexplored areas.
>
> Since the deaf constitute a fairly small part of the total population, it is not commercially feasible to produce those specialized films which would be of use only to the deaf. Included in this category would be films on such matters as auditory training, speech reading, special languages systems, and other special problems. The present act does not permit use of funds for the actual production of films, but if the research to which I have referred above is to yield practical results, some means, either private or governmental, should be found to sponsor the production of specialized films.

Mr. President, the bill which Senator PELL and I have introduced would meet the basic objectives which Commissioner McMurrin has outlined. The bill retains the basic program, as it now exists, and adds provisions for research in the use of educational and training films for the deaf, production and distribution of educational and training films, and training for persons using films for the deaf. The bill authorizes the appropriation of such funds as may be necessary to carry out the objectives of the act. We have not specified a set amount for the program, because we do not have sufficient experience to set an exact figure. We believe a modest increase in existing appropriations should provide a beginning. We should point out that in fiscal year 1961 the expenditure for books for the blind through the Library of Congress was $1,700,000. A doubling of the amount now authorized for captioned films for the deaf would represent less than a third of the funds being spent for books for the blind at the present time.

It is my hope, Mr. President, that the necessary preliminary action can be taken this fall to enable us to enact this legislation early in the 2d session of the 87th Congress. As I have indicated, this is a modest request, but it is an essential one for those who suffer from the handicap of deafness.

Mr. PELL. Mr. President, I am most pleased to cosponsor the bill just introduced by my distinguished colleague from Maine. This bill will help to meet a very real educational need among the approximately 250,000 deaf people in the United States, 27,500 of whom are children and young people under the age of 21.

We in Rhode Island are proud of the Rhode Island State School for the Deaf and Windmill School which provides outstanding education for deaf children and certainly the challenge of providing adequate education for the deaf is one which faces educators in every State of the Union. Moreover, it is not just a question of education for deaf children but of providing stimulating and rewarding education for the adult deaf. The enactment of this bill can definitely contribute to the vocational skills of the deaf.

Mr. President, I believe the program outlined in this bill is a sound one which presents a well thought out approach to improving educational and vocational opportunities for deaf children and adults. In addition to providing for the production of films the bill very wisely includes provisions for research in the use of captioned films as educational media with the deaf and for training professional personnel in the proper use of captioned films.

When I first looked into this whole question I was surprised to note that very little research and training has been done in these fields. The provisions for research and training of personnel will insure that the maximum effective use is made of these films.

Mr. President, the proper education of the deaf is a national challenge which deserves our serious attention. The outstanding chairman of the Committee on Labor and Public Welfare, Senator HILL, and other distinguished Senators have consistently sponsored and supported legislation to assist the deaf. In this connection, I believe that Senator MUSKIE's and my bill makes an important contribution. It is clearly important that we provide our deaf children with the best possible learning tools and that we help to stimulate adult education programs for the deaf which will in turn enable them to enhance their contribution to our society.

COINAGE OF GOLD MEDAL PROPOSED FOR SPEAKER RAYBURN

Mr. YARBOROUGH. Mr. President, on behalf of myself, and the distinguished senior Senator from Oklahoma [Mr. KERR], I introduce a joint resolution to provide for the coinage of a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives of the United States.

Mr. President, we all know of the modesty and absence of ostentation of the able and beloved Speaker of the House. He knows nothing of this resolution; not a breath of this action has been whispered to him. If he were in Washington, he would doubtless put his foot down upon it; he neither seeks nor desires praise of himself. But, now that he is back in his beloved home district in Texas, I believe that this Congress should act speedily in both Houses and authorize this medal before he returns.

Return he will. All the reports from Texas indicate his improving health and vigor, for which we are all thankful, so, I request my colleagues to act before the beloved "Mr. Speaker," "Mr. SAM" comes back to the Congress.

There is ample precedent for this action. By Public Law 221 of the 81st Congress—House Joint Resolution 188—a similar medal was authorized for the beloved "Mr. Veep," Vice President Alben W. Barkley, in 1949, the first year he was Vice President. I ask unanimous consent that Public Law 221, 81st Congress—the Alben W. Barkley Medal Resolution—be printed at this point in the RECORD.

There being no objection, Public Law 221, 81st Congress, was ordered to be printed in the RECORD, as follows:

PUBLIC LAW 221, 81ST CONGRESS—CHAPTER 420, 1ST SESSION—HOUSE JOINT RESOLUTION 188

Joint resolution to provide for the coinage of a medal in recognition of the distinguished services of Vice President Alben W. Barkley

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in recognition of the distinguished public service and outstanding contribution to the general welfare of Alben W. Barkley, Vice President of the United States, the Secretary of the Treasury is authorized and directed to cause to be struck and presented to Vice President Alben W. Barkley a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary. There is authorized to be appropriated the sum of $2,500 to carry out the purposes of this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to cause duplicates in bronze of such medal to be struck and sold, under such regulations as he may pre-

scribe, at a price sufficient to cover the cost thereof (including labor). The proceeds of the sale of such bronze medals shall be reimbursed to the appropriation then current for the expenditure of the Bureau of the Mint chargeable for the cost of the manufacture of medals.

Approved August 12, 1949.

Mr. YARBOROUGH. Mr. President, former Vice President Barkley was honored by a resolution which originated in the House. I think it appropriate that the resolution to honor Speaker RAYBURN originate in the Senate.

Mr. President, this resolution I offer does not come the first year that Mr. RAYBURN is Speaker. On the contrary, it comes after he has served as Speaker of the House for longer than any other person in American history. He has served in the House of Representatives more than 48½ years, longer than any other person in American history. In addition to the speakership, he has served there as both minority and majority leader of his party, and as chairman of the influential Committee on Interstate and Foreign Commerce.

Ten times the Members of the House of Representatives of the United States have elected SAM RAYBURN Speaker. Three times his own party, the Democratic Party, has elected him permanent chairman of three separate national conventions—1948, 1952, 1956. Before coming to the Congress of the United States in 1913, at the youthful age of 31, he had already served as speaker of the House of Representatives of the State of Texas.

He has placed his imprint and his influence on more legislation than any other man in American history, and it has been an influence for progress in America.

Mr. President, I know of no other person in public life today so worthy of this medal sought by this resolution, as the Speaker of the House of Representatives. I ask unanimous consent that this resolution not be referred to a committee, that it lie on the desk for 2 days for the signatures of cosponsors, and I request all of my colleagues who feel so inclined to join me as cosponsors.

Mr. President, I ask unanimous consent that this resolution not be referred to a committee, but that at the conclusion of 2 days, it be placed directly upon the calendar.

Mr. MANSFIELD. Mr. President, I think the regular procedure should be followed. I have no objection to the resolution lying on the desk; I think that is a good idea. However, I believe the proper committee should consider the resolution in the regular course of its business.

The VICE PRESIDENT. The understanding of the Chair is that the Senator from Montana suggests that the resolution, in addition to lying on the table for 2 days, be referred to the appropriate committee.

Mr. MANSFIELD. That is correct.

Mr. YARBOROUGH. Of course, it could be placed upon the calendar directly only by unanimous consent.

Mr. President, I ask unanimous consent that the resolution be printed at this point in the RECORD.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD, and will lie on the desk, as requested by the Senator from Texas.

The joint resolution (S.J. Res. 133) to provide for the coinage of a medal in recognition of the distinguished services of SAM RAYBURN, Speaker of the House of Representatives, introduced by Mr. YARBOROUGH (for himself and Mr. KERR), was received, read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in recognition of the distinguished public service and outstanding contribution to the general welfare of SAM RAYBURN, Speaker of the House of Representatives, the Secretary of the Treasury is authorized and directed to cause to be struck and presented to Speaker SAM RAYBURN a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary, but to include the phrase "For services rendered to the people of the United States." There is authorized to be appropriated the sum of $2,500 to carry out the purposes of this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to cause duplicates in bronze of such medal to be struck and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor). The proceeds of the sale of such bronze medals shall be reimbursed to the appropriation then current for the expenditure of the Bureau of the Mint chargeable for the cost of the manufacture of medals.

REVISION OF FEDERAL ELECTION LAWS—AMENDMENTS

Mr. KEATING. Mr. President, I submit two amendments to the bill (S. 2426) to revise the Federal election laws, to prevent corrupt practices in Federal elections, and for other purposes, which I ask to have printed. I ask unanimous consent that the text of these two amendments, together with my individual views which are contained in the report on Senate bill 2426, be printed in the RECORD at the conclusion of my remarks.

The VICE PRESIDENT. The amendments will be received and printed, and will lie on the table; and, without objection, the text of the amendments and the individual views will be printed as requested.

(See exhibits 1 and 2.)

Mr. KEATING. Mr. President, this statement describes in brief, the two amendments which I have just offered. Both amendments were adopted by the Senate last year.

The first would include in S. 2426, primaries, conventions, and caucuses for the purpose of nominating candidates for Federal office. In many cases, victory in a primary is tantamount to election. We would therefore only be taking a nibble at the problem, rather than a full bite, if we did not require reports and apply ceilings to the nominating process as well as general elections, as specified in existing law.

My second amendment places a $20,000 ceiling on the amount which any one individual can contribute to candidates for Federal office. Present law limits the amount which candidates can spend and places a $5,000 limit on contributions to any one candidate or committee. It does not limit total contributtions. The Senate last year adopted an overall ceiling of $10,000 on individual contributions. I consider this amendment an important means by which to avoid any one contributor having an undue and excessive influence over a successful candidate.

In offering both of these amendments, I am joined by the distinguished Senator from Missouri [Mr. LONG], to whom I wish to pay tribute for introducing proposed legislation very similar to that introduced and successfully guided through the Senate last year by the late distinguished Senator Hennings, of Missouri.

In addition, I have joined with the Senator from Missouri [Mr. LONG] in an amendment which he is introducing today, to include under the provisions of Senate bill 2426 intrastate political committees which spend more than $10,000 on campaigns for Federal office.

EXHIBIT 1

INDIVIDUAL VIEWS OF MR. KEATING

I am pleased that the Committee on Rules and Administration has again reported a clean elections bill. This bill contains several important features which would greatly strengthen our electoral system. S. 2426 places realistic ceilings on campaign expenditures, makes campaign financing information available at the State level, and authorizes a tax credit to encourage broader participation in political campaigns. Although I enthusiastically endorse these important innovations, I differ with the committee on two points. They affect—not what the bill does—but what it does not do.

First. I regret that this bill excludes from coverage primaries, conventions, and caucuses for the purpose of nominating candidates for Federal office. In many States, victory in a primary is tantamount to election. I do not mean to imply that there are more or greater irregularities in primaries. However, I believe that a free system of government depends greatly upon full access to information and public vigilance in the political process. These are the aims of the clean elections bill. We would be sorely remiss if we did not apply them across the board.

The Supreme Court in 1941 cleared the way for Federal regulation of primaries in the case of *United States* v. *Classic* (313 U.S. 299).

Second, I favor an overall limit on the amount which can be contributed by any one individual to the campaigns of candidates for Federal office. While this limit should not prevent or restrict active participation in the electoral process, it is widely agreed that we must set a maximum limit, beyond which a contributor would be likely to have an undue and excessive influence over a successful candidate for office. I believe a limit of $15,000 (or perhaps $20,000) would serve this purpose. Last year the Senate adopted $10,000, but it must be remembered that the other body did not act on this measure.

These two areas involve changes which, I believe, would greatly improve the bill reported by our committee. I signed the committee report and cosponsored the bill introduced for the committee by Senator CANNON the distinguished chairman of the

Subcommittee on Privileges and Elections. Nevertheless, I reserve the right to go beyond the provisions of this measure in offering and supporting amendments on the floor of the Senate.

EXHIBIT 2

Page 2, strike out lines 4 to 6, inclusive, and insert in lieu thereof the following:

"(1) The term 'election' includes a general, special, or primary election, and a convention or a caucus of a political party held for the purpose of nominating candidates;".

Page 3, line 1, after the word "for" insert the following: "nomination for, or".

Page 3, line 1, after the word "as" insert a comma.

Page 3, line 3, after the word "is" insert the words "nominated or".

Page 13, line 15, after the word "election" insert the following: "(treating primaries, nominating conventions, caucuses, and special and general elections as separate for the purposes of this limitation)".

Page 13, line 21, after "(2)" insert the following: "in the case of an election other than a caucus or nominating convention,".

Page 16, strike out lines 18 to 20, inclusive, and insert in lieu thereof the following:

"(1) The term 'election' includes a general, special, or primary election, and a convention or a caucus of a political party held for the purpose of nominating candidates;".

Page 16, line 22, after the word "for" insert the following: "nomination for, or".

Page 16, line 22, after the word "as" insert a comma.

Page 16, line 24, after the word "is" insert the words "nominated or".

Page 2, in the table of contents, strike out the heading of section 302 and insert in lieu thereof the following:

"Overall limitation on financial aid to candidates or political committees and prohibition of certain purchases."

Page 18, strike out lines 7 and 8 and insert in lieu thereof the following: "OVERALL LIMITATION ON FINANCIAL AID TO CANDIDATES OR POLITICAL COMMITTEES AND PROHIBITION OF CERTAIN PURCHASES"

Page 18, beginning with line 11, strike out through line 4 on page 19 and insert in lieu thereof the following:

"SEC. 608. (a) Whoever, directly or indirectly, makes contributions or expenditures in an aggregate amount in excess of $20,000 during any calendar year, or in connection with any campaign for nomination or for election, for any or all of the following purposes—

"(1) to or on behalf of any candidate or candidates for an elective Federal office or offices, including the offices of President and Vice President of the United States and Presidential and Vice Presidential electors, or

"(2) to or on behalf of any committee or committees or other organizations engaged in furthering, advancing, or advocating the nomination or election of any candidate or candidates for any such office or offices or the success of any national political party, shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"This subsection shall not apply to contributions or expenditures made by a political committee."

Mr. LONG of Missouri (for himself and Mr. KEATING) submitted amendments, intended to be proposed by them, jointly, to Senate bill 2426, supra, which were ordered to lie on the table and to be printed.

REREFERRAL OF S. 1747, RELATING TO IMPORT TAXES ON LEAD AND ZINC

Mr. BYRD of Virginia. Mr. President, the Senate Committee on Interior and Insular Affairs reported S. 1747, Calendar No. 849, a bill revising the import taxes on lead and zinc and providing for Government assistance to certain small producers.

This is primarily a revenue measure and should be referred to the Committee on Finance.

It is true that the bill contains a subsidy feature, one which is the substance of H.R. 84, which has passed the House and is now before the Interior and Insular Affairs Committee and can be acted upon separately.

This subsidy feature of S. 1747 is relatively minor when compared with the revenue features, both as to effect on the economy and the number of dollars involved. The bill is overwhelmingly in the class of bills over which the Finance Committee must take jurisdiction.

The matter was discussed in a meeting of the Finance Committee and the chairman was directed by a vote of the committee, in the event that S. 1747 was reported by the Interior and Insular Affairs Committee, to ask that it be rereferred to Finance.

The chairman of the Interior and Insular Affairs Committee is absent because of illness, but I have discused the matter with him by telephone and he has assured me that he would not object. Therefore, I ask that the bill, S. 1747, be taken from the calendar and be referred to the Finance Committee.

The VICE PRESIDENT. Is there objection to the request of the Senator from Virginia [Mr. BYRD]? Without objection, the bill will be referred to the Committee on Finance.

ESTABLISHMENT OF FRANKLIN DELANO ROOSEVELT MEMORIAL NATIONAL PARK — ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of August 31, 1961, the name of Senator LONG of Missouri was added as an additional cosponsor of the bill (S. 2501) to establish the Franklin Delano Roosevelt Memorial National Park, introduced by Mr. DOUGLAS on August 31, 1961.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on September 6, 1951, he presented to the President of the United States the following enrolled bills:

S. 415. An act for the relief of Margaret Jean Dauel;

S. 513. An act to authorize and direct the Secretary of the Treasury to cause the vessel *Acadia* owned by Robert J. Davis of Port Clyde, Maine, to be documented as a vessel of the United States with coastwise privileges;

S. 888. An act to authorize the Secretary of the Interior to lease certain lands in the State of Utah to Joseph A. Workman; and

S. 1012. An act to direct the Secretary of the Interior to adjudicate a claim of the Greif Bros. Cooperage Corp. to certain land in Marengo County, Ala.

GOVERNOR ROCKEFELLER'S ENDORSEMENT OF MILK BARRIERS

Mr. PROXMIRE. Mr. President, yesterday's New York Times reported that Gov. Nelson Rockefeller attacked Secretary of Agriculture Orville Freeman for the support given by the Secretary of Agriculture to a national milk sanitation law. In doing this Governor Rockefeller threw his chances in the crucial 1964 Wisconsin Republican primary right out the window.

Should Governor Rockefeller be the Republican nominee for President in 1964, Wisconsin consumers and dairy farmers will have every reason to reject his candidacy resoundingly.

Consumers will be bitterly disappointed that a figure of Governor Rockefeller's reputation should attack the interest of the Nation's consumers on behalf of the short-run economic interest of part of the New York State dairy industry. For a political figure with national aspirations to endorse the horse-and-buggy milk sanitation requirements which restrict milk marketing all over our country reveals a shocking and disturbing lack of vision.

The New York Governor's statement benefits only a small number of producers in protected big-city markets. It totally ignores the Nation's millions of consumers, including some 16 million in New York State itself, who would have greater assurance of ample milk supplies at reasonable prices if artificial barriers were eliminated.

It ignores our growing, changing population, which will need more milk in new areas. Modern refrigeration means milk can be shipped long distances, from the regions best suited to dairying.

It completely ignores the ability of Wisconsin dairy farmers to produce top quality, sanitary milk to supply big city markets in all parts of the country, at competitive prices. For years, Wisconsin farmers and public officials in both Wisconsin political parties have vehemently opposed these ridiculous barriers to Wisconsin milk.

Wisconsin farmers have not even been given a chance, up to now, to sell their milk in the protected markets. Governor Rockefeller would like to see them stay fenced out permanently.

In refreshing contrast, the Secretary of Agriculture, Orville Freeman, has just ringingly endorsed national milk sanitation legislation, showing again that this administration intends to keep faith with the farmers.

When President Kennedy was in the Senate, some of his constituents opposed the St. Lawrence Seaway. Senator Kennedy had the vision to rise above narrow regionalism. He supported the seaway, which is bringing enormous benefits to the entire Nation.

Governor Rockefeller should remove the horse blinkers from his vision and should repudiate his endorsement of milk barriers, if he has any regard for his previous fine reputation as a national statesman.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, is there further morning business?

A PUBLIC INTEREST CODE FOR AMERICAN BUSINESS

Mr. JAVITS. Mr. President, in a speech before the New York State Society of Certified Public Accountants, earlier this year, I proposed a public interest code for American business.

With our present hearings on the antitrust laws, the framework and the discussion we are likely to have today on the matter of steel prices, and the ethics of business involved, as they have been, in matters such as price fixing in the electric appliances industry, and so forth, I believe it might be very useful to present at least one Member's ideas in regard to what should be the code of ethics for American business. So I ask unanimous consent to have printed at this point in the RECORD the article I wrote, which appears in the September 1961, issue of the journal entitled "The New York Certified Public Accountant."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A PUBLIC INTEREST CODE FOR AMERICAN BUSINESS

(By Hon. JACOB K. JAVITS)

(U.S. Senator JACOB K. JAVITS, Republican, of New York, was the featured speaker at our society's annual dinner held on May 8, 1961. His paper received such acclaim as to warrant its reproduction for the benefit of members who were not able to attend.

(In his remarks, aside from this paper, the Senator made a strong point about the important role of accountants, as a major advisory force in the field of business, in helping to bring about the necessary improvements in our economy and in its structure.)

I should like to talk to you today about the state of the U.S. economy and the role of U.S. business—which I define to include labor, management, farmers and voluntary organizations—in helping to insure our security and to spur the economic progress of the American people and the peoples of the free world.

We are meeting a great challenge in foreign affairs and our attention has been correctly focused on the Congo, Laos, and Cuba. But we are also meeting a great challenge in our domestic economy and in a mounting Communist economic offensive.

At home we have been in a real recession—a recession characterized by high and hard-core unemployment and an imbalanced international balance of payments. The imbalance in international payments was substantially improved during the first quarter in 1961, but remains a danger. High unemployment remains a sore spot; and hard-core unemployment remains a stubborn aspect of our economy that we have so far failed to solve.

The basic problem of our country is to effect an adequate mobilization of our resources, public and private, to support our role for effective peace leadership in the free world; and for the development, proportioned to that leadership, of our American society.

The theory that our economy will automatically adjust is not adequate to the problems and responsibilities we have today, nor to the acceleration of timing brought on by the Communist economic offensive. We need government-business coordination to make our economy operate to produce enough and in the right lines to meet our economic responsibilities in the public interest. I am convinced that the techniques to achieve this purpose are available without such Federal Government direction and control as will seriously endanger individual freedom.

Our strength is production based on the dignity of the individual and on the good faith of credit. We have overwhelming economic power to make this principle good in terms of the well-being of peoples in the neutralist areas and in the areas, newly self-governing, which will determine which way the world goes. Our Government's policy must be the recognition of this essential base for the free world's success, and the determination to marshal our resources, public and private, with the boldness, vision, and discipline required for their effective utilization for this grand design—and for their coordination with the similiar resources of the other leading industrial nations for the same purpose—as, for example, in the newly organizing 20-nation OECD (Organization for Economic Cooperation and Development).

One of the chief concepts of modern, progressive political thinking is that we can achieve our maximum economic potential by means of our private economic system operating in the public interest.

In accordance with this concept, I would like to offer to you, as a suggestion of how business can operate in the public interest, a public interest code for American business. I know it will take much refining but here is at least a 10-point start on a vital issue:

1. Dealing with corporations, employees, stockholders and consumers in the ethical spirit of trusteeship; and acting as good citizens in dealing with Government officials.

2. Making every effort to eliminate featherbedding, in management as well as in labor, as being in the national interest, which demands maximum productivity.

3. Encouraging stockholder democracy through maximum voting, full disclosure, and other participation.

4. Extending the benefit of restricted stock options or other means of profit sharing and wage security to workers generally.

5. Moving vigorously to eliminate discrimination or segregation in employment on grounds of race, religion, sex, or age.

6. Expanding research, corporate participation in education and activities in natural resources conservation.

7. Determining the level of prices and wages in terms of the best interests of U.S. economic policy generally in addition to private considerations.

8. Participating in adjustment assistance to competitors and others in its community or trade, incident to technological obsolescence, concentrated imports or automation.

9. Observing the antitrust laws in letter and spirit and participating in developing trade association cooperation in research, standardization of product, quality, and other permissible affirmative activities.

10. Supporting U.S. foreign policy through foreign private investment, expansion of export markets, and making available technical assistance facilities for foreign use.

We need to move in a number of ways as a Nation to fully utilize our resources to meet our great challenges at home and abroad and to attain a new plateau of economic effectiveness and well-being.

A U.S. productivity drive is essential.

Enlistment of the cooperation of labor and management is essential for the fullest utilization of our economic potential.

A national policy of affording equal opportunity in employment, education, housing, and the exercise of their civil rights to all elements of our population, regardless of color or religion, is basic, also, to the entire effort toward productivity expansion.

A U.S. peace leadership requires a great expansion of our foreign trade, which represents our largest economic commitment to world affairs except for defense expenditures.

The international economic policy of the United States requires new media for coordinating the economic efforts of the free world.

U.S. policy must lead, on even a broader scale, toward the establishment of international banking and credit facilities which will provide for the increase of liquidity, which is the essential basis for the rapid expansion of international trade.

There must be a constant effort to draw upon the economic strength, technological skills, and managerial know-how of the private sector of our economy in carrying out our international economic policies.

There, then, are some of the ideas, some of the opportunities we can take to spur the economic progress of the American people and the world, not now being brought forward and developed by the administration. They are more than just the immediate measures needed to deal with the recession. They represent he real essence of the economic struggle. And they would demonstrate that we understand the basis for free world stability and that we are determined with all our resources to join with the rest of the free world in building that basis on a solid foundation.

THE RIGHT TO EQUALITY

Mr. JAVITS. Mr. President, I had the honor to write a book, entitled "Discrimination—U.S.A.," dealing with the great and, I think, momentous and historic issue of equal opportunity for all Americans, whatever be their race, creed, or color. I was requested to summarize the book for the magazine "Americas," which is published here in Washington under the auspices of the Organization of American States. Inasmuch as some Members or perhaps many Members may not have had an opportunity to see the book, they may be interested in the summary. Therefore, I ask unanimous consent that an article entitled "The Right to Equality," which is a summary of the book "Discrimination—U.S.A.," be printed at this point in the RECORD. The article was published in the September 1961 issue of the magazine "Americas."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE RIGHT TO EQUALITY

(By JACOB K. JAVITS)

The struggle against the remaining racial and religious discrimination in the United States engaged my interest and action long before I entered public life. I cannot emphasize too strongly the primary importance of this struggle to the tranquillity of our country and its moral leadership of the free world. Patience and determination are basic qualities for success, law is the necessary equipment, but most essential of all is the support of a well-informed public opinion. This book is my contribution to the effort to provide information and to stimulate discussion and study of one of the major issues of our time.

I was born in 1904, and I remember vividly my life as a small boy, the son of Jewish immigrants, in a janitor's flat on Orchard and Stanton Streets on the lower East Side of New York City. My father made pants and doubled as janitor of the tenement, then later worked full time as the janitor for $30 a month, plus rooms. My mother sold crockery and dry goods from a pushcart. In school I read about democracy and about the equality of all in America, but to a poor

Jewish boy, running errands for a candy shop, scratching for a penny, watching my father get out the vote for $2 a head paid by a saloonkeeper who was a Tammany Hall captain, the words democracy and equality seemed just so many distant, high-sounding phrases. I had little thought that I could win social acceptance, not to speak of being permitted to serve in the high public offices of Congressman, attorney general of New York State, and U.S. Senator.

My own experience is symptomatic of the social revolution which has marked American life since the turn of the 20th century. The United States of the early 1900's was a "white, Protestant, Anglo-Saxon" country, as people used to say. Millions of citizens were not white or Protestant or Anglo-Saxon (meaning descended from Western European stock), but the dominant assumption was that they should be satisfied with the skimpier educations, the dirtier jobs, and a severely limited right to advance in the economic or political world. In 1900 the top-ranking colleges admitted only a handful of students from minority families, and most of these came from decidedly exceptional circumstances. It was difficult for a Catholic of Irish or southern European background, and still harder for an eastern European Jew, to rise high in the basic industries, in the professions, or in the realm of arts and letters. No realistic person would have thought of proposing anyone but an old-stock white Protestant for the Presidency or the Vice-Presidency of the United States. As for the average Negro, in either the North or the South, he was lucky to find a livelihood that kept him in ramshackle housing and grubby food.

During the decades after World War I, the United States went on chipping away at the crust of caste. There were years when the Nation seemed to turn backward, but overall it headed toward the elimination of discrimination on the basis of race, creed, or color.

By the late 1950's, the highest prestige colleges were competing with each other to enroll outstanding students regardless of family background. More miles of trim suburbia were stretching out, now inhabited not only by the old-stock executive group but by the middle-class and working-class sons of immigrants. The only Federal civil rights law since Reconstruction days was passed in 1957, and was followed 3 years later by further civil rights legislation. In one area of U.S. life after another, Negroes scored more firsts. A particularly striking event occurred in 1958. For decades the top echelon of the U.S. diplomatic service had been considered a special preserve of the wellborn. On January 23, 1958, President Eisenhower appointed Clifton R. Wharton Minister to Romania, the first Negro to be named U.S. chief-of-mission to a country of predominantly white population.

All the while, the 1954 Supreme Court decision ordering the end of the color line in public schools was doing its work. Desegregation was resisted by efforts ranging from the portentous to the ridiculous. In Arkansas, Gov. Orval Faubus so brazenly defied the Supreme Court that President Eisenhower ordered Federal troops into Little Rock. In Florida, Henry Balch, columnist for the Orlando Sentinel, thundered that a children's book telling about the marriage of a white and a black rabbit was a plot of the "integrating desegregationists," and hounded the volume off the shelves of the public libraries. (The author, Garth Williams, mused sadly: "It was written for children from 2 to 5 who will understand it perfectly. It was not written for adults, who will not understand it because it is only about a soft furry love and has no hidden message of hate.") Under the circumstances, desegregation moved ahead slowly. In 1960, on the anniversary of the Court decision, the statistics showed that only 6 percent of the Negro students in the Southern and border States were attending integrated schools—and the percentage was zero in Alabama, Georgia, Louisiana, Mississippi, and South Carolina. Yet, whatever the rate of speed, whatever the obstacles, the Nation was going ahead desegrating its schools.

Today, I am confident, the United States is entering a period when the walls of discrimination will go on tumbling—and being tumbled—down. The election of a Catholic to the presidency is already a fact. By the year 2000, it is conceivable that we may see the election of a Negro to the presidency or the vice presidency. The appointment of a Negro Secretary of State does not seem farfetched when a man like Ralph Bunche is considered. A former Assistant Secretary of State, this distinguished American Negro is second only to Secretary General Dag Hammarskjold at the United Nations; he has, and has richly earned, an international reputation as a peace negotiator and statesman. Negro leaders have told me that they feel it will be politically feasible to name a Negro to the Supreme Court within the next 10 years.

In the proximate future we may well see a marked increase in the number of Negroes in Congress. The National Association for the Advancement of Colored People, spurred on by the passage of the Civil Rights Acts of 1957 and 1960, has launched a drive to triple Negro registration in the South and thus to put it on a par with the present 60 percent registration of eligible white voters. I believe that the number in the House of Representatives is likely to grow steadily, and that, from the Negro 10 percent of our population, between 30 and 40 qualified persons may be elected as Representatives to the 106th Congress by the year 2000. Long before then, I expect to see the first Negro since the Reconstruction Era taking his place in the U.S. Senate.

By 1965, public school integration should be well on its way even in the Deep South. The next two Congresses, those which convene in 1961 and 1963, will probably bring an end to the archaic Senate rule XXII and therefore to the filibuster, which has been the special and stubborn hurdle on the road to civil rights legislation. I make this prediction on the strength of my own experience in the Senate and on the basis of my observation of the mood of the country during the civil rights debates of 1957 and 1960. There is a new generation in the United States—and of those who live below the Mason-Dixon line. Today the South is producing an ever-increasing number of enlightened citizens who, while still opposed to general civil rights legislation, do not carry over the ancient southern opposition, indeed revulsion, to the idea of accepting Negroes as the equals of whites in public affairs. For example, during the civil rights discussions of recent years, a notable number of southern leaders conceded that the full enjoyment of the ballot belongs to the Negro as well as to the white man.

If the country's past argues for a continuing social upsurge, the country's present certainly does not gainsay it. The Negro group, latest of the groups to make its bid for equal rights and equal opportunities, is certain to increase in political power and certain to use that power to win more opportunities. Since 1950, it has been estimated, the potential nonwhite vote has catapulted 25 percent in New York, 50 percent in Chicago, 62 percent in Los Angeles. By the year 2000, 1 out of every 3 voters in New York and Chicago, and 1 out of 2 voters in Los Angeles may well be nonwhite. Population shifts of minority groups to urban areas are creating a tide that could elect a nonwhite mayor in New York, Chicago, Philadelphia, or Los Angeles before many years. In the South, as a result of the civil rights legislation already passed and the additional laws that are almost certain to come, the Negro will vote more and more. And, as all American groups have done, he will use the vote to broaden opportunities for himself.

Outside the South, the antidiscrimination forces can count on a hard reality of modern U.S. life; prejudice has proved to be ineffective politics. In the past, bigotry and hate may have had some success, but today they simply do not work. In my own career in politics, I have had no little experience with religious smear campaigns. In the late part of the senatorial campaign of 1956, literature appeared in New York City—which has a large Jewish population—carrying the innuendo that I had forsaken the Jewish faith. The matter was brought out into the open during a television interview when viewers telephoned in the question: "Is it true you changed your Jewish faith?" Questions such as this, as every public figure knows, are like that old verbal trap which calls for a yes-or-no answer to the question: "Have you stopped beating your wife yet?" Air time ran out before I could reply that I had not changed my religion. Yet, according to my analysis of the 1956 results, the question had little or no effect on the voters of New York State.

The most spectacular proof that appeals to religious prejudice do not work in modern U.S. politics came in the West Virginia presidential primary battle of 1960 between Senator John Kennedy, a Catholic, and Senator HUBERT HUMPHREY, a Protestant. Although Senator HUMPHREY made it ringingly plain that he wanted no votes gained from religious bias, anti-Catholicism was a blatant part of the campaign. Seasoned observers thought the prejudice might well have a decisive effect: West Virginia is 95 percent Protestant and was supposed to have a strong anti-Catholic tradition. But when the votes were counted, Kennedy had won a thumping 3-to-2 victory. He was hurt little or not at all by the anti-Catholic campaign. On the contrary, apparently he was actually helped by it. Heavily Protestant West Virginia seemed the more determined to give the Senator, a Catholic, a victory as a way of showing that it wanted no part of elections determined by irrelevant questions of religion.

There are approximately 18 million Negroes in the United States, one-half of whom live in the South, and another third in five urban centers in the North. Statistics offer a dramatic picture of how meagerly they share in our expanding economy. In 1939, the median income for white workers was $1,112 a year; for nonwhite workers, it was $460. In 1955, white workers had a median income of $3,986, contrasted with $2,342 for nonwhite workers. These figures make plain that while the nonwhite population has shared in our general prosperity and reduced the difference between incomes, the Negro nevertheless continues to pay a severe price solely because of the color of his skin. Today, two out of every five Negro families earn less than $2,000 a year. Average Negro incomes are still far below white incomes.

There is a final fact about the results of discrimination, the most important of all. The future of our Nation—indeed, its very existence—may well depend upon whether nonwhites living in the underdeveloped countries choose communism or freedom. The great contest revolves around the 1,200 million people—largely Negro and oriental—who live in the Far East, the Middle East, and Africa. This global picture is crucially related to our domestic struggle over civil rights and the ending of discrimination. It is so importantly related because the nonwhites are watching closely to see whether we practice what we preach about equality and justice.

No U.S. domestic situation gives the Soviet Union and the international Commu-

nist Party more fuel for their propaganda machines than our two faces on civil rights. In terms of world prestige, Little Rock cost us more in 1 day of violent prejudice than the launching of all the Russian space satellites.

Even more damaging to our prestige was the reaction of the press in the uncommitted areas of Asia, the Middle East, and Africa. Typically, the Times of Indonesia declared: "It is hard to realize that this is taking place in a country proclaiming its democratic liberties for all to hear." We simply cannot hope to win the nonwhite peoples of the world conclusively to our side if they doubt that we will consider them equals. They will continue to doubt just as long as we wave our Constitution at them with one hand, and with the other tolerate the denial to a substantial part of our citizens in a broad region of our own country of their rights under the Constitution.

As the United States hurries along the road toward genuine democracy, all kinds of efforts will help. The agitation of organizations will have its importance; so, too, will the labors of dedicated individuals and the studies of psychologists, sociologists, economists, and historians. But the prime need is law—more firm, carefully formulated legislation on the Federal, State, and municipal levels directed toward making equal rights and equal opportunities ultimate realities. Law is the indispensable advance guard of social change. It gives well-intentioned men a standard to which they can repair. It nudges the indifferent and it tames the hostile.

In this connection, too little attention has been paid to the fact that the Federal Government now spends more than $30 billion a year on contracts with private firms. This means that hundreds of thousands of jobs are placed where the Government has the power—indeed, the responsibility—to see that they are filled without regard to religion or color, but the Congress has to help. In 1953, by Executive order, President Eisenhower established the Federal Committee on Government Contracts, the main purpose of which is to combat discriminatory practices in industries fulfilling Government contracts. The committee has done some good work, but it is hampered by inadequate funds and staff and especially by the fact that it does not have the authority of an institution established by Congress. (Since 1953, it has investigated only 837 complaints, and settled to its satisfaction only 245.)

In 1959, as part of his package civil rights proposals, President Eisenhower recommended the establishment of a statutory Federal Commission on Equal Opportunity Under Government Contracts. New York State pioneered in this field with the formation of the State Commission Against Discrimination. This agency's experience and its success fully justify the President's recommendation. The Eisenhower proposal was lost in the Senate compromises, but its ultimate enactment is of prime importance.

Action is needed to bring, in all 50 States, the enactment of legislation already existing in five States, which forbids discrimination in any housing aided by federally guaranteed mortgages under the Federal Housing Administration (FHA) or the Veterans' Administration (VA). The existing State laws authorize agencies or commissions to deal with discrimination on a basis of conciliation and mediation and, if these fail, by civil action in the courts. But a big share of the responsibility for driving Jim Crow out of the housing field must be assumed by the Federal Government—and it could do a great deal more than it is presently attempting. It should be fundamental Federal policy for all agencies connected with housing to push vigorously for equal opportunity to a decent home. Every effort should be made—particularly every administrative effort—to bring about compliance by builders who seek the aid of FHA and VA mortgages. The urban renewal program shows that this can be done.

Those of us who live in States like New York, where public sentiment and every responsible governmental agency are on record against any inequality of opportunity, have a special responsibility to practice, and practice in highly positive terms, what we preach. If southern segregationalists are to be deprived of their most cherished distortion—that racial or religious discrimination which persists in the North gives a license for Jim Crowism in the South—then none among us can be a mere bystander in the fight.

It is a fight filled with its ups and downs, its nagging complexities, its shocking desertions, as I am only too well aware from my years in public office. It is also a fight peculiarly appropriate to the only nation in all of man's long history that ever dared mix so many different races, nationalities, and religions, and, having mixed them, dared to declare that the end product could be equal rights and equal opportunity for all. That the people of the United States have the desire, the strength, and the faith to go on pushing toward this goal has been said many times, but it was once said in a way that carries its special force over all the intervening decades. In 1880, U.S. Senator B. K. Bruce rose to support a pending bill. His remarks moved to the subject of the general meaning of the country's experience, and he said: "As a people, our history is full of surmounted obstacles. We have been scaling difficult problems for more than a hundred years. We have been (and will continue to be) settling material, moral, and great political questions that before our era had been unsolved."

B. K. Bruce was a Negro, born into human slavery, elected to the U.S. Senate from Mississippi amid all the anti-Negro bitterness and violence of reconstruction days. His speech was in support of a bill protecting the civil rights and extending the opportunities of the American Indian.

Many predict that racial tensions in the United States will get worse before they get better. I am well aware of these predictions and of the possibility that they could be correct, but I still have great faith in the resourceful genius of our country. When public indignation is raised here there is no denying relief. To save ourselves—and do it just in time—there must be those who will not permit themselves to be still and complacent or permit their fellow citizens to be complacent in the face of the incendiary injustices of discrimination and segregation which persist in our society.

NARCOTICS ADDICTION

Mr. JAVITS. Mr. President, thus far at this session we have not acted on legislation dealing with narcotics addiction, a matter which, however, has received considerable attention from a number of congressional committees, including the subcommittee headed by the distinguished Senator from Connecticut [Mr. DODD], the Juvenile Delinquency Subcommittee of the Judiciary Committee.

As attorney general of New York, I had the honor to inaugurate in our State the concept of the treatment of this dread affliction as an illness, rather than strictly as a crime, although, of course, it has its criminal aspects, which should be punished with condign punishment. But the medical approach to drug addiction is a very important new departure in that field, in which we have been so frustrated, both in regard to learning how to prevent it and in learning the proper treatment.

Mr. President, I have noted with great satisfaction the approach made to this matter in an editorial published on September 4 in the Washington Post. The editorial is entitled "Woe to the Victims." I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 4, 1961]

WOE TO THE VICTIMS

It is an anomaly of American criminal law that it seems to be applied at times with the greatest ferocity against those who least deserve to be punished and who are least likely to be reformed by punishment. This anomaly is nowhere better illustrated than in the Federal Narcotic Control Act of 1956. The act operates to impose its penalties more often on the hapless victims of drug addiction than on the vicious nonaddicts who are the overlords of the country's illicit drug traffic. And the penalties are truly ferocious—ranging from 5 years for a first offense up to 80 years in prison with no possibility of parole or mitigation.

Despite these penalties, there appears to be no abatement of the illicit traffic in drugs. According to Senator THOMAS J. DODD, whose Juvenile Delinquency Subcommittee has been looking at the problem, "Our continuing study of narcotics traffic and addiction among juveniles indicates that drug trafficking is at an all-time high, that there is an increase in addiction among the young, and that the facilities for confining and treating the addict-pusher-criminal are hopelessly inadequate.

The Dodd subcommittee sent a questionnaire respecting the efficacy of the Narcotic Control Act to all the Federal law enforcement officials concerned with the problem. Seventy-five percent of them recommended changes in the statute. It seems plain that an entirely new approach is in order. It needs to be rooted in a recognition that drug addiction ought to be treated fundamentally as an illness rather than as a crime. An ounce of compassion may well be worth a pound of punishment.

TOTAL PSYCHOLOGICAL WARFARE

Mr. KEATING. Mr. President, in the Wednesday issue of the New York Times, C. L. Sulzberger has a most perceptive and shrewd article in which he discusses the type of psychological warfare now being waged by the Kremlin. It is evident that the Communists will stop at nothing in their efforts to intimidate and browbeat the peoples of the world into a fearful acceptance of Communist tyranny. Our society and our cold war techniques must be flexible enough and imaginative enough to meet the Communist threat strongly and effectively on our own terms. There is great need for a thorough going over and intelligent reappraisal of our own cold war tactics.

Diplomacy as usual is not the only answer to an enemy who threatens to bury us.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD C. L. Sulzberger's article on the Communist basis of psychological warfare and our own need for more vigorous anti-Communist tactics.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 6, 1961]

TOTAL WAR IN THE FOURTH DIMENSION

(By C. L. Sulzberger)

Moscow, September 5.—Total war is a reality in the three-dimensional sense and is becoming a reality in the four-dimensional sense, the fourth dimension being time. Thus, in a way, the two ideological blocs are constantly in conflict without fighting. Technical progress has made it possible to switch from war waged psychologically to psychological war as such.

Peaceful coexistence, a term invented in Moscow, is a tactical variation. Peace alone is carefully eschewed as the descriptive phrase. There are three variations of coexistence within Marxist meaning. Mao Tse-tung is for militant coexistence; Khrushchev for dynamic coexistence, and Tito for passive coexistence. Only Tito's formula is truly peaceful.

It is extremely difficult for a governmental system, dependent upon mass support and allied cooperation, to switch abruptly from one to another diplomatic line. Our adversaries, controlling both their public and allied opinion, need not worry about sudden shifts in policy.

We are finding this out today in the growing Berlin crisis, rendered still more grave by the end to any thought of a ban on nuclear tests. On both these issues we are convinced we are wholly in the right; but we find ourselves hard pressed to convince a confused world opinion of this verity.

The free world, handicapped by its own complexes and political theorems, has shown itself largely defenseless in this kind of warfare. It has learned more about ingenious methods of selling automobiles and synthetic fabrics than about selling political ideas. The Communist world, not faced with a glut of consumer goods, specializes in selling ideas.

The Russians have closed down some of their foreign military bases, such as Porkkala in Finland and Saseno in Albania. But the Russians have not closed down the bases of their psychological war. These bases are the Communist Party cells, overt or covert, scattered about the globe.

There is today hardly a nation that does not have at least the cadre of a Communist Party. Suzanne Labin, a thoughtful student of the problem, writes in France's National Defense Review:

RIGIDLY ORGANIZED GROUPS

"There is one among the Eskimos, one among the Touaregs, one in the United States, one in Bechuanaland. Sometimes the Communist Party has millions of members, sometimes only a handful, but this handful is rigidly organized."

Outside the Marxist bloc itself there are mass parties in seven countries: France, Italy, Finland, India, Indonesia, Cuba, and Iraq. There are significant but less solid parties in 22 other lands, and elsewhere small legal or illegal groups.

Nevertheless, illegality does not necessarily denote impotence. In Greece the outlawed Communists are gaining. In the United Arab Republic, although their leaders are in prison or exile, they conspire. And in Iran, masquerading under the name of Tudeh and illegal for 12 years, they pose a threat.

Mlle. Labin estimates there are 6 million Communist militants in non-Communist countries. We may comfort ourselves that some of these are divided by schisms in the Marxist bloc, above all the Khrushchev-Mao feud. But all of them work against us.

Our own military bases are ready to function in case of military war. But the Communist bases work all the time in psychological war. Day and night, they are rearmed with slogans, leaflets, instructions, funds, and agents.

This is the war we know as peace, the reversal of Clausewitz' famous theory, a continuation of war by other means. It is a war we have not yet learned properly to fight. It is ridiculous merely to blame the Russians for skillfully propagating what they think is right. That is the rule of the missionary. We remain unable either to define our own ideas or to make them plainly understandable to those we court.

A report on this subject to the Assembly of the Western European Union concludes that if means of combating Communist propaganda techniques are not found, "the West will no longer have to seek a raison d'être, it will no longer exist." Khrushchev himself announces he will surpass us in 1970. Apropos of this timetable it is worth recalling Lenin's 1920 prophecy:

"In 50 years' time armies will no longer have much significance. We shall have undermined our enemies to such an extent before war breaks out that it will be impossible to set the war machine in motion in the hour of need."

ECHO PARK, UTAH, WILDERNESS AREA

Mr. ALLOTT. Mr. President, yesterday the senior Senator from Utah [Mr. BENNETT] offered to the so-called wilderness bill an amendment which related to the Echo Park area, which is in the northwest corner of Colorado and Utah. I wish to point out for the benefit of my colleagues, and particularly our neighbors in Utah, that the senior Senator from Utah has rendered a spectacular and very worthy service, not only to the people of Utah, but also to the people of the entire West in offering the amendment.

The withdrawal of the amendment was occasioned by the fact that the legislative history has been made clear that there is no diminution of the rights which exist in Dinosaur National Monument with respect to power or water by virtue of the passage of the wilderness bill. At this time I merely wish to pay particular respect to the foresight of the senior Senator from Utah, which goes so far to adequately protect the development and vital interests of the people of his State. It is a characteristic move on his part, and I am sure that with that history, the economic advancement of the State of Utah and that area of the country will be much strengthened.

Mr. MANSFIELD. Mr. President, is there further morning business?

The VICE PRESIDENT. Is there further morning business? If not, morning business is concluded.

THE CALENDAR

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. MANSFIELD. Am I correct in assuming that, at the conclusion of the morning business, it is the will of the Senate to turn to the consideration of items on the calendar to which there is no objection?

The VICE PRESIDENT. The Senator is correct, beginning with Order No. 825, the Parliamentarian informs the Chair.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

The clerk will state the first bill on the calendar to be called.

BILL PASSED OVER

The bill (S. 778) to amend the act entitled "An act to authorize the District of Columbia government to establish an Office of Civil Defense, and for other purposes," approved August 11, 1950, was announced as the first bill in order.

Mr. YOUNG of Ohio. Over.

The VICE PRESIDENT. The bill will go over.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INDECENT PUBLICATIONS IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H.R. 4670) to amend the law relating to indecent publications in the District of Columbia, which had been reported from the Committee on the District of Columbia with an amendment to strike out all after the enacting clause and insert:

That section 872 of the Act entitled "An Act to establish a code of law for the District of Columbia," approved March 3, 1901, as amended (D.C. Code, sec. 22–2001), is amended (1) by inserting "(a)" immediately after "SEC. 872", and (2) by adding thereto the following new subsections:

"(b) Any vehicle, fixture, equipment, stock, or any personality (including, without limitation, vehicles, equipment, fixtures, or things adaptable to a lawful use) used or to be used in connection with (1) the sale, distribution, manufacture, or showing of any article or material, or (2) the advertising or staging of any exhibition, the sale or advertising of which is prohibited by subsection (a) of this section, shall be subject to seizure by any member of the Metropolitan Police Force or the United States Park Police, or the United States marshal, or any United States deputy marshal, for the District of Columbia, and shall, upon seizure, be proceeded against by libel action brought in the Municipal Court for the District of Columbia in the name of the District of Columbia by the Corporation Counsel or any of his assistants and shall, unless good cause be shown to the contrary, be forfeited to the District of Columbia and shall be made available for the use of any agency of the government of the District of Columbia or otherwise disposed of as the Commissioners of the District of Columbia may, by order or regulation, provide, except that all such property of an indecent, obscene, or lewd

nature shall, upon order of the court, be destroyed, and any lien thereon shall be deemed not to be a bona fide lien: *Provided*, That if there be bona fide liens against the property so forfeited then such property shall be disposed of by public auction. Bona fide liens against property so forfeited shall, on good cause shown by the lienor, be transferred from the property to the proceeds of the sale of the property. The proceeds of the sale of such property shall be available for the payment of such liens and for all expenses incident to such sale, and the remainder shall be deposited in the Treasury of the United States to the credit of the District of Columbia.

"(c) Any house, building, vessel, garage, shed, booth, shelter, enclosure, room, lot, or other premises to which the public commonly resort or congregate for business or pleasure, where publications, pictures, films, recordings, and other things and devices forbidden by this section are kept, possessed, sold, exhibited, manufactured, bartered, or given away, or to which persons resort for the purpose of observing same, is hereby declared to be a common nuisance and may be enjoined as hereinafter provided. Any person who knowingly maintains or assists in maintaining such a place is guilty of maintaining a nuisance.

"(d) Evidence that any of said prohibited acts are frequently committed in any of such places shall be prima facie proof that the proprietor or person having custody or control knowingly permitted the same, and evidence that persons have been convicted of committing any said act in any of such places is admissible to show knowledge on the part of the defendants that this section is being violated in the house or premises. The original papers and judgments, or certified copies thereof in such cases of convictions may be used in evidence in the suit for injunction, and oral evidence is admissible to show that the offense for which said parties were convicted was committed in said house or premises. Evidence of general reputation of said houses or premises shall also be admissible to prove the existence of said nuisance.

"(e) An action to enjoin any nuisance defined in this section may be brought in the name of the District of Columbia by the Corporation Counsel of the District of Columbia or any of his assistants in the municipal court for the District of Columbia against any person conducting or maintaining such nuisance or knowingly permitting such nuisance to be conducted or maintained. The rules of the municipal court for the District of Columbia relating to the granting of an injunction or restraining order shall be applicable with respect to actions brought under this subsection, except that the District as complaining party shall not be required to furnish bond or security. It shall not be necessary for the court to find the building, ground, premises, or place was being unlawfully used as aforesaid at the time of the hearing, but on finding that the material allegations of the complaint are true, the court shall enter an order restraining the defendant from keeping, possessing, selling, exhibiting, manufacturing, bartering, or giving away publications, pictures, films, recordings, or other things and devices forbidden by this section. When an injunction, either temporary or permanent, has been granted, it shall be binding on the defendant throughout the District of Columbia. Upon final judgment of the court ordering such nuisance to be abated, the court may order that the defendant, or anyone claiming under him, shall not occupy or use, for a period of one year thereafter, the building, ground, premises, or place upon which the nuisance existed, but the court may, in its discretion, permit the defendant to occupy or use the said building, ground, premises, or place, if the defendant shall give bond with sufficient security to be approved by the court, in the penal and liquidated sum of not less than $1,000 nor more than $5,000, payable to the District of Columbia, and conditioned that the acts prohibited by this section shall not be done or permitted to be done in or upon the buildings, grounds, premises, or place. On violation of such bond the whole sum may be recovered as a penalty in the name of and for the District of Columbia and shall be deposited in the Treasury of the United States to the credit of the District of Columbia.

"(f) In the case of the violation of any injunction, temporary or permanent, rendered pursuant to the provisions of this section, proceedings for punishment for contempt may be commenced by the Corporation Counsel, or any of his assistants, by filing with the court in the same case in which the injunction was issued a petition under oath setting out the alleged offense constituting the violation and serving a copy of said petition upon the defendant requiring him to appear and answer the same within ten days from the service thereof. The trial shall be promptly held and may be upon affidavits or either party may demand the production and oral examination of the witnesses. Any person found guilty of contempt under the provisions of this section shall be punished by a fine of not more than $1,000, or by imprisonment for not more than twelve months, or by both such fine and imprisonment."

SEC. 2. Nothing in this Act shall be construed so as to affect the authority vested in the Board of Commissioners of the District of Columbia by Reorganization Plan Numbered 5 of 1952 (66 Stat. 824). The performance of any function vested by this Act in the Board of Commissioners or in any office or agency under the jurisdiction and control of said Board of Commissioners may be delegated by said Board of Commissioners in accordance with section 3 of such plan.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

CERTAIN RELATIVES RESPONSIBLE FOR SUPPORT OF NEEDY PERSONS

The bill (S. 914) to provide for a more effective administration of public assistance in the District of Columbia; to make certain relatives responsible for support of needy persons, and for other purposes, was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "District of Columbia Public Assistance Act of 1961".

DEFINITIONS

SEC. 2. As used in this Act, the word "District" means the District of Columbia; the word "Commissioners" means the Commissioners of the District of Columbia or the agents, agencies, officers, and employees designated by them to perform any function vested in them by this Act; the term "public assistance" means payment in or by money, medical care, remedial care, goods or services to, or for the benefit of, needy persons; the word "recipient" means a person to whom or on whose behalf public assistance is granted and the word "State" includes Puerto Rico, Guam, and the Virgin Islands.

FUNCTIONS OF COMMISSIONERS

SEC. 3. This Act shall be administered by the Commissioners who shall—

(a) establish such categories of public assistance as they deem appropriate;

(b) (1) provide for maximum cooperation with other agencies rendering services to maintain and strengthen family life and to help applicants for public assistance and recipients to attain self-support or self-care, and (2) provide such services directly under this Act to the extent that they are not available from other agencies: *Provided*, That as used in this paragraph the term "other agencies" shall include programs administered by or under the Commissioners under the authority of any law other than this Act;

(c) establish and enforce such rules and regulations as may be necessary or desirable to carry out the provisions of this Act;

(d) cooperate in all necessary respects with agencies of the United States Government in the administration of this Act, and accept any funds, goods, or services payable to the District for public assistance and for administering public assistance;

(e) enter into reciprocal agreements with any State relative to the provision of public assistance to residents and nonresidents.

ELIGIBILITY FOR PUBLIC ASSISTANCE

SEC. 4. Public assistance shall be awarded to or on behalf of any needy individual who either (a) has resided in the District for one year immediately preceding the date of filing his application for such assistance; or (b) who was born within one year immediately preceding the application for such aid, if the parent or other relative with whom the child is living has resided in the District for one year immediately preceding the birth; or (c) is otherwise within one of the categories of public assistance established by the Commissioners pursuant to this Act.

AMOUNT OF PUBLIC ASSISTANCE

SEC. 5. (a) The amount of public assistance which any person shall receive shall be determined in accordance with regulations approved by the Commissioners.

(b) Such amount as referred to in subsection (a) of this section shall not be less than the full amount determined as necessary on the basis of the minimum needs of such person as established in accordance with such regulations. No ceiling shall be administratively imposed with respect to the amount of public assistance which any person, or class of persons, may receive.

(c) The provisions of subsection (b) of this section shall become effective on July 1, 1961.

APPLICATION FOR PUBLIC ASSISTANCE

SEC. 6. Application for public assistance shall be accepted from, or on behalf of, any person who believes himself eligible for public assistance. Such application shall be made in the manner and form prescribed by the Commissioners, and shall contain such information as the Commissioners shall require.

INVESTIGATION OF APPLICANT

SEC. 7. Whenever the Commissioners shall receive an application for public assistance, they shall promptly make an investigation and record of the circumstances of the applicant in order to ascertain the facts supporting the application and to obtain such other information as they may require.

AWARD AND PAYMENT OF PUBLIC ASSISTANCE

SEC. 8. (a) Upon completion of the investigation, the Commissioners shall determine whether the applicant is eligible for public asistance, the type and amout of public assistance for which he is eligible, and the date from which such public assistance shall begin, and shall furnish public assistance with reasonable promptness to all eligible persons: *Provided*, That such date shall not be prior to the first day of the calendar

month in which such determination is made, except that as a result of reconsideration or review of a case, and in order to correct previous erroneous administrative action such as undue delay or improper denial of assistance, an initial payment of pubic assistance may be made for a period beginning prior to the first day of the calendar month in which the eligibility determination is made.

(b) Money payments of public assistance shall be made by check, except that in emergency cases under section 10 of this Act, money payments of public assistance may be made in cash, and to accomplish such purpose the Commissioners are authorized to make necessary provisions for advancing from time to time to one or more officers or employees of the District such sum or sums as the Commissioner may determine: *Provided*, That no such advance shall be made to any such officer or employee who has not been previousy bonded in such amount and form as the Commissioners shall determine.

RECIPIENT INCAPACITATED

SEC. 9. Whenever a recipient has been found by the Commissioners to be incapable of taking care of himself, his property, or his money, and a person has been judicially appointed as legal representative, or a responsible person has been appointed by the Commissioners, on behalf of such incapacitated individual for the purpose of receiving and managing such individual's public assistance payments (whether or not he is such individual's legal representative for other purposes), public assistance payments may be made on behalf of such individual to such judicially appointed legal representative, or to such responsible person appointed by the Commissioners.

EMERGENCY PUBLIC ASSISTANCE

SEC. 10. The Commissioners may grant emergency public assistance pending completion of investigation when eligibility has been established pursuant to section 4 of this Act: *Provided*, That such emergency assistance shall not be granted in any case for a period exceeding sixty days.

REDETERMINATION OF GRANTS

SEC. 11. All public assistance grants made under this Act shall be reconsidered by the Commissioners as frequently as they may deem necessary. After such further investigation as the Commissioners may deem necessary, the amount of public assistance may be changed, or may be entirely withdrawn, if the Commissioners find that any such grant has been made erroneously, or if they find that the recipient's circumstances have altered sufficiently to warrant such action. If at any time during the continuance of public asistance the recipient thereof becomes possessed of income or resources in excess of the amount previously reported by him, or if other changes should occur in the circumstances previously reported by him which would alter either his need or his eligibility, it shall be his duty to notify the Commissioners of such fact immediately on the receipt or possession of such additional income or resources, or on the change of circumstances.

RECORDS

SEC. 12. (a) The Commissioners are directed to prescribe regulations governing the custody, use, and preservation of the records, papers, files, and communications of the Commissioners relating to public assistance. Except as herein otherwise provided, such regulations shall provide safeguards restricting the use or disclosure of information concerning applicants for, or recipients of, public assistance to purposes directly connected with the administration of public assistance. The Commissioners are authorized in their discretion to include in such regulations provision for the public to have access to the records of disbursement or payment of public assistance made after the effective date of this Act.

(b) No person who obtains information by virtue of any regulation made pursuant to subsection (a) of this section shall use such information for commercial or political purposes.

(c) This section and section 13 of this Act shall be construed as State legislation conforming to the requirements of section 618 of the Revenue Act of 1951 (Public Law 183, Eighty-second Congress).

PENALTIES

SEC. 13. Any person violating subsection (b) of section 12 of this Act shall be punished by a fine of not more than $500, or by imprisonment of not more than ninety days, or by both such fine and imprisonment. Prosecutions for such violations and for violations of section 17(a) of this Act shall be brought to the municipal court for the District of Columbia by the Corporation Counsel or any of his assistants.

FUNERAL EXPENSES

SEC. 14. On the death of a recipient, reasonable funeral expenses may be paid, subject to rules and regulations approved by the Commissioners.

HEARINGS

SEC. 15. An applicant for, or recipient of, public assistance aggrieved by the action or inaction of the Commissioners shall be entitled to a hearing. Each applicant or recipient shall be notified of his rights to a hearing. Upon request for such hearing, reasonable notice of the time and place thereof shall be given to such applicant or recipient. Such hearing shall be conducted in accordance with rules and regulations prescribed by the Commissioners. The findings of the Commissioners on any appeal shall be final.

PUBLIC ASSISTANCE NOT ASSIGNABLE

SEC. 16. Public assistance awarded under this Act shall not be transferable or assignable at law or in equity, and none of the money paid or payable to any recipient under this Act shall be subject to execution, levy, attachment, garnishment, or other legal process, or to the operation of any bankruptcy or insolvency law.

FRAUD IN OBTAINING PUBLIC ASSISTANCE—REPAYMENT

SEC. 17. (a) Any person who by means of false statement, failure to disclose information, or impersonation, or by other fraudulent device obtains or attempts to obtain or any person who knowingly aids or abets such person in the obtaining or attempting to obtain, (1) any grant or payment of public assistance to which he is not entitled; (2) a larger amount of public assistance than that to which he is entitled; or (3) payment of any forfeited grant of public assistance; or any person who with intent to defraud the District aids or abets in the buying or in any way disposing of the real property of a recipient of public assistance, shall be guilty of a misdemeanor and shall be sentenced to pay a fine of not more than $500, or imprisoned not to exceed one year, or both.

(b) Any person who obtains any payment of public assistance to which he is not entitled shall be liable to repay such sum. In any case in which, under this section, a person is liable to repay any sum, such sum may be collected without interest by civil action brought in the name of the District. Any repayment required by this subsection may, in the discretion of the Commissioners, be waived in whole or in part, upon a finding by the Commissioners that such repayment would deprive such person, his spouse, parent, or child of shelter or subsistence needed to enable such person, spouse, parent, or child to maintain a minimum standard of health and well-being.

PROPERTY

SEC. 18. (a) At the death of any person who has received public assistance in the form of old-age assistance, medical assistance for the aged, or aid to the disabled pursuant to the provisions of this Act, or of any Act repealed by this Act, the District shall have a preferred claim for the amount of any such public assistance against the estate of the deceased recipient. Notwithstanding the provisions of any other law, no statute of limitations shall be deemed applicable as a defense to any claim of the District made pursuant to this section. The Commissioners are authorized to waive any such claim when in their judgment they deem it appropriate to do so.

(b) In addition to the remedy provided by subsection (a) of this section, or by any other provision of law, the Commissioners may file a notice in the office of the Recorder of Deeds in any case where public assistance in the form of old age assistance or aid to the disabled is granted to any person under this Act, and such notice shall constitute and have the effect of a lien in favor of the District against the real and personal property of such person for the amount of such public assistance which theretofore has been granted or which may thereafter be granted to, or on behalf of, such persons. Any such lien may be enforced by a proceeding filed in the United States District Court for the District of Columbia. The Commissioners shall file in the office of the Recorder of Deeds a release of any such real and personal property from the effect of such lien whenever there has been repaid to the District the amount of the public assistance theretofore granted to, or on behalf of, such person. The Commissioners are also authorized to release any such lien when in their judgment they deem it appropriate to do so. Such notices and releases may be filed without payment of fees.

(c) If the District collects from any recipient of public assistance in the form of old-age assistance or aid to the disabled or from his estate, or otherwise, any amount with respect to public assistance furnished him under this Act, or under any Act repealed by this Act, the pro rata share to which the United States is equitably entitled shall be paid to the United States in accordance with the provisions of the Social Security Act, as amended (42 U.S.C. 303, 603, 1203, 1353). The pro rata share due the District shall be deposited as miscellaneous receipts to the credit of the District.

RESPONSIBLE RELATIVES

SEC. 19. (a) The husband, wife, father, mother, or adult child of a recipient of public assistance, or of a person in need thereof, shall, according to his ability to pay, be responsible for the support of such person. Any such recipient of public assistance or person in need thereof or the Commissioners may bring an action to require such husband, wife, father, mother, or adult child to provide such support and the court shall have the power to make orders requiring such husband, wife, father, mother, or adult child to pay to such recipient of public assistance or to such person in need thereof such sum or sums of money in such installments as the court in its discretion may direct and such orders may be enforced in the same manner as orders for alimony.

(b) The Commissioners shall be empowered on behalf of the District to sue such husband, wife, father, mother, or adult child for the amount of public assistance granted under this Act or under any Act repealed by this Act to such recipient or for so much thereof as such husband, wife, father, mother, or adult child is reasonably able to pay.

(c) All suits, actions, and court proceedings under this section shall be brought in the domestic relations branch of the municipal court for the District of Columbia.

To the extent applicable, the provisions of the Act entitled "An Act to establish a domestic relations branch in the municipal court for the District of Columbia, and for other purposes", approved April 11, 1956, shall be followed in suits, actions, and proceedings brought pursuant to this section.

PAYMENT OF EXPENSES

SEC. 20. All necessary expenses incurred by the District in carrying out the provisions of this Act shall be disbursed in the same manner as other expenses of the District are disbursed.

DELEGATION OF AUTHORITY

SEC. 21. The Commissioners are authorized to make provisions for delegation and subdelegation of any function vested in them by this Act to any agency, officer, or employee of the District.

VOLUNTARY SERVICES

SEC. 22. The Commissioners are authorized to accept voluntary services in administering the provisions of this Act. Such voluntary services shall not create any obligation against the District.

APPROPRIATIONS

SEC. 23. (a) The Commissioners shall include in their annual estimates of appropriations such sums as may be needed to carry out the provisions of this Act.

(b) Unobligated balances of appropriations for the Department of Public Welfare are hereby made available for the purposes of this Act.

REPEALS

SEC. 24. The following Acts are hereby repealed: The Act entitled "An Act to provide aid to dependent children in the District of Columbia", approved June 14, 1944 (58 Stat. 277); the Act entitled "An Act to amend the code of laws for the District of Columbia in relation to providing assistance against old-age want", approved August 24, 1935 (49 Stat. 747); and the Act entitled "An Act to provide aid for needy blind persons of the District of Columbia and authorizing appropriations therefor", approved August 24, 1935 (49 Stat. 744), as amended. Notwithstanding such repeal, all claims of the District of Columbia for recovery of amounts expended for aid or assistance granted under such repealed Acts which it now has, or which would have accrued had such Acts not been repealed, shall be recoverable in the same manner and to the same extent as such amounts would be recoverable had such aid or assistance been granted under the provisions of this Act.

REORGANIZATION

SEC. 25. This Act shall not be considered as affecting the authority vested in the Board of Commissioners of the District of Columbia by Reorganization Plan Numbered 5 of 1952 (66 Stat. 824), and the performance of any function vested by said plan in the Board of Commissioners or in any office or agency under the jurisdiction and control of said Board of Commissioners shall continue to be subject to delegation by said Board of Commissioners in accordance with section 3 of such plan. Any function vested by this Act in any agency established pursuant to such plan shall be deemed to be vested in said Board of Commissioners and shall be subject to delegation in accordance with such plan.

VALIDITY

SEC. 26. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of the Act and the application of such provision to other persons or circumstances shall not be affected thereby.

EFFECTIVE DATE

SEC. 27. Except as otherwise provided in this Act, the provisions of this Act shall take effect on the first day of the second month following the date of enactment.

BILLS PASSED OVER

The bill (H.R. 8383) to further amend section 201(i) of the Federal Civil Defense Act of 1950, as amended, and for other purposes, was announced as next in order.

Mr. YOUNG of Ohio. I ask that the bill go over.

The VICE PRESIDENT. The bill will go over.

The bill (H.R. 8406) to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan, and for other purposes, was announced as next in order.

Mr. BARTLETT. Mr. President, over by request.

The VICE PRESIDENT. The bill will go over.

AMENDMENT TO REORGANIZATION PLAN NO. 1 OF 1958

Mr. BARTLETT. Mr. President, I ask unanimous consent that the Senate return to the consideration of Calendar No. 830, H.R. 8406.

The VICE PRESIDENT. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill (H.R. 8406) to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan, and for other purposes, which was ordered to a third reading, was read the third time, and passed.

FINANCIAL CONTRIBUTION FOR CIVIL DEFENSE PURPOSES IN OKLAHOMA

The bill (H.R. 2877) to authorize the Director, Office of Civil and Defense Mobilization, to approve a financial contribution for civil defense purposes to the State of Oklahoma, was considered, ordered to a third reading, read the third time, and passed.

USE OF REVOLVING FUND OF VETERANS' ADMINISTRATION

The bill (H.R. 8414) to amend section 5011 of title 38, United States Code, to clarify the authority of the Veterans' Administration to use its revolving supply fund for the repair and reclamation of personal property, was considered, ordered to a third reading, read the third time, and passed.

AMENDMENT TO UNITED STATES CODE TO INCREASE DEPENDENCY AND INDEMNITY COMPENSATION

The bill (H.R. 6969) to amend title 38, United States Code, to increase dependency and indemnity compensation in certain cases, was considered, ordered to a third reading, read the third time, and passed.

FREE ENTRY OF TOWING CARRIAGE FOR USE OF MICHIGAN UNIVERSITY

The Senate proceeded to consider the bill (H.R. 5852) to provide for the free entry of a towing carriage for the use of the University of Michigan, which had been reported from the Committee on Finance with an amendment on page 1, after line 6, to insert a new section, as follows:

SEC. 2. (a) Paragraph 1798(b) of the Tariff Act of 1930, as amended (19 U.S.C., sec. 1201, par. 1798(b)), is amended by renumbering subdivisions (2) and (3) as (3) and (4), respectively, and by inserting after subdivision (1) the following new subdivision:

"(2) not exceeding $100 in value of articles (including not more than one wine gallon of alcoholic beverages and not more than one hundred cigars) accompanying such person to be disposed of by him as bona fide gifts, if such person has not claimed an exemption under this subdivision (2) within the six months immediately preceding his arrival and he intends to remain in the United States for not less than seventy-two hours;"

(b) Paragraph 1798(g) of such Act, as amended (19 U.S.C., sec. 1201, par. 1798(g)), is amended by striking out "subdivision (2) of subparagraph (b)" and inserting in lieu thereof "subdivision (3) of subparagraph (b)".

(c) Subdivision (2)(B) of section 321(a) of such Act, as amended (19 U.S.C., sec. 1321), is amended by inserting "(b)(2) or" after "paragraph 1798".

(d) The amendments made by subsections (a), (b), and (c) shall apply with respect to persons arriving in the United States on or after the 30th day after the date of the enactment of this Act.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended, so as to read: "An act to provide for the free entry of a towing carriage for the use of the University of Michigan, and to increase the duty-free exemption of persons arriving in the United States who are not returning residents thereof."

Mr. JAVITS subsequently said: Madam President, I ask unanimous consent to have printed in the RECORD a statement I have prepared on H.R. 5852, which was on the Consent Calendar earlier today.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR JAVITS

I should like to express my profound satisfaction with the action by the Senate in unanimously adopting H.R. 5852, incorporating an amendment sponsored by me that will be extremely helpful in encouraging travel into the United States.

The amendment, which I have sponsored as a bill for the past 3 years, would permit visitors from abroad to bring $100 worth of gifts into the United States free of duty. They are now permitted only to bring $10 worth of gifts free of duty. The bill thereby gives equal treatment to tourists from abroad with our own tourists who return from abroad.

My amendment has been endorsed by the Commerce Department, the Treasury Department, and the Agriculture Department

and was recommended by Clarence Randall, President Eisenhower's special assistant who who made a study during the Eisenhower administration on how to increase tourism to the United States.

The report from the Department of Commerce emphasizes the importance of this amendment. It states in part:

"This Department favors enactment of S. 1280 (the original text of the amendment) as an element in the encouragement of foreign travel to the United States. Many visitors from abroad enjoy the hospitality of American families during all or part of their stay, and such visitors quite naturally feel that they should at least offer a gift in return for the hospitality received. To some extent, the limitations on dollar exchange allowed to them by their governments make it impracticable for foreign visitors to purchase gifts here. On the other hand, gifts from the home country can, of course, be purchased with local currency, and more importantly have the added attraction of being more personal and characteristic in nature. To give nonresident travelers a more adequate duty-free allowance for gifts, as proposed, would, we believe, contribute to better public international relations and to some increased international travel, with little, if any, loss of revenue."

This may be considered by some a minor amendment, but I believe it is a highly significant one, in view of the importance of travel to this country's economic and political well-being, and in order to stimulate, encourage, and genuinely welcome a larger number of foreign tourists.

AMENDMENT TO SHIP MORTGAGE ACT OF 1920

The bill (H.R. 2308) to amend the Ship Mortgage Act, 1920, with respect to its applicability to certain vessels, was announced as next in order.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BARTLETT. Mr. President, I offer an amendment which I ask to have stated.

The VICE PRESIDENT. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 2, after line 13, it is proposed to insert the following:

SEC. 3. That the proviso at the end of section 511(h) of the Merchant Marine Act, 1936, as amended, is amended to read as follows: *"Provided,* That until January 1, 1962, in addition to the extensions hereinbefore permitted, further extensions may be granted ending not later than December 31, 1962".

SEC. 4. The amendment made by the first section of this Act shall take effect December 31, 1961, or on the date of enactment of this Act, whichever date first occurs.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Alaska.

The amendment was agreed to.

The VICE PRESIDENT. The bill is open to further amendment. If there be no amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 2308) was read the third time, and passed.

TEMPORARY APPOINTMENTS AND PROMOTIONS IN U.S. COAST GUARD

The bill (S. 2376) to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 16 of the Act of July 23, 1947, chapter 301 (61 Stat. 413; 14 U.S.C. 435, note), as amended, is amended to read as follows:

"SEC. 16. Notwithstanding the limitations contained in subsection (a) of section 435, and subsection (a) of section 436, of title 14, United States Code, the authority granted by those sections may be exercised until—

"(1) such time as the Secretary of the Treasury determines that the number of officers holding permanent appointments on the active list of the Coast Guard is equal to 95 per centum of the number of such officers authorized by law, exclusive of extra numbers; or

"(2) January 1, 1964;

whichever occurs earlier."

Mr. HUMPHREY subsequently said: Mr. President, earlier today the Senate passed Senate bill 2376. House bill 8719 has just now been received from the House of Representatives.

I ask unanimous consent that the vote by which Senate bill 2376 was passed be reconsidered.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, I move that the Senate now proceed to the consideration of House bill 8719.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 8719) to amend the act of July 23, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 8719) was ordered to a third reading, was read the third time, and passed.

Mr. HUMPHREY. Mr. President, I ask that Senate bill 2376 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, Senate bill 2376 will be indefinitely postponed.

Mr. HUMPHREY. I thank the Chair.

PART 1 OF TRANSIT DEVELOPMENT PROGRAM, NATIONAL CAPITAL TRANSPORTATION AGENCY

The Senate proceeded to consider the bill (S. 2397) authorizing the National Capital Transportation Agency to carry out part 1 of its transit development program and to further the objectives of the act approved July 14, 1960 (74 Stat. 537), which had been reported from the Committee on the District of Columbia, with amendments, on page 2, line 12, after the word "the", to insert "acquisition or", and on page 3, line 6, after the word "as", to strike out "it determines"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of enabling the National Capital Transportation Agency to carry out that part of its transit development program described in its report entitled "Report on Part One of the Transit Development Program, July 1961", transmitted to the Congress on July 31, 1961, pursuant to the provisions of subsection (c) of section 204 of the National Capital Transportation Act of 1960, the National Capital Transportation Agency is hereby authorized, subject to the provisions of such Act, to acquire, or enter into agreements for the acquisition or use of, facilities, property, and rights-of-way for express transit:

(1) in the center median area and elsewhere in, adjacent to, or in conjunction with (A) Interstate Route 66 in Fairfax County and Arlington County, Virginia; and (B) Interstate Route 95 in Prince Georges County, Maryland;

(2) adjacent to, or in conjunction with (A) the George Washington Memorial Parkway; (B) the Little Falls Branch Parkway from the George Washington Memorial Parkway to the vicinity of Massachusetts Avenue; (C) the Parkway Spur through the Cabin John Valley from Cabin John to the Capital Beltway; and (D) the Capital Beltway from the George Washington Memorial Parkway to the vicinity of Bradley Boulevard, all in Montgomery County, Maryland: *Provided,* That the Agency is further authorized to carry out, as part of part 1 of its transit development program, such construction in connection with the land acquisition projects provided for herein, as must necessarily be undertaken at the time the aforesaid highways and parkways are constructed: *Provided further,* That the authority granted the Agency under subparagraph (2) above shall in no way diminish the powers of the Secretary of the Interior under other Federal laws.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

AMENDMENT TO GAMBLING LAW IN DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (H.R. 4669) to amend the law relating to gambling in the District of Columbia, which had been reported from the Committee on the District of Columbia, with an amendment, on page 3, line 2, after the word "auction.", to strike out "Bona fide liens against property so forfeited shall, on good cause shown by the lienor, be transferred from the property to the proceeds of the sale of the property. Forfeit moneys and other proceeds realized from the enforcement of this section shall be deposited in the Treasury of the United States to the credit of the District of Columbia." " and insert "The proceeds of the sale of such property shall be available, first, for the payment of all expenses incident to such sale; and, second, for the payment of such liens; and the remainder shall be deposited in the Treasury of the United States to the credit of the District of Columbia. To the extent necessary,

liens against said property so forfeited shall, on good cause shown by the lienor, be transferred from the property to the proceeds of the sale of the property.'"

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

JUVENILE DIVISION WITHIN DISTRICT OF COLUMBIA YOUTH CORRECTIONAL CENTER

The bill (S. 2299) to provide for the establishment of a juvenile division within or in connection with the District of Columbia Youth Correctional Center, and to authorize the judge of the juvenile court of the District of Columbia to commit to such juvenile division, subject to the provisions of the Juvenile Court Act, children 15 years of age or older, was considered, ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commissioners of the District of Columbia are authorized to establish within or in connection with the District of Columbia Youth Correctional Center at Lorton, Virginia, a juvenile division of such center, with facilities separate and distinct from those designed and intended for persons convicted of crime, and so designed and maintained as to provide suitable custody, care, subsistence, education, training, treatment, and guidance for juveniles committed thereto under the Juvenile Court Act of the District of Columbia. Appropriations for this purpose are hereby authorized. Nothing contained in this section shall be construed to prevent the use of any of the facilities of such youth correctional center by juveniles committed thereto in accordance with section 2 of this Act if such juveniles use such facilities at different hours than persons committed to such center under the provisions of the Federal Youth Corrections Act, as amended (18 U.S.C. 5005 et seq.), and such juveniles are not permitted to have contact with the persons committed under said Federal Youth Corrections Act.

SEC. 2. The judge of the juvenile court of the District of Columbia is authorized to commit to the juvenile division of the District of Columbia Youth Correctional Center, authorized by this Act to be established, any child, fifteen years of age or older, who comes within the provisions of said Juvenile Court Act, and who—

(1) in the opinion of the judge will benefit from immediate commitment thereto and treatment therein, or

(2) having been committed by the court to the National Training School for Boys demonstrates by his conduct that he is not amenable to the rules of, or treatment at, such school, or

(3) having been committed by the court to the National Training School for Boys, has absconded therefrom, or

(4) having been committed by the court to the National Training School for Boys and paroled therefrom, has violated the conditions of his parole, or

(5) regardless of any disposition which may have previously been made in his case by the judge, thereafter is found by the judge, in the interest of providing a satisfactory disposition in his case, to require commitment to and treatment in such juvenile division.

BILLS PASSED OVER

The bill (S. 1528) to make the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 applicable to retired former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and to their widows, widowers, and children, was announced as next in order.

Mr. FONG. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1918) to extend benefits of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to widows and surviving children of former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, or the U.S. Secret Service Division, who were retired or who died in the service of any such organization prior to the effective date of such amendments, was announced as next in order.

Mr. FONG. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The bill (H.R. 6775), to amend the Shipping Act, 1916, as amended, to provide for the operation of steamship conferences, was announced as next in order.

Mr. BARTLETT. Over, Mr. President. The bill is not properly calendar business.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1728) to amend section 510 of the Merchant Marine Act, 1936, to provide for the trade-in of obsolete vessels in connection with the construction of new vessels, either at the time of executing the construction contract or at the time of delivery of the new vessel, was announced as next in order.

Mr. FONG. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The bill (H.R. 6141) to amend the act of September 1, 1954, in order to limit to cases involving the national security the prohibition on payment of annuities and retired pay to officers and employees of the United States, to clarify the application and operation of such act, and for other purposes, was announced as next in order.

Mr. FONG. Over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

PROTECTION FROM DOWNGRADING ACTIONS AND PROTECTION FOR CERTAIN POSTAL FIELD SERVICE EMPLOYEES

The bill (H.R. 7043) to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

EMPLOYMENT OF RETIRED FEDERAL GOVERNMENT PERSONNEL BY THE DISTRICT OF COLUMBIA BOARD OF EDUCATION

The Senate proceeded to consider the bill (S. 502) to authorize the employment of retired personnel of the Federal Government by the Board of Education of the District of Columbia, which had been reported from the Committee on the District of Columbia with amendments, on page 1, line 7, after the word "to", to strike out "the" and insert "any"; in line 8, after the word "Board", to insert "and which is covered by the provisions of the Act for the retirement of public school teachers in the District of Columbia, approved April 7, 1946 (60 Stat. 875), as amended", and on page 2, line 8, after the word "who", to insert "having attained mandatory retirement age", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any former employee of the Federal Government who has been retired under the Civil Service Retirement Act of May 29, 1930, as amended, shall, if otherwise qualified under the rules of the Board of Education of the District of Columbia, be eligible for appointment to any position for which he may be qualified under the rules of the Board and which is covered by the provisions of the Act for the retirement of public school teachers in the District of Columbia, approved April 7, 1946 (60 Stat. 875), as amended, and shall draw the pay or compensation authorized for the position to which he may be appointed, in addition to the pension he is authorized to receive under the Civil Service Retirement Act.

SEC. 2. Any former employee of the Board of Education of the District of Columbia who, having attained mandatory retirement age, shall have been retired under the Act for the retirement of public school teachers in the District of Columbia, approved April 7, 1946 (60 Stat. 875), as amended, shall, if otherwise qualified under the rules and regulations of the Civil Service Commission, be eligible for appointment to the position for which he may be qualified under the rules of the said Civil Service Commission, and shall draw the pay or compensation authorized for the position to which he may be appointed, in addition to the pension he is authorized to receive under the Act for the retirement of public school teachers in the District of Columbia, as amended.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

BILLS PASSED OVER

The bill (H.R. 7622) to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia, was announced as next in order.

Mr. BARTLETT. Over, by request, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1747) to stabilize the mining of lead and zinc in the United States,

and for other purposes, was announced as next in order.

Mr. FONG. Over, Mr. President, by request.

The VICE PRESIDENT. The bill will be passed over.

CREDITS AGAINST EMPLOYMENT TAX

The Senate proceeded to consider the bill (H.R. 2585) relating to the credits against the employment tax in the case of certain successor employers, which had been reported from the Committee on Finance, with amendments, on page 2, after line 21, to strike out:

(b) The amendment made by subsection (a) shall apply with respect to the calendar year 1955 and each calendar year thereafter. Provisions having the same effect as the provisions added to the Internal Revenue Code of 1954 by such amendment shall be deemed to be included in the Internal Revenue Code of 1939 and shall apply with respect to the tax imposed by section 1600 of such Code for the calendar years 1951 through 1954.

And in lieu thereof, to insert:

(b) The amendment made by subsection (a) shall apply with respect to the calendar year 1961 and each calendar year thereafter.

And, on page 3, after line 7, to insert a new section, as follows:

SEC. 2. ELECTION FOR QUARTZITE AND CLAY USED IN THE PRODUCTION OF REFRACTORY PRODUCTS.

(a) ELECTION FOR PAST YEARS.—If an election is made under subsection (c), in the case of quartzite and clay used by the mine owner or operator in the production of refractory products, for the purpose of applying section 613(c) of the Internal Revenue Code of 1954 (and corresponding provisions of the Internal Revenue Code of 1939) for each of the taxable years with respect to which the election is effective—

(1) the term "ordinary treatment processes" shall include crushing, grinding, and separating the mineral from waste, but shall not include any subsequent process; and

(2) the gross income from mining for each short ton of such quartzite or clay used in the production of all refractory products sold during the taxable year shall be equal to 87½ percent of the lesser of—

(A) the average lowest published or advertised price, or

(B) the average lowest actual selling price, at which, during the taxable year, the mine owner or operator offered to sell, or sold, such quartzite or clay (in the form and condition of such products after the application of only the processes described in paragraph (1) and before transportation from the plant in which such processes were applied). For purposes of this paragraph, exceptional, unusual, or nominal sales or selling prices shall be disregarded. If the mine owner or operator makes no sales of, or makes only exceptional, unusual, or nominal sales of, such quartzite or clay after application of only the processes described in paragraph (1), then in lieu of the price provided for in subparagraph (A) or (B) there shall be used the average lowest recognized selling price for the taxable year for such quartzite or clay in the marketing area of the mine owner or operator published in a trade journal or other industry publication.

(b) YEARS TO WHICH APPLICABLE.—An election made under subsection (c) to have the provisions of this section apply shall be effective on and after January 1, 1951, for all taxable years beginning before January 1, 1961, in respect of which—

(1) the assessment of a deficiency,

(2) the refund or credit of an overpayment, or

(3) the commencement of a suit for recovery of a refund under section 7405 of the Internal Revenue Code of 1954,

is not prevented on the date of the enactment of this Act by the operation of any law or rule of law. Such election shall also be effective on and after January 1, 1951, for any taxable year beginning before January 1, 1961, in respect of which an assessment of a deficiency has been made but not collected on or before the date of the enactment of this Act.

(c) TIME AND MANNER OF ELECTION.—An election to have the provisions of this section apply shall be made by the taxpayer on or before the 60th day after the date of publication in the Federal Register of final regulations issued under authority of subsection (f), and shall be made in such form and manner as the Secretary of the Treasury or his delegate shall prescribe by regulations. Such election, if made, may not be revoked.

(d) STATUTES OF LIMITATIONS.—Notwithstanding any other law, the period within which an assessment of a deficiency attributable to the election under subsection (c) may be made with respect to any taxable year for which such election is effective, and the period within which a claim for refund or credit of an overpayment attributable to the election under such subsection may be made with respect to any such taxable year, shall not expire prior to one year after the last day for making an election under subsection (c). An election by a taxpayer under subsection (c) shall be considered as a consent to the application of the provisions of this subsection.

(e) TERMS: APPLICABILITY OF OTHER LAWS.—Except where otherwise distinctly expressed or manifestly intended, terms used in this section shall have the same meaning as when used in the Internal Revenue Code of 1954 (or corresponding provisions of the Internal Revenue Code of 1939) and all provisions of law shall apply with respect to this section as if this section were a part of such Code (or corresponding provisions of the Internal Revenue Code of 1939).

(f) REGULATIONS.—The Secretary of the Treasury or his delegate shall prescribe such regulations as may be necessary to carry out the provisions of this section.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended, so as to read: "An Act relating to the credits against the employment tax in the case of certain successor employers and to provide an election for past taxable years with respect to the determination of gross income from mining in the case of quartzite and clay used in the production of refractory products."

BILLS AND RESOLUTION PASSED OVER

The bill (H.R. 8444) to amend the act of August 12, 1955, relating to elections in the District of Columbia, was announced as next in order.

Mr. BARTLETT. Over, by request, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The resolution (S. Res. 4) to amend the cloture rule by providing for adoption by a three-fifths vote, was announced as next in order.

Mr. BARTLETT. Over, Mr. President, by request.

The VICE PRESIDENT. The resolution will be passed over.

The bill (S. 2426) to revise the Federal election laws, to prevent corrupt practices in Federal elections, and for other purposes, was announced as next in order.

Mr. BARTLETT. Over, by request, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

REFERENCE OF SENATE BILL 1845 TO THE COURT OF CLAIMS

The resolution (S. Res. 144) to refer S. 1845 to the Court of Claims, was considered and agreed to, as follows:

Resolved, That the bill (S. 1845) entitled "A bill for the relief of Moorland Court, Inc.", now pending in the Senate, together with all accompanying papers, is hereby referred to the Court of Claims; and the court shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28 of the United States Code and report to the Senate at the earliest practicable date.

CONSTRUCTION OF RAILROAD SIDING IN THE DISTRICT OF COLUMBIA

The bill (S. 2470) to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia, was announced as next in order.

The VICE PRESIDENT. Without objection, the Senate will proceed to consider the companion House bill.

The bill (H.R. 8466) to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia, was considered, ordered to a third reading, read the third time, and passed.

The VICE PRESIDENT. Without objection, Senate bill 2470 will be indefinitely postponed.

WORKWEEK OF FIRE DEPARTMENT OF THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 1292) to amend the act of June 19, 1948, relating to the workweek of the Fire Department of the District of Columbia, and for other purposes, which had been reported from the Committee on the District of Columbia, with an amendment to strike out all after the enacting clause and insert:

That subsection (a) of section 2 of the Act entitled "An Act to amend the Act entitled 'An Act to classify the officers and members of the Fire Department of the District of Columbia, and for other purposes', approved June 20, 1906, and for other purposes", approved June 19, 1948, as amended (sec. 4-404a(a), D.C. Code, 1951 ed.), is amended to read as follows:

"(a) The Commissioners of the District of Columbia are authorized and directed to es-

tablish a workweek for officers and members of the firefighting division of the Fire Department of the District of Columbia which will result in an average workweek of fifty-six hours in any complete work cycle: *Provided,* That no workweek shall exceed seventy hours.

"(b) The firefighting division shall operate under a two-shift system and all hours of duty of any shift shall be consecutive.

"(c) The Commissioners of the District of Columbia are further authorized and directed to establish a workweek for officers and members of the Fire Department, other than those in the firefighting division, of forty hours, and the hours of work in such workweek shall be performed on consecutive days in such workweek.

"(d) The days off duty to which each officer or member of the Fire Department is entitled shall be in addition to his annual leave and sick leave allowed by law. In the case of any shift of the Fire Department beginning on one day and extending without a break in continuity into the next day, or in the case of two shifts beginning on the same day, the Commissioners are authorized to designate the shift which shall be the workday, and the entire shift so designated shall be considered the workday for all pay and leave purposes.

(e) If a holiday shall fall on any day off of any officer or member of the Fire Department, he shall be excused from duty on such other day as is designated by the Commissioners of the District of Columbia, and if he is required to be on duty in lieu of such day off, he shall receive compensation for such duty at the rate provided by law for duty performed on a holiday. When any shift of the Fire Department begins on the day before a holiday and extends without a break in continuity into the holiday, or begins on a holiday and extends without a break in continuity into the next day, the Commissioners of the District of Columbia are authorized to designate either of such shifts as the holiday workday, and the entire shift so designated shall be considered as the holiday workday for all pay and leave purposes. As used in this subsection the word "holiday" shall have the same meaning as such word has in the Act of October 24, 1951 (65 Stat. 607), as amended (sec. 4–808, D.C. Code, 1951 ed.), and as supplemented by the Act of January 11, 1957 (71 Stat. 3; Public Law 85–1)."

SEC. 2. Section 2 of such Act appoved June 19, 1948 (62 Stat. 499; sec. 4–404a(b), D.C. Code 1951 ed.), is further amended by redesignating subsection (b) as subsection (f) and by amending the first sentence of subsection (f) as so redesignated to read as follows: "Notwithstanding the provisions of the preceding subsection, whenever the Commissioners declare that an emergency exists of such a character as to necessitate the continuous service of all or some of the officers and members of the Fire Department, the granting of days off shall be suspended during the continuation of such emergency."

SEC. 3. Subsection (e) of the first section of the Act entitled "An Act to provide a five-day week for officers and members of the Metropolitan Police force, the United States Park Police force, and the White House Police force", approved August 15, 1950 (64 Stat. 447), as amended (sec. 4–904, D.C. Code, 1951 ed.), is amended (a) by inserting "the Fire Department of the District of Columbia," after "Metropolitan Police force,"; (b) by striking "Major and Superintendent of Police," and inserting in lieu thereof "Chief of Police, the Fire Chief,"; and (c) by striking therefrom "section 5 of the Act entitled 'An Act to fix the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia', approved July 1, 1930, as amended", and inserting in lieu thereof "such section".

SEC. 4. The first section of the Act entitled "An Act to provide for granting to officers and members of the Metropolitan Police force, the Fire Department of the District of Columbia, and the White House and United States Park Police forces additional compensation for working on holidays", approved October 24, 1951 (65 Stat. 607), as amended (sec. 4–807, D.C. Code, 1951 ed.), is amended to read as follows:

"That under regulations promulgated by the Commissioners of the District of Columbia each officer and member of the Metropolitan Police force and of the Fire Department of the District of Columbia when he may be required to work on any holiday, shall be compensated for such duty, excluding periods when he is in a leave status, in lieu of his regular rate of basic compensation for such work, at the rate of twice such regular rate of basic compensation: *Provided,* That for the purpose of this Act, each such officer or member who works eight hours or less on any holiday shall be compensated for such duty in addition to his regular rate of basic compensation for such work, at the rate of one-eighth of his daily rate of basic compensation for each hour so worked, computed to the nearest hour, counting thirty minues or more as a full hour: *Provided further,* That the total compensation to be paid any such officer or member for duty performed on a holiday shall not exceed an amount equal to twice the daily rate of pay to which such officer or member shall be entitled for performing one regular tour of duty on a day other than a holiday: *And provided further,* That no such officer or member shall be entitled to additional compensation for such holiday work for any day for which he is entitled to receive additional compensation under the provisions of subsection (e) of the first section of the Act approved August 15, 1950 (64 Stat. 447), as amended (sec. 4–904, D.C. Code, 1951 ed.). So much of the compensation for such holiday work as is in excess of the regular pay for such day shall not be considered as salary for the purpose of computing deductions for life insurance or for computing annuity payments under the provisions of the Policemen and Firemen's Retirement and Disability Act (39 Stat. 718, 71 Stat. 391; sec. 4–521, et seq., D.C. Code, 1951 ed.), nor shall such excess compensation be subject to deduction as provided in such Act. Appropriations for personal services for the Metropolitan Police force, the Fire Department of the District of Columbia, the White House Police force, and the United States Park Police force shall be available for payment of the additional compensation authorized by this Act."

SEC. 5. Clause (D) of subsection (b) of section 405 of the District of Columbia Police and Firemen's Salary Act of 1953, as amended (67 Stat. 76; D.C. Code, sec. 4–821), is amended to read as follows:

"(D) In the case of the Metropolitan Police force, except with respect to computation of holiday pay, a biweekly rate shall be divided by the number of hours constituting the biweekly tour of duty in order to derive an hourly rate.

"(E) In the case of the firefighting division of the Fire Department of the District of Columbia, except with respect to computation of holiday pay, the weekly or biweekly rate shall be divided by 56 or 112, as the case may be, to derive an hourly rate.

"(F) In the case of officers and members of divisions of the Fire Department of the District of Columbia other than the firefighting division, except with respect to computation of holiday pay, a biweekly rate shall be divided by the number of hours constituting the biweekly tour of duty in order to derive an hourly rate."

SEC. 6. (a) For the purpose of recording annual and sick leave on an hourly basis for officers and members of the firefighting division of the Fire Department of the District of Columbia, the workday of any workweek shall be considered to be twelve hours.

(b) For the purposes of recording on an hourly basis annual and sick leave taken by officers and members of the firefighting division, the following formula shall be used:

(1) During the day shift of ten hours, one and two-tenths hours of leave shall be charged for each hour taken.

(2) During the night shift of fourteen hours, twelve-fourteenths of an hour of leave shall be charged for each hour taken, calculated to the nearest fractional tenth.

SEC. 7. This Act shall take effect on the first day of the first full pay period which begins at least sixty days after the date of approval of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

REGULATION OF FARES FOR TRANSPORTATION OF SCHOOLCHILDREN

The Senate proceeded to consider the bill (S. 1745) to amend the act of August 9, 1955, relating to the regulation of fares for the transportation of schoolchildren in the District of Columbia, which had been reported from the Committee on the District of Columbia, with an amendment, on page 1, after line 7, to strike out:

"SEC. 2. As soon as practicable after June 30 of each year, the Washington Metropolitan Area Transit Commission shall determine and certify to the Board of Commissioners of the District of Columbia, with respect to each common carrier required to furnish transportation to schoolchildren at a reduced fare under this Act, an amount which is the difference between the total of such reduced fares paid each such carrier by schoolchildren during the preceding fiscal year and the amount which would have been paid each such carrier if such fares had been paid at the cash fare established by the Commission for regular route transportation. Within thirty days after receiving such certification, the Board of Commissioners shall pay to each such carrier an amount equal to the amount so certified. Any amount so received by each such carrier shall not be subject to the imposition of Federal income taxes or District of Columbia franchise taxes levied upon corporate income."

And, in lieu thereof, to insert:

"SEC. 2. If, after giving effect to any and all motor vehicle fuel tax and real estate tax exemptions, the net operating income of any common carrier required to furnish transportation to schoolchildren at a reduced fare under this Act for any twelve-month period ending June 30 is less than the rate of return by the regulatory Commission having jurisdiction in such carrier's last rate case, net after all taxes properly chargeable to transportation operations, including but not limited to income taxes, on its gross operating revenues, exclusive of any school fare subsidy, then the Washington Metropolitan Area Transit Commission shall, as soon as practicable after such June 30, certify to the Commissioners of the District of Columbia or their designated agent with respect to such twelve-month period: (1) an amount which is the difference between the total of all reduced fares paid to each such carrier by schoolchildren in accordance with this Act and the amount which would have been paid to each such carrier if such fares had been

paid at the lowest adult fare established by the Commission for regular route transportation; and (2) an amount which is the amount by which each such carrier's net operating income is less than such rate of return established by the appropriate regulatory commission in the carrier's last rate case, after giving effect to the aforesaid tax exemptions, exclusive of any such school fare subsidy. Upon such certification, the Board of Commissioners of the District of Columbia shall pay to each such carrier an amount equal to the amount certified pursuant to clause (1) thereof; except that in no event shall such amount exceed the amount certified pursuant to clause (2) hereof."

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to provide for the regulation of fares for the transportation of schoolchildren in the District of Columbia", approved August 9, 1955 (D.C. Code, sec. 44–214a), is amended by adding at the end thereof the following new section:

"SEC. 2. If, after giving effect to any and all motor vehicle fuel tax and real estate tax exemptions, the net operating income of any common carrier required to furnish transportation to schoolchildren at a reduced fare under this Act for any twelve-month period ending June 30 is less than the rate of return by the regulatory Commission having jurisdiction in such carrier's last rate case, net after all taxes properly chargeable to transportation operations, including but not limited to income taxes, on its gross operating revenues, exclusive of any school fare subsidy, then the Washington Metropolitan Area Transit Commission shall, as soon as practicable after such June 30, certify to the Commissioners of the District of Columbia or their designated agent with respect to such twelve-month period: (1) an amount which is the difference between the total of all reduced fares paid to each such carrier by schoolchildren in accordance with this Act and the amount which would have been paid to each such carrier if such fares had been paid at the lowest adult fare established by the Commission for regular route transportation; and (2) an amount which is the amount by which each such carrier's net operating income is less than such rate of return established by the appropriate regulatory commission in the carrier's last rate case, after giving effect to the aforesaid tax exemptions, exclusive of any such school fare subsidy. Upon such certification, the Board of Commissioners of the District of Columbia shall pay to each such carrier an amount equal to the amount certified pursuant to clause (1) thereof; except that in no event shall such amount exceed the amount certified pursuant to clause (2) hereof."

SEC. 2. The amendment made by the first section of this Act shall be applicable with respect to the twelve-month period ending on June 30 next following the date of enactment of this Act, and to each twelve-month period thereafter.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

BILL PASSED OVER

The bill (H.R. 6302) to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes, was announced as next in order.

Mr. BARTLETT. Over, Mr. President, this bill is too important to be passed on the call of the calendar.

The VICE PRESIDENT. The bill will be passed over.

PRESENTATION OF MONUMENT TO THE PEOPLE OF MEXICO

The Senate proceeded to consider the bill (S. 653) to provide for the presentation by the United States to the people of Mexico of a monument commemorating the 150th anniversary of the independence of Mexico, and for other purposes, which had been reported from the Committee on Foreign Relations, with an amendment, on page 1, line 7, after the word "Mexico", to strike out "in commemoration of the occasion of the one hundred and fiftieth anniversary of the independence of Mexico and the one hundredth anniversary of the triumph of Benito Juarez", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of State is authorized and requested to procure a statue of Lincoln to commemorate appropriately the independence of Mexico, and present the same, on behalf of the people of the United States, to the people of Mexico. Such monument shall be prepared only after the design, plans, and specifications therefor have been submitted to and approved by the Commission of Fine Arts.

SEC. 2. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, including payment of the cost of such statue, the design and construction of a suitable pedestal therefor, transportation, including insurance, erection of the statue in Mexico, and traveling expenses of persons delegated by the Secretary of State to present such statue, on behalf of the people of the United States, to the people of Mexico.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended, so as to read: "An Act to provide for the presentation by the United States to the people of Mexico of a monument commemorating the independence of Mexico, and for other purposes."

Mr. KUCHEL subsequently said: Mr. President, I ask unanimous consent that I may comment briefly, and that my comments may appear in the RECORD following the action taken on Calendar No. 859.

The VICE PRESIDENT. Is there objection to the request of the Senator from California? The Chair hears none, and it is so ordered.

Mr. KUCHEL. Mr. President, passed today by the Senate was legislation providing for the presentation by the people of the United States to the people of Mexico of a monument, the likeness of the sainted Abraham Lincoln. Standing in the beautiful capital of our neighboring Republic it will be a tangible indication of the growing friendship between two great Western neighbors.

There are no barbed wire entanglements running along the borders of America to the south or to the north. We are the friends of Mexico, as we are the friends of Canada. The people of Mexico and the people of the United States share a common heritage. Our culture has been enriched in great part by the culture and by the history of Mexico and by her people. We desire to be good friends. She and her people, like us, love liberty, desire an honorable peace, and object to any type of government by slavery.

I was rather interested the other day to note that the Government of Mexico has confiscated about 12 tons of Communist propaganda, printed in the Soviet Union, and sent to the Soviet Embassy in Mexico via Cuba. I suggest that in that example the Government of the United States might very well follow suit.

At any rate, the people of Mexico commemorate Abraham Lincoln, as do the people of the United States. In this Capital City of ours much of the beauty which we know has come from gifts from other nations in this hemisphere and around the globe, which add luster and beauty to the streets of Washington.

This monument is a tangible indication of the aspirations which the American people have for freedom, for the hemisphere, and for the globe.

My colleagues in the Senate on both sides of the aisle who joined me in sponsoring the legislation, endorsed by the State Department both in this administration and its predecessor, are grateful for the action the Senate is taking today in giving its stamp of approval to the gift of a monument to Mexico.

Mr. MANSFIELD. I compliment the distinguished acting minority leader on the remarks he has made relative to the passage of the bill he sponsored, in which capacity he was joined by a number of his colleagues on both sides of the aisle. I believe this is an evidence of the great amity, friendship, understanding, and tolerance which exists between the great Republic of Mexico, at the present time under the leadership of one of the great leaders in the hemisphere and of the world, Adolfo Lopez Mateos, and our country.

Of course there are many things in the past that we would like to forget, or at least not to remember. However, we cannot recall the past; we must live in the present, and prepare for the future.

This small token in its way is very significant and indicative of the feeling of love, admiration, respect, and affection which the citizens of the United States have for the citizens of the Republic of Mexico.

As one who was a participant in a conference last February in the beautiful city of Guadalajara in the State of Jalisco, at which time the Mexican delegates overwhelmed us with their hospitality and their understanding and their tolerance, I am indeed grateful that the Senate has unanimously passed the bill which was sponsored by the distinguished minority leader and which has now been brought to fruition. It is indeed symbolic of the deep friendship which exists between two great countries, Mexico and the United States.

Mr. KUCHEL. I am grateful to the able majority leader for his eloquence and the accuracy of his statement. It is indeed true that these two peoples must live together in peace and friendship and look forward to strengthening the bonds between the two countries.

Mr. ENGLE. Mr. President, I wish to associate myself with the remarks of the distinguished majority leader with reference to the legislation and to compliment my senior colleague on the authorship of the resolution. I am proud to be a coauthor with him.

Certainly those of us who live close to Mexico know how important it is for our two peoples to establish the kind of relationship that makes it possible for us to work together in harmony and in peace.

Last year I had the privilege of attending the Interparliamentary Conference, the first of its kind between Mexico and the United States, which was attended by 24 legislators from the United States and 24 from Mexico. Our association with these legislators was a revealing experience to all of us. It will help to bridge the gap of misunderstanding whenever there might be any between the two countries.

It gave us a proper grasp of the problems which face us on both sides of our international boundary. I am delighted that we did not adjourn before passing this measure authorizing our Government to present to the people of Mexico a monument of Abraham Lincoln to commemorate the 150th anniversary of Mexican independence.

Today Mexico stands among the forefront of the democracies. It is one of our stanchest allies in the defense of freedom and human dignity. The United States shares with Mexico a common historical experience in having thrown off the yoke of foreign domination. This common heritage has been an important factor in strengthening the hands of friendship between us in the fight to preserve the freedoms of the world.

The original intent was to send to the people of Mexico a statue of Miguel Hidalgo, the patriot whose call to freedom inspired Mexico's movement of independence. But it was the Mexican Government's own suggestion that, instead of a statue of one of their own heroes, we send them a monument of Abraham Lincoln. Here is one more example to prove that Abraham Lincoln not only "belongs to the ages" but to all nations. I can think of no finer gesture of inter-American friendship than to send to the people of Mexico a monument of a man who symbolizes the universal quest for humanitarianism and freedom.

It is my earnest hope that the House of Representatives will lose no time in sending this bill to the White House.

I am glad that the bill to provide for the presentation of a monument to commemorate the 150th anniversary of the independence of Mexico has passed the Senate and will further add to the atmosphere of good will and understanding between our two great countries.

Mr. KUCHEL. I thank my able colleague, because he and I come from a State whose specific California culture is intertwined with the culture and the history of Mexico and her people.

Mr. YARBOROUGH. Mr. President, I commend the distinguished senior Senator from California for his leadership in having the resolution considered.

The State of Texas also adjoins Mexico on the longest boundary between our two countries.

The United States conducts many joint activities with Mexico and has had many fruitful negotiations with her. Travelers and commuters in large numbers cross the border between the two nations. Our fishing and shrimp fleets fish in the Gulf of Mexico, off the coast of Tampico. We realize the necessity and also the advantage of highly desirable, friendly relations with our neighbor.

The population of Mexico has been increasing steadily until now it is about 35 million. The prosperity of the average citizen of Mexico and trade between our two countries have jumped immeasurably in the past decade.

U.S. tourist travel to Mexico amounts to as much as 70 percent of the total tourist traffic to Europe. Millions of Americans are now going south. That leads to a strengthening of the ties of friendship between the two great Republics of the North American Continent.

Again I thank the distinguished Senator from California for his leadership in the passage of the bill.

Mr. KUCHEL. I thank the distinguished Senator from Texas for the generosity of his remarks. He and his colleague from Texas, like the two Senators from California, come from a State which borders Mexico. I know that they have the same fondness and respect for their neighbors as we have and, indeed, which the people of our whole country have.

APPOINTMENT OF REPRESENTATIVE TO THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT

The Senate proceeded to consider the bill (S. 2423) to provide for the appointment of a representative of the United States to the Organization for Economic Cooperation and Development, and for other purposes, which had been reported from the Committee on Foreign Relations with amendments on page 1, line 9, after the word "shall", to insert "have the rank and status of minister plenipotentiary and", and on page 4, line 23, after "$7,800", to strike out "each"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Organization for Economic Cooperation and Development Act of 1961".

SEC. 2. (a) The President, by and with the advice and consent of the Senate, may appoint a permanent representative of the United States to the Organization for Economic Cooperation and Development (hereinafter referred to as the "Organization"), who shall have the rank and status of minister plenipotentiary and hold office at the pleasure of the President. Such representative shall be the representative of the United States to the Organization and shall perform such other functions in connection with the participation of the United States in the Organization as the President may from time to time direct.

(b) The President may appoint or designate an alternate permanent representative of the United States to the Organization to serve during the absence, illness, or other disability of the permanent representative provided for in subsection (a) of this section or in the event of a vacancy in that office. The President may also appoint or designate from time to time such other persons as he may deem necessary to represent the United States in the bodies of the Organization.

(c) Persons nominated by the President and elected to chair any committee or other body of the Organization shall receive compensation at rates determined by the President upon the basis of duties to be performed but not in excess of rates authorized by sections 411 and 412 of the Foreign Service Act of 1946, as amended (22 U.S.C. 866, 867), for chiefs of missions and Foreign Service officers occupying positions of equivalent importance. Any such persons may be granted allowances and benefits not to exceed those received by chiefs of mission and Foreign Service officers occupying positions of equivalent importance. If a Foreign Service officer shall be nominated by the President to serve under this subsection, the period of his service shall be considered as constituting an assignment for duty within the meaning of section 571 of the Foreign Service Act of 1946, as amended, and such person shall not, by virtue of such service, lose his status as a Foreign Service officer.

(d) All persons appointed or designated in pursuance of authority contained in subsections (a) and (b) of this section shall receive compensation at rates determined by the President upon the basis of duties to be performed but not in excess of rates authorized by sections 411 and 412 of the Foreign Service Act of 1946, as amended (22 U.S.C. 866, 867), for chiefs of mission and Foreign Service officers occupying positions of equivalent importance, except that no Member of the Senate or House of Representatives or officer of the United States who is designated under subsection (b) of this section as a representative of the United States in the bodies of the Organization shall be entitled to receive such compensation. Any person who receives compensation pursuant to the provisions of this subsection may be granted allowances and benefits not to exceed those received by chiefs of mission and Foreign Service officers occupying positions of equivalent importance.

SEC. 3. The representatives provided for in section 2 hereof, when representing the United States in the Organization, shall, at all times, act in accordance with the instructions of the President transmitted by the Secretary of State unless other means of transmission are directed by the President.

SEC. 4. There is hereby authorized to be appropriated annually to the Department of State, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary for the payment by the United States of its share of the expenses of the Organization, and for all necessary salaries and expenses of the permanent representative, other representatives, and persons provided for in section 2 hereof, and of their appropriate staffs, including personal services without regard to the civil service laws and the Classification Act of 1949, as amended; travel expenses without regard to the Standardized Government Travel Regulations, as amended, the Travel Expense Act of 1949, as amended, and section 10 of the Act of March 3, 1933, as amended; salaries as

authorized by the Foreign Service Act of 1946, as amended, and allowances and benefits of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); translating and other services, by contract; hire and purchase (not to exceed two, the cost of which shall not exceed $7,800) of passenger motor vehicles and other local transportation; printing and binding without regard to section 11 of the Act of March 1, 1919 (44 U.S.C. 111); official functions and courtesies; and such other expenses as may be authorized by the Secretary of State.

SEC. 5. The salaries, expenses, and allowances of any employees of the United States Government detailed to serve with the Organization which are payable by the Organization may be credited against the payment by the United States Government of its share of the expenses of the Organization.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. JAVITS subsequently said: Mr. President, I enter a motion that the vote by which Calendar No. 860, Senate bill 2423, to provide for the appointment of a representative of the United States to the Organization for Economic Cooperation and Development, and for other purposes, was passed today by the Senate, be reconsidered.

The PRESIDING OFFICER. The motion will be entered.

Mr. JAVITS. Mr. President, let me ask whether that motion is now in order.

The PRESIDING OFFICER. The entering of a motion to reconsider is a privileged matter, and is in order at any time.

BILLS AND JOINT RESOLUTION PASSED OVER

The bill (S. 1633) to establish a Department of Veteran Affairs and Housing, and for other purposes, was announced as next in order.

Mr. FONG. Mr. President, I ask that the call of the calendar be terminated at this point.

Mr. BARTLETT. With Calendar No. 860?

Mr. FONG. Yes.

The VICE PRESIDENT. Does the Senator request that Calendar No. 861, Calendar No. 862, Calendar No. 863, Calendar No. 864, and Calendar No. 865 go over?

Mr. FONG. Yes, beginning with Calendar No. 861.

The VICE PRESIDENT. The bills and joint resolution will be passed over.

The bills and joint resolution passed over are as follows:

S. 1633 to establish a Department of Veteran Affairs and Housing and for other purposes.

S. 2194 to amend the District of Columbia Unemployment Compensation Act of 1935, as amended.

S. 1761 to amend the act of March 3, 1901 relating to divorce, legal separation, and annulment of marriage in the District of Columbia.

S. 2180 to establish a U.S. Disarmament Agency for World Peace and Security.

Senate Joint Resolution 132 extending recognition to the International Exposition for Southern California in the year 1966, and authorizing the President to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition.

POINT REYES NATIONAL SEASHORE, CALIF.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business, S. 476, be laid before the Senate.

The VICE PRESIDENT. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 476) to establish the Point Reyes National Seashore in the State of California, and for other purposes.

The VICE PRESIDENT. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate resumed the consideration of the bill (S. 476) to establish the Point Reyes National Seashore in the State of California, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 6, line 5, after the word "acres", to insert "Notwithstanding the foregoing description, the Secretary is authorized to include within the Point Reyes National Seashore the entire tract of land owned by the Vedanta Society of Northern California west of the centerline of Olema Creek, in order to avoid a severance of said tract."; in line 16, after "(a)", to strike out "The" and insert "Except as provided in section 4, the"; on page 7, line 23, after "Sec. 4.", to strike out "Within such area the Secretary shall designate not less than twenty thousand acres of ranch land as a pastoral zone in which the open space shall be preserved. In order to preserve the pastoral scene the Secretary shall, with respect to land so designated, (1) acquire said land subject to its continued use and occupancy for ranching purposes, upon terms and conditions which he finds will preserve said scene; or (2) upon acquiring the fee title to said land, enter into lease agreements for its continued use for ranching purposes in such manner and upon such terms and conditions which he finds will satisfy said preservation objective. In carrying out the provisions of this section the Secretary shall utilize that alternative method which, with respect to the particular land involved, affords the most effective means of preserving Point Reyes National Seashore in accordance with this Act." and, in lieu thereof, to insert "Within such area the Secretary shall designate approximately twenty-six thousand acres of ranch or dairy land as a pastoral zone in which the existing open space and pastoral scene shall be preserved, the zone being generally depicted on map numbered NS–PR–7002, dated August 15, 1961, on file with the Director, National Park Service, Washington, District of Columbia. No parcel within the designated pastoral zone, exclusive of that land required to provide access for purposes of the national seashore, shall be acquired without the consent of the owner so long as it remains in its natural state or is used exclusively for ranching and dairying purposes, including housing directly incident thereto."; on page 8, after line 24, to insert:

(a) In acquiring access roads within the pastoral zone, the Secretary shall give due consideration to existing ranching and dairying uses and shall not unnecessarily interfere with or damage such use.

(b) So long as that tract of land generally known as Duck Cove, situated on the west side of Tomales Bay and containing approximately sixteen acres, is held by Duck Cove, Incorporated, and is devoted to the sole purpose of non-commercial, residential uses, the Secretary shall not acquire said land by condemnation.

On page 10, line 14, after the word "latest", to strike out "The owner shall elect the term to be reserved."; on page 11, line 20, after "(b)", to strike out "The Secretary is authorized to enter into cooperative agreements with the State of California regarding rules pertaining to hunting and fishing and management programs pertaining to fish, game, wildlife, and wild fur-bearing animals which in his judgment will not materially impair the scenic, scientific, and recreational features of the Point Reyes National Seashore." and insert "The Secretary may permit hunting and fishing on lands and waters under his jurisdiction within the seashore in such areas and under such regulations as he may prescribe during open seasons prescribed by applicable local, State, and Federal law. The Secretary shall consult with officials of the State of California and any political subdivision thereof who have jurisdiction of hunting and fishing prior to the issuance of any such regulations, and the Secretary is authorized to enter into cooperative agreements with such officials regarding such hunting and fishing as he may deem desirable.", and on page 12, line 14, after the word "Act", to insert a comma and "except that no more than $14,000,000 shall be appropriated for the acquisition of land and waters and improvements thereon, and interests therein, and incidental costs relating thereto, in accordance with the provisions of this Act"; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to save and preserve, for purposes of public recreation, benefit, and inspiration, a portion of the diminishing seashore of the United States that remains undeveloped, the Secretary of the Interior (hereinafter referred to as the "Secretary") is hereby authorized to take appropriate action in the public interest toward the establishment of the national seashore set forth in section 2 of this Act.

SEC. 2. (a) The area comprising that portion of the land and waters located on Point Reyes Peninsula, Marin County, California, which shall be known as the Point Reyes National Seashore, is described as follows by reference to that certain boundary map, designated NS–PR–7001, dated June 1, 1960, on file with the Director, National Park Service, Washington, District of Columbia.

Beginning at a point, not monumented, where the boundary line common to Rancho Punta de los Reyes (Sobrante) and Rancho Las Baulines meets the average high tide line of the Pacific Ocean as shown on said boundary map;

Thence southwesterly from said point 1,320 feet offshore on a prolongation of said bound-

ary line common to Rancho Punta de los Reyes (Sobrante) and Rancho Las Baulines;

Thence in a northerly and westerly direction paralleling the average high tide line of the shore of the Pacific Ocean; along Drakes Bay, and around Point Reyes;

Thence generally northerly and around Tomales Point, offshore a distance of 1,320 feet from average high tide line;

Thence southeasterly along a line 1,320 feet offshore and parallel to the average high tide line along the west shore of Bodega Bay and Tomales Bay to the intersection of this line with a prolongation of the most northerly tangent of the boundary of Tomales Bay State Park;

Thence south 54 degrees 32 minutes west 1,320 feet along the prolongation of said tangent of Tomales Bay State Park boundary to the average high tide line on the shore of Tomales Bay;

Thence following the boundary of Tomales Bay State Park in a southerly direction to a point lying 105.4 feet north 41 degrees east of an unimproved road heading westerly and northerly from Pierce Point Road;

Thence south 41 degrees west 105.4 feet to a point on the north right-of-way of said unimproved road;

Thence southeasterly along the north right-of-way of said unimproved road and Pierce Point Road to a point at the southwest corner of Tomales Bay State Park at the junction of the Pierce Point Road and Sir Francis Drake Boulevard;

Thence due south to a point on the south right-of-way of said Sir Francis Drake Boulevard;

Thence southeasterly along said south right-of-way approximately 3,100 feet to a point;

Thence approximately south 19 degrees west approximately 300 feet;

Thence south approximately 400 feet;

Thence southwest to the most northerly corner of the Inverness watershed area;

Thence southerly and easterly along the west property line of the Inverness watershed area approximately 9,040 feet to a point near the intersection of this property line with an unimproved road as shown on said boundary map;

Thence southerly along existing property lines that roughly follow said unimproved road to its intersection with Drakes Summit Road and to a point on the north right-of-way of Drakes Summit Road;

Thence easterly approximately 1,000 feet along the north right-of-way of said Drakes Summit Road to a point which is a property line corner at the intersection with an unimproved road to the south;

Thence southerly and easterly and then northerly, as shown approximately on said boundary map, along existing property lines to a point on the south right-of-way of the Bear Valley Road, approximately 1,500 feet southeast of its intersection with Sir Francis Drake Boulevard;

Thence easterly and southerly along said south right-of-way of Bear Valley Road to a point on a property line approximately 1,000 feet west of the intersection of Bear Valley Road and Sir Francis Drake Boulevard in the village of Olema;

Thence south approximately 1,700 feet to the northwest corner of property now owned by Helen U. and Mary S. Shafter;

Thence southwest and southeast along the west boundary of said Shafter property to the southwest corner of said Shafter property;

Thence approximately south 30 degrees east on a course approximately 1,700 feet to a point;

Thence approximately south 10 degrees east on a course to the centerline of Olema Creek;

Thence generally southeasterly up the centerline of Olema Creek to a point on the west right-of-way line of State Route Numbered 1;

Thence southeasterly along westerly right-of-way line to State Highway Numbered 1 to a point where a prolongation of the boundary line common to Rancho de las Reyes (Sobrante) and Rancho Las Baulines would intersect right-of-way line of State Highway Numbered 1;

Thence southwesterly to and along said south boundary line of Rancho Punta de los Reyes (Sobrante) approximately 2,900 feet to a property corner;

Thence approximately south 38 degrees east approximately 1,500 feet to the centerline of Pine Gulch Creek;

Thence down the centerline of Pine Gulch Creek approximately 400 feet to the intersection with a side creek flowing from the west;

Thence up said side creek to its intersection with said south boundary line of Rancho Puna de los Reyes (Sobrante);

Thence southwest along said south boundary line of Rancho Punta de los Reyes to the point of beginning, containing approximately 53,000 acres. Notwithstanding the foregoing description, the Secretary is authorized to include within the Point Reyes National Seashore the entire tract of land owned by the Vedanta Society of Northern California west of the centerline of Olema Creek, in order to avoid a severance of said tract.

(b) The area referred to in subsection (a) shall include also a right-of-way, to be selected by the Secretary, of not more than 400 feet in width to the aforesaid tract from the intersection of Sir Francis Drake Boulevard and Haggerty Gulch.

SEC. 3. (a) Except as provided in section 4, the Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, condemnation, transfer from any Federal agency, exchange, or otherwise, the land, waters, and other property, and improvements thereon and any interest therein, within the areas described in section 2 of this Act or which lie within the boundaries of the seashore as established under section 5 of this Act (hereinafter referred to as "such area"). Any property, or interest therein, owned by a State or political subdivision thereof may be acquired only with the concurrence of such owner. Notwithstanding any other provision of law, any Federal property located within such area may, with the concurrence of the agency having custody thereof, be transferred without consideration to the administrative jurisdiction of the Secretary for use by him in carrying out the provisions of this Act.

(b) The Secretary is authorized to pay for any acquisitions which he makes by purchase under this Act their fair market value, as determined by the Secretary, who may in his discretion base his determination on an independent appraisal obtained by him.

(c) In exercising his authority to acquire property by exchange, the Secretary may accept title to any non-Federal property located within such area and convey to the grantor of such property any federally owned property under the jurisdiction of the Secretary within California and adjacent States, notwithstanding any other provision of law. The properties so exchanged shall be approximately equal in fair market value, provided that the Secretary may accept cash from or pay cash to the grantor in such an exchange in order to equalize the values of the properties exchanged.

SEC. 4. Within such area the Secretary shall designate approximately twenty-six thousand acres of ranch or dairy land as a pastoral zone in which the existing open space and pastoral scene shall be preserved, the zone being generally depicted on map numbered NS–PR–7002, dated August 15, 1961, on file with the Director, National Park Service, Washington, District of Columbia. No parcel within the designated pastoral zone, exclusive of that land required to provide access for purposes of the national seashore, shall be acquired without the consent of the owner so long as it remains in its natural state or is used exclusively for ranching and dairying purposes, including housing directly incident thereto.

(a) In acquiring access roads within the pastoral zone, the Secretary shall give due consideration to existing ranching and dairying uses and shall not unnecessarily interfere with or damage such use.

(b) So long as that tract of land generally known as Duck Cove, situated on the west side of Tomales Bay and containing approximately sixteen acres, is held by Duck Cove, Incorporated, and is devoted to the sole purpose of noncommercial, residential uses, the Secretary shall not acquire said land by condemnation.

SEC. 5. (a) As soon as practicable after the date of enactment of this Act and following the acquisition by the Secretary of an acreage in the area described in section 2 of this Act, that is in the opinion of the Secretary efficiently administrable to carry out the purposes of this Act, the Secretary shall establish Point Reyes National Seashore by the publication of notice thereof in the Federal Register.

(b) Such notice referred to in subsection (a) of this section shall contain a detailed description of the boundaries of the seashore which shall encompass an area as nearly as practicable identical to the area described in section 2 of this Act. The Secretary shall forthwith after the date of publication of such notice in the Federal Register (1) send a copy of such notice, together with a map showing such boundaries, by registered or certified mail to the Governor of the State and to the governing body of each of the political subdivisions involved; (2) cause a copy of such notice and map to be published in one or more newspapers which circulate in each of the localities; and (3) cause a certified copy of such notice, a copy of such map, and a copy of this Act to be recorded at the registry of deeds for the county involved.

SEC. 6. (a) Any owner or owners (hereinafter in this subsection referred to as "owner") of improved property on the date of its acquisition by the Secretary may, as a condition to such acquisition, retain the right of use and occupancy of the improved property for noncommercial residential purposes for a term ending at the death of such owner, the death of his spouse, or the day his last surviving child reaches the age of thirty, whichever is the latest. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition less the fair market value on such date of the right retained by the owner.

(b) As used in this Act, the term "improved property" shall mean a private noncommercial dwelling, including the land on which it is situated, whose construction was begun before September 1, 1959, and structures accessory thereto (hereinafter in this subsection referred to as "dwelling"), together with such amount and locus of the property adjoining and in the same ownership as such dwelling as the Secretary designates to be reasonably necessary for the enjoyment of such dwelling for the sole purpose of noncommercial residential use and occupancy. In making such designation the Secretary shall take into account the manner of noncommercial residential use and occupancy in which the dwelling and such adjoining property has usually been enjoyed by its owner or occupant.

SEC. 7. (a) Except as otherwise provided in this Act, the property acquired by the Secretary under this Act shall be administered by the Secretary, subject to the provisions of the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535), as amended and supplemented, and in

accordance with other laws of general application relating to the national park system as defined by the Act of August 8, 1953 (67 Sta'. 496), except that authority otherwise available to the Secretary for the conservation and management of natural resources may be utilized to the extent he finds such authority will further the purposes of this Act.

(b) The Secretary may permit hunting and fishing on lands and waters under his jurisdiction within the seashore in such areas and under such regulations as he may prescribe during open seasons prescribed by applicable local, State, and Federal law. The Secretary shall consult with officials of the State of California and any political subdivision thereof who have jurisdiction of hunting and fishing prior to the issuance of any such regulations, and the Secretary is authorized to enter into cooperative agreements with such officials regarding such hunting and fishing as he may deem desirable.

SEC. 8. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, except that no more than $14,000,000 shall be appropriated for the acquisition of land and waters and improvements thereon, and interests therein, and incidental costs relating thereto, in accordance with the provisions of this Act.

SEC. 9. If any provision of this Act or the application of such provision to any person or circumstances is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

Mr. BIBLE. Mr. President, this measure is the second of the bills which would preserve great areas of our seashore for public use that has been considered by the Senate Committee on Interior and Insular Affairs, and reported to the Senate. Point Reyes is an area of great natural beauty and recreational potentialities located on the Pacific coast approximately 30 miles north of San Francisco.

The bill had the very careful consideration of the Committee on Interior and Insular Affairs. Amendments were carefully worked out, and committee action on it was unanimous.

Point Reyes National Seashore constitutes one of the three great national seashore areas to be preserved for public benefit and enjoyment that our committee hopes to move forward either in this session or early in the next session of Congress. We have already passed the Cape Cod bill, and it has been signed into law by President Kennedy.

I ask unanimous consent that a statement I have prepared concerning the Point Reyes National Seashore project be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BIBLE
POINT REYES NATIONAL SEASHORE

In his message to Congress on natural resources last February, President Kennedy pointed out, in part:

"From the beginning of civilization, every nation's basic wealth and progress has stemmed in large measure from its natural resources. This Nation has been, and is now, especially fortunate in the blessings we have inherited. Our entire society rests upon—and is dependent upon—our water, our land, our forests, and our minerals. How we use these resources influences our health, security, economy, and well-being.

"But if we fail to chart a proper course of conservation and development—if we fail to use these blessings prudently—we will be in trouble within a short time.

"Present projections tell us that our water use will double in the next 20 years; that we are harvesting our supply of high-grade timber more rapidly than the development of new growth; that too much of our fertile topsoil is being washed away; that our minerals are being exhausted at increasing rates; and that the Nation's remaining undeveloped areas of great natural beauty are being rapidly preempted for other uses."

Later in this message, the President said:

"America's health, morale, and culture have long benefited from our national parks and forests, and our fish and wildlife opportunities. Yet these facilities and resources are not now adequate to meet the needs of a fast-growing, more mobile population—and the millions of visitor-days which are now spent in federally owned parks, forests, wildlife refuges, and water reservoirs will triple well before the end of this century.

"To meet the Federal Government's appropriate share of the responsibility for fulfilling these needs, the following steps are essential:

* * * * *

"To improve both the quality and quantity of public recreational opportunities, I urge the Congress to enact legislation leading to the establishment of seashore and shoreline areas such as Cape Cod, Padre Island, and Point Reyes for the use and enjoyment of the public. Unnecessary delay in acquiring these shores so vital to an adequate public recreation system results in tremendously increased costs."

As chairman of the Subcommittee on Public Lands of the Senate Interior Committee, I made an official inspection trip to Point Reyes this spring, and from my own knowledge and observation, I heartily concur in the President's views. It is in truth an area of unique charm, great natural beauty, and endowed with outstanding recreational potentialities.

It is described by the "Pacific Coast Recreation Area Survey," published in 1959, as follows:

"The shoreline varies in character, with wide sandy beaches, wave-swept caves, offshore rocks, steep coastal bluffs and one 3-mile long sandspit. The upland consists of sand dunes and grassland graduating into chaparral and magnificent fir and pine forests. Also included are such features as Drakes Estero with its 28 miles of shoreline, nine inland fresh-water lakes plus Abbotts Lagoon of several hundred acres, several fresh and salt water marshes, and an interesting variety of birds and mammals."

The Department of the Interior's report on S. 476, the bill now before us, states:

"Point Reyes is one of the nine most important relatively unspoiled natural seashore areas in the United States. This was revealed by a comprehensive survey of the Nation's entire coastal and Great Lakes shoreline. Located only 30 miles north of San Francisco, the proposed national seashore area encompasses some 45 miles of undeveloped sandy beaches, wave-swept caves, offshore rocks and steep coastal bluffs with 53,000 acres of upland, including dunes, coastal grasslands, chaparral, and fir and pine forested mountains. Moderated by the moist ocean breezes, the cool summer temperatures provide delightful respite from the inland heat. This climate, in combination with the great variations in topography and soils of the area, has produced an extraordinary diversity of forests, beachlands, grasslands, dune vegetation and marshes. As a result, the wildlife exhibits a corresponding diversity, ranging from salt-water shore birds to birds and mammals typical of dense mountain forests. Moreover, historians believe that Sir Francis Drake may have repaired his vessel, the *Golden Hind*, here in 1579 before starting out across the Pacific on his journey around the world."

As mentioned in the Interior Department's report, an especially fortunate fact about the proposed national seashore is its location: Point Reyes is within easy access of the highly populous San Francisco-Oakland area, presently containing some 4½ million persons with an estimated increase to 7 million by 1980. The highway entrance to the peninsula is but some 30 miles or so north of downtown San Francisco. In addition, the National and State road pattern makes it easily accessible to tourists from all parts of the country.

An aspect of the pending legislation meriting particular attention is the manner in which the Interior Committee has amended the bill to protect both private rights and the interests of the State of California with respect to hunting and fishing in the area. The committee gave full and careful consideration to every objection to the establishment of the proposed national seashore, especially those made by dairy and beef cattle ranchers, and by commercial fishermen.

By its principal amendment to section 4, the committee has provided for the designation of a pastoral zone of 26,000 acres which shall not be acquired by the Secretary without the consent of its owners as long as the land remains in its natural state or is used exclusively for ranching or dairying purposes. Such a provision permits a reduction of land acquisition costs as well as the fostering of long-established ranching and dairying activities which, in the committee's judgment, will not interfere with the public enjoyment and use of those areas on the Point Reyes Peninsula most suitable for recreational pursuits.

The new language in section 4(a) is designed as a safeguard of ranching and dairying interests in those areas where the National Park Service must necessarily acquire rights-of-way for the development of access roads through the pastoral zone.

Section 4(b) permits the retention in private ownership of that area within the proposed seashore boundaries known as Duck Cove. This area on Tomales Bay is a closely held property presently devoted to seasonal occupancy by its owners; as long as it is maintained for private, noncommercial, residential use it will not be acquired by condemnation. The developed property enjoys a somewhat secluded location that would neither benefit the park development scheme if acquired nor obstruct development plans if permitted to remain in its present ownership.

The revised language of section 7(b) clarifies the procedure to be followed in the event the Secretary of the Interior determines that hunting and fishing are consistent with seashore objectives and requires that hunting and fishing, if and when permitted, be conducted under applicable local, State, and Federal laws.

S. 476, as amended, is an excellent bill, preserving as it does an outstanding seashore area for the enjoyment, education, and physical well-being of our fellow Americans of today as well as of future generations, and at the same time protecting private and State interests.

I commend it to the Congress and the American people.

Mr. BIBLE. Mr. President, the Point Reyes National Seashore bill (S. 476) is sponsored by the senior Senator from California [Mr. KUCHEL] and the junior Senator from California [Mr. ENGLE]. Both in its sponsorship and in action on

it, the measure is truly a nonpartisan one, being in the interests of all of the people of all of the States of the United States.

Mr. President, I move that the committee amendments be considered en bloc, and that the bill as thus amended be considered as original text for the purpose of amendment.

The VICE PRESIDENT. The question is on the motion of the Senator from Nevada.

The motion was agreed to, and the committee amendments were considered and agreed to en bloc.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. BIBLE. I am happy to yield to the distinguished senior Senator from California.

Mr. KUCHEL. For many years I have worked assiduously in behalf of the legislation now before the Senate to establish the Point Reyes National Seashore. S. 476, which was jointly introduced by my colleague from California [Mr. ENGLE] and myself, is the result of the hopes and careful planning by many public-spirited citizens who are interested in conserving and putting to controlled use for the benefit of all Americans the unique scenic, scientific, and recreational areas which exist within our land. As early as 1935, the Department of the Interior recommended the establishment of a 53,000-acre national seashore recreation area at Point Reyes. A preliminary report was submitted by the National Park Service in 1957.

It was then my privilege to secure an appropriation so that a more detailed land use survey and economic feasibility study could be undertaken. On April 14, 1960, a public hearing was held in the area by the Senate Committee on Interior and Insular Affairs. At that time, the able Director of the National Park Service, Conrad L. Wirth, appeared before the committee and informed the group of the support for a Point Reyes National Seashore by the Secretary of the Interior's Advisory Board on National Parks, Historic Sites, Buildings, and Monuments. A 3-year survey by the National Park Service agreed with this recommendation.

On August 10, 1960, the then Secretary of the Interior, Fred A. Seaton, favorably recommended such legislation. In this session of Congress, under the careful guidance and distinguished leadership of the Senator from Nevada [Mr. BIBLE], the Subcommittee on Public Lands held 3 days of hearings on S. 476. The subcommittee chairman and several other members again visited the area so that they would have an on-the-scene knowledge of the vastness and the beauty which had been described to them by the proponents of this measure as well as attempt to arrive at an equitable solution to the problems which inevitably arise in a project of this scope. Following this visit the Subcommittee on Public Lands and the full Interior and Insular Affairs Committee favorably and unanimously reported the measure which is now before you.

The proposed Point Reyes National Seashore, if established, would include 53,000 acres of the 64,000 acres which form the Point Reyes Peninsula, beginning approximately 15 miles north of the entrance to the Golden Gate Channel of San Francisco Bay and extending northward for 45 miles. In this unique area of wide, sandy beaches, with stark offshore rocks, one can stand high on the coastal bluffs and look out to a turbulent ocean where 382 years ago in 1579 that valiant English sailor, Sir Francis Drake, who plyed the Spanish Main, is said to have put in to what is now appropriately known as Drake's Bay, to repair his vessel, the *Golden Hinde*.

The seclusion that this peaceful inlet offered was to remain with the passage of the centuries. Since the now well-known Golden Gate and San Francisco Bay was accidently discovered almost two centuries later in 1769, by the Spanish explorer, Don Gaspar de Portola, who was traveling north from San Diego by land.

Much of the isolation and poetic charm remains despite the fact that this unique land area is located so close to one of the major metropolitan areas of our Nation, the San Francisco-Oakland Bay area. Besides the small communities of Bolinas and Inverness and such other groupings as Duck Cove and isolated homes here and there, the peninsula is largely occupied with fine dairy and beef ranches.

In 1960, a detailed study showed that there were 15 dairy ranches totaling approximately 19,000 acres and 10 beef cattle ranches with a total of 23,000 acres which were located within the boundaries of the present proposed seashore. An equitable solution in preserving the local economy has been reached in the bill before you. Approximately 26,000 acres within the 53,000-acre national seashore has been set aside to preserve most of the ranching and dairying lands.

As long as these areas are maintained for their present purposes which are vital to the needs of Marin County and the bay area, the Secretary of the Interior will not be able to acquire them. Over 2,000 additional acres include the communications facilities belonging to the Radio Corp. of America, and the American Telephone & Telegraph Co. A similar parcel of almost 2,000 acres is operated as a religious retreat for the Vedanta Society of Northern California. By continuing uses which are not incompatible with the purposes of the park the acquisition costs have been greatly decreased and the total amount authorized has been set at $14 million.

Mr. President, one other parcel of land known as Duck Cove of approximately 16 acres of which 8 are usable was included in the Point Reyes National Seashore but provision was made that the Secretary of the Interior "shall not acquire said land by condemnation" as long as it "is devoted to the sole purpose of noncommercial, residential uses." The community of Duck Cove which was incorporated to formalize long-existing arrangements as to the use of the common facilities such as the playground and beach area is delighted with the establishment of the Point Reyes National Seashore.

This little group of 10 members was founded originally 15 years ago when Dr. Richard Wistar, a professor at Mills College, visited a tiny cove with a small strip of beach frontage on Tomales Bay, adjacent to the Tomales Bay State Park. He sank a well and with neighborly help built an access road. It was the unanimous feeling of all members of the Subcommittee on Public Lands that the community nature of this group called for the privilege of transferability in case one of the members passed on. It is not the intent of the Committee on Interior and Insular Affairs to permit further subdivision than that already provided.

The Committee on Interior and Insular Affairs noted in its report on S. 476 that—

> This area on Tomales Bay is a closely held property presently devoted to seasonal occupancy by its owners; as long as it is maintained for private, noncommercial, residential use it will not be acquired by condemnation. The developed property enjoys a somewhat secluded location that would neither benefit the park development scheme if acquired nor obstruct development plans if permitted to remain in its present ownership.

Point Reyes has been aptly called a gem of the California coastline. With the passage of this legislation, it will truly be a gem of the American coastline—available for all the people who seek quiet solitude; or hiking, biking, or riding on the many paths and byways to be constructed; or a pleasant drive along the winding roads as the fog creeps in from the vast Pacific. Here now for all our people is an area ranging from majestic hills to grassy lowlands; an array of wildflowers to Douglas-fir; an occasional marsh to wide strips of sand; and floating birds such as geese and pelicans and animals such as sea lions and hair seals. Now this uniqueness belongs to the people.

I most earnestly urge prompt approval by the Senate of this measure in the interest of all of the people of our Nation.

Mr. BIBLE. I now yield to the distinguished junior Senator from California, who also has had a longstanding interest in this particular area. Senator ENGLE has been most helpful in bringing this meritorious measure to the floor of the Senate in its present well-considered form.

Mr. ENGLE. Mr. President, I desire to join with my senior colleague in expressing our thanks to the distinguished chairman of the subcommittee which handled the proposed legislation for the attention and courtesy he has shown to the people of our State. We appreciate particularly the time that he personally took to investigate, along with other members of the committee, the site of this proposed park.

The area is one remaining place where millions of people who live in the San Francisco Bay area will have an opportunity in the future to go for recreational purposes. The action of the Senate today in passing the bill will go a long way toward preserving one of the really great recreational areas of the country, and multitudes of people will

be grateful to the Senator from Nevada [Mr. BIBLE], the committee, and the Congress for the action taken today.

Mr. President, section 1 of this bill states its official purpose, which is "to serve and preserve, for purposes of public recreation, benefit, and inspiration, a portion of the diminishing seashore of the United States that remains undeveloped." The significant point that I wish to make is that if S. 476 is approved by the 87th Congress, this worthy purpose can be achieved within close proximity of one of the great metropolitan areas of our country.

This probably is our last opportunity, with respect to both time and geography, to accomplish our purpose anywhere near a growing urban area like the San Francisco Bay region. But we do still have the opportunity. The rugged grandeur of the seacoast, the wild beauty of the redwood groves, and the pastoral loveliness of the rolling farmlands still remain unspoiled on the Point Reyes Peninsula approximately 35 miles from downtown San Francisco.

Unless this area is preserved it will not remain in its natural state very long. The whole bay region is expanding rapidly, as I will show by some population statistics. This fact is not only a warning that we must act now or never with respect to Point Reyes, but it also is fair indication of the large mass of people who will need the recreational space here available and who will be able to enjoy the Point Reyes National Seashore to be established by this bill.

The 1960 census gave the official population of the nine-county San Francisco Bay metropolitan area as 3,638,000. The Department of Commerce has just completed a special study of the area which predicts that the population of the nine counties will increase to 5,729,000 by 1980. The projection for the year 2000 is 8,261,000.

Beyond the nine-county bay region, Point Reyes has an especial appeal to the citizens of the dry and hot counties of the Sacramento and San Joaquin Valleys. That appeal is the sight of the surging sea, the coolness of the ocean breezes and, yes, even the fog which is fairly common to the whole Golden Gate area in midsummer.

I do not mean to suggest, Mr. President, that the Point Reyes National Seashore is designed to serve the San Francisco Bay region alone, or California alone. This legislation would preserve Point Reyes for the recreational use and inspiration and enjoyment of every U.S. citizen. I think the National Park Service is correct when it predicts that visitors to Point Reyes may be expected from every State in the Union.

This is not a new proposal. The Congress has had an opportunity to ponder the merits of Point Reyes as a national seashore for more than 3 years. I first proposed the legislation as House Resolution 634 in July 1958 in the 85th Congress. It was approved by the House committee but not taken up on the floor. I introduced it also in the 86th Congress, as S. 2428, which served to expedite an intensive Park Service study of the area. With the study completed, in January of this year I introduced the more detailed and perfected version as S. 476.

I want to compliment the senior Senator from Nevada for his legislative handling of the bill in committee. As chairman of the Public Lands Subcommittee of the Senate Interior Committee, Senator BIBLE has conducted extensive hearings, both in California and in Washington. He has worked out certain amendments to the original bill which have solved many problems and accommodated the interests of many groups involved, without sacrificing the basic public interest and without chopping off the land areas needed for park purposes. He has brought a bill to the floor which meets my objective as the author of the legislation and which satisfies the expressed interests of all of the major groups concerned.

Mr. BIBLE. I thank the Senator from California.

The VICE PRESIDENT. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 476) was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. KUCHEL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ENGLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE OREGON DUNES: AN AREA UNEQUALED ON THE NORTH AMERICAN CONTINENT

Mrs. NEUBERGER. Mr. President, in recent hours many bills have been passed by the Senate. Yesterday, the Senate passed the bill to create and regulate wilderness areas in our country and for the preservation of many of our natural resources—the first bill of that sort ever to be passed by either House of Congress.

I was glad to be on the floor of the Senate today when the two Senators from California commented so succinctly on another historic bill; namely, the one creating at Point Reyes the second national seashore park. I was delighted to hear the junior Senator from California state that the overflow from the San Francisco Bay area will find the Point Reyes National Seashore an excellent recreational area.

I wish to urge that the overflow travel just a few miles to the north, where there is a very scenic area for them to visit, and it will soon join the great State on the south in a national seashore development.

Mr. President, early this year a group of my constituents organized a Committee for the Oregon Dunes to help preserve a particularly scenic section of my State's beautiful coastline. The committee, under the chairmanship of Mr. James A. Mount, of Portland, undertook an objective study of the area and the various proposals which had been advanced for its future development.

The conclusion of this citizen's committee was that establishment of the Oregon Dunes National Seashore, with propert safeguards, provides many advantages over other proposals for managing the area. I am pleased, of course, with the decision of the Committee for the Oregon Dunes, because it is my belief that enactment of a bill I introduced early this year, S. 992, would accomplish the objectives sought by this group of outstanding Oregon citizens.

President Kennedy has signed into law the act to establish the Cape Cod National Seashore. I certainly share the hope expressed by the President that this legislation will serve as the pattern and forerunner for action on other national seashore recreation bills pending before Congress, including the Oregon Dunes National Seashore.

Mr. President, the Oregon Dunes is an area unequaled on the North America continent. As such, it is certainly deserving of protection and development as a unit of the national park system. This is the theme of a detailed analysis and report which has been prepared by the Committee for the Oregon Dunes. I ask consent to include the text of the report in the body of the RECORD with my remarks; and I ask unanimous consent that my comments on the Oregon Dunes be printed in the RECORD following the remarks of the able Senators from California on the Point Reyes National Seashore bill which was passed this morning.

The VICE PRESIDENT. Without objection, it is so ordered.

The report is as follows:

THE OREGON DUNES AND THE WISE DECISION

This appraisal of the Oregon Dunes area is based upon our desire that this unique area of the Oregon coast be developed to provide the most suitable recreational benefits for the public and the greatest economic benefits to the surrounding area and to Oregon, and at the same time preserve the essential character of this unusually attractive area as part of our national heritage. It is undertaken in an effort to determine the essential facts about the various programs that have been proposed for the dunes area, to try and determine what would be the most desirable development program, and to recommend for the dunes a development program that should have the active support of the citizens and political leaders of Oregon and the Nation.

While different political leaders have been identified in varying degrees with different proposals for the development of the Oregon Dunes, we believe that the dunes development program should be nonpartisan and this report is prepared in that spirit.

CHARACTER OF OREGON DUNES

The Oregon Dunes area is almost universally regarded by all interested parties as an area of unique beauty and great potential for recreational use. There is no comparable area on the Pacific coast with the natural characteristics of the Oregon Dunes and it was identified as one of four or five most outstanding natural areas of any kind on the west coast by a survey of the coast conducted by the National Park Service in 1959. The sand dunes themselves have been identified as the most outstanding example of shifting dunes to be found anywhere on the North American Continent.

DUNES PRIMARY VALUE IS RECREATIONAL

It is generally recognized by all interested parties that recreational development is the primary economic value of the Oregon Dunes. In addition to the mass recreation uses of the area such as boating, swimming,

hiking, museums, etc., all plans recognize the special recreation qualities of the area which are suitable for trail hiking, bird watching, opportunities for solitude, scientific observation, scenic vistas and other features of esthetic and inspirational character. In fact, there has seldom been an area that has had a recreation potential so overwhelmingly superior to all other possible purposes. Since this basic fact has been recognized, the choice that Oregon must make is between the alternate programs of recreational development that have been proposed.

FOREST SERVICE PROPOSAL

The U.S. Forest Service has recently presented a comprehensive program for the development of a portion of the Siuslaw National Forest in the Oregon Dunes area into a major recreational area. Representative DURNO has introduced a bill in Congress giving legal sanction to this program and authorizing an expenditure of $9 million over a 10-year period for this purpose. The salient facts of the Forest Service proposal are discussed in the following paragraphs.

The Forest Service land lies almost entirely west of U.S. 101 and adjoins only a very small fraction of the shorelines of the principal lakes. There are significant amounts of private land within this area, including most of the property adjacent to the highway. Under Forest Service regulations this property could only be acquired through voluntary exchange of the private lands for other Forest Service property outside the area.

The Forest Service recreational plan envisions the development of a large number of campsites, and swimming and boating facilities to the extent that the Forest Service land gives access to lakes, which is limited. In addition, in a new departure for the Forest Service, they propose an active recreational program which includes special interpretive facilities and staff.

This latter proposal deserves careful consideration, for an appraisal of its significance includes many factors. Probably the foremost factor is that this would be a program new to Forest Service experience. Heretofore their program has been almost entirely passive, basically providing the facilities for camping. It has been the National Park Service that has conducted active interpretive programs in the outstanding natural areas of the country.

The Forest Service has been primarily organized, and its personnel have basically been trained, for a program of land management, principally forest management. Recreation has largely been an auxiliary consideration. The Forest Service is not organized for the planning and management of active programs for preservation of unique recreational, scenic, scientific, and geological areas for the benefit of the Nation at large. It is appropriate to wonder how effective an active program could be developed by an organization whose basic aims and operations are of a fundamentally different character, and where career success does not lie in achievements in the preservation and interpretive development of outstanding unique natural areas.

The Forest Service proposal envisions having only technical personnel on duty on a permanent basis and hiring temporary personnel for the heavy tourist season. It appears probable that the supervision of the Oregon Dunes would continue to be responsibility of the Smith River ranger, who is located outside the Oregon Dunes and has many other responsibilities of greater importance to his professional career.

The Forest Service report talks of multiple use, but this is an empty phrase for recreation is the only significant use of this area. This fact has been recognized by the Forest Service in their earlier action banning grazing and their proposal to eliminate any general timber cutting. There are situations where a single use is the only appropriate use for an area and other activities are both limited in potential and harmful to the best use. Multiple use is not applicable to the Oregon Dunes.

THE DURNO BILL (H.R. 6528)

It is known that the original Forest Service plans for this area were modified in accordance with Representative DURNO'S wishes, which he incorporated in his bill. This bill has several unique features.

One of these is the appropriation of $9 million over a 10-year period for the development of the Oregon Dunes. This is many times any amount mentioned in other development plans and there is no indication of how it is to be spent. The Pacific Northwest regional office of the Forest Service has no information on the utilization of this sum of money. A request for a budgetary allocation of this sum has been sent to Representative DURNO and the Chief Forester.

Another aspect of the Durno bill that deserves special consideration is that while it directs that recreation and conservation of scenic values are to be major purposes of this area, it also specifically states that no unnecessary restrictions are to be placed on other utilization of the area. This means that the Forest Service must permit other uses of the area, subject only to the vague limitation that recreational and scenic values are to be major purposes. This raises the real hazard that individual interpretations could result in other activities that would significantly change the natural character of the Oregon Dunes. Actually, it would be difficult to deny other activities because the phrasing of the bill directs that they are to be permitted.

This is in contrast to a national seashore under National Park Service administration which would preserve the area for all time for recreation purposes and would not be subject to change by changing administrative policies. If unique natural areas such as Oregon Dunes are to be preserved under a long-range policy of conservation and protection, administrative discretion must be limited to well-defined areas so that a hasty, ill-considered administrative decision (perhaps by a single man) cannot destroy for hundreds of years or perhaps forever the extraordinary natural values of the area sought to be preserved.

The significant fact is that the Durno bill gives wide discretionary power and specifically States that the Oregon Dunes shall be utilized for other purposes without unnecessary restrictions. This provides for less protection of the area than is found in national park legislation, which clearly specifies the preservation of the natural character of an area and would require congressional action to permit any fundamental change. Long experience has shown that such a major safeguard against the pressures of special interests is highly desirable. Scenic and recreational values are generally interpreted in a very narrow sense unless they are clearly and firmly made the sole purpose of an area.

At the present time the Forest Service proposes to limit timber cutting to dead, diseased, and dangerous trees. However, there is no bar to more extensive timber cutting at a later date, even though the dollar return would be insignificant in terms of the recreational income that would be available through comprehensive development. An additional hazard to the natural beauty of the area is the danger that the proposed cutting, unless very strictly controlled, would be undertaken in a manner that would be destructive of the natural and scenic value.

The Forest Service believes it vital to stabilize through planting approximately 6,600 of the 18,200 acres of dunes within their proposed area. Other estimates indicate that the actual moving dunes between the Suislaw and Umpqua Rivers totals only approximately 8,500 acres and that the proportion of this area that might be stabilized under the Forest Service program could be as high as 75 percent. The Park Service would stabilize a much smaller area, at most only a fourth of the Forest Service plans and possibly less than that. This difference in approach is important, for the basic attraction of the open dunes is their unique, living, moving character. The more the dunes are stabilized, the greater will be the interference with the processes of nature and the greater will be the destruction of the distinctive nature of the area.

While the Forest Service program plans the maximum development of the lakes within the Forest Service boundaries, these lakes are very limited in size compared with those that would be developed under the national park program. The Forest Service lakes total only 630 acres altogether. The inclusion of the principal lakes which would be part of the national park development would add 4,250 additional acres of lake surface which would be available for comprehensive recreational development.

THE NATIONAL SEASHORE PROPOSAL (S. 992)

The national seashore proposal, which is embodied in a bill introduced by Senator NEUBERGER, directs that the Oregon Dunes area be administered by the National Park Service. The program which would result from its adoption would differ in a number of significant respects from either a continuation of the present development of the area or the development that would occur if the Durno bill were passed.

A very important difference would be the area involved. The national seashore would include the entire area of the Oregon Dunes that belongs together naturally, geologically, and recreationally. The very significant difference is the inclusion of the principal lakes, which were formed by the ancient dunes, and the area bordering U.S. Highway 101. It would also mean the ultimate acquisition of all private land within the area. Unimproved land would be acquired immediately. Improved land which was being utilized for noncommercial residential purposes would be acquired over an extended period. Basically the national seashore proposal envisions the creation of an integrated unit comprising all of the principal areas of the Oregon Dunes. This area would be developed as a unit to provide comprehensive recreation use and to preserve the essential natural beauty of the area.

Controlled use of the extensive mass recreation areas, adjoining the unique natural areas, permits the preservation of the latter. A smaller Federal area, such as proposed by the Durno bill, will result in reduced ability to control use and to protect uniqueness. A far greater use pressure is brought to bear upon a smaller recreation area which can result in serious overuse and destruction of some of the unique features in the name of recreation, as has already occurred in some of the fine State parks along the coast.

The program for the acquisition of private property has several features which should be clearly understood. Owners of residential property may retain use of it for the rest of their lives, the lives of their spouses, and their children until they are 21, or for 25 years, whichever is latest. The property may be conveyed or leased. Zoning regulations are to be established for the protection of the area.

However, private property shall not be acquired for the seashore if it consists of a single-family dwelling, and adjoining land, which was constructed before January 1, 1961, and which is in an area with an approved zoning law. In addition, local property taxes will continue to be imposed on all

public property acquired in the area which is leased to a person in whose hands property is taxable and on all private property which, by virtue of approved zoning, is not acquired.

When private land is acquired, payments equivalent to the taxes on it will be paid to the appropriate county for the balance of the year of acquisition and the 2 succeeding years. At the end of this period it is expected that increases in property values adjacent to the national seashore will more than compensate for the tax loss.

The development program for the national seashore has been subject to considerable public misunderstanding, which has complicated the appraisal of the national seashore development program. A national seashore deviates in several significant respects from a national park. While both of them are limited to areas of such outstanding and unique natural attractiveness that they warrant special preservation and development, a national seashore is also an area that can sustain a much more varied and intensive recreational program. The Oregon Dunes program would actively encourage maximum recreational enjoyment consistent with the preservation of the natural values of the area. A major recreational activity which is specifically permitted by the national seashore bill is hunting, which is not allowed in national parks.

Another important feature of the Oregon Dunes National Seashore bill is the provision permitting the withdrawal of ground and surface water for use outside the seashore, as long as it does not materially impair the scenic, scientific, and recreational features of the national seashore.

Commercial and industrial use of land within the national seashore is prohibited, except as it may be specifically authorized by the Secretary of the Interior as being desirable for the recreational development of the seashore and in harmony with its natural values.

The national park program provides for extensive consultation with the State of Oregon in the development and administration of their program. An advisory board of five members would be established, two of whom would be residents of counties in the seashore. Two of the board would be appointed by the Secretary of the Interior and three by the Governor of Oregon.

In addition, the appropriate Oregon officials shall be consulted in the establishment of hunting and fishing regulations and cooperative arrangements may be established. While some individuals have felt that fishing and hunting within national park boundaries should be directly managed by the State, there are very good reasons why such a policy would be both inappropriate and hazardous. There should never be two agencies administering a major recreational area. In such a situation there would be danger of a festering disagreement developing between the Park Service staff, which is charged with the general recreational development program, and a State agency whose program is for one use. In addition, if the Federal Government should give up a portion of its management rights in Oregon, it would establish a precedent for similar action elsewhere. This would create a constant problem of conflicting management in all national parks, together with the intrusion of State politics into park management wherever and whenever aspiring politicians felt it personally advantageous to do so.

Actually, it is very likely that the Park Service hunting and fishing program would be largely in harmony with the State's desires. The principal hunting activity, which would be waterfowl, is basically governed by Federal regulations now. Fishing regulations are likely to be essentially the same as State regulations. Since the national seashore bill specifically provides for consultation and cooperation, there does not appear to be any real basis for concern. Certainly, it would be difficult to justify opposition to a development program which would do so much for the recreational and economic welfare of Oregon solely on this point.

The creation of a national seashore would mean the establishment of a substantial park staff in the area on a permanent basis. This permanent staff would be supplemented by a number of temporary employees during the season of heavy tourist use.

The national seashore staff would supervise the recreation development of the area, carry out an active program to encourage full recreational use of the area and create and conduct interpretive programs. Trained ranger naturalists will conduct extensive programs of a scientific, educational character utilizing museums and furnishing lectures as is customary in national parks. This type of interpretive activity is not likely to be furnished by the Forest Service in a comparable degree.

The basic purpose of the national seashore would be the protection, preservation, and recreational development of an area that is generally regarded as unique and outstanding in its scenic, recreational, and scientific qualities. This is an area that is considered of such national significance, similar to our various national parks, that it should be preserved and developed for the single purpose of recreational use, rather than having recreation receive only "primary" emphasis among many uses.

The unique character of an Oregon Dunes National Seashore would result in very substantial publicity for this area and for Oregon. All tourist guides and maps give prominent notice to national park facilities. Travel articles on our national parks appear regularly in national magazines and in newspapers. Travel tours are conducted to national parks. The Government-sponsored public information program is extensive. The benefits of this publicity which would accompany the establishment of an Oregon Dunes National Seashore would be of very great value in encouraging tourist visits to this area and to Oregon.

ECONOMIC POTENTIAL OF THE OREGON DUNES

The fact that tourist industry is Oregon's third largest economic asset, after forest products and agriculture and is the only one of these three which is capable of extensive and rapid growth, gives special emphasis on the economic implications of the different programs for the development of the Oregon Dunes. The most authoritative report on the economic potential of the Oregon Dunes was prepared in 1959 by Dr. J. Granville Jensen, chairman of the Department of Natural Resources at Oregon State University. This report compares the economic benefits that would result from a continuation of the present land use and recreational pattern with those resulting from the creation of a national seashore.

In summary, his conclusion is that the economic benefits to be obtained from the national seashore are overwhelmingly greater than those which would accompany the continuation of the present use pattern of the area. He estimates that 30 years from now the annual tourist income for just the adjoining area would be $26 million, more than 300 percent greater than could be contemplated under a continuation of the present use program.

Capital investment from private sources would exceed $14 million contrasted with $4,600,000 that would occur without the national seashore. Federal expenditures for capital improvements within a national seashore would total $3,535,000 compared with $1,200,000 of Federal and State expenditures.

This report also points out that the establishment of the national seashore would substantially increase the tax receipts in the surrounding area as a result of the major increase in businesses serving the tourists and the general rise in property values. This increase would greatly exceed the loss of tax revenue resulting from the incorporation of private land within the Oregon Dunes National Seashore. There is extensive evidence across the country supporting this conclusion.

All of Oregon would benefit from an Oregon Dunes National Seashore, but we cannot be so parochial that we consider only Oregon's interest. We must also recognize that there is a great national interest in proper development and protection of seashore areas.

WILDERNESS AREA PRESERVATION

Mrs. NEUBERGER. Mr. President, yesterday, while the wilderness area bill was being debated in the Senate, I had the good fortune to be presiding over the Senate, for I was intent on listening to all the debate.

At this time I should like to submit my own statement in support of the bill.

Mr. President, the bill to establish a National Wilderness Preservation System is the natural outgrowth of policies which have developed ever since President Teddy Roosevelt launched the U.S. Forest Service. When that agency was being established, Secretary of Agriculture James Wilson sent a letter of instructions to Gifford Pinchot, the famed first Chief Forester. The letter stated, in part:

> In the administration of the forest reserves it must be clearly borne in mind that all the land is to be devoted to its most productive use for the permanent good of the whole people and not for the temporary benefit of individuals or companies.

The wilderness bill seeks to assure that portions of the public domain still natural and unspoiled will be protected for "its most productive use."

All too few acres on this continent remain as our forefathers found them. The prudent thing to do is to give some protection to the scenic and majestic wilderness now available. We need these timbered sanctuaries from the pressures and tensions of 20th-century society.

The passage of S. 174 will have relatively minor effect on existing land uses in my own State of Oregon. Under the act, some 662,527 acres out of the 31.5 million acres of federally owned land in Oregon will go into the wilderness system without additional review. The basic wilderness system in Oregon will be comprised of Eagle Cap and Three Sisters Wilderness areas, and Diamond Peak, Gearhart Mountain, Kalmiopsis, Mount Hood, Mount Washington, Mountain Lakes, and Strawberry Mountain Wild Areas.

Only one primitive area in Oregon is available for later inclusion in the wilderness system. This is the Mount Jefferson primitive area, comprising 87,700 acres in the Deschutes, Mount Hood, and Williamette National Forests.

Under the provisions of S. 174, valid wilderness in national parks and national wildlife refuges and game ranges could be included in the wilderness system. Oregon has 160,290 acres in national parks and 438,069 in wildlife refuges. Very little of this acreage

will ever go into the wilderness system, for the simple reason that it is not valid wilderness.

For instance, the Hart Mountain Antelope Refuge, in Oregon, has 323 miles of roads maintained by the Fish and Wildlife Service. The road bisects the refuge, and a spur runs up Hart Mountain. The Malheur National Wildlife Refuge, in Oregon, is a T-shaped unit embracing Donner Creek and Harney and Malheur Lakes. It is crisscrossed with 240 miles of roads maintained by the Fish and Wildlife Service. I do not know the mileage of Federal and State roads in wildlife refuges in Oregon, but I do have the data on roads under jurisdiction of the Fish and Wildlife Service.

I ask unanimous consent to have printed in the RECORD information regarding the roads and trails on national wildlife refuges administered by the Bureau of Sport Fisheries and Wildlife.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The Bureau maintains 5,428 miles of roads and trails on 28,537,000 acres of land within 289 national wildlife refuges and game ranges. All of these roads and trails are located on the refuges and ranges in the 48 contiguous States where we have 270 projects aggregating 9,565,000 acres. There are also public highways on these projects which we do not maintain. We have no record of the mileage of such public roads, except that for Alaska there are approximately 2,125 miles of public and abandoned military roads.

The records for the national wildlife refuges in Oregon are as follows:

Name	County	Acreage	Miles roads and trails
Malheur	Harney	184,871.8	240
Hart Mountain	Lake	239,933.0	323
Cape Meares	Tillamook	138.5	0
Cold Springs	Umatilla	3,116.8	0
McKay Creek	do	1,836.5	0
Oregon Islands	Curry	21.0	0
Three Arch Rocks	Tillamook	17.0	0
Upper Klamath	Klamath	12,532.8	0
Klamath Forest	do	731.1	0
Lower Klamath	do	1,340.0	0
Charles Sheldon	Lake	627.5	0

Mrs. NEUBERGER. Mr. President, Crater Lake National Park in Oregon has 160,000 acres. It is pierced with roads and has considerable development to accommodate tourists and visitors. Almost 400,000 people went into the park last year. With three major highways traversing it, it could hardly be regarded as wilderness.

I have been advised that our entire national park system has 6,480 miles of roads and 8,589 miles of trails. Yet the argument has been made by opponents of the wilderness bill that vast amounts of national park and national wildlife refuges will be devoted to wilderness. I think that no reasonable person will contend that parks with 15,000 miles of roads and trails and with facilities for millions of visitors could all be included in wilderness.

There are in our parks and wildlife refuges some outstanding acres that should be kept roadless. They will be, under the procedures of S. 174. But there will be no blanketing of primitive national park and game refuges into the wilderness system. The acres to be added will be added only after lengthy study and review and only if the areas qualify as valid wilderness.

The claim has been made that S. 174 will limit timber harvesting in Oregon. This is not so. No commercial timber is being taken from any of the areas in Oregon which are eligible for inclusion in the wilderness system. Out of Oregon's 31.5 million acres of federally owned land, only 749,000 of national forest land is eligible for wilderness status. But this does not mean that it is all in forest. Only one-third—252,000 acres—is commercial forest land. Of the balance, 178,000 acres is open, rough mountain land, and 319,000 acres is noncommercial, scrub, high-alpine-type forest.

In the national forests in Oregon alone there are 487,000 acres of commercial forest land that need reforestation. Why should we let the logger into wilderness when we have almost a half-million acres that need reforesting? Here is where some initiative needs to be taken.

We have a conservation job to do, and a part of that job is holding in reserve some of our resources. I do not view this holding as one to meet future needs, I view it more as a spur to assure the rehabilitation of lands which have been wastefully used. If we stand firm on wilderness, we force the application of public and private initiative and energy to the rehabilitation of exploitable lands.

Each time an effort is made to chop away at the little bit of timber in wilderness, we must ask ourselves this question: Have we reached the end of our resource? Of course we have not. We have simply failed to do the conservation job that should be done. Let us get on with reforesting the commercial timber lands, and retain for future generations the untrammeled wilderness that now exists.

Mr. President, we have heard arguments that Congress should be required to pass individually and affirmatively on each new addition to the wilderness system in the future. However, it is my opinion that the provisions in S. 174 give Congress adequate veto power over any unwise additions to the wilderness. It will require between 10 and 14 years to complete the review of areas now eligible for inclusion. If we find that procedural improvements are necessary, the Congress has ample time in which to make any needful changes.

There is nothing new in the bill's provisions for giving the President and the executive departments authority to make decisions for use of the public domain. Since 1803, the Congress has made grants to the States of 328 million acres. Much of this acreage was given to the States under acts by which Congress empowered the President to grant the lands to the States.

Some 94 million acres were given the railroads, some of this under precise grants, other lands under more general grants.

In 1862, Congress gave the President the power to grant homesteads; and 248 million acres were so granted for settlers. The Desert Land Act of 1877 enabled the President to grant patents to 10 million acres, and the Stock Raising Homestead Act placed another 70 million acres in private hands.

The Timber Culture and Timber and Stone Acts placed almost 25 million acres in private hands.

In sum, over 1.1 billion acres has passed from the Federal domain to State or private ownership; and virtually all of this has occurred under laws passed by Congress which gave the President broad authority to transfer title.

If the argument of some persons were followed to its illogical conclusion, Congress would have had to give affirmative approval to each grant and homestead entry.

In the wilderness bill we are dealing with the use of lands that are already under Federal ownership. We are not changing the title of the land.

All of the policy issues over use really are settled. For the parks, forests, and wildlife areas there are basic statutes which give the President direction. In this bill we are creating a useful device by which the Congress can review Executive action to restrict one of the uses of these lands—use for wilderness—no more, no less.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider nominations on the Executive Calendar beginning with new reports.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Albert Lee Stephens, Jr., of California, to be U.S. district judge for the southern district of California;

Raymond E. Plummer, of Alaska, to be U.S. district judge for the district of Alaska; and

H. Moody Brickett, of Montana, to be U.S. attorney for the district of Montana.

By Mr. LONG of Missouri, from the Committee on the Judiciary:

William H. Becker, of Missouri, to be U.S. district judge for the western district of Missouri.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. MANSFIELD. Mr. President, I move that the nominations be considered en bloc.

The VICE PRESIDENT. The question is on the motion of the Senator from Montana.

The motion was agreed to, and the nominations were considered en bloc, and were confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate resumed the consideration of legislative business.

SMALL BUSINESS ACT

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 783, Senate bill 836.

The PRESIDING OFFICER (Mr. BARTLETT in the chair). The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 836) to amend the Small Business Act, and for other purposes.

The PRESIDING OFFICER. The question is on the motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill, which had been reported from the Committee on Banking and Currency, with amendments.

Mr. PROXMIRE. Mr. President, on February 9, 1961, I introduced a bill (S. 836) for myself, the Senator from Alabama [Mr. SPARKMAN], and the Senator from Indiana [Mr. CAPEHART]. Hearings were held on March 15, 16, and 17, and April 24, 1961, by the Small Business Subcommittee of the Banking and Currency Committee of which I am chairman. This bill was reported with amendments to the Senate on August 28, 1961. S. 836, a bill to amend the Small Business Act, is similar in many respects to H.R. 11207, which passed the Senate unanimously last July 1.

The bill passed the Senate unanimously last July and went to conference with the House. The bill would have been accepted in conference, except that it was rejected by a tie vote of the House conferees, with Senators unanimously supporting the far stronger bill. It was rejected because it was felt by the Defense Department that there were provisions in the bill which would result in the SBA interfering in the procurement process, and that should be exclusively and completely within the jurisdiction of the Defense Department.

We made compromise after compromise in S. 836 as compared with the bill last year. We have modified it very greatly. We have met virtually every objection that has been made by the Defense Department.

The bill not only applies to procurement, but it also would provide additional authorization for the SBA's revolving fund.

There are, however, some changes that I would like to point out to the Senate today.

First, the bill would increase the SBA's revolving fund by $36.5 million. This, together with the $20 million increase we just approved, would bring the total SBA revolving fund to $1,056,500,000. It would also provide for the pooling of the amounts that SBA can commit for its regular business loan program, its disaster loan program, and its prime contract authority. This pooling of loan authority would permit SBA to commit money for these three programs without regard to the ceilings that are presently contained in the act. The SBA estimates that if its revolving fund is increased by this amount and if the pooling amendment is adopted, it would be able to continue its regular business loan program until March 1962. This will give the Congress time early in the next session to review the lending programs administered by the SBA.

The committee deliberately decided not to provide funds to carry the SBA through 1962. It was an unusual decision by the committee. The feeling was that the SBA had expanded with such rapidity, the committee has a duty to the Senate to carefully consider the policies adopted by the SBA, to reconsider them early next year, and by limiting the authorization in this way, it will have an opportunity to do so.

This position had considerable bipartisan support.

The committee, in recommending this pooling of the amounts under this revolving fund authority, is mindful of the fact that this might at some time dangerously deplete the amount which could be available for the disaster loan program. Therefore, the committee recommended in its report on this bill that the SBA establish and maintain a reserve adequate to the needs of the disaster loan program.

The President has instructed the Department of Defense to increase the small business share of our military procurement dollar. He recommends that the small business participation be increased by at least 10 percent in fiscal year 1962. In order to facilitate such increased participation by small business concerns in our vast procurement program, this bill will provide for the development by the SBA, the Department of Defense and the General Services Administration of a small business subcontracting program.

This program would provide that all prime contracts of $1 million and above and all subcontracts of $500,000 and above shall include provisions which would insure that these contractors consult through the procuring agency with the SBA at the request of SBA. It would also provide that the SBA may obtain information on subcontracting from the procuring agencies.

This bill does not authorize a program which would dictate to the contractor the extent to which he should make contracts or the persons to whom the contracts should be granted. This bill clearly provides that any subcontracting program developed under this section will be administered by the procuring agencies.

The section provides that the three agencies shall cooperatively develop a contracting program. This means that SBA will participate fully in all stages of the development of this program, from the initial discussions to and including the formulation of the regulations in which this subcontracting program is to be expressed. In order to make it abundantly clear that the participation by SBA in the formulation of the program is to be carried through fully and completely, a specific provision was written into the section expressly requiring that SBA must approve the regulations before they are issued by the procuring agencies. In its report the committee makes it clear that SBA approval is necessary before the regulations can be issued.

While the subcontracting provisions are designed to give maximum assistance to small businesses, it is my understanding that the language of section 8(d)(1) would not authorize a procurement agency or the Small Business Administration to secure and disseminate technical data or processes developed by a company at its own expense.

S. 836 would also empower the Secretary of Commerce to obtain notice of all proposed defense procurement actions of $10,000 and above and all civilian procurement actions of $5,000 and above and publish them, with 10 stated exceptions, in the daily publication, U.S. Department of Commerce Synopsis of the U.S. Government Proposed Procurement, Sales and Contracts Awards.

We have met every single exception of the Defense Department.

This will furnish small businessmen an up-to-date record of what the Government is buying. Large corporations can afford to have representatives in Washington to furnish this information to them. Most small business concerns, however, cannot afford to receive this valuable service. This daily synopsis has a subscription rate of $10 per year. If there is any additional publication cost as a result of this bill, this cost should be borne by the subscribers.

I might say that the distinguished junior Senator from Michigan [Mr. HART] is completely responsible for all the initiative in having this particular provision incorporated in the bill. He pressed for it very hard last year, and he fought very hard for it again this year.

The Defense Department has informed the committee that it has now amended its regulations and accomplishes administratively what this section of the bill proposes.

However, the committee believes that it is better to have this requirement enacted into law and thus assure that this service will continue to be made available to the small business community.

I understand that there may be an amendment offered to the bill by the Senator from Texas [Mr. TOWER]. If so, the amendment, in my judgment, would reduce the authority and oppor-

tunity for the SBA to fight for small business to have a greater share of defense contracts. I wish to call the attention of the Senate to the fact that although the President of the United States only last January asked the Secretary of Defense to increase the share of small business by 10 percent, the fact is that the latest release of the Senate Select Committee on Small Business has this to say:

Small business share of military purchases hit an alltime low in fiscal 1961, dipping 15.9 percent compared with 16.1 percent in fiscal 1960. Research and development contract awards to small firms also dropped from 3.4 percent in fiscal 1960 to 2.8 percent in fiscal 1961.

It seems to me that small business should get a bigger share of this business. Unless we do something, unless we give this agency the responsibility and some opportunity and some authority in promulgating, together with GSA and Defense Department regulations, we will continue the relentless tendency and trend that we have had in the past of smaller and smaller share for small business in these contracts.

I hope the bill will pass.

Mr. TOWER. Mr. President, I ask unanimous consent that at this time I may yield to the Senator from Wisconsin [Mr. PROXMIRE] without losing the floor. He wishes to have action taken on the committee amendments.

The PRESIDING OFFICER (Mr. HICKEY in the chair). Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, a parliamentary inquiry: What is the pending business?

The PRESIDING OFFICER. The pending business is Calendar No. 783, Senate bill 836, to amend the Small Business Act.

Mr. PROXMIRE. Mr. President, I asked the question because some time ago I began to explain the bill, and then was interrupted in order to permit the presentation of statements in regard to a number of other measures. I ask unanimous consent that the entire debate on Senate bill 836 appear at one point in the CONGRESSIONAL RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill as thus amended be treated as original text, for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments agreed to en bloc are as follows:

At the top of page 2, to strike out:

"SEC. 3. Subsection 4(c) of the Act is amended

"(1) by striking out '$975,000,000' each place it appears and inserting in lieu thereof '$1,050,000,000'; and

"(2) by striking out '$575,000,000' where it appears in the fifth sentence and inserting in lieu thereof '$650,000,000'.

And, in lieu thereof, to insert:

"SEC. 3. Section 4(c) of the Act is amended to read as follows:

"'(c) The Administration is authorized to obtain money from the Treasury of the United States for use in the performance of the powers and duties granted to or imposed upon it by law, not to exceed a total of $1,056,500,000 outstanding at any one time. For this purpose appropriations not to exceed $1,056,500,000 are hereby authorized to be made to a revolving fund in the Treasury. Advances shall be made to the Administration from the revolving fund when requested by the Administration. This revolving fund shall be used for the purposes enumerated subsequently in sections 7(a), 7(b), and 8(a) of this Act, and in the exercise of the functions of the Administration under the Small Business Investment Act of 1958. Not to exceed an aggregate of $806,500,000 shall be outstanding at any one time for the purposes subsequently enumerated in sections 7(a), 7(b), and 8(a) of this Act. Not to exceed an aggregate of $250,000,000 shall be outstanding at any one time for the exercise of the functions of the Administration under the Small Business Investment Act of 1958. The Administration shall pay into miscellaneous receipts of the Treasury, at the close of each fiscal year, interest on the net amount of the cash disbursements from such advances at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities.'"

On page 5, line 9, after the word "deem", to strike out "desirable." and insert "desirable." ", and in the same line, after the amendment just above stated, to strike out "The Administrator may also request the Attorney General to make supplemental surveys and reports on any particular activities of the Government which may affect small business;"; at the beginning of line 13, to strike out the quote mark; in line 15, after the world "follows", to strike out "'Such" and insert "'Such"; line 21 to strike out "section.'" and insert "section." "; at the top of page 6, to strike out:

"SEC. 7. Section 8(b) of the Act is amended—

"(1) by inserting in paragraph (8) after 'concerning' the following: ', and for the purpose of review to have access to records involving,"; and

"(2) by amending paragraph (11) by adding after the word 'contracts' wherever it appears the words '(including subcontracts made pursuant thereto)'.

In line 8, to change the section number from "8" to "7"; after line 9, to strike out:

"(d)(1) Within ninety days after the effective date of this subsection, the Administrator, after consultation with the Administrator of General Services, the Assistant Secretary of Defense (Supply and Logistics), and the Chairman of the Atomic Energy Commission, shall promulgate a small business subcontracting program containing such provisions as may be appropriate (A) to enable small business concerns to be considered fairly as subcontractors and suppliers to contractors performing work or rendering services as prime contractors or subcontractors under Government procurement contracts, (B) to insure that such prime contractors and subcontractors will consult with the Administration when requested by the Administrator, and (C) to enable the Administration to obtain from any Government procurement agency such information and records concerning subcontracting by its prime contractors and their subcontractors as the Administration may deem necessary; except that no program promulgated hereunder shall prescribe the extent to which any contractor shall enter into subcontracts or specify the business concerns to which subcontractors shall be granted.

"(2) Every contract for property or services, including but not limited to contracts for research and development, but excluding contracts to be performed entirely outside of the United States or its territories, in excess of $1,000,000 made by a Government department or agency shall require the contractor to conform to the small business subcontracting program promulgated by the Administrator under this subsection (d), and to insert in all subcontracts and purchase orders in excess of $500,000 a provision requiring the subcontractor or supplier to conform to such small business subcontracting program.

"(3) The Administration shall include in any report filed under section 10(b) of this Act information, and such recommendations as it may deem appropriate, with respect to the administration of the small business subcontracting program promulgated under this subsection (d)."

And, in lieu thereof, to insert:

"(d)(1) Within ninety days after the effective date of this subsection, the Administrator, the Secretary of Defense, and the Administrator of General Services shall cooperatively develop a small business subcontracting program and shall approve the regulations implementing such program which shall contain such provisions as may be appropriate to (A) enable small business concerns to be considered fairly as subcontractors and suppliers to contractors performing work or rendering services as prime contractors or subcontractors under Government procurement contracts, (B) insure that such prime contractors and subcontractors will consult through the appropriate procuring agency with the Administration when requested by the Administration, and (C) enable the administration to obtain from any Government procurement agency such available or reasonably obtainable information and records concerning subcontracting by its prime contractors and their subcontractors as the Administration may deem necessary: *Provided*, That such program shall not authorize the Administration to (i) prescribe the extent to which any contractor or subcontractor shall subcontract, (ii) specify the business concerns to which subcontracts shall be granted, or (iii) vest in the Administration authority respecting the administration of individual prime contracts or subcontracts. Thereafter the Secretary of Defense and the Administrator of General Services each shall issue regulations implementing the program as developed. In addition, the Administrator of General Services and the Secretary of Defense may issue such other regulations concerning subcontracting not inconsistent with the small business subcontracting program as they each deem necessary or appropriate to effectuate their functions and responsibilities.

"(2) Every contract for property or services (including but not limited to contracts for research and development, maintenance, repair and construction, but excluding contracts to be performed entirely outside of the United States or its territories) in excess of $1,000,000 made by a Government department or agency, which in the opinion of the procuring agency offers substantial subcontracting possibilities, shall require the contractor to conform to the small business subcontracting program promulgated under this subsection (d), and to insert in all subcontracts and purchase orders in excess of $500,000 which offer substantial subcontracting possibilities a provision requiring the subcontractor or supplier to conform to such small business subcontracting program.

"(3) The Administration shall include in any report filed under section 10(b) of this Act information, and such recommendations as it may deem appropriate, with respect to the administration of the small business subcontracting program established under this subsection (d)."

On page 9, line 21, to change the section number from "9" to "8"; on page 11, line 1,

after the word "solicited", to insert "or (10) for which it is determined in writing by the procuring agency, with the concurrence of the Administrator, that advance publicity is not appropriate or reasonable." "; in line 5, to change the section number from "10" to "9"; after line 6, to strike out:

"(d) The Administration also is empowered to make grants to any State government, or any agency thereof, State chartered development credit or finance corporations, land grant colleges and universities, colleges and schools of business, engineering, commerce, or agriculture, and corporations formed by two or more of the entities hereinabove described which are eligible to receive such grants, for studies, research, and counseling concerning the managing, financing, and operation of small business enterprises and technical and statistical information necessary thereto in order to carry out the purposes of sections 8(b)(1) by coordinating such information with existing information facilities within the State and by making such information available to State and local agencies. Only one such grant shall be made within any one State in any one year and no such grant shall exceed an aggregate amount of $40,000. The Administration may require, as a condition to any grant under this section, that an additional amount not exceeding the amount of such grant be provided from sources other than the Administration to assist in carrying out the purposes for which such grant is made: *Provided,* That if such grant or any part thereof is to be utilized for the purpose of providing counseling services to individual small business enterprises the Administration shall require that such additional amount be provided and in an amount which is equal to the amount of such grant."

And, in lieu thereof, to insert:

"(d) The Administration also is empowered to make grants to any State government or any agency thereof, any State-chartered development credit or finance corporation, any land-grant college or university, any college or school of business, engineering, commerce, or agriculture, or to any corporation formed by two or more of the entities hereinabove described which are eligible to receive such grants, for studies, research, and counseling concerning the managing, financing, and operation of small business enterprises and technical and statistical information necessary thereto in order to carry out the purposes of section 8(b)(1) by coordinating such information with existing information facilities within the State and by making such information available to State and local agencies. The Administrator may recommend to grant applicants particular studies or research which are to be financed by such grants. The total of all grants (including amendments and modifications thereof) made under this subsection within any one State in any one year shall not exceed $40,000. The Administration may require, as a condition to any grant (or amendment or modification thereof) made under this subsection, that an additional amount not exceeding the amount of such grant be provided from sources other than the Administration to assist in carrying out the purposes for which such grant is made: *Provided,* That if such grant or any part thereof is to be utilized for the purpose of providing counseling services to individual small business enterprises the Administration shall require that such additional amount be provided and in an amount which is equal to the amount of such grant. What constitutes such additional amount may be defined by the Administration."

And, on page 13, after line 13, to strike out:

"SEC. 11. Section 502 of the Small Business Investment Act of 1958 is amended by deleting paragraph (6)."

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Business Act Amendments of 1961".

SEC. 2. As used in this Act, unless otherwise indicated, references to "the Act" are to the Small Business Act, approved July 18, 1958 (72 Stat. 384), as amended by the Small Business Investment Act of 1958, approved August 21, 1958 (72 Stat. 689), and Public Law 86-367 (73 Stat. 647).

SEC. 3. Section 4(c) of the Act is amended to read as follows:

"(c) The Administration is authorized to obtain money from the Treasury of the United States for use in the performance of the powers and duties granted to or imposed upon it by law, not to exceed a total of $1,056,500,000 outstanding at any one time. For this purpose appropriations not to exceed $1,056,500,000 are hereby authorized to be made to a revolving fund in the Treasury. Advances shall be made to the Administration from the revolving fund when requested by the Administration. This revolving fund shall be used for the purposes enumerated subsequently in sections 7(a), 7(b), and 8(a) of this Act, and in the exercise of the functions of the Administration under the Small Business Investment Act of 1958. Not to exceed an aggregate of $806,500,000 shall be outstanding at any one time for the purposes subsequently enumerated in sections 7(a), 7(b), and 8(a) of this Act. Not to exceed an aggregate of $250,000,000 shall be outstanding at any one time for the exercise of the functions of the Administration under the Small Business Investment Act of 1958. The Administration shall pay into miscellaneous receipts of the Treasury, at the close of each fiscal year, interest on the net amount of the cash disbursements from such advances at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities."

SEC. 4. Section 5 of the Act is amended by adding at the end thereof a new subsection as follows:

"(d) Section 3648 of the Revised Statutes (31 U.S.C. 529) shall not apply to prepayments of rentals made by the Administration on safety deposit boxes used by the Administration for the safeguarding of instruments held as security for loans or for the safeguarding of other documents."

SEC. 5. (a) Section 10 of the Act is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) The Administration shall make a report on December 31 of each year of operations under this Act to the President, the President of the Senate, and the Speaker of the House of Representatives. Such report shall include the names of the business concerns to whom contracts are let and for whom financing is arranged by the Administration, together with the amounts involved, and such report shall include information on the progress of the Administration in liquidating the assets and winding up the affairs of the Reconstruction Finance Corporation, and such other information and such comments and recommendations as the Administration may deem appropriate. The requirement contained in this subsection with respect to the inclusion of information respecting the progress of the Administration in liquidating the assets and winding up the affairs of the Reconstruction Finance Corporation in such report shall be in lieu of any requirement, pursuant to section 106(b) of the Reconstruction Finance Corporation Liquidation Act, and Reorganization Plan Numbered 1 of 1957, that progress reports with respect to such liquidation of or winding up of affairs by the Administration be made to the Congress on a quarterly basis.";

(2) by striking out "June 30 and" from subsection (b); and

(3) by striking out subsection (c) and inserting in lieu thereof the following:

"(c)(1) The Attorney General is directed to make, or direct the Federal Trade Commission to make for him, surveys of any activity of the Government which may affect small business, for the purpose of determining any factors which may tend to eliminate competition, create or strengthen monopolies, promote undue concentration of economic power, or otherwise injure small business.

"(2) The Attorney General shall submit to the Congress and the President, at such times as he deems desirable, but not less than once every year, reports setting forth the results of such surveys and including such recommendations as he may deem desirable."

(b) The second and third sentences of subsection (e) of section 708 of the Defense Production Act of 1950 are amended to read as follows: "Such surveys shall include studies of the voluntary agreements and programs authorized by this section. The Attorney General shall submit to the Congress and the President at least once every three months reports setting forth the results of such studies of voluntary agreements and programs authorized by this section."

SEC. 6. The fifth sentence of section 2(a) of the Act is amended by inserting after "contracts", each place the term appears, the following: "or subcontracts".

SEC. 7. Section 8 of the Act is amended by adding at the end thereof a new subsection as follows:

"(d)(1) Within ninety days after the effective date of this subsection, the Administrator, the Secretary of Defense, and the Administrator of General Services shall cooperatively develop a small business subcontracting program and shall approve the regulations implementing such program which shall contain such provisions as may be appropriate to (A) enable small business concerns to be considered fairly as subcontractors and suppliers to contractors performing work or rendering services as prime contractors or subcontractors under Government procurement contracts, (B) insure that such prime contractors and subcontractors will consult through the appropriate procuring agency with the Administration when requested by the Administration, and (C) enable the Administration to obtain from any Government procurement agency such available or reasonably obtainable information and records concerning subcontracting by its prime contractors and their subcontractors as the Administration may deem necessary: *Provided,* That such program shall not authorize the Administration to (i) prescribe the extent to which any contractor or subcontractor shall subcontract, (ii) specify the business concerns to which subcontracts shall be granted, or (iii) vest in the Administration authority respecting the administration of individual prime contracts or subcontracts. Thereafter the Secretary of Defense and the Administrator of General Services each shall issue regulations implementing the program as developed. In addition, the Administrator of General Services and the Secretary of Defense may issue such other regulations concerning subcontracting not inconsistent with the small business subcontracting program as they each deem necessary or appropriate to effectuate their functions and responsibilities.

"(2) Every contract for property or services (including but not limited to contracts for research and development, maintenance, repair and construction, but excluding contracts to be performed entirely outside of the United States or its territories) in excess of $1,000,000 made by a Government department or agency, which in the opinion of the procuring agency offers substantial subcon-

tracting possibilities, shall require the contractor to conform to the small business subcontracting program promulgated under this subsection (d), and to insert in all subcontracts and purchase orders in excess of $500,000 which offer substantial subcontracting possibilities a provision requiring the subcontractor or supplier to conform to such small business subcontracting program.

"(3) The Administration shall include in any report filed under section 10(b) of this Act information, and such recommendations as it may deem appropriate, with respect to the administration of the small business subcontracting program established under this subsection (d)."

SEC. 8. Section 8 of the Act is further amended by inserting after subsection "(d)" (as added by section 8 of this Act) a new subsection as follows:

"(e) It shall be the duty of the Secretary of Commerce, and he is hereby empowered, to obtain notice of all proposed defense procurement actions of $10,000 and above, and all civilian procurement actions of $5,000 and above, from any Federal department, establishment, or agency engaged in procurement of supplies and services in the United States; and to publicize such notices in the daily publication 'United States Department of Commerce Synopsis of the United States Government Proposed Procurements, Sales, and Contract Awards', immediately after the necessity for the procurement is established; except that nothing herein shall require publication of such notices with respect to those procurements (1) which for security reasons are of a classified nature, or (2) which involve perishable subsistence supplies, or (3) which are for utility services and the procuring agency in accordance with applicable law has predetermined the utility concern to whom the award will be made, or (4) which are of such unusual and compelling emergency that the Government would be seriously injured if bids or offers were permitted to be made more than 15 days after the issuance of the invitation for bids or solicitation for proposals, or (5) which are made by an order placed under an existing contract, or (6) which are made from another Government department or agency, or a mandatory source of supply, or (7) which are for personal or professional services, or (8) which are for services from educational institutions, or (9) in which only foreign sources are to be solicited, or (10) for which it is determined in writing by the procuring agency, with the concurrence of the Administrator, that advance publicity is not appropriate or reasonable."

SEC. 9. Section 7(d) of the Act is amended to read as follows:

"(d) The Administration also is empowered to make grants to any State government or any agency thereof, any State-chartered development credit or finance corporation, any land-grant college or university, any college or school of business, engineering, commerce, or agriculture, or to any corporation formed by two or more of the entities hereinabove described which are eligible to receive such grants, for studies, research and counseling concerning the managing, financing, and operation of small business enterprises and technical and statistical information necessary thereto in order to carry out the purposes of section 8(b)(1) by coordinating such information with existing information facilities within the State and by making such information available to State and local agencies. The Administrator may recommend to grant applicants particular studies or research which are to be financed by such grants. The total of all grants (including amendments and modifications thereof) made under this subsection within any one State in any one year shall not exceed $40,000. The Administration may require, as a conditon to any grant (or amendment or modification thereof) made under this subsection, that an additional amount not exceeding the amount of such grant be provided from sources other than the Administration to assist in carrying out the purposes for which such grant is made: *Provided*, That if such grant or any part thereof is to be utilized for the purpose of providing counseling services to individual small business enterprises the Administration shall require that such additional amount be provided and in an amount which is equal to the amount of such grant. What constitutes such additional amount may be defined by the Administration."

Mr. PROXMIRE. I thank the Senator from Texas.

Mr. TOWER. Mr. President, I call up an amendment to Senate bill 836 and ask that it be stated.

The PRESIDING OFFICER. The amendment of the Senator from Texas will be stated.

The LEGISLATIVE CLERK. On page 7, in line 25, beginning with the word "and", it is proposed to strike out all through line 1, on page 8, as follows: "and shall approve the regulations implementing such program".

Mr. TOWER. Mr. President, I should like to commend the distinguished Senator from Wisconsin [Mr. PROXMIRE] for his labors on this bill.

I believe that the bill is, on the whole, a good one which will be very helpful to small business.

However, I believe the bill has one serious defect; namely, it provides the Small Business Administration with virtual veto power over the procurement regulations of the Defense Department and the General Services Administration. In this day and age when we are trying to build up our Defense Establishment in order to meet the Communist threat, I think certainly the Defense Department should have a free hand in formulating its procurement policies.

I point out that the bill itself provides that the Department of Defense, the General Services Administration, and the Small Business Administration will cooperatively develop a small business subcontracting program; and this provision appears to me to be adequate. But the Defense Department has the greatest responsibility for developing effective procurement policies; and it must be allowed complete control, authority, and direction over its procurement policies.

At this time I yield to the Senator from Utah.

Mr. BENNETT. Mr. President, I am happy that the Senator from Texas made the last point with respect to the responsibility of the Defense Department, because as the cold war heats up, we might put ourselves into a tragic situation if we required the Defense Department, which might need to move rapidly in a procurement situation, to be governed by a set of regulations whose purpose was not to serve the needs of the Defense Department, but was to protect what everyone wants to protect; namely, the opportunity of small business to be considered in connection with the allocation of defense contracts.

The assumption in connection with the provision finally included in the bill is that the Defense Department cannot be trusted to consider the needs and the rights of small business; and that, therefore, another agency, with veto powers, must be put over the Defense Department, to serve as a barrier and a deterrent to the efficient operation of the procurement policies of that Department.

I personally feel that the consideration of this bill in the committee has made it abundantly clear that Defense, GSA, and SBA should consult and work together in the development of such a procurement program; but, in the event of some disagreement, I would think the needs of the Defense Department should override, if necessary, the point of view of the SBA.

Interestingly enough, the Senator from Texas [Mr. TOWER] and I, as Republicans, stand here to defend the position of the administration.

I certainly hope, in the present situation particularly, that we will realize that we are suggesting a situation that could make the operation of the defense procurement needs rather difficult. I hope the Senators in charge of the bill will accept the Tower amendment and preserve the consultative power of SBA, but not give it an ultimate veto power over the procurement program of our Defense Establishment.

Mr. TOWER. I wish to thank the distinguished Senator from Utah for his remarks, which I think build the strongest possible case for the adoption of this amendment. I should like to point, too, to the report of the committee, which makes it clear that the intent here is to give the SBA veto power over defense procurement, and I quote from the committee report:

> In order to make it abundantly clear that the participation by SBA in the formulation of the program is to be carried through fully and completely, a specific provision was written into the section expressly requiring that SBA must approve the regulations before they are issued by the procuring agencies. The committee wants to make it clear that SBA approval is necessary before the regulations can be issued.

I think it would be folly, when the Defense Department has the responsibility of accumulating the weaponry and the manpower necessary to defend our country against attack, against aggression, to give an administration that is not concerned at all with defense matters a veto power over procurement policies and regulations.

Mr. BEALL. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Maryland.

Mr. BEALL. Mr. President, I rise in support of the amendment.

At the same time, I wish to give my strong endorsement to the establishment of a small business subcontracting program. The language in this bill, however, would give to the Small Business Administration, a nonprocurement agency, powers to veto the rules promulgated by GSA and the Department of Defense. While I favor greater participation in this program by SBA, I sincerely doubt the wisdom of placing

the final determination in a procurement matter with a nonprocurement agency.

S. 836 provides sufficient funds to enable the SBA to continue its regular business loan program until March 1962. The funds provided in this bill are essential to the continued operations of the agency.

The subcontracting provisions of the bill are already controversial. If we accept the present language giving a veto power to SBA, I fear that we may jeopardize passage of the entire bill.

Since it will be necessary to bring another bill to the floor next year, I think it would be wise to accept the provisions recommended by the administration. We would then be in a position to review the program next year. During my 19 years in Congress, I have learned that the weeks immediately prior to adjournment are not conducive to the enactment of new programs. I would much rather return next year and give this matter the careful consideration it deserves.

I hope the Senate will adopt this amendment.

Mr. PROXMIRE. Mr. President——

Mr. TOWER. I yield to the Senator from Wisconsin.

Mr. PROXMIRE. I oppose the pending amendment. This question was discussed at great length in the subcommittee, and also in the full committee. There was a strong feeling by a number of us against weakening the opportunity to provide small business to get a greater share of defense contracts. The facts are clear. The latest figures indicate that small business gets a small percentage of the military contracts. In fiscal 1961 the small business share hit an all-time low. A few years ago the percentage of defense contracts obtained by small business was 25 percent. The figure has gone down to 16.1 percent in fiscal 1960 and 15.9 percent in fiscal 1961. The President of the United States directed the Secretary of Defense in January of this year to increase the amount 10 percent, from 16.1 to 17.6 percent. Instead, the percentage has gone down to 15.9.

We can talk all we want to about offering a small business program, but unless we have a program that has "muscle" for small business, it is going to get a smaller and smaller share of defense contracts.

The fact is that the Defense Department does have the No. 1 responsibility for our defense, and it should have. It should not have to be concerned in any significant way with problems of small business. The Department has much more important obligations to our Nation and to the free world than getting involved in such problems. That is why it is so important that we have an SBA, an agency which has its primary responsibility to small business, to make certain it will develop such a program.

Let me say that the bill before us has already been compromised very greatly as compared with the bill which we unanimously passed last year, which gave SBA far greater power than this bill gives.

H.R. 11207, which we unanimously passed last year, provided that SBA, after consultation with Defense, should itself, alone, develop a small business subcontracting program. SBA would have had sole power.

This bill provides that Defense and SBA and GSA cooperatively shall develop a small business subcontracting program.

Obviously, we have gone a long way toward diminishing the authority of SBA and have increased the authority of GSA and Defense.

Anybody who follows what has happened in the past knows that the Defense Department has the muscle, the authority, the prestige, and the power to make its authority felt.

H.R. 11207, the bill we passed last year unanimously, provided that primary contractors and subcontractors consult with and utilize the facilities of SBA when requested by the SBA.

This bill, S. 836, provides that prime contractors and subcontractors consult through the procurement agencies. In other words, in this year's bill SBA does not have an opportunity to go to a prime contractor and say, "Will you give a bigger share of your procurement contracts to this and that small business?" They cannot do that.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. KUCHEL. Let me say first that the language of the bill, reading on page 7, line 22, is as follows:

> Within ninety days after the effective date of this subsection, the Administrator, the Secretary of Defense, and the Administrator of General Services shall cooperatively develop a small business subcontracting program and shall approve the regulations implementing such program which shall contain such provisions as may be appropriate—

And then they are enumerated.

The able Senator from Texas seeks to strike out the last word, "and" on page 7, and, continuing on the next page, the words reading, "shall approve the regulations implementing such program".

I assume the language which the able Senator from Texas would strike out gives the Small Business Administrator the right to veto what the Defense Department determines to be the rules upon which subcontracts shall be let. Is that the purpose of the amendment?

Mr. PROXMIRE. The purpose of the bill is to provide that SBA will be an equal partner. The way the bill was drafted last year and unanimously passed by the Senate, the SBA, Defense, and GSA would consult together. But the SBA alone would determine the program. We change that and say GSA, SBA, and the Defense Department shall cooperatively approve, and it must be approved by all, including SBA. If the Defense Department does not approve, it vetoes the regulations. They can stall and prevent the program. It means that if there is not agreement, the three agencies may go to the White House, they may conceivably bring the matter, to some extent, to Congress and try to work it out.

This would give to the Small Business Administration a little more influence, a little more power, a little more opportunity to fight for a program which will give small business some bigger share of the defense contracts than small business has had in the past.

Mr. KUCHEL. Did the able Senator or the committee listen to the comments of the Department of Defense?

Mr. PROXMIRE. We did, at great length. The Department of Defense testified last year and testified this year.

Mr. KUCHEL. Did the Department of Defense approve the proposal?

Mr. PROXMIRE. Oh, no. The Department of Defense did not approve or disapprove this proposal. I would say they have gone 95 percent of the way with the bill as now drafted.

Mr. KUCHEL. Did any agency in the executive branch of the Government approve it?

Mr. PROXMIRE. No.

I should say that we have greatly modified the bill, which passed the Senate unanimously last year, to meet the objections of the Department of Defense. I am enumerating the compromises we made. The Department did not finally approve every last comma and semicolon.

Mr. KUCHEL. In other words, while the language has been changed, it is a fair statement to say that the Department of Defense objects to the language sought to be deleted by the able Senator from Texas.

Mr. PROXMIRE. The Department of Defense came in with a proposal in which it was stated there should be a joint determination of the program and that it should be worked out cooperatively. We modified our bill to accomplish that.

We did not go all the way. I think we went about 95 percent of the way. The committee decided that if we were to have a small business program we should give to the Small Business Administration the opportunity to approve regulations.

Mr. KUCHEL. I understand that. Is it fair to say that the Department of Defense objects to the language sought to be deleted by the Senator from Texas?

Mr. PROXMIRE. The Department had its own language. The language sought to be deleted by the Senator from Texas was not in this bill when Defense approved. It was added by the committee in the final markup of the bill.

Mr. JAVITS. Mr. President, will the Senator yield to me?

Mr. PROXMIRE. I am delighted to yield.

Mr. JAVITS. I should like to express my support.

Mr. PROXMIRE. I am sorry; the Senator from Texas [Mr. TOWER] has the floor.

Mr. TOWER. I am happy to yield to the Senator from New York.

Mr. JAVITS. I should like to explain to the Senator what happened in the committee with respect to the amendment. I must admit I had something to do with the way it now stands.

I know the Senator is serious about his proposal and will press it, but I think the RECORD ought to be clear as to how this came about.

Three things were at issue. First, who would initiate the regulations? Second, who would approve them? Third, who would issue them?

One position was taken by the Senator from Wisconsin [Mr. PROXMIRE] and those with him, who wished to make the Small Business Administration a full participant in every one of these functions. Then there was a very strong objection by the Department of Defense and its friends, who felt it was the job of the Department of Defense to issue procurement regulations. They did not wish to have the Small Business Administration in that picture.

They felt it would confuse the procurement officers, and so on.

I suggested the formula as a compromise. It comes down to the fact that the Small Business Administration appears in only one phase, only as to the capability for veto. It is somewhat like the question we considered yesterday with respect to the wilderness bill.

The Small Business Administration does not have the power to initiate. That remains with the procurement agencies. The Small Business Administration does not have the power to issue. That remains with the procurement agencies.

The Senator will notice certain language which he did not move to strike, which is contained on page 8 of the bill and which relates to issuance by procurement agencies.

The Small Business Administration would have the power of veto, if it found the regulations unsatisfactory in terms of small business.

That was a compromise of a difficult situation, with conflicting points of view as among various agencies.

I appreciate the Senator's position, but I must say it seems to me to be a fair compromise and a necessary compromise, in view of the fact that otherwise we cannot give to small business any real assurance, in view of the bad experience it has had with the major procurement agencies in terms of getting what we consider—I think quite fairly—to be an equitable share of the procurement.

I think that is the situation.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Utah.

Mr. BENNETT. This is a very interesting discussion, because in the record of hearings on page 231 and from there to page 239 is a copy of a letter which the committee received not from the Department of Defense but from John E. Horne, Administrator of the Small Business Administration. This is the Small Business Administrator speaking, and not the Department of Defense.

On page 236, as a part of the letter, Mr. Horne said, "I am, therefore, submitting the following redraft of section 8 of S. 836," prepared by the Department of Defense and the General Services Administration and the Small Business Administration.

Within that redraft are exactly the words which would remain in the bill if the Tower amendment is agreed to.

In other words, the Small Business Administration itself does not wish to have the power which the committee finally gave it.

Mr. Horne, in writing to the committee, proposed language which would be exactly what would remain if the Tower amendment is agreed to.

I have only one further observation. If the bill is passed, we shall face a situation which would create within the Government and within the area of defense the exact situation to which we apply the word "troika" with respect to the Russian insistence that there must be a three-headed control over, in that case, the suspension of testing of atomic bombs. In other words, the Russians wish to retain the power of veto.

We are asked to write into the bill a troika situation, under which the Small Business Administration would retain the power of veto over the Department of Defense in the face of the fact that neither the President nor the Administrator of the Small Business Administration wishes to have that power provided.

I agree with my colleague from Wisconsin that the advocates of giving to the Small Business Administration complete control over the procurement policies of the Department of Defense and the General Services Administration have retreated quite a ways, but they still would leave the troika principle, the Russian principle, which is that they must retain the power of veto. They would let the other man do all the work, and say, "Let him consult us. We will sit back, and if we do not like what he does, we will wipe it out with a wave of our hands."

I think this is particularly important under the present circumstances. It is far too serious to settle on the basis of a statement, "We have already retreated part way. We have only retained the right of veto."

We realize that the other body passed a bill which makes no change in the present situation. I think we would do well to agree to the Tower amendment and go to conference on a bill in which the troika principle is not involved.

Mr. TOWER. Mr. President, the problem should be put in proper perspective. Certainly we all feel that small business should receive an equitable share of defense contracts, but it should not have veto power over the procurement regulations of the Department of Defense.

Nothing could be more important than allowing the Department of Defense to procure goods and services with speed, dispatch, and efficiency at a time when we are trying desperately to build our Defense Establishment to meet the Communist imperialistic threat. This should override all other considerations.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Texas.

Mr. KUCHEL. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. KUCHEL. Mr. President, I ask for the yeas and nays on the amendment offered by the Senator from Texas.

The yeas and nays were ordered.

Mr. KUCHEL. Mr. President, I have a few comments to make.

We have never had a more dark or dismal future to contemplate. The Soviets are detonating nuclear bombs by way of testing and perfecting them. The Berlin crisis increases each day.

The Secretary of Defense and the Department of Defense have an overriding, crucial responsibility for the security of the American people.

The Senator from Texas deserves the commendation and congratulations of the Senate and of the country for bringing to the attention of the Senate today by his amendment the fact that the bill as it is presently worded would give to the Small Business Administration the right to stultify a portion of the responsibility which the Secretary of Defense has and ought to have.

No one in Congress has tried to be more helpful to the plight of American small business than has the Senator from California. I have been a member of the Subcommittee on Small Business. I have had the honor to join the able junior Senator from Alabama [Mr. SPARKMAN] time and time again in sponsoring legislation which would be of assistance to small business in America. I hope to be able to do so in the future.

But how can the Senate say to the Department of Defense, "Go away. We are not going to let the Senate give any consideration to the position that you take in discharging your responsibilities to the American people"?

The amendment of the distinguished Senator from Texas [Mr. TOWER] ought to be agreed to unanimously. I respectfully suggest to the Senate that this is not a time to place any kind of shackles on the men and the agencies in the American Government who are charged with providing this country with the sinews of defense and the strength and the Military Establishment to deter Communist aggression and, if necessary, to combat it. The amendment of the Senator from Texas ought to be agreed to unanimously.

Mr. TOWER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TOWER. Do I still have the floor?

The PRESIDING OFFICER. The Chair recognized the Senator from California. He was under the impression that the Senator from Texas had yielded the floor.

Mr. TOWER. I did yield the floor to the Senator from California.

The PRESIDING OFFICER. If the Senator from Texas wishes to be recognized, he is recognized now.

Mr. TOWER. I thank the Chair.

I should like to offer my gratitude to the distinguished Senator from California for his very piercing remarks. He has certainly gone directly to the heart of the problem. We know that everything we do in Washington is oriented by one consideration and that is the

necessity for the United States to maintain her defense perimeter as close to the enemy's shores as possible and as far from our own shores as possible. Our Defense Department must have the greatest latitude in formulating and implementing the policies necessary for us to maintain a position of military and strategic superiority to the Soviet Union, and this consideration must override and subordinate all others.

I therefore urge the Senate to agree to the amendment.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. JAVITS. I rise in opposition to the amendment. I think the amendment raises a fundamental question of policy, which is whether or not we believe that small business can or cannot contribute to the defense effort. In other words, is small business an anchor around the defense effort or is small business capable of contributing to the defense effort? That is the point now being argued. The argument is being made that we would do small business a favor, that we would carry it on our back because it interferes with the defense effort and we should not permit it to interfere. The argument is made that we should minimize its intrusion into the procurement process, and all business should be concentrated in big business. Then we will be sure that we will get everything that we want for defense. That is what the argument comes down to.

I come from New York, which has an enormous complex of small business. My State—and I think what I am about to say would go for many other States—is suffering from the fact that there has been a tremendous shift of defense contracts from the eastern part of the country to the far western part of the country. I think that we shall be put to even more of a disadvantage if we do not retain the bill in its present form. Either small business is capable of doing a job in respect of the defense procurement of the United States, or the Senator from Alabama [Mr. SPARKMAN], our whole committee and the Committee on Banking and Currency, have been wrong right along, and we are an incubus on the back of the body politic in the economy of the United States. That argument will be deeply resented by millions of small businessmen because it is not true.

The Defense Department authorities testified to that point themselves. Representatives of the Department are always saying how important, how valuable, how good, how efficient small business is, and how much it contributes. But when we come to the paying teller's window of actual participation by the Small Business Administration in the process of procurement, they are turned away. All the fine speeches and all the fine words are meaningless compared to the rollcall. This is where we will vote yea or nay depending on whether we think the small businessman contributes effectively to the defense effort.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. KUCHEL. Let us assume that the bill is passed in its present form. Let us assume that under the present wording of the bill the Administrator, exercising the authority given to him by the language sought to be striken by the Senator from Texas, would not favor the regulations implementing the program. Then, I ask my friend, on what basis would small business in America have any opportunity to participate?

Mr. JAVITS. I point out to the Senator that he might as well tell me in that case that the FBI will not enforce the law, or that the Secret Service will not protect the President, when it is their sworn duty to do so.

What law requires Congress to vote appropriations? My friend knows as well as I do that we can sit on our hands and bring the entire Government of the United States to an end by not doing our duty.

At the same time I would rather have the Small Business Administration, which is bound to carry out the law and the intent of Congress with respect to small business, as a party that has to agree, than to turn it over to the Department of Defense, which would use its own judgment and its own discretion without necessarily a regard to the small business field as to the kind of procurement regulations it will make.

In short, the Senator is saying that the Small Business Administration is not a coequal—equally patriotic and equally deserving in terms of the interest with which it is charged to deal—element of the U.S. Government, but that the Defense Department is superior to it in that regard. I cannot accept the argument, because that is not what Congress provided in the Small Business Act and in the authority of the Small Business Administration.

Mr. KUCHEL. Mr. President, all I ask is a simple question: Let us assume that under the language of the bill the Small Business Administrator states, "I will not approve these regulations." All I ask then is, On what basis would small business participate in the procurement of the Department of Defense? That is all I ask.

Mr. JAVITS. Then Congress has absolute authority, and the President has absolute authority to fire the Small Business Administrator on the ground that he would be running directly contrary to his duty, which is to help small business.

As I said to the Senator previously, it is absolutely inconceivable. We might as well say that we are going to sit on our hands and not vote appropriations. Surely we can do so. But would the country let us get away with it? Of course not.

To call on us to come to such a conclusion would call upon us to tax our imagination far more than to consider the possibility that if small business does not get into this process, what will happen will be exactly what has been happening all this time. Surely the volume of small business will be going down and down because there will be no one looking into the regulations and the processes that look after small business.

Mr. KUCHEL. Does the Senator suggest that while the proposed language gives the Small Business Administrator the right to approve or disapprove regulations implementing the program for small business, he would not exercise that right and would under no circumstances withhold approval?

Mr. JAVITS. I say nothing of the kind. I say that he would use his discretion, subject to the paramount authority of the President to fire the Secretary of Defense or anyone else in the process. In the final analysis, the sanctions which we have and the sanctions the country has lie in the final decision of the President. But we know from the dynamics of departmental operations that a department must participate in the process if we are going to get any particular result for the element of the economy that we represent. That is why the committee feels that the Small Business Administration must participate in this program.

Mr. KUCHEL. So that if the Small Business Administrator did not approve of the regulations, then the answer of my able colleague from New York would be that the President should remove the Small Business Administrator from his office?

Mr. JAVITS. If the Small Business Administrator, arbitrarily and contrary to the national interest of the United States, did not approve, he certainly should. That might be true not only of him but also of the Secretary of Defense and the Administrator of the General Services Administration. We are talking about processes in which various people participate. I do not see the Senator from California very much exercised about the fact that the Administrator of the General Services Administration is also supposed to participate in this process. He, too, can be arbitrary. The Secretary of Defense, too, can be arbitrary.

Mr. KUCHEL. The Senator from New York has supplied one more argument why the amendment of the Senator from Texas [Mr. TOWER] should prevail. We ought not to write into law a manacle by which any one of the three agencies would be able to shackle and to overrule the regulations under which small business participates in the defense procurement program. That responsibility rests, as it ought to rest, in the solid discretion of the Defense Department. It ought to stay there.

Mr. JAVITS. If it stays there we will have a repetition of the situation which we have had right along, under which small business cannot get its fair participation. We have tried it time and time again. If the amendment of the Senator from Texas prevails, it will copper-rivet it down and make it tight and make it clear that this is the intent of Congress, and that we do not have any special confidence in small business to carry its share of the load in relation to defense procurement.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. BENNETT. The Senator from New York has made the point that the Administrator of Small Business would

be more or less helpless if the Tower-Bennett amendment were approved. I have already indicated that in his letter of April 6, written to the committee, the Administrator of Small Business approved the language in the Tower amendment, and does not ask for this power which the committee is forcing on him.

It is hard for me to believe that the Small Business Administrator and his Administration would be so badly hamstrung when he is not asking for the power and is willing to proceed under the proposal which is represented by the amendment of the Senator from Texas.

Mr. JAVITS. I have not closely read the communication to which the Senator refers. I am not aware of the circumstances under which it was delivered. However, I would like to say that of course the Small Business Administrator can always appeal to the President. That has been their position up to now. Our position in committee was that it has not worked. We created the Small Business Administration. We created the Small Business Administrator. It is up to us to prescribe his powers and authority. If we think that what he is doing does not work, it is up to us to determine what will work. We believe that the scheme that we want to put forward, coming from the committee, has a much better chance of doing what we want done than what the Administrator has done up to now.

The Administrator, when he is suggesting policy, is dealing in a field in which he is not the sole judge. We are.

Although I have not read the details connected with the letter, I will take the Senator's word for it, and the letter is entitled to a certain amount of weight. However, it is not decisive. It is for us to say what we want him to do. It is up to us to say what will do most for small business.

Mr. BENNETT. I do not wish to repeat the full text of the letter, but the letter itself appears at page 231 of the hearings. I should like to read a few sentences to the Senator from New York:

> I am therefore submitting the following redraft of section 8 of S. 836.
>
> These recommendations are supported by the Department of Defense, the General Services Administration, and the Small Business Administration.

Incidentally, section 8 referred to by the administrator, is now section 7 in the bill as reported by the committee.

It means all three of them, acting together, propose the language which is identical with the language which will remain in the bill after the Tower amendment is adopted.

Mr. JAVITS. I do not even find the hearings on my desk, which is a little odd. So I am completely in the dark as to what the Senator has read. I am not disputing the Senator's point. As I say, it is up to us to determine what is the most effective type of approach in order to get a better program for small business. As far as the committee is concerned, we think this is the most effective type of approach.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. TOWER. No one is questioning the patriotism of the Small Business Administrator, nor his concern, or indeed that of any other agency, for the safety of the country. However, the point remains that it is not sound for the Small Business Administration to have a veto power over defense procurement. SBA should not be a coordinate partner with the Defense Department in defense procurement. We have heard a great deal of talk about helping small business. If we were introducing a bill to provide for right-to-work laws for the small businessmen, or to repeal the minimum wage for the small businessmen, I wonder if we would hear expressed very great concern for the small businessmen that we have heard here today.

Mr. JAVITS. In answer to the Senator from Texas I might say that what we are doing here is dealing with regulations on the small business subcontracting program, not the procurement activities of the Defense Department. We are dealing precisely with the area of activity which we have entrusted to the Small Business Administrator. Therefore, it seems to me very clear that if we want him to do what we expect him to do we must give him more muscle. It has often been said that the Small Business Administration lacks muscle. Of course, they have had advisers and they have been sent around to watch the situation and observe and study it and to advise about it. However, they have not had any muscle. This is the first time that we are giving it some muscle with respect to the subcontracting program itself, not with respect to defense procurement. This is a new initiative on the part of Congress in an attempt to do something substantively so far as small business participation in defense orders is concerned. We should not be frustrated in doing it by adopting the amendment offered by the Senator from Texas.

Mr. MILLER. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. MILLER. I have two observations I should like to make and I would appreciate it if the Senator from New York would comment on them. The first observation is that it seems to me we are getting too many regulations cranked into this picture. At the top of page 8 of the bill there is a provision for regulations implementing the subcontracting program. Down at line 20 it states:

> Thereafter the Secretary of Defense and the Administrator of the General Services Administration each shall issue regulations implementing the program as developed.

It seems to me we have a duplication of regulations, which is not good. I believe all of us know that we have too many regulations now which businessmen must keep up with. I am just wondering if the provision which the Tower amendment seeks to strike was not put into the bill without taking into consideration that we have all these other regulations provided for, starting with line 20. That is the first observation.

The second observation is this: The Senator from New York is talking about giving some muscle to the Small Business Administration. But it seems to me the muscle has been taken out pretty well, starting at line 14, page 8, where reference is made to the program which is to be developed, and, of course, in turn, the regulations to implement that program. The language reads: "*Provided*, That such program shall not authorize the Administration to (i) prescribe the extent to which any contractor or subcontractor shall subcontract, (ii) specify the business concerns to which subcontracts shall be granted, or (iii) vest in the Administration authority respecting the administration of individual prime contracts or subcontracts."

There goes the muscle. It has already been taken out. I cannot see how the adoption of the Tower amendment will interfere in any way with the effectiveness of the Small Business Administration's program. The heart of it, it seems to me, is the program. In turn, the regulations to implement that program are prescribed, starting on line 20. I think the Small Business Administration and the powers envisaged by Congress for that administration would be amply protected by having the Tower amendment in the bill.

Mr. JAVITS. In answer to the Senator from Iowa, regulations, of course, will have to be issued. They are issued now. Nothing is being done now which will not be in the new set of regulations. It depends on what terms the regulations will carry. That is what we are debating now, because of the way in which they shall be approved. The question of promulgation is something the committee debated. The promulgating of regulations is an autonomous authority of the governmental departments which do the procuring. So we provide that power to them.

The reason I use the word "muscle" is this: Certainly, as the Senator from Utah [Mr. BENNETT] properly said, if we eliminate what the Tower amendment seeks to eliminate, we refrain from giving to the Small Business Administrator any responsibility or any authority to approve. We confine him to the fact that he shall be conferring with these agencies in order to cooperatively administer the program; but if they override him, then he must go to the President. That procedure has been found ineffective up to now.

On the other hand, if we give him this element of muscle, by which he, too, will become a high contracting party, he, too, will have to give his approval. We will, for the first time, have given small business a real voice in what would be contained in the regulations.

There will be no duplication of regulations, because they will be regulations which would have to be issued anyhow. The bill will provide that they are to be issued not only by GSA and the Department of Defense, but also are to be approved by them, if this is without any participation in the approval by the Small Business Administration. So I do not see how we are duplicating or making any more complicated the issuance

of regulations than we do whether we adopt the Tower amendment or not.

Mr. MILLER. May I ask, with respect to the last point, whether the regulations referred to on line 1, page 8, are the same regulations as are referred to starting in line 21, page 8?

Mr. JAVITS. That is my understanding, very clearly. I shall ask the Senator from Wisconsin, who is in charge of the bill, to confirm that understanding.

The question is whether the regulations which are referred to in the language sought to be stricken by the Tower-Bennett amendment are the very same regulations as are referred to on page 8, lines 20 to 22, inclusive.

Mr. PROXMIRE. The answer is, "Yes, they are the same."

Mr. JAVITS. Of course. That is my understanding, too.

Mr. MILLER. I appreciate the Senator's clarification of that point.

Mr. COOPER. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. COOPER. Adverting to the question raised by the Senator from Texas, I ask the Senator from New York if there is any force or validity to the argument which has been made that the language contained in this section would limit the Secretary of Defense and the Department of Defense, either in contracting or subcontracting activities, would limit their power and flexibility to make contracts or subcontracts for property or services, or for research and development, even though it were thought those regulations were not advantageous to the general security of the United States?

Mr. JAVITS. I do not believe there is anything in the bill which would limit the procurement capability of the Secretary of Defense. We are dealing only with the promulgation of a set of regulations. So far as the regulations are concerned, before he promulgated them, he would have to get the approval of his colleague in Government, in the executive department, the Small Business Administrator. If he does not like what his colleague is trying to do under the subcontracting program, he can always go to the President, who can overrule them all. This is a technique which has been adopted in foreign aid bills time and again, where there is a cooperative responsibility among the Department of State and other agencies of the Government. This is the first time, and a very effective time, in which we are trying to introduce the Administrator of Small Business. We are finally trying to give him some muscle, in terms of muscle which he can authorize with respect to other programs and agencies. However, I cannot see how in any way that would interfere with the Department of Defense programs and activities once these regulations are adopted. We expressly provided, as was contemplated in the committee, that the Department of Defense should put its own imprimatur on the regulations, should administer them itself, should interpret them itself. Once they get by the regulations stage, they are through the Small Business Administrator, except to the extent they deal with him now in their effort to get set-aside and give people information in terms of the defense program. We are introducing a new element, the element of giving the Administrator some say in the regulations which will be promulgated by the Department of Defense and the General Services Administration.

Mr. COOPER. I appreciate the Senator's explanation, but I must say that this point troubles me, as I am sure it troubles other Senators. I think it was last year or earlier this year, in connection with another bill, that the distinguished junior Senator from Louisiana [Mr. LONG] offered an amendment which provided that no Army installation could be moved, even though the Department of Defense needed to move or close that installation, unless the Department had the approval of some other agency. Anyway, the proposal was argued quite vehemently on the floor of the Senate. Many Senators thought the amendment was absolutely inconsistent with the security or the defense of this country to let some other agency determine what the Department of Defense should do, even though the ideas of the other agency were inconsistent with the protection and security of the country.

My only remaining question is this: What authority has the Secretary of Defense in cooperating with the Administrator of Small Business and the Administrator of General Services in developing these regulations? I think the Senator said that if there was a disagreement, it would always go back to the President. Is that the ultimate resort?

Mr. JAVITS. I do not think that is the ultimate resort, because we are dealing with a totally different quantity of authority in respect of this bill compared with the analogy which the Senator from Kentucky gave. The Small Business Administrator is not engaged in the day-to-day, month-to-month program activity of the Department of Defense. The Small Business Administrator comes into the process only in respect to the regulations. Once they have been issued, that is the end of his role, so far as this particular amendment is concerned. So he will not participate in the day-to-day or month-to-month decisions—the dynamics of the administration of the program or the administration of the Department of Defense.

Mr. SPARKMAN. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. SPARKMAN. That is specifically provided for in the proviso referred to by the Senator from Iowa [Mr. MILLER], a moment ago, which appears on line 14, page 8, of the bill. The language provides that the Small Business Administrator shall have nothing to do with the administration of contracts or the giving of subcontracts, and so forth.

Mr. JAVITS. The second point, which is very important on its face, is this: Where there is given what I call some muscle in respect to this matter, it is being given in respect to the small business subcontracting program. So the worst that could happen if the Small Business Administrator became obstinate or obdurate—and the Senator from California pointed that out—is that he would hurt the interests he is sworn to protect. If he becomes impossible to deal with, he will hurt the small business program more and more. He does not interfere with the general defense program or defense activities of the Department of Defense on any theory that it can get along without small business. But he would really be cutting off his own nose to spite his face, which seems to us to be inconceivable. So, if he did not agree, he would not cripple the Department of Defense; he would only hurt himself and the agency he was obligated to protect.

In the second place, if he did not participate in the dynamics of administration, but participated only in the rule-making process, once that was launched, it would end his participation in terms of the veto authority.

For those reasons, I do not believe that the normal operations of the Department of Defense would be interfered with.

Mr. COOPER. Mr. President, will the Senator from New York yield?

The PRESIDING OFFICER (Mr. METCALF in the chair). Does the Senator from New York yield to the Senator from Kentucky?

Mr. JAVITS. I yield.

Mr. COOPER. I assure the Senator from New York that I am not trying to find in the bill some hobgoblin which does not exist; but I think it is well for the Senator to interpret the amendment, which I know he had a great deal to do with developing.

On page 8, in line 20, we find the following:

> Thereafter the Secretary of Defense and the Administrator of General Services each shall issue regulations implementing the program as developed.

It seems to me that once the program is developed, the Secretary of Defense will be bound to issue regulations implementing the program; and that would be carried out by the further language, beginning in line 22:

> In addition, the Administrator of General Services and the Secretary of Defense may issue such other regulations concerning subcontracting not inconsistent with the small business subcontracting program as they each deem necessary or appropriate to effectuate their functions and responsibilities.

I know that the Small Business Administration is not engaged in the procurement activities of the Department of Defense; and the provision I have just read indicates that the regulations which the Secretary of Defense would be required to implement or which he might develop on his own initiative would have to adhere to the standard of consistency with regulations previously agreed to by the Administrator of the Small Business Administration, the Secretary of Defense, and the Administrator of General Services. But it seems to me that this provision goes back to the first provision about the development of regulations.

I should like to ask this question: In the event the Secretary of Defense determined that the regulations which might have been agreed to by the Administrator of General Services were not consistent with his obligations in

regard to the security of the Nation and the best methods of procurement, what would be his recourse?

Mr. JAVITS. His recourse, it seems to me—and it is very clearly spelled out—would be to go to the President, who is the final arbiter with respect to any conflicts between the executive departments. If the Administrator arbitrarily refused to agree, according to my interpretation—and the floor manager of the bill is here, and I believe it important that he confirm this statement, if he agrees—my interpretation is that if the Small Business Administrator refused to agree about the small business procurement regulations, then the Administrator of General Services and the Secretary of Defense could issue subcontracting regulations of their own. That is the very purpose of the last sentence, because then there would be no small business regulations with which their regulations could be inconsistent. So it seems to me that only buttresses our point, which is that we are giving the Small Business Administrator some muscle, but at the same time we are not giving him the ability to tie up the Defense Department procurement.

Mr. PROXMIRE. I would certainly confirm that completely; and that emphasizes the point that under this provision, of which the Senator from New York was the initiator, this could be called to the attention of the President, and perhaps to the attention of Congress. But the fact is that there would not be a minute's interference—let alone a day's interference or a week's interference—with the procurement process. The Department of Defense would simply go right ahead, because unless it approved, there would be no effect at all on any small business subcontracting program. There could not be any regulations if the Department of Defense refused to accept them.

Mr. JAVITS. And if they refused to accept what the Small Business Administrator was willing to approve, the Department of Defense could promulgate its own subcontracting regulations, and then there would be nothing with which they would be inconsistent.

Mr. PROXMIRE. That is correct.

Mr. COOPER. I think the Senator has come to the point on which I sought enlightenment. The Senator's statement is, then, that if the Defense Department did not agree with the Administrator of General Services on the regulations which they would like to promulgate, there would be no regulations insofar as the Department of Defense was concerned, regarding its procurement policies.

Mr. JAVITS. Exactly, and they could go ahead and could promulgate their own regulations and could do business in the normal way, without reference to this bill.

Mr. COOPER. Then there must be agreement between the three, before any regulations would become effective. Is that correct?

Mr. JAVITS. Before any regulations of the small business subcontracting program would become effective. That is the critical qualification. If there is to be a small business subcontracting program, the administrators must agree. If there is not to be a small business subcontracting program, the Department of Defense will proceed to transact its business in the way it is transacting it now, and it could not be stopped by the Small Business Administrator.

Mr. COOPER. The small business subcontracting program must be agreed to by the Department of Defense before it becomes effective as to their procurement policies?

Mr. JAVITS. That is exactly correct.

Mr. CAPEHART. Mr. President, the matter we are discussing is not a political one in any sense. It is a practical matter. We have been wrestling with it for many years in the Committee on Banking and Currency.

As all Senators know, the Defense Department spends billions of dollars a year. The problem is how to set up a system to assure that small businesses will get their fair share of those billions of dollars of business.

I suspect that I am the only Senator now discussing this matter who has had a great deal of experience over a period of 25 years in doing business with the Defense Establishment—selling merchandise and doing business with the Department as a small manufacturer.

For many years I have been vitally interested in this subject.

We need some sort of arrangement by which the small businesses of America can be assured a just and equitable share of defense business. But in the past the small businesses have not been getting it. This has not necessarily been the fault of the Defense Establishment. The Department must move rapidly from time to time. It purchases billions and billions of dollars' worth of goods and services. It must purchase them under the law. In short, over the years Congress has passed laws to which the Defense Establishment must adhere. So in many respects its hands have been tied by these laws.

I believe I can say without fear of successful contradiction that small businesses are not getting their fair share of the Defense Establishment expenditures. One of the reasons for that is, of course, that the big business concerns of the Nation maintain—they can afford to do so—offices in Washington and elsewhere, and have the necessary organization and facilities and funds to enable them to know what is going on every minute.

In the first place, thousands and thousands of small businessmen in the United States have no way of knowing what is going on. They have no possible way of knowing what is to be purchased.

I have discussed on the floor of the Senate before, and for hours in the Banking and Currency Committee, the desirability of a formula which would assure small business a larger percentage of our Government contracts.

I do not think the language in the bill we are now considering is 100 percent satisfactory. Parts of it I do not like.

On the other hand, small business is the backbone of this Nation. I am just as strongly for big business as I am for small business. I am a 100-percenter when it comes to all business. But I recognize, through experience over the years, the problems small businesses have in getting their share of defense contracts and also the business that goes overseas.

The language in the bill is an effort to assure small businessmen more business. I believe the Defense Establishment, the Small Business Administration, and the General Services Administration can get together on the proposal contained in the bill.

Congress has the responsibility to say to the Defense Department, "Since your expenditures are so great, and there are so many thousands and thousands of small businesses, we should have some sort of procedure here to help small business get more of your contracts."

This bill is an effort to do that. Some persons do not like the language of the bill because they fear the Small Business Administration will dominate the situation. I doubt that very much. Furthermore, I believe the good to be derived by channeling a larger percentage of the business to small firms will overcome any small harm that might be done the Defense Establishment.

As one who was in the manufacturing business and who purchased a great deal of goods and spent much money in that business over the years, I know it is easier for any buyer or for the Defense Establishment to give his business to one firm. It is easier to buy from only one concern. I know it is easier, on negotiated contracts, to do business with 2 or 3 manufacturers rather than 25.

But I happen to know from experience that in those instances where small businesses have finally forced their way into the Department of Defense with orders in certain emergencies, they have quoted prices that have saved the American taxpayers millions and millions of dollars. If it had not been for the competition of the small businessmen in competing with the big business firms, the taxpayers would have paid many more millions of dollars.

I do not particularly like some of the language of the bill, but I do not know any other way to bring about this result. There was a time when I seriously considered proposing, and I talked at great length about it, a regulation whereby the defense and other procurement agencies would be required to buy at least 33⅓ percent of their products from small businesses. In the case of a contract with a prime contractor that ran into millions and millions of dollars, while the contract would be awarded to the lowest bidder, a consideration would have been the awarding of the bid to a prime contractor who would have subcontracted the largest dollar volume to small business.

I do not believe anyone can successfully contradict the statement that small firms are not getting their share of Government business. I know the small business concerns in Indiana are not, and I know many of them are in trouble.

I believe the facts will show that the great volume of Government business goes to a few manufacturers. I can understand why that is so. First, it is the

easiest way to buy. Second, large firms are organized to get the business.

This is not a political matter at all. It is not a question of whether one is for or against something. A practical question is involved; namely, Is there some honest, equitable way in which small business can get a larger share of Government procurement contracts without in any way hurting the Defense Establishment? I believe there is. I believe this bill is a fair start. Perhaps it can be improved, but it is a fair start, and I think we should give it a try.

I do not want to see small businesses in this Nation hurt. I want to see them get their share. They, as well as big firms, pay taxes.

The more competition there is, the more people who are competing for Government orders, the lower the prices will be to the Government, and the better it will be for the economy of this Nation. So it is a practical matter, and not a political matter at all.

I have never felt that the Defense Establishment and the GSA have done as good a job in this respect as they could do. I feel they are to blame for the fact that this legislation is before us today.

There is another problem facing the Nation in the field of special items such as electronics, airplanes, missiles, rockets, and many other products in the manufacture of which many small businesses cannot engage. In other words, the nature of the purchases of products today, in comparison with World War II, has a tendency to put such contracts into the hands of large firms with engineering and research facilities. Because of these facilities, they possibly can do the job better. It is easier for them to do.

The other side of the coin is that the last thing I want to do or the committee would want to do is to establish a system which would hamstring or hurt the national defense and force the Defense Establishment to give orders to someone who could not deliver the goods or qualify except for a regulation which forced the agency to give the contract to him.

It seems to me the bill is a step in the right direction. I am talking from practical experience, both in the Senate of the United States and as a longtime manufacturer before I came to the Senate, who sold goods to the Government during World War II. It seems to me we should make the effort outlined in this bill. If we do, I believe we shall find that SBA, representing small business in America, together with GSA and the Defense Department, can get together and perform a great service for the small businessmen of America.

Small businessmen are having a hard time today. Small business is really pinched in a cost squeeze. The small businessmen are not making the amount of money they should be making. In my opinion, they are not getting a just share of governmental expenditures. I have thought so for a long time.

I have wrestled with the problem. It is not a new problem for me. I have talked about it for many years. We have talked about it in the Senate Committee on Banking and Currency for many years.

I certainly have no quarrel with anyone who feels opposite to the way I feel about the problem. I have had practical experience with the problem. I know exactly how procurement is handled and am completely familiar with the problems faced by a small manufacturer or small businessman, including the expense to which he is put to obtain business.

I must take the position I am taking because of the experience I have had in studying the problem, and actual experience in dealing with it.

We should make an effort. Perhaps some words in the bill could be changed. Perhaps some new language could be used. The last thing I wish to have happen is for the Small Business Administration to dominate the situation. I do not believe it would, under the proposed legislation. I am not interested in having that occur at all.

I am interested in establishing a system under which the Small Business Administration would help, with the Defense Establishment and the General Services Administration, to work out a program so that x amount of the business, which small business can handle, will be given to small business, and so that a system will be worked out whereby it will be easier for small business to know what is to be purchased, how it will be purchased, and how the small businessman should proceed.

My interest in the problem is that. I do not particularly like the language suggested, but I am willing to gamble on it. If we find it does not work, I shall be the first to say, "Let us repeal it" or "Let us change it."

I think the time has arrived when we must do something for small business in the United States.

Mr. TOWER. Mr. President, points remain which have not been refuted. The bill, if passed in its present form, would give to the Small Business Administration coordinate power to establish procurement policy for the Department of Defense with the Department of Defense. The Department of Defense does not want this. The Kennedy administration does not want it. It would be dangerous folly to allow an agency which has nothing to do with the defense effort, which has no responsibility for the Nation's safety, to impose its arbitrary will and discretion on the Department of Defense in these critical times.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Utah.

Mr. BENNETT. The Senator from Utah has heard, ever since he has been a Member of the Senate, the statement that the Senate marches up the hill and then marches down again.

I have listened to the arguments made on the proposal. We have heard the argument made that if the Department of Defense promulgates regulations, in cooperation with the Small Business Administration, and the Small Business Administration vetoes them, then the Department of Defense could ignore the whole thing on the ground that no regulations had been promulgated. If that would not be marching up and down hill, I have no idea what it would be.

It seems to me it is a very weak argument in favor of the existing language of the bill, which is supposed to increase the power of small business to obtain defense contracts, if we say, "Well, if the Small Business Administration uses that power unwisely the Defense Department can ignore it, anyway."

Why should we go through all of this effort, to try to spell out that the Small Business Administration can be involved in making defense procurement regulations, under those circumstances?

I have listened with great interest to my friend from Indiana. Like him, I have engaged in the manufacturing business. My business officially is assumed to be small business, under the definition of the Small Business Administration.

Whether the bill passes or does not pass, in view of the interpretation made by the Senator from New York, I do not think it will affect the power of small business to get more subcontracts or contracts. We are dealing with a very interesting question, whether an agency set up to help one segment of the American economy can impose its will upon the $40-billion-odd defense procurement program to the point that it can veto the regulations under which the Department makes its procurement.

I think the bill properly goes to the point that the Small Business Administration and its officials should have a part in making the regulations originally, but if there should come a time of disagreement I do not think the Small Business Administration should say to the Department of Defense, particularly in these perilous times, "We do not like your regulations, therefore you cannot issue them."

I do not feel reassured to be told, "Well, if they cannot issue them, then the Defense Department can proceed and do its purchasing without regulations." That seems to me to negate all the work we are doing today.

I thank the Senator from Texas for yielding to me.

Mr. SYMINGTON rose.

Mr. TOWER. Mr. President, I yield to the distinguished senior Senator from Missouri.

Mr. SYMINGTON. Mr. President, first I express my appreciation for the interest and effort of the distinguished junior Senator from Wisconsin with respect to the problems of small business in this country. Every small businessman in the Nation should be grateful for his interest. I wish to work with him and for him on any program he or the able and distinguished Senator from Alabama have for the future in connection with problems relating to small business.

On the other hand, Mr. President, I have analyzed the proposal to the best of my ability and believe I should support the amendment of the distinguished Senator from Texas.

The problem of purchasing equipment, especially for the Department of Defense, involves purchasing units which have much to do with the lives of

the people who use them. I do not believe it advisable or right therefore for restrictions which might affect quality to be placed on those who have the basic responsibility for this equipment.

Not many years ago we had a sad experience in my home community. A corporation not normally involved in the work of building gliders built a glider. There was great interest. The construction took place during the war, when work was scarce and being parceled out. A demonstration of the glider was arranged. The mayor of St. Louis, the president of the Chamber of Commerce of St. Louis, the presiding judge of St. Louis County, the head of the Air Force in that part of the country, and others went up in the glider. A wing broke and every one of those fine citizens was killed.

Later it was found that the reason for the failure was a particular machined part that had been machined one-eighth of an inch more than the maximum tolerance specified on the drawing in question. It so happened the company that made the part was a fine company. The president was my good friend. But the company was then engaged in a line of new work and did not know the vital importance of certain tolerances on certain of the drawings.

I do not think there should be any restriction on the procurement policies of the Department of Defense, from the standpoint of purchasing quality.

In that connection, many small businesses in Missouri have written or telegraphed me requesting that I either work for the defeat of the bill or the deletion of section 7. I ask unanimous consent that four of these telegrams be printed at this point in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

ST. LOUIS, MO., *August 29, 1961.*
Senator STUART SYMINGTON,
Senate Office Building,
Washington, D.C.:
Defeat bill S. 836 or amend by deleting section 7.

PRECISION PRODUCTS CORP.

LAMBERTFIELD, MO., *August 29, 1961.*
Senator STUART SYMINGTON,
Washington, D.C.:
Reference Proxmire bill—S. 836 due to the labor problem existing in the metropolitan area at the present time we feel that this bill should be given careful consideration, especially section 7 of S. 836, i.e. This portion means definitely detrimental to all small businesses. I am sure that if aware of it many other small businesses would express the same opinion.

FLIGHT RESEARCH & DEVELOPMENT CO., INC.

LAMBERTFIELD, MO., *August 29, 1961.*
Senator STUART SYMINGTON,
Washington, D.C.:
Reference Proxmire bill—S. 836. Due to the labor problem existing in the metropolitan area at the present time we feel that this bill should be given careful consideration, especially section 7 of S. 836, i.e. This portion means definitely detrimental to all small businesses. I am sure that if aware of it many other small businesses would express the same opinion.

CLYDE MOSLEY,
President, Lambert Tool Specialty Co.

BLUE SPRINGS, MO., *August 29, 1961.*
Senator STUART SYMINGTON,
Senate Office Building,
Washington, D.C.:
I am in hopes that you will see the fallacies of the Proxmire bill, S. 836, in particular section 7. In my opinion can work out to be another bottleneck in the defense program and can do no good whatever.

Respectfully yours,

L. L. FIKE,
President, Fike Metal Products Corp.

Mr. SYMINGTON. Let me again assure my friend from Wisconsin, one of the great Members of this body, that I have every desire to support him in the development of small business, but I believe the amendment of the Senator from Texas is logical and right with respect to defense work.

Mr. TOWER. Mr. President, I thank the distinguished Senator from Missouri. In the light of his rich experience in the field, I think great weight should be given to his words.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the distinguished Senator from Arizona.

Mr. GOLDWATER. I wish to ask my friend from Texas a question or two on the subject. Was any evidence introduced in the hearings which would indicate what percentage small business should receive in relation to the total spent on defense contracts?

Mr. TOWER. Not to my knowledge. No such information came before the committee, either in testimony or as a result of study.

Mr. SPARKMAN. Mr. President, will the Senator yield at that point?

Mr. TOWER. I yield.

Mr. SPARKMAN. There was evidence. The Senator will recall that last year's experience was 16 percent, and that President Kennedy has directed the Defense Department to raise that percentage by 10 percent, which would make it 17.6 percent.

Mr. GOLDWATER. I am glad that the Senator from Alabama entered the discussion, because he has been a member of the committee for some time. I have always been puzzled as to what the goal should be. Should it be 16 percent? Twenty percent? Twenty-five percent? What should the goal be? Has evidence ever been introduced that would enable us to say that small business, under our definition of small business, should receive X percentage of the money that is spent on defense?

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. SPARKMAN. The Select Committee on Small Business has on several occasions pointed to 25 percent as being a reasonable figure. There was a time when the percentage ran around 25 percent. But over the past several years it has been gradually going down and, as the Senator from Wisconsin pointed out a few minutes ago, it actually has gone down a little since the first of the year. I believe it has decreased from 16 percent to 15.9 percent.

Mr. PROXMIRE. It is now at an all-time low. It has never before since records were first kept been as low.

Mr. TOWER. It seems to me altogether logical that although we would set a goal and hope that a certain percentage of defense procurement would go to small business, we must maintain flexibility in a matter of this kind, the flexibility, of course, being a concomitant of the fact that defense requirements vary from time to time, and needs change. So I do not think we can adopt a fixed goal and say, "This is what we must do. We must attain this percentage."

We can set a goal, but certainly we should not make the percentage so rigid and arbitrary that we must comply with the goal regardless of what the Defense Department needs are.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. TOWER. I yield.

Mr. CAPEHART. We ought to try to arrive at a policy under which small business would be given an opportunity to bid upon purchases. Therein lies the weakness of small businesses today. The fault is not necessarily that of the Defense Establishment. I wish to make that point clear. But small businesses ought to be given an opportunity to bid. A policy or system should be worked out to enable them to do so. That is what I hope will happen as a result of the bill. It may not. But small businesses should be given an opportunity to bid on such business, an opportunity which they do not have now. In thousands of instances there is no way by which small businesses know when purchases are about to be made.

The bill would set up a system whereby the Defense Establishment would not have to give small businesses any business, but they would be given an opportunity to bid and an opportunity to come in contact with the procurement agencies in such a way that they would be able to know when purchases were to be made.

I agree with the able Senator with respect to the percentage of business small businesses should receive. I do not know whether it should be 20 percent, 25 percent, or 30 percent.

As I said a moment ago, the percentage is growing a little smaller all the time because of the kind of things that the Defense Establishment buys—for example, airplanes, rockets, missiles, electronics, and that sort of thing. The average small business cannot make many of such items. Dollarwise, small business is getting less. I do not think the issue is a terrific one, one way or the other, but I am hopeful that we shall set up a system or a policy or a plan whereby small businesses will be given an opportunity to obtain business, if they want to do so.

Mr. GOLDWATER. Mr. President, will the Senator yield further?

Mr. TOWER. I yield.

Mr. GOLDWATER. I should like to ask either the Senator from Wisconsin [Mr. PROXMIRE] or the Senator from Alabama [Mr. SPARKMAN] if any provision has been placed in the bill to take care of the assistance concept of contracting. I might refer to Cape Canaveral as an example, or Fort Huachuca, Ariz., a place at which systems

are being tested and a prime contractor is awarded an overall contract. Many times such contractors form their own companies for subcontracting purposes.

Is there any provision of the bill which would encourage prime contractors to spread the subcontracts in assistance concepts?

Mr. PROXMIRE. If I might reply to that question, I think the Senator has stated an excellent example. It is exactly the kind of thing that the bill is designed to accomplish. It is a subcontracting bill. Of course, the argument that has been made constantly is that small business has a diminishing share of business. One of the big reasons is systems development in procurement. The Defense Department must go to big business in order to have its requirements handled.

This would be exactly the kind of thing that the SBA, the GSA, and the Defense Department would work on. The SBA would work very hard for it because, obviously, if we could encourage this kind of subcontracting and do it in such a way that it would not offend or adversely affect the Defense Department, it would greatly benefit small business. I think that certainly is a prime objective the bill is designed to achieve.

Mr. GOLDWATER. Could they not do that under the existing bill if they tried?

Mr. TOWER. I point out to the Senator from Arizona that the bill provides for the formulation and promulgation of a subcontracting policy by GSA, Defense, and SBA. The amendment of the Senator from Texas would not destroy the bill. It would simply delete that section of the bill which would give SBA veto power over the formulation of regulations for the implementatiton of this policy by the Department of Defense.

Mr. GOLDWATER. What the Senator is trying to do is to remove language which would require the adoption of regulations implementing such a program.

Mr. TOWER. That is correct.

Mr. PROXMIRE. Only the approval power.

Mr. TOWER. Only the power of approval of regulations; yes.

Mr. PROXMIRE. Also approval by Defense and GSA. We contend that this approval is protection for the Defense Department.

Mr. TOWER. Mr. President, I read from the committee report:

> In order to make it abundantly clear that the participation by SBA in the formulation of the program is to be carried through fully and completely, a specific provision was written into the section expressly requiring that SBA must approve the regulations before they are issued by the procuring agencies. The committee wants to make it clear that SBA approval is necessary before the regulations can be issued.

In other words, SBA has an absolute veto power over the procurement policies of the Department of Defense.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Alabama.

Mr. SPARKMAN. I have an appointment and I shall have to leave the floor for a short time. I do wish to make some brief remarks on the bill. First of all, I do not believe the Senator from Texas is entirely accurate when he says that this provision gives a veto power to SBA. There is no veto involved so far as the procurement policies of the Defense Department are concerned. All that this section seeks to do is to set up a program which can be helpful to small business in sharing in subcontracts. This is not a prime contract bill. The plan is to set up a program. At the suggestion of the Defense Department, it was provided that GSA, the Defense Department, and the Small Business Administration should cooperate in setting up the program and should promulgate policies.

When it came to issuing regulations—and this is the thing to which the amendment of the Senator from Texas goes—the committee wrote in this provision. Originally we had written in a much broad provision. The only thing we added to the suggestion of the Defense Department, GSA, and SBA, was that when the regulations were issued, SBA would have the right to look at them and to approve or disapprove of them.

Let us remember that this does not refer to the Defense Department's procurement. It relates only to setting up a program to help small business share in subcontracts.

As has been pointed out, the SBA did not approve, or if the Defense Department did not approve, or if GSA did not approve, it would not interfere one single minute with procurement. The only thing it would do would be to say to SBA, instead of having this kind of policy to share in subcontracting, it would continue to run as it does now, which is a kind of hit and miss proposition. What we are trying to do is set up an orderly procedure by letting small business share in subcontracting.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GOLDWATER. If it would not make any difference, why change the language in the bill as the committee is intending to do? What the Senator has said defeats his own purpose.

Mr. SPARKMAN. No; I do not believe it does. If I may go one step further, I conceived it as being an opportunity for the three to work together. If they work together on the first part, I feel certain they can agree on regulations. It gives them an opportunity to do that. It gives them a chance to sit around the table, before the regulations are printed and published in the Federal Register.

Mr. GOLDWATER. Suppose they do not agree on the second part?

Mr. SPARKMAN. If they do not agree, there are two different procedures to be followed. One would be to refer the matter to the President of the United States, as they have the right to do. The second would be not to have any regulations, which would mean that there would not be any small business subcontracting program.

Mr. GOLDWATER. Let us take the first case, where the matter is referred to the President. Am I correct in assuming that if there is any disagreement over whether regulations would follow, the contracting can be held up?

Mr. SPARKMAN. Yes; by any one of the three.

Mr. GOLDWATER. By any one of the three?

Mr. SPARKMAN. Yes.

Mr. GOLDWATER. The power would then be in the President of the United States.

Mr. SPARKMAN. Yes.

Mr. GOLDWATER. What concerns me, over and above putting too many regulations into the processes of business, is the matter of time. Let us consider what the House did yesterday, in passing a $30 million appropriation bill, to spend that money immediately on nuclear testing, which is something that we would want to get into in a matter of days. Let us assume that an important prime contract in connection with it came into dispute and the President was asked to step in.

Mr. SPARKMAN. The bill does not apply to prime contracts.

Mr. GOLDWATER. Let us talk about a subcontract. Let us assume that one of the subcontractors of a prime contractor has not followed regulations of the Defense Department. It must then go to the President. We are talking about something concerned with national defense, and we must implement it in a matter of a day or two.

Mr. SPARKMAN. This bill would not affect it in any way.

Mr. GOLDWATER. It would not have to wait for the decision of the President to go ahead?

Mr. SPARKMAN. No. As I said, this does not hold up procurement. What this tries to do is to organize a procedure in order to help. It sets up a policy to help small business share in subcontracting.

Mr. GOLDWATER. I understand that part.

Mr. SPARKMAN. It does not hold up procurement.

Mr. GOLDWATER. I cannot agree that it does not hold up procurement. There would be no sense in having any reference to regulations at all, if I understand it, because, let us assume that a subcontractor gets his contract in violation of regulations, and that he is going to get it anyway——

Mr. SPARKMAN. The Senator is assuming that the regulations have already been issued.

Mr. GOLDWATER. I have to assume that because I am putting myself in this bill and assuming it has passed in the language proposed by the Senator from Alabama.

Mr. SPARKMAN. I should like to call the attention of the Senator from Arizona to this fact. Reference has been made to how this would interfere with procurement and how terrible it would be in these days. During World War II we had the Smaller War Plants Corporation, which had the absolute right to go into defense and pick out contracts that should be given only to smaller war plants. There is no such power in the pending bill or in any program that we have now.

It did not interfere with production during World War II, even with stronger power, and we certainly are not asking that in this bill.

Mr. PROXMIRE. Mr. President, I think I know what is bothering the Senator from Arizona.

Mr. SPARKMAN. Mr. President, I shall have to leave the Chamber now. I appreciate the Senator from Texas giving me this opportunity to make a few remarks. I think we have worked out a good bill. It is just as mild as we could work it out, and as mild, certainly, as we ought to have it. Not only that, we have had fine cooperation existing among the heads of the various agencies involved. I am certain we are going to continue to have that good cooperation. I do not believe there is anything in the bill for us to be afraid of.

While I respect the viewpoint of the distinguished Senator from Texas, I must say that I hope his amendment will not prevail.

Mr. GOLDWATER. Mr. President, will the Senator from Texas yield?

Mr. TOWER. I yield.

Mr. GOLDWATER. I am sure the Senator from Wisconsin can answer a question in my mind, because I am a little confused by the statements made by the Senator from Alabama. They indicate to me that even if the language proposed is adopted, it will not make any difference; that is, if the amendment is adopted, it will not make any difference. So why not have the amendment? Why run the risk of controversy on the floor of the Senate or the floor of the House?

Mr. PROXMIRE. Mr. President, I see exactly the point of the Senator from Arizona. The fact is that the bill provides that within 90 days the agencies shall agree and shall cooperatively formulate a program and shall approve a program. What will happen if they do not agree, if the SBA decides to disagree, is that the program will go on as it has in the past, but the President and Congress can come into the picture. There is a fixed focus on the small business procurement program. That is what the bill can accomplish if agreement is not reached. In other words, the Department of Defense, the General Services Administration, and the Small Business Administration all know that there is pressure upon them to agree. If they do not agree, they will be subject to a decision by the President or subject to pressure by Congress, because it will be recognized that they have not been able to devise a program for small business. This is a kind of sanction which will compel them to get together, reconcile their differences, and provide a program which will not adversely affect the Nation's defense, but will get small business into the act more than it has been in the past.

Mr. GOLDWATER. I thank the Senator from Wisconsin for his explanation. Let us assume that the bill has become law, and that the regulations have been agreed to, but that a subcontractor gets a contract concerning which there is some question. As I understood the Senator from Alabama, the subcontractor would still be allowed to proceed with his subcontract, even though his obtaining of it was in violation of the regulations which had been agreed upon.

Mr. PROXMIRE. It seems to me that under those circumstances the Small Business Administration would be out. It would be up to the Department of Defense, however, to abide by its own regulations. It seems to me that they would be subject to criticism by the President and by Congress, or by any interested person involved in small business who had been cut out of a subcontract, because if there was a violation of the regulations, he could protest. However, it would be up to the Department of Defense to have the final word. The SBA cannot interfere in the contracting process between a contractor and the Department of Defense. That is entirely a Department of Defense decision. The SBA has nothing to do with the actual procurement process; only with the regulations.

Mr. GOLDWATER. I thank the Senator from Wisconsin. I must say that I can see no need for the language contained in the bill. I still do not feel it will accomplish anything. The fact that there may be a controversy will not help the small businessman, the Small Business Administration, the Department of Defense, or the General Services Administration. Therefore, I think the striking of this language by the amendment of the Senator from Texas is most desirable, because it maintains simplicity in a field in which I think simplicity must be maintained, in keeping the hand of government away from the small business segment of our country.

Mr. TOWER. I thank the Senator from Arizona.

Mr. President, in that connection I wish to bring up something which has been touched on only lightly; namely, what the small businessman thinks about this situation. I should like to read a portion of the testimony given by Charles E. Hastings in behalf of the Chamber of Commerce of the United States before the Small Business Subcommittee. It reflects, I believe, the thinking of the small businessman. Certainly the chamber of commerce is primarily an organization of small businessmen. The testimony, in part, reads as follows:

> The chamber supports the principle of subcontracting and small business participation in defense contracting. We recognize the importance of small business in the national economy and the need for integrating small business into the defense production program. The strength of American industry lies in its reliance, not on any one company or on any small group of companies, but on the teamwork of many business organizations both large and small working together.
>
> But we must also face up to the fact that the complexity of military technology, coupled with the rising importance of research and development in lieu of large production contracts, is making it increasingly difficult for small business to qualify and complete for prime defense contract awards.
>
> The primary objective of the program authorized in section 8 of the bill before the subcommittee is to make certain that prime defense contracts are subcontracted to the maximum extent to small business concerns. If the responsibility for implementing this objective were placed with the agency responsible for the procurement program, and were coupled with adequate safeguards to insure that this was done consistent with efficient and economical performance of such contracts, this would indeed be a sound objective. There are no size limitations on skill and ingenuity. It is well known that many prime contractors, because of the variety and volume of parts entering into defense items, cannot make many of the parts they require as economically as they can buy them from small business.
>
> Although purporting to help the small business concerns—the provisions of the bill which require contractors to consult with the Small Business Administration, when requested to do so, and which enable the SBA to obtain information and records from any procurement agency concerning subcontracting by its contractors, would in fact hurt the small businessman, rather than help him—I speak from experience.

Mr. PROXMIRE. Mr. President, I rose about an hour and a half ago to oppose the amendment. I had gotten about halfway through my speech when it was necessary to yield. I should like to complete my remarks now. In view of the colloquy, I think I should underline and emphasize once again the facts of life which have made the bill necessary and have made as strong a bill as possible necessary under these circumstances.

In 1954 the small business percentage of defense contracts was 25.3; in 1955, 21.5; in 1956, 19.6; in 1957, 19.8; in 1958, 17.1; in 1959, 16.6; in 1960—last year—16.1. This year, the share of small business in defense contracts has hit an all-time low of 15.9 percent. One of the reasons, perhaps the principal reason, is that small business is not getting the share it should get of defense subcontracting. The bill is designed to achieve that objective.

The bill has been attacked as interfering with the Department of Defense jurisdiction. It seems to me that the Senator from California and the Senator from Missouri, both of whom are experts in this field, unfortunately have not had a chance to study the whole history and to recognize that there is no interference possible—none. There is not a bit of interference with the defense program all along the line.

All the bill does, as we have tried to emphasize, is to provide that, so far as the small business subcontracting program is concerned, the SBA shall have the right to approve that program, and only that program, and shall have the right to approve regulations, but may not interfere in any stage of the program once those regulations are adopted.

I wish to emphasize that the bill which was passed last year, unanimously, provided that the SBA would have the sole right to promulgate the program. Now we bring in GSA and the Department of Defense along with the SBA to promulgate the program.

Last year the bill provided that prime contractors and subcontractors consult with and utilize the facilities of the SBA when requested by the SBA. This year the bill provides that prime contractors and subcontractors consult only through the Defense Department. So SBA has no direct contact with any

contractor or subcontractor under the bill.

H.R. 11207, last year, provided that SBA could obtain from prime contractors and subcontractors such information and records as it may require. It gave the SBA almost carte blanche authority. We have reduced that authority this year and have provided in the bill that SBA may obtain from the procuring agency, not the contractor or subcontractor, such available or reasonably available records regarding subcontracts.

The bill last year provided that the subcontracting program shall contain such other provisions and requirements as the Small Business Administrator may determine to be necessary and requisite to carry out the policy declaration of the act.

On the other hand, the bill this year provides that the program shall not prescribe, first, the extent to which any contractor or subcontractor shall contract, or, second, specify the business concerns to which subcontracts should be made. The bill also provides that the program shall not vest any powers in SBA to administer individual contracts or subcontracts.

Finally, this is a watered-down bill, a modified bill, a compromise bill to meet the objections of the Defense Department. As compared with the bill which was passed last year, the bill this year provides that the Department of Defense and the General Services Administration shall issue the regulations, but only after they have been approved by the Small Business Administration.

Mr. President, if we have any real concern with small business' proportion of the defense contracts, it seems to me we must at least permit the SBA to approve the regulations, so that if the SBA feels very strongly that the regulations will not serve the interests of small business, the SBA can object and can carry its objection to the President and can focus attention on that situation. This provision gives the SBA the power to object. It is a limited power, but it is at least the power to focus attention on the fact that the agency which has the responsibility for making proper provision for small business believes small business is not getting a fair share.

Let me point out what this provision is, to show how ridiculous it is for anyone to feel that such a provision would result in interference with the Department of Defense in any of its activities, including the necessary steps it must take in connection with the Berlin crisis or any other military crisis. I read now from the bottom of page 7, and page 8:

"(d)(1) Within ninety days after the effective date of this subsection, the Administrator—

That is, the Administrator of the Small Business Administration—

the Secretary of Defense, and the Administrator of General Services shall cooperatively develop a small business subcontracting program and shall approve the regulations implementing such program which shall contain such provisions as may be appropriate to (A) enable small business concerns to be considered fairly as subcontractors and suppliers to contractors performing work or rendering services as prime contractors or subcontractors under Government procurement contracts, * * *.

How would that interfere with the defense effort? How in the world could such action by the SBA, on the basis of subdivision (A), on page 8, interfere with or slow down the defense effort? Obviously it would not.

I read further from the provisions on page 8:

(B) insure that such prime contractors and subcontractors will consult through the appropriate procuring agency with the Administration when requested by the Administration,

What is wrong with that? Obviously it would not slow down the contractors or the subcontractors. They could send in their counsel to consult with the Defense Department, the GSA, and the SBA. This is a reasonable provision. If such a regulation were provided—and this measure limits the kinds of regulations which can be provided—obviously there could be no interference in any significant way with the Department of Defense.

And finally it is provided:

(C) enable the Administration to obtain from any Government procurement agency such available or reasonably obtainable information and records concerning subcontracting by its prime contractors and their subcontractors as the Administration may deem necessary: * * *.

Once again, the power to obtain that information, if it is reasonably available, is a very mild power; and certainly the SBA should have that much power. So this provision will not retard the Defense Establishment activities in any way.

Then the bill provides:

Provided, That such program shall not authorize the Administration to (1) prescribe the extent to which any contractor or subcontractor shall subcontract—

And so forth. I have already gone into those additional limitations on SBA.

Mr. President, this is a very mild bill. I feel almost apologetic for bringing the bill forward, following my introduction of it, along with the Senator from Indiana [Mr. CAPEHART] and the Senator from Alabama [Mr. SPARKMAN], now that the bill has been watered down to this extent. But we have had to yield to the interests and the appeal of the Department of Defense. I think we have gone about as far as we can go in that respect.

Finally, it is true that the bill does not conform to the extent of every comma, semicolon, dotted "i," or crossed "t" with what those agencies requested. But if Congress cannot proceed in this way, if Congress must dot every "i" in accordance with requests of the executive agencies, it seems to me Congress might just as well let the executive branch of the Government do the legislating.

This is a very modest provision, because we recognize that small business is not getting its fair share.

Mr. GOLDWATER. Mr. President, will the Senator from Wisconsin yield?

Mr. PROXMIRE. I yield.

Mr. GOLDWATER. I know the Senator from Wisconsin is sincere in what he is attempting to do. Our disagreement stems over the means he has adopted.

I am not particularly fearful that these activities will be harmful to the defense effort, and so forth. My concern is in regard to the possibility of control. Obviously, if such power is available, someone may use it at some time.

On page 4 of the report, in the fourth paragraph, we find the following:

In order to make it abundantly clear that the participation by SBA in the formulation of the program is to be carried through fully and completely, a specific provision was written into the section expressly requiring that SBA must approve the regulations before they are issued by the procuring agencies. The committee wants to make it clear that SBA approval is necessary before the regulations can be issued.

That is what I find objectionable—namely, that the SBA would have a veto, in effect, over the purchasing practices of the GSA and the Defense Department.

I believe it would have sufficed to have had the bill indicate that it was the congressional intent that the three agencies work together. Certainly these agencies will pay attention to what Congress believes should be done.

But if it is provided that one agency—either the SBA or the GSA—shall have veto power over the promulgation of these regulations by the Department of Defense, I become fearful, because I have an inborn fear of bureaucracy.

Mr. PROXMIRE. I share much of the Senator's inborn fear of bureaucracy. But this measure provides only that the SBA shall have the right to approve this particular program. It is not a program in regard to all the procurement operations of the Government. This program deals with the small business subcontracting regulations. What does such approval mean? Does it mean that if the approval is not given, the SBA can write the regulations? No, Mr. President; it means that if the SBA does not approve, the GSA and the Defense Department may continue with the regulations they already have; but, if the SBA does not approve, it will become apparent to the country, to the Congress, and to the President that the SBA does not agree; and then at some point the President or his aids will enter the situation; and thus the disagreement will be carried to a higher authority.

It seems to me that at that point the influence of the SBA can begin to be meaningful. Without the provision for that approval, the Defense Department and the GSA could listen to the SBA, but they would not have to pay very much attention to it.

The entire history of such matters is that the power to approve in such cases is generally delegated to very junior officials. Of course, the Department of Defense necessarily has to consider many other matters. After all, it is responsible for the defense of the Nation. What has happened to the junior officer assigned by Defense to represent small business now. The Small Business officers are overruled again and again by senior officers in the Department of Defense.

Mr. GOLDWATER. But we do not seem to be able to agree in regard to what would be a fair division of this business between small business and

large business. I think one part of the problem is that we have not yet really decided what small business is.

Mr. PROXMIRE. I think the Senator is correct. I would not say, because small business was getting only 15.9 percent of the procurement contracts, that fact in and of itself meant the Defense Department was negligent. The small and declining percentage is a warning signal. It indicates to me that Congress is absolutely right in insisting that the SBA have an opportunity to take a really effective part in formulating regulations for small business procurement.

Mr. GOLDWATER. If the Senator will yield further, let me put forth a hypothetical situation relative to these regulations. Let us assume SBA does arrive at the figure of 25 percent, and writes into its regulation that 25 percent of the business must go to what we call small business. That in itself could very seriously revise the methods by which the Defense Department issues its procurement orders.

Mr. PROXMIRE. I am glad the Senator has raised that point. I think some persons have that fear, and we can make useful legislative history right now. As the Senator handling the bill on the floor, and as the author of the bill, if the agency even proposed that, it would be completely wrong. I am sure SBA would not do that. There is nothing in the bill to authorize that. If it insisted by regulation that small business should get 25 percent, or 15 percent, or 20 percent, it would be ridiculous. That would not be the kind of regulation that would serve our Defense Establishment. It should be provided that small business will have as great an opportunity as is possible to take part in subcontracts, where it is feasible. Often it is impossible.

Mr. GOLDWATER. I think that has been the clear intention of the legislation over the years. I was honored to be a member of the Small Business Committee. I remember at that time we made it abundantly clear to Defense what our feelings were about small business participating in the overall program. I still think if we try to alter the situation which exists, we are not going to help small business. I think a stronger expression in the bill as to the intent of Congress in this field would accomplish what the Senator wants and what I would like to see accomplished.

I am fearful that, when one reads the language of the bill as we see it on the last line of page 7 and the first line of page 8, and read in the report that the committee wants to make it clear that the SBA approval is necessary before the regulation can be issued, we take too long a step. I do not think it is necessary at all.

I believe that, had we been a little more attentive to the problems of small business, particularly in this general area, we might have forced, by our weight, a more cooperative attitude between the three agencies mentioned. It has been my limited experience, in my own section of the country, that the three agencies have gotten along very well. We have found minor areas of discontent on the part of small businessmen; but, on the whole, they have been getting along fairly well. We cannot keep any firm in business by Government edict. Today, some of the largest aircraft manufacturers are suffering very badly because it has been the intent of present Defense policy to get out of airplanes and into missiles. This is the nature of the beast we call our economic system.

I close by expressing the hope that the Senator from Wisconsin will reconsider his resistance to this amendment and consider the containment of stronger language in the bill which would contain the feeling that I know we mutually agree upon and which would accomplish the same purpose the language of the bill intends to accomplish.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, and ask that we proceed to a vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment offered by the Senator from Texas. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from Arkansas [Mr. FULBRIGHT], the Senator from South Carolina [Mr. JOHNSTON], the Senator from Oregon [Mr. MORSE], and the Senator from New Jersey [Mr. WILLIAMS], are absent on official business.

I also announce that the Senator from New Mexico [Mr. ANDERSON], and the Senator from New Mexico [Mr. CHAVEZ], are absent because of Illness.

I further announce that the Senator from West Virginia [Mr. RANDOLPH], is necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Oregon [Mr. MORSE], the Senator from West Virginia [Mr. RANDOLPH], and the Senator from New Jersey [Mr. WILLIAMS] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Kansas [Mr. CARLSON] are absent because of illness.

The Senator from North Dakota [Mr. YOUNG] is necessarily absent.

The result was announced—yeas 35, nays 55, as follows:

[No. 189]

YEAS—35

Aiken	Engle	Russell
Allott	Goldwater	Saltonstall
Beall	Gore	Schoeppel
Bennett	Hickenlooper	Scott
Bush	Holland	Smith, Mass.
Butler	Hruska	Smith, Maine
Byrd, Va.	Kuchel	Stennis
Case, S. Dak.	Lausche	Symington
Cotton	Long, Mo.	Thurmond
Curtis	Miller	Tower
Dirksen	Morton	Williams, Del.
Dworshak	Robertson	

NAYS—55

Bartlett	Hart	McNamara
Bible	Hartke	Metcalf
Boggs	Hayden	Monroney
Burdick	Hickey	Moss
Byrd, W. Va.	Hill	Mundt
Cannon	Humphrey	Muskie
Capehart	Jackson	Neuberger
Carroll	Javits	Pastore
Case, N.J.	Jordan	Pell
Church	Keating	Prouty
Clark	Kefauver	Proxmire
Cooper	Kerr	Smathers
Dodd	Long, Hawaii	Sparkman
Douglas	Long, La.	Talmadge
Eastland	Magnuson	Wiley
Ellender	Mansfield	Yarborough
Ervin	McCarthy	Young, Ohio
Fong	McClellan	
Gruening	McGee	

NOT VOTING—10

Anderson	Fulbright	Williams, N.J.
Bridges	Johnston	Young, N. Dak.
Carlson	Morse	
Chavez	Randolph	

So Mr. TOWER's amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MILLER. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment of the Senator from Iowa will be stated.

The LEGISLATIVE CLERK. On page 8, line 20, following the period, it is proposed to insert the following:

Provided further, That such program shall provide that in evaluating bids or in selecting contractors for negotiated contracts, the extensive use of subcontractors by a proposed contractor shall be considered a favorable factor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

Mr. MILLER. Mr. President, the purpose of the amendment is to make clear what I am sure the intention of Congress has been for a number of years, but which I am afraid has not been implemented by the administrative agency. A number of small businessmen have felt that they are being discriminated against because prime contractors who do not enter into subcontracts to an appreciable extent are obtaining contracts, and that some evidence should be given on the part of the administration to the various administrative agencies that subcontracting is a desirable factor.

The bill as now written provides that a program shall not authorize the Administrator to prescribe the extent to which any contractor shall get into subcontracting, or the particular subcontractors. It is all negative. It seems to me desirable to have in the bill a positive statement that a favorable factor will consist of the degree to which subcontractors are used by a prime contractor. It would not hamstring the administration at all.

I have discussed the subject with the Senator having the bill in charge, the able Senator from Wisconsin, and I understand that the amendment is acceptable to him.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MILLER. I am happy to yield for any questions.

Mr. PROXMIRE. I think the amendment is an excellent one. It would add something to the bill which the bill needs. As the Senator from Iowa has said, the amendment states the intention of Congress. It would help small business. The more subcontracting that is done by big prime contractors, the more opportunity small business subcontractors will have to take part in defense work. I commend the distinguished Senator from Iowa upon his amendment and I am happy to accept it.

Mr. CAPEHART. I think it is a good amendment. I know of no Senator on this side of the aisle who is opposed to it.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. RANDOLPH subsequently said: Mr. President, this legislation is vital to the effective operation of the Small Business Administration and to the small business segment of our country's economy. The diligent Senator from Wisconsin [Mr. PROXMIRE] has performed a real service in sponsoring and managing this measure. I commend him, along with the distinguished Senator from Alabama [Mr. SPARKMAN], who is chairman of the Select Committee on Small Business and ranking majority member of the Committee on Banking and Currency, and the able Senator from Indiana [Mr. CAPEHART], ranking minority member of the Committee on Banking and Currency. Their cosponsorship of S. 836 and their aggressive support likewise merit commendation.

As a member of the Select Committee on Small Business, and as a Member of the Congress with a continuing interest in the stimulation of independent business activity, I am aware of the need for improving the status and adequacy of the SBA revolving fund. This measure is most helpful in meeting that problem.

Then, too, the authorization for SBA to pool the amounts it can commit for its regular business loan program, its disaster loans, and its prime contract authority, without being subjected to the ceiling inhibitions presently contained in the Small Business Act, would be a further stimulant to the SBA revolving fund.

Perhaps no other feature of this legislation is more meritorious than its provision for the development by the Small Business Administration, the Department of Defense, and the General Services Administration of a small business subcontracting program. This is consistent with the policy enunciated by the President to increase small business sharing in the defense procurement dollar and more independent business participation in general procurement. This is a vital need and one which has been too long neglected.

It is stimulating to find in still another provision of S. 836 an authority for the Secretary of Commerce to obtain notice of all proposed defense procurement actions of $10,000 and above and all civilian procurement actions of $5,000 and above, and to authorize their publication, subject to certain exceptions, in the "U.S. Department of Commerce Synopsis of U.S. Government Proposed Procurement, Sales and Contract Awards." This publication has been too limited in its scope and not sufficiently inclusive in its content and it is time that small businessmen be furnished more comprehensive information on what the Federal Government is purchasing.

It is a privilege to support this legislation.

The PRESIDING OFFICER. The bill is open to further amendment.

If there are no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the Senate proceed to consider the bill H.R. 8762, coming over from the House of Representatives, a bill to amend the Small Business Act to increase the amount available for regular business loans thereunder.

The PRESIDING OFFICER. The bill will be stated by title.

The bill (H.R. 8762) to amend the Small Business Act to increase the amount available for regular business loans thereunder, was read twice by its title.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin?

There being no objection, the Senate proceeded to consider the bill.

Mr. PROXMIRE. Mr. President, I move to amend the bill (H.R. 8762) by striking out all after the enacting clause and inserting in lieu thereof the text of S. 836 as amended.

The PRESIDING OFFICER. The question is on the motion of the Senator from Wisconsin.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. PROXMIRE. Mr. President, I move that the Senate insist on its amendment and request a conference with the House thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. ROBERTSON, Mr. SPARKMAN, Mr. DOUGLAS, Mr. PROXMIRE, Mr. LONG of Missouri, Mrs. NEUBERGER, Mr. BEALL, Mr. BENNETT, Mr. JAVITS, and Mr. TOWER conferees on the part of the Senate.

Mr. PROXMIRE. Mr. President, I move that the Senate reconsider the vote by which H.R. 8762 was passed.

Mr. HOLLAND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Without objection, S. 836 will be indefinitely postponed.

DEFINITION OF "PEANUTS"

Mr. HOLLAND. Mr. President, I have cleared with the leadership on both sides the matter of bringing up Calendar No. 725, H.R. 1021. This is a bill on which the distinguished junior Senator from New York [Mr. KEATING] interposed an objection when it was called on the call of the calendar earlier today. He advised me last night that he was withdrawing his objection. I have since cleared the matter with the leaders on both sides of the aisle. I know of no objection. The bill, H.R. 1021, would simply extend for 2 years the definition now in effect of "peanuts" under the Agricultural Adjustment Act of 1938. The Senate will recall that that includes the exemption of peanuts for boiling only, which has not interposed any difficulty.

I ask unanimous consent that the bill be called up at this time.

The PRESIDING OFFICER. The clerk will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 1021) to extend for 2 years the definition of "peanuts" which is now in effect under the Agricultural Adjustment Act of 1938.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. HOLLAND. I know of no objection to the bill. I do not care to discuss it unless there are some questions concerning it.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. HOLLAND. I move that the Senate reconsider the vote by which the bill was passed.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to table was agreed to.

APPLICABILITY OF POLICEMEN AND FIREMEN'S RETIREMENT AND DISABILITY ACT AMENDMENTS OF 1957

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 840, S. 1528.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1528) to make the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 applicable to retired former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and to their widows, widowers, and children.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to and the Senate proceeded to consider the bill which had been reported from the Committee on the District of Columbia with an amendment to strike out all after the enacting clause and insert:

That the amount of relief or retirement compensation payable to each officer or member of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, or the United States Secret Service Division who retired under section 12 of the Act approved September 1, 1916 (39 Stat. 718), as amended, prior to the effective date of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957, approved August 21, 1957, shall be increased 10 per centum beginning on the effective date of this Act.

SEC. 2. Each widow or child who, on or after the effective date of this Act, was receiving or is now receiving or shall hereafter be entitled to receive relief or annuity by reason of service in the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, or the United States Secret Service Division, of a deceased former officer or member who died in the service of any such organization prior to the effective date of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957, approved August 21, 1957 (71 Stat. 391), or who retired prior to such effective date, shall be entitled to benefits computed in accordance with the provisions of subsection (k) of section 12 of the Act approved September 1, 1916 (39 Stat. 718), as amended (sec. 4–531, District of Columbia Code, 1951 ed., supp. VIII).

SEC. 3. Nothing in this Act shall be deemed to reduce the relief or retirement compensation any person receives, or is entitled to receive, on the date of approval of this Act.

SEC. 4. The effective date of this Act shall be the first day of the first month following the date of its approval.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a statement relative to the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MANSFIELD

The purpose of this bill is twofold; it will:

(1) Provide a 10-percent increase of present annuity to those former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the Secret Service, who retired prior to October 1, 1956; and

(2) Extend the benefits of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to the widows and surviving minor children of deceased firemen and policemen, of the various forces, who died prior to the effective date of the 1957 amendments.

The committee in considering the testimony presented at hearings July 19, 1961, concurred strongly with the position of the Board of Commissioners of the District of Columbia and other witnesses who then testified that relief was due in equity to the widows and surviving minor children of the deceased members of the various branches of the services. Since the present monthly rates for such widows and children are $125 for widows and $25 for each child, and since these rates have remained unchanged in a decade, an adjustment for these dependents is overdue. The cost of this section of the bill is estimated to be $4,696,000 for the remainder of the potential life expectancy of widow beneficiaries.

Under the provisions of this bill these benefits will be made effective the first day of the month following the date of enactment of this act.

The increased benefits for a widow and one child would rise from the present $150 a month to $200 per month. The formula for computing the increased benefits to such widows and children, the committee was given to understand, follows the civil service formula for similar situations when an employee dies in active duty status. This section of the bill would place on a complete parity the protection accorded the surviving dependents of men who died prior to the effective date of the 1957 amendments and the survivors of men who died after the effective date of the amendments.

In considering the adjustments to be accorded retirees who do not have the benefits of the 1957 amendments, the committee gave careful consideration to the proposition that they should in equity be accorded the same benefits as those former members who retired subsequent to the effective date of the 1957 amendments. To do this however, based on a prospective application, would involve expenditures of a magnitude of over $16 million over the life expectancy of the retirees.

The committee further took note of the fact that under the equalization clause of the present retirement system, which has been in operation since 1923, automatic increases in retirement annuities occur whenever a pay raise for active members of the forces is granted.

The following chart which sets forth examples of the relationships between the annuities of various classes of employees under present law, the salary received at date of retirement, the amount of retirement increases which have already occurred as a result of the equalization factor, and the amounts which would be received under the provisions of this bill, is herewith made a part of the report:

Examples of annuities paid policemen and firemen under the Policemen and Firemen's Relief Act of Sept. 1, 1916, as amended, indicating increases in annuity since original retirement and annuities as increased under the provisions of S. 1528, 87th Cong., as amended by the Senate committee in reporting the bill

Rank	Year retired	Service		Salary on date of retirement	Annuity on date of retirement	Effective Aug. 1, 1960, present annuity	Percent increase since retirement	Total amount of increase since retirement	10 percent increase over present annuity under S. 1528 (Senate committee amendment as reported)	
		Years	Months						Amount	Total

Chief [2]	1941	35		8,000.00	4,000.00	8,815.00	120	4,815.00	881.50	9,696.50

[1] Chief from April 1929 to Oct. 31, 1931, service step 2.

[2] Chief from October 1932 to October 1941, service step 7.

Statement showing years of service by retirement categories.

Years of service:	Number
Disability retirements:	
Under 33⅓	960
34	15
35 or more	30
Voluntary retirements:	
Less than 30	64
30 or more	66
Total	1,135

A cost statement, prepared by the government of the District of Columbia, of the 10-percent increase in annuities for retired members of the forces who do not have the benefits of the 1957 amendments is made herewith a part of the report:

Statement of estimated cost of section 1(a) of S. 1528 (relating to retired policemen and firemen) projected in 5-year periods from October 1, 1961, through 1986 and the period thereafter, based on 10-percent annual increase to each retiree:

1961–66	$1,646,000
1967–71	1,301,000
1972–76	895,000
1977–81	552,000
1982–86	300,000
1987 and over	250,000
Total	4,944,000

NOTE.—This information supplied by the Government Actuary of the U.S. Treasury Department.

It is the view of the committee that the 10-percent annuity increase herein recommended and which would be made effective the 1st day of the month following the date of enactment of this act, represents an equitable upward adjustment for this group of employees. While it is recognized that the proponents of a greater increase may find it inadequate, nevertheless, it is the considered judgment of the committee that a greater increase at this time would widen too greatly the existing disparity of treatment accorded the members of other retirement systems under the District government, specifically the teachers and the civil service retirees. Moreover, the committee was of the opinion that at this time it was unwise to burden the District of Columbia with any greater expenditures than are absolutely necessary in view of the fact that the District is presently having difficulty meeting its budgeted requirements for fiscal year 1962.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

The title was amended, so as to read: "A bill to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and of widows and children of certain deceased former officers and members of such forces, department, or service."

EXTENSION OF BENEFITS OF POLICEMEN AND FIREMEN'S RETIREMENT AND DISABILITY AMENDMENTS OF 1957

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 841, S. 1918.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 1918) to extend benefits of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 to widows and surviving children of former members of the Metropolitan Police force, the Fire Department of the District of Columbia, and the U.S. Park Police force, the White House Police force, or the U.S. Secret Service Division, who were retired or who died in the service of any such organization prior to the effective date of such amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement of the purposes of the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MANSFIELD

The purpose of this bill is to extend the benefits of the 1957 amendments to the Policemen and Firemen's Retirement and Disability Act to the widows and surviving minor children of former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and U.S. Secret Service Division, who died in service of any such organization prior to the effective date of the Firemen's Retirement and Disability Act Amendments of 1957, or who retired prior to such effective date.

The committee, in considering the testimony presented at hearings July 19, 1961, concurred strongly with the position of the Board of Commissioners of the District of Columbia and other witnesses who then testified, that relief was due in equity to the widows and surviving minor children of the deceased members of the various branches of the services. Since the present monthly rates for such widows and children are $125 for widows and $25 for each child, and since these rates have remained unchanged in a decade, an adjustment for these dependents is overdue. The cost of this bill is estimated to be $4,696,000 for the remainder of the potential life expectancy of widow beneficiaries. Under the provisions of this bill these benefits will be made effective the first day of the first month following the date of enactment of this act.

The increased benefits for a widow and one child would rise from the present $150 a month to $200 per month. The formula for computing the increased benefits to such widows and children, the committee was given to understand, follows the civil service formula for similar situations when an employee dies in active duty status. This section of the bill would place on a complete parity the protection accorded the surviving dependents of men who died prior to the effective date of the 1957 amendments and the survivors of men who died after the effective date of the amendments.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That each widow or child who, on or after the effective date of this Act, was receiving or is now receiving or shall hereafter be entitled to receive relief or annuity by reason of service in the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, the White House Police force, or the United States Secret Service Division, of a deceased former officer or member who died in the service of any such organization prior to the effective date of the Policemen and Firemen's Retirement and Disability Act Amendments of 1957, approved August 21, 1957 (71 Stat. 391), or who retired prior to such effective date, shall be entitled to benefits computed in accordance with the provisions of subsection (k) of section 12 of the Act approved September 1, 1916 (39 Stat. 718), as amended (section 4–531, District of Columbia Code, 1951 ed., supp. VIII).

SEC. 2. Nothing in this Act shall be deemed to reduce the relief or retirement compensation any person receives, or is entitled to receive, on the date of the enactment of this Act.

SEC. 3. The effective date of this Act shall be the first day of the first month following the date of enactment.

TEACHING HOSPITAL FOR HOWARD UNIVERSITY AND TRANSFER OF FREEDMEN'S HOSPITAL

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 858, H.R. 6302.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 6302) to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. HUMPHREY. Mr. President, I merely wish to say how pleased I am that this measure, which was reported by the Committee on Labor and Public Welfare, comes before the Senate for approval. My colleagues in the Senate will remember that I recently visited Freedmen's Hospital and found that it was totally inadequate for modern hospital and medical care. The pending bill would put the hospital under the jurisdiction of Howard University Medical School. It provides ways and means of constructing a hospital of the size that will meet the patient load for this particular hospital facility.

As I understand, the bill would authorize the transfer of the present Freedmen's Hospital to Howard University pursuant to an agreement between the university board of trustees and the Secretary of Health, Education, and Welfare; authorize appropriations for such sums as may be necessary for the construction of a new hospital for the university and for partial support of its operation; and provide for continued employment of the Freedmen's Hospital employees and maximum consideration of their interest after the transfer.

My hope is that the hospital which will be constructed under this authorization will not be inadequate in size. There has been discussion as to whether a 500-bed

hospital is adequate. It is my view, after very careful study of this hospital—and I visited it and I talked with the hospital staff and the hospital management—that a hospital at least of the size of 850 beds is required. I am happy to know that there is no limitation in the bill on the size of the hospital that could be constructed under the authorization.

I hope that the Senate will quickly pass the bill and send it to the President for signature.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

MEMORIAL TO WOODROW WILSON

Mr. MANSFIELD. Mr. President, I move that the Senate turn to the consideration of Calendar No. 727, Senate Joint Resolution 51.

The PRESIDING OFFICER. The clerk will state the joint resolution by title for the information of the Senate.

The LEGISLATIVE CLERK. A joint resolution (S.J. Res. 51) authorizing the creation of a commission to consider and formulate plans for the construction in the District of Columbia of an appropriate memorial to the memory of Woodrow Wilson.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the joint resolution, which had been reported from the Committee on Rules and Administration with amendments on page 4, at the beginning of line 3, to insert "However, such plans and recommendations shall not be reported until the Commission has obtained the assistance and advice of the National Capital Planning Commission and the Commission of Fine Arts if the memorial is to be located in the District of Columbia, or the assistance and advice of the National Capital Planning Commission, the Commission of Fine Arts, and the National Capital Regional Planning Council if the memorial is to be located in the environs of the District of Columbia. Furthermore, such plans and recommendations shall be consistent with the premise that the construction of the memorial would not be financed by public funds."; in line 24, after the word "memorial", to insert "and"; on page 5, line 3, after the word "joint", to strike out "resolution; and" and insert "resolution.", and after line 3, to strike out:

(d) avail itself of the assistance and advice of the Commission of Fine Arts, the National Capital Planning Commission, and the National Capital Regional Planning Council, and such Commissions and Council shall, upon request, render such assistance and advice.

So as to make the joint resolution read:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there is hereby established a commission, to be known as the Woodrow Wilson Memorial Commission (hereinafter referred to as the "Commission"), for the purpose of considering and formulating plans for the design, construction, and location of a permanent memorial to Woodrow Wilson in Washington, District of Columbia, or in its immediate environs. The Commission shall, in general, decide on the advisability of one of two kinds of memorials: One which would be a monument similar to those which honor Presidents Washington, Jefferson, and Lincoln; or one which will serve as a building of a functional nature, or, as it is often called, a "living memorial". The Commission shall study, among others, proposals to associate the memorial with the Washington International Center program for international visitors.

(b) The Commission shall be composed of the following members:

(1) Former Presidents of the United States, at their pleasure;

(2) Two persons to be appointed by the President of the United States;

(3) Two Senators to be appointed by the President of the Senate;

(4) Two Members of the House of Representatives to be appointed by the Speaker of the House of Representatives; and

(5) Three members to be appointed by the President of the United States, one from each of the following:

(A) The Woodrow Wilson Foundation;

(B) The Woodrow Wilson Centennial Commission (now discharged); and

(C) One member of the Department of the Interior, who shall be the Director of the National Park Service, or his representative.

(c) The Commission shall select a chairman and a vice chairman from among its members. Vacancies occurring in the membership of the Commission shall be filled in the same manner as the original appointment.

(d) The members of the Commission shall serve without compensation, but shall be reimbursed for expenses incurred by them in carrying out the duties of the Commission.

(e) The Commission shall report such plans, together with its recommendations, to the President and Congress at the earliest practicable date, and in the interim shall make annual reports of its progress to the President and Congress. However, such plans and recommendations shall not be reported until the Commission has obtained the assistance and advice of the National Capital Planning Commission and the Commission of Fine Arts if the memorial is to be located in the District of Columbia, or the assistance and advice of the National Capital Planning Commission, the Commission of Fine Arts, and the National Capital Regional Planning Council if the memorial is to be located in the environs of the District of Columbia. Furthermore, such plans and recommendations shall be consistent with the premise that the construction of the memorial would not be financed by public funds.

SEC. 2. The Commission is authorized to—

(a) make such expenditures for personal services and otherwise for the purpose of carrying out the provisions of this joint resolution as it may deem advisable from funds appropriated or received as gifts for such purpose;

(b) accept gifts to be used in carrying out the provisions of this joint resolution or to be used in connection with the construction or other expenses of such memorial; and

(c) hold hearings, organize contests, enter into contracts for personal services and otherwise, and do such other things as may be necessary to carry out the provisions of this joint resolution.

SEC. 3. There is authorized to be appropriated not more than $10,000 to carry out the provisions of this joint resolution.

Mr. MANSFIELD. Mr. President, I wish to offer an amendment to the amendment on page 4, lines 11, 12, 13, and 14, to strike the following language:

Furthermore, such plans and recommendations shall be consistent with the premise that the construction of the memorial would not be financed by public funds.

In explanation of that proposal I wish to say that I have discussed this matter with the Senator from Virginia [Mr. ROBERTSON] and other Senators. In examining the matter affected by my amendment, I discovered that this is the first time a proposal of this kind has been brought to the floor with this particular provision contained in it.

I observe the distinguished junior Senator from Virginia in the Chamber. I yield to him for a statement on the proposed resolution.

Mr. ROBERTSON. Mr. President, we are very much interested in the proposal to build a suitable memorial to honor one of our truly great Presidents. Not only was he a great scholar and political philosopher, but he was a successful leader of our Nation during a time of serious war. We agree with the proposal just made by the distinguished majority leader that there be stricken from the joint resolution, beginning on page 4, line 11, the sentence:

Furthermore, such plans and recommendations shall be consistent with the premise that the construction of the memorial would not be financed by public funds.

Mr. MANSFIELD. I do not recall that I was in attendance in the Committee on Rules and Administration when this proposal was suggested, but the Senator from Iowa was there, and I think he has some views on it. So I would appreciate his comments at this time.

Mr. MILLER. Mr. President, the question was discussed thoroughly in the Committee on Rules and Administration when I was present. I believe the sentiment of the entire membership present at the meeting was that while this kind of project is most desirable, the proponents should make it very clear that the mere authorization of a commission does not at the same time carry with it the promise on the part of Congress that public funds will be used for the construction of the memorial.

From what has been said, as I understand, the objection is not so much to that policy as it is to the fact that the joint resolution singles out a particular project for special wording, wording which is different from that which has been accorded other projects. If that is so, I should like to ask the Senator from Virginia if he would object to having the legislative intent made clear on the floor of the Senate, that the only reason for deleting the language proposed to be deleted by the amendment of the Senator from Montana is that we, by so doing, recognize that we do not wish to single out this particular project for special language, language which is different from that accorded other projects; but that the legislative intent, nevertheless, is clearly that the authorization of the commission does not carry with it the promise, the pledge, or the

implication that Congress will later provide public funds for the project.

Mr. ROBERTSON. The junior Senator from Virginia hesitates to speak for the large number of patrons of the joint resolution who feel that our Nation would be fully justified in erecting a suitable memorial in the District of Columbia to a great President. However, he does say that there is nothing in the history of our Nation with respect to a proposal to erect a monument, in the District of Columbia or anywhere else, to a President of the United States which carried with it language that provided that no public funds should be invested in the proposal.

If we strike out these words, as the majority leader has suggested, and which the Senator from Virginia hopes will be done, the resolution can be taken for exactly what it says. It neither denies the opportunity to ask for public funds nor commits Congress to make appropriations for the memorial. Naturally, I hope that if the Commission recommends a suitable memorial, the Commission will not be precluded, for the first time in history, from asking for public funds for a memorial to one of our truly great Presidents.

Mr. MILLER. Mr. President, I am sure there was no intention on the part of any member of the Committee on Rules and Administration to single out the particular President concerned in the joint resolution for special language which would in any way detract from the high regard in which he is held on the part of the members of the committee.

However, there is concern on the part of many members of the Committee on Rules and Administration, including the junior Senator from Iowa, that particularly at this time, in the light of the policy of President Kennedy to avoid doing things which are merely desirable, instead of things which are absolutely necessary, that, of all the times when a resolution authorizing a Commission to be formed, Congress should not give the impression that it will later provide public funds for the project. In fact, when the proposal was discussed in committee, doubt was expressed that any public funds would be needed if the Commission did its work properly. It was felt that ample funds would be provided from private contributions, thus making the edifice even more befitting the memory of a great President.

The thought was expressed that authority to ask Congress for tax moneys to erect such a monument might detract from the memory of a great President.

I express the desire that the Commission will make all efforts possible to obtain voluntary contributions for this very appropriate, proper purpose, and with the understanding that there is no implication in the joint resolution that public moneys will be appropriated, I should say I would have no objection. I believe the RECORD should be made clear on this point, because it reflects the sentiment of the members of the Committee on Rules and Administration during the meeting I attended when the joint resolution was considered.

Mr. ROBERTSON. Mr. President, I hope the language proposed to be stricken can be removed on the basis I have indicated, so as to leave the Commission free to make plans to seek private donations for a suitable memorial, but not to preclude the Commission from coming to Congress if it thought that was the best way to carry the project through to completion.

Mr. MILLER. Mr. President, I do not believe the Commission would ever be precluded from coming to Congress, even if the language proposed to be stricken were retained in the joint resolution. I do not believe the Commission could be precluded from asking Congress for funds, no matter how the bill was worded. The important point, it seems to me, is to reflect the legislative intent. Whether it is contained in the bill or in statements made on the floor of the Senate does not make too much difference. The legislative intent should be clear that the Commission should make every effort to make certain that the memorial is financed by voluntary contributions, not only because there is concern about the use of public moneys, especially at a time like this, for what would not be considered an absolutely essential expenditure, but also for the purpose of having the monument erected by voluntary contributions from the people, which, in my judgment, would make it a memorial even more befitting the memory of a great President.

Mr. ROBERTSON. The Senator from Virginia agrees that this is not a good time, when the Nation is threatened with another world war and a big step-up in military expenditures, to say nothing of a huge expansion of domestic expenditures, to put a large sum of money into the construction of a memorial to anyone. But based on past experience, if the Commission is organized and can develop a project within the next 10 years on which agreement can be reached, they will be functioning rather effectively.

I think the fear of the Senator from Iowa that if the joint resolution is passed now Congress will be called upon to appropriate a great many million dollars next year is rather unfounded.

Mr. MILLER. I do not have such a fear. My only thought is that the record might not be absolutely clear that the passage of the joint resolution with the amendment of the Senator from Montana does not thereby give an implied promise on the part of Congress that it will later bail out the Commission, so to speak, if the Commission does not do its work properly. It is my personal hope that the Commission will be able to obtain adequate voluntary contributions, because, as I have said before, I think an edifice erected on the basis of voluntary contributions from citizens rather than from tax moneys will be much more befitting the memory of a great President.

Mr. MANSFIELD. Mr. President, I appreciate the courtesy extended by the Senator from Iowa. He has made his position quite clear.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana to strike out the language of the committee amendment on page 4, beginning with the word "Furthermore" in line 11 through 14.

The amendment to the committee amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment, as amended, on page 4, lines 3 through 11.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment on page 4, in line 24, after the word "memorial", to insert "and".

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the committee amendment on page 5, line 3, after the word "joint", to strike out "resolution; and" and insert "resolution.", and after line 3 to strike out paragraph (d).

The amendment was agreed to.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 51) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. WILLIAMS of New Jersey subsequently said: Mr. President, it has been my privilege to speak in this Chamber on many subjects of very great meaning and importance to me. Today, as one of the representatives from a State once served so well by Woodrow Wilson, I am particularly honored to speak on a proposal of great significance to me, to fellow citizens of my home State, and to every person who has been stirred by the eloquence and greatness of Woodrow Wilson.

Senate Joint Resolution 51, which we discuss here today, would establish a Commission to consider and formulate plans for the construction in the District of Columbia of an appropriate permanent memorial to the memory of Woodrow Wilson.

There are several points about this Commission I would like to make: The Commission would be required to make recommendations to Congress. It would not have the power to make final decisions on the form the memorial would take.

Its membership would include persons familiar with present and past efforts to honor Wilson.

The only appropriation of funds involved is $10,000 to carry out the provisions of the resolution. Members would serve without compensation. Recommendation. Recommendations to the President and the Congress would be made at the earliest possible date.

To make certain that the Commission recommendations do not conflict with future development of the District of Columbia, the Commission would be required to seek the assistance and advice of official planning agencies in the Capital City.

In other words, Mr. President, we have here a Commission which would:

First. Thoroughly study all possible forms that a memorial to Wilson could take.

Second. Consider the overall development of Washington, D.C., in making its recommendations.

Third. Seek advice from as many sources as necessary on an appropriate theme for the memorial.

Fourth. Offer recommendations to Congress, for approval or disapproval.

If we are to have a fitting memorial to Woodrow Wilson, this, I believe, is the way to prepare for it. The question is: Is this the time to seek such a memorial?

WILSON AND THE WORLD

When I introduced this resolution this year, 38 Senators joined with me in sponsoring it. In the House, 17 identical resolutions were offered. I have received many letters indicating great interest and enthusiasm for a memorial. Such immediate enthusiasm indicates to me that our affection for Wilson, and our debt to him, may be even stronger today than it was a few decades ago. Now that we are committed so thoroughly to global defense of freedom on all its frontiers, we can appreciate anew the spirit of a man who asked us for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free.

That same man told us that America was born to serve mankind, that aspirations for self-determination should be nurtured rather than thwarted, and that—as he said to a small group in 1923 during his last public utterance:

> I cannot refrain from saying it: I am not one of those who have the least anxiety about the triumph of the principles I have stood for, that we shall prevail is as sure as that God reigns.

Mr. President, it seems to me that greatness is given to a nation when it can produce a man who believes as Wilson did and spoke as Wilson spoke. We should treasure such greatness; we should certainly not accept it dully; and Heaven help us if we ever forget it.

Our debt to Wilson is like a river fed by many streams.

To everyone who has served in education, Wilson will be remembered as the man who fought for new academic freedom.

To every citizen of New Jersey he will be remembered as a Governor who made over the State's corporation, election, public utility and labor laws.

To all who realize that progressive legislation was needed early in this century to dislodge those who "sat upon a hill of privilege," Wilson will be remembered as an architect of social change.

To everyone who believes that the Presidency is a podium for leadership rather than mere administration, Woodrow Wilson will be remembered as a man who gave this Office new dimensions.

And, to everyone who believes that a crime against one nation is a crime against all nations, Wilson will forever be remembered as the man who, in the words of Bernard Baruch, "dared to do what few statesmen have had the courage to do—to introduce ethics into international affairs and to insist that the conduct of nations as well as men be governed by law."

We are still working toward this goal in 1961—more than four decades after Wilson helped us to see it clearly. In 1961 we draw inspiration from Wilson's words, and I think we would draw inspiration from a memorial to him in the Capital of the United States.

THE STAGE IS SET

No one in this Chamber needs any more discussion, I am sure, on the life and accomplishments of Woodrow Wilson. I shall close, therefore, by noting the following:

First. The Woodrow Wilson Centennial Commission, after it completed its notable nationwide program in 1956–57, said that its work would remain incomplete until a memorial to Wilson is constructed in the Nation's Capital. Commission members felt that a memorial of size and grandeur similar to those honoring Washington, Jefferson, and Lincoln would be the only suitable one for Wilson.

Second. Many other suggestions have been made since then for "living memorials"—functional buildings that could carry out a specific Wilsonian theme while serving a specific purpose. As I have said on other occasions, the arguments for a living memorial and for a monumental memorial are strong; I am glad that the Commission will have the job of making the decision on this issue.

I would like to point out, however, that either form of memorial would capture the imaginations of many millions of people throughout the world. Imagine, for instance, the number of visitors from abroad who would visit a Wilson memorial to pay their respects to the memory of a man who may have had an important role in the winning of independence for their homelands. Imagine, too, how those who fled from "captive nations" would wish to visit the same memorial or to pay direct tribute to a man who said earlier in this century that their nations should be free and independent.

What better way could be found to remind our countrymen and our friends in other nations that the United States has sought peace with justice under the leadership of men like Washington, Jefferson, Lincoln, Wilson, and Roosevelt?

Third. My final comment is that the Woodrow Wilson Foundation and many distinguished Americans have expressed great interest in the memorial proposal. The Commission would be assured, I believe, of much help and extensive discussion as soon as it could begin its work.

Mr. President, we in Congress often borrow from Wilson when we wish to make a pertinent comment. I should like to end these arguments for a Wilson Memorial Commission with the words Wilson spoke during his 1912 campaign. He described America as a land with a vision of the future then added:

> She saw them free because they were equal. She saw them banded together because they had the spirit of brothers. She saw them safe because they did not wish to impose upon one another.
>
> And the vision is not changed. The multitude has grown, that welcome multitude that comes from all parts of the world to seek a safe place of life and of hope in America. And so America will move forward, if she moves forward at all, only with her face to that same sun of promise. Just so soon as she forgets the sun in the heavens, just so soon as she looks so intently upon the road before her and around her that she does not know where it leads, then will she forget what America was created for; her light will go out; the nations will group again in darkness, and they will say: "Where are those who prophesied a day of freedom for us? Where are the lights that we followed? Where is the torch that the runners bore?"

DEFENSE OF SUITS AGAINST FEDERAL EMPLOYEES

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar 712, House bill 2883.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 2883) to amend title 28 entitled "Judiciary and Judicial Procedure" of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment and for other purposes, which had been reported from the Committee on the Judiciary, with amendments, on page 2, line 23, after "(d)", to strike out "Any" and insert "With the consent of the plaintiff in any", and in line 24, after the word "court", to strike out "shall" and insert "such action or proceeding may".

The amendments were agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed——

FOREIGN AID

Mr. HUMPHREY. Mr. President, in a recent issue of the Minneapolis, Minn., Tribune, an excerpt from a speech by Mr. John Nuveen, a Chicago investment banker, dealing with foreign aid, appeared.

Mr. Nuveen is an authority on Latin American investment, and served as chief of the U.S. Economic Aid Mission to Greece in 1948 to 1949. His remarks indicate a brilliant insight into the basic problem of foreign aid—that is, how we can get our aid to the people who need it, and past the individuals and groups who in varying degrees have blocked the effective use of our capital in previous years.

I commend Mr. Nuveen's remarks to my colleagues as we consider the appropriations for the foreign aid program.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point in my remarks the article entitled "Let's Interfere in Positive Way," by John Nuveen.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LET'S INTERFERE IN POSITIVE WAY

My thesis is quite simple. China was the first major battle in the cold war and we lost it.

If nothing else, we should have profited by the mistakes we made in China, but almost everything that we have done in Cuba shows that our foreign policy planners did not learn anything from China, for we have repeated almost all the same errors and have lost another major battle in the cold war.

A failure to understand the forces at work in the world is further evidenced by the reappearance, through the John Birch society, of a neurotic fear of communism which was epidemic under McCarthyism and shows that a substantial number of our citizens are not prepared to support a realistic program if our representatives in Washington should develop one.

Debate about the personalities of Mao Tse-tung and Castro tends to obscure from our minds the most important single fact in the world today, i.e. the revolution of the "have-nots." This was the force that was shaping events in China in 1947 and 1948. This is the force that is shaping events in Latin America and the rest of the world today.

What we should have debated in 1947–48 was whether Chiang Kai-shek's government had a program for helping the underprivileged masses of China. He did not but Mao did—that's the simple reason we lost China.

Imagine a sales manager explaining to the president or the president explaining to the board of directors why their company lost a big order to a competitor and saying our competitor merely offered them what they wanted while we offered them what we wanted.

But this is not only what we did in China, it is what we have been doing in our so-called foreign-aid program ever since the Marshall plan. We have told country after country that they should want an army to fight Communist aggression. The people in these countries wanted food and shelter, good health, and schools for their children.

Supporting Chiang has not deterred communism on the mainland and supporting him and his mock Cabinet to return and rule the mainland has long since been regarded as unrealistic. We are in trouble in Korea because for too long we suported Syngman Rhee without questioning his programs of economic and political reform. Bao Dai didn't save Indochina. We have lost North Vietnam and are about to lose Laos.

The one place where we were realistic was in the Philippines, where we helped them get rid of the corrupt leadership of Elpidio Quirino. When he was defeated by a coalition of opposition parties which we helped to bring about and was succeeded by Ramon Magsaysay, an honest patriot dedicated to raising the standard of living of the people, the Communist-inspired Huk rebellion collapsed. The unfortunate death of Magsaysay in a plane accident has produced some problems which are going to require more attention than we have been giving them.

And what did we do in Cuba? We supported Batista after he seized the power of the presidency illegally for the second time. He played ball with American economic interests and he hated communism, so we gave him economic and military aid. We never debated what was being done to raise the standard of living of the mass of the Cuban people.

As a result we are in deep trouble in Cuba, but our greatest danger is not from Cuba but that we will become so preoccupied with Cuba that we won't see the 19 other Latin American countries.

There are potential revolutions in most of these countries. Cuba contains only 6,500,000 people, while the 19 other countries in Latin America have a total population of nearly 200 million people. There is much more hope of preventing a destructive, Cuban-type revolution in those countries than there is of trying to put together the pieces after one has exploded.

There are a couple of simple facts that we should realize about Latin America. When we examine Latin America as a whole, we find that almost 50 percent of the people are illiterate, 50 percent are hungry, and 50 percent have no property and so few possessions that they do not even sleep in beds.

Up to the present time we seem to have assumed that all the ills of Latin America were due to a lack of capital and could be cured with dollars. Cuba certainly has disillusioned us on that. It had more American capital in proportion to its size than any other country in Latin America except Venezuela with its oil.

Our State Department has excused its lack of concern with social revolutions by stating that we couldn't interfere in the internal affairs of other countries and has written this into the articles of the Organization of American States.

Actually "noninterference" is an ambiguous cliche if not a meaningless platitude. It is next to impossible for a nation that is as dominant in world trade and world affairs as the United States to avoid interference in the internal affairs of other countries.

The decision of our Government to stockpile or to stop stockpiling may mean the difference between boom and depression to a neighbor with a one-product economy. Laws regulating the creation and disposal of agricultural surpluses, financial policies, and commercial regulations have an impact on the members of the Organization of American States as well as the commonwealths in the United States.

We should have learned after 12 years of foreign-aid programs that we cannot give aid to another country without interfering in its internal affairs, since such aid is always interpreted by the political regime in power as an endorsement of it and used to strengthen or prolong its political power. The people of Latin America have considered our aid to be interference, regardless of our intentions.

Let's say frankly that we recognize that there is nothing that we can do economically or otherwise to help our neighboring countries that will not constitute interference to some degree in their internal affairs, but we will try to see that such interference will support the cause of raising the standard of living of all the people and not just profit a few politicians and economic royalists

I am suggesting, if you please, that we only give economic aid with strings attached, but those strings will be to insure that our aid helps to better the lot of all the people in the recipient country, not strings to help our defense strategy.

I can offer you one bit of good news. President Kennedy in connection with the 500 million dollars of aid for Latin America which has just been approved by the Congress, has announced that it will have to be matched by action on land and other necessary reforms by the countries receiving it. This is the first time that we have announced such a fact publicly as official policy.

Let's not be deceived about the Communists. They are dedicated, ruthless, and conscienceless, but let's not be completely preoccupied with our enemies. Let's get on with the job of giving leadership in the great unfinished world revolution, the revolution we started, the revolution dedicated to the proposition that all men are created equal and that the governments derive their just powers from the consent of the governed.

MILK PRODUCTION POLICY AND OTHER AGRICULTURAL POLICIES

Mr. HUMPHREY. Mr. President, I wish to speak for a few moments on an item which appeared in the Nation's press, and, in particular, in the press along the eastern seaboard. This item relates to an address delivered by Governor Rockefeller, of the State of New York. His address was on the subject of agricultural policy.

I have heard the Governor of New York speak before on agricultural policy. I find his statements interesting, if not informative. I find his statements worthy of news copy, even if not worthy of very serious consideration.

For 2½ days, now, the headlines in the Washington, D.C., press have dealt with a speech which Governor Rockefeller made at the New York State Fair; the speech related to the agricultural policy of this administration.

It seems that on September 6, Governor Rockefeller, when speaking in Syracuse, N.Y., at the annual farm dinner on the eve of the Governor's Day at the State Fair, made some observations on current Government agricultural policy which I believe to be worthy of some comment, if only for the purpose of setting the record straight.

First, Governor Rockefeller assailed the Secretary of Agriculture, Orville Freeman, for advocating a national milk sanitation law; and then Governor Rockefeller criticized the current feed grains program. Governor Rockefeller specifically charged the Secretary of Agriculture with "pushing legislation favoring his own home State of Minnesota and its immediate neighbors at the expense of the rest of the country."

Because the Secretary of Agriculture is from a State which produces milk, among many other agricultural commodities, I suppose he is inevitably going to be subjected to this type of politically motivated accusation, even though he is simply advocating a measure in the national interest, one that is intended to bring commerce in milk and milk products out of the 19th century into the present day.

Incidentally, Mr. President, the second largest crop in Minnesota is soybeans, one of Minnesota's major crops.

Mr. President, I am a sponsor, along with my colleague [Mr. MCCARTHY] and the Senators from Wisconsin [Mr. PROXMIRE and Mr. WILEY] of Senate bill 212, to amend the Public Health Service Act to protect the public from unsanitary milk and milk products shipped in interstate commerce, without unduly burdening such commerce. The bill relates to nationwide standards for milk sanitation. The standards are to be high, and will be enforced by the Public Health Service.

In my testimony on the bill I pointed out that by establishing the U.S. Public Health Service proven milk code as a quality yardstick for milk moving in interstate trade, we shall eliminate the use of arbitrary health standards as trade barriers against the shipment of high quality milk from one State to another. Currently, many eastern and southern milk consuming areas are hemmed in by sanitary standards which are designed more to protect local milk monopolies than to protect the public health.

Mr. President, milk and milk products are the only agricultural products which are prevented from moving freely in interstate commerce. This is obviously unfair to the producers who live in areas such as Minnesota, Wisconsin, North Dakota, South Dakota, and other States that provide the ideal conditions for volume production. It is also unfair to the consuming public to deny them the benefits resulting from the free flow of trade.

The National Milk Sanitation Act is intended to bring commerce in milk and milk products out of the 19th century and into the present day, for the betterment of the general welfare and the consumers.

Mr. President, the proposed National Milk Sanitation Act is designed to establish the U.S. Public Health Service's proven milk code as the quality yardstick for milk moving in interstate trade; and the National Milk Sanitation Act would eliminate the use of arbitrary local health standards as trade barriers against the shipment of high-quality milk from one State to another.

Currently, many markets are being restrained and restricted by these health ordinances.

Mr. President, it seems to me there is a basic contradiction in Governor Rockefeller's proposals on agricultural policy.

For example, in the speech Governor Rockefeller delivered at Syracuse, he said that by backing national milk sanitary standards, Secretary Freeman is "threatening to disrupt our existing system for orderly milk marketing."

He did not say anything had disrupted it; he merely said it was threatening to disrupt it. What he really means is that he is against a national milk sanitation code that will assure consumers of milk a high quality product that meets higher standards than the present New York State standards; and he means that he prefers to restrict the flow of milk, in order to have milk production in New York State higher than in some other areas of the Nation. I cannot see much economy in that, and I do not see much sound economic policy in it. Governor Rockefeller is really a protectionist in his home State of New York even as he sends telegrams to Members of Congress advocating foreign aid. He says he is an internationalist when we talk about other nations. He is a protectionist at home, but a free trader abroad.

I have not noticed that the Governor has said there ought to be import duties on textile products, even though in New York thousands of people are in the textile business and their jobs are being affected by foreign competition. He appears to be less concerned about imports from Japan than he is about imports of milk from Wisconsin.

I would be interested in knowing how this Republican spokesman can explain that contradiction. Governor Rockefeller's statements reflect a philosophy that may be popular in his State on one product, but they are not those which would indicate a proper national interest for a national figure.

I want to remind my friends of the Republican Party that he is an alleged national figure. He ought to speak as a national figure.

I really do not know how the Governor, by the wildest stretch of the imagination, can inject the word "scarcity" as it applies to this discussion, particularly feed grains.

Let me quote from the news dispatch which appeared in the Herald Tribune News Service, Mr. Charles N. Quinn, Syracuse, N.Y.:

> The Republican Governor also chided the Kennedy administration for its emergency feed program to curb production. Rockefeller said the program would cost the taxpayers $800 million this year and could lead to higher prices for the New York dairymen, poultrymen, and livestock feeders.

In another story, in the New York Times, by Mr. Warren Weaver, Jr., the following statement appears:

> Mr. Rockefeller's objection to reducing feed grain production is that it tends to raise the prices that New York dairy farmers have to pay for their feed. He conceded that feed prices in the State now were not so bad, but warned against possible future increases.

What is the Governor saying? Well, the future looks bleak, because the farmers who produce feed grains may get a little more for their products. Let me add that what those farmers get will be far below parity prices. But the Governor concedes there is nothing wrong now, that it is not so bad, even though the feed grains program has been in effect for several months. This is a program of eventualities, the tortures of the future. It makes good politics, but it is very poor economics. What is more, it does not represent the truth.

The Governor of New York would have the American people believe that the feed grains program is going to cost $800 million this year. I say to Mr. Rockefeller, "You have revealed an abysmal lack of knowledge and information about this program." The program will cost, for payments and operations, $730 million; but it will save the Commodity Credit Corporation approximately $800 million in storage costs and in the handling of the surplus grains. Under this program, there has been a cut of 650 million bushels, at an average saving to the Government of $1.10 a bushel.

I say to the Governor of New York, "If you are going to tell the story, tell it all. If you are going to say how much this program costs in conservation payments, you ought to say how much we are going to save out of the production curb or control that is put into effect."

What are the facts? I now quote from a debate that took place in the House of Representatives the other day, a debate in which there was no contest over these facts, and which appears at page 18186 of the RECORD for September 5, 1961. Representative ALBERT was speaking and was quoting from the debate of the Representative from Iowa [Mr. HOEVEN]:

> The simple fact is that for every bushel of corn not produced and not acquired by CCC, a saving of $1.10 per bushel in storage, handling, transportation, and interest charges accrues to the Government, and hence to the taxpayer.
>
> September 1 estimates of the Department of Agriculture indicate that in point of fact the corn crop under the new program will be about 650 million bushels less than it would have been had the feed grains law not been enacted, and that it will be some 540 million bushels under the 1960 production figure.

So the feed grains law put into effect some production controls which have resulted in a saving of $800 million and over to the taxpayer and the Government on costs for handling the surplus. The total cost of the program will be approximately $730 million, which is a net saving to the taxpayer of $70 million. It will be more than that. These are conservative figures. What is more, the farm producer himself, not the handler, not the Commodity Credit Corporation, not the grain trade, but the farmer himself, will get a better price for his feed grains.

What do better prices for feed grains mean? Better prices for feed grains mean, first of all, a better income for the farm producer. This means better consumption. Farm income is up about 10 percent already under this administration.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. JOHNSTON. The reason I was so anxious to interrupt at this point is that history itself gives us a little light on this subject. I well remember when I was Governor of South Carolina and Mr. Dewey was Governor of New York, the same question came up about selling feed grains. He wanted more feed grains sold in New York at low prices. Governor Dewey was speaking at the conference and he was asked where he expected the feed grains to be sold which would be fed to the hogs. He said, "I expect them to sell it to us." He was asked, "What are you going to do with the little pigs?" He said, "Kill them." If one will look at the record, he will see a song was published at that time about the pigs squealing, which shows that the Governor of New York was looking after the interests of New York and what was best for New York, and not for the consumers or the people in general at all.

Mr. HUMPHREY. I thank the Senator for his contribution. I have no objection to the Governor of New York looking after what he considers to be the interests of his State and his constituents, but he should take into consideration the full constituency.

There should be fair prices for feed grains. The record of every university and every land-grant college in America, without exception, shows that when feed grain prices are fair and reasonable—which are above what they are today—cattle prices are fair—which are above what they have been—then the volume of milk is available which will keep consumer prices at a reasonable level. There is no excess supply of milk in this country in light of our national commitments and our needs. When we talk about what is good for the people, we

had better keep in mind not only what they produce, but what they eat, and the free flow of commerce in this Nation is to the interest of America. That is what we are talking about when we talk about a National Milk Sanitation Act.

The Governor went on to point out, in the agricultural policy statement, that we were engaging in a philosophy of scarcity. He said the Kennedy administration's program will create food shortages and is based on a philosophy of scarcity. The exact quotation is, "Mr. Rockefeller questioned the wisdom of the Kennedy administration's 'philosophy of artificial scarcity' in the feed grains used by dairy farmers." That is a quotation from the New York Times, a story by Warren Weaver, Jr.

About what philosophy of scarcity is he talking? I have news for Mr. Rockefeller. There are 1.1 billion bushels of corn in surplus, in the ownership of the Commodity Credit Corporation today, plus many hundreds of millions more under loan. There are 400 to 500 million bushels of feed grains in surplus over and beyond our commitments.

A philosophy of scarcity? All the administration has attempted to do is to slow down the accumulation of this surplus. There are large strategic reserves for our national emergency needs, as well as food supplies for our international commitments. There is available a supply over and above any of those requirements.

Today the feed grain farmers are getting a little better price than they received a year ago. A year ago the price on the average was below 70 percent of parity, which no industrial worker would tolerate and which no businessman would tolerate.

Today the feed grain producer is getting a little better price, but he is a long, long way from parity prices. The cattle raiser is a long way from parity prices.

The present Presiding Officer [Mr. HICKEY] comes from a State in which there are range cattle and feeder cattle. The Senator knows cattle prices need strengthening, rather than depressing. The Senator knows when there is an abundance—a fantastic surplus—of feed grains it tends to produce a surplus of cattle and hogs, which in turn results in lower prices.

What the administration is attempting to do is not to engage in a philosophy of scarcity but to engage in a philosophy of production regulation and production management, so that prices in the marketplace will provide a fair return on work and investment and capital. That is what we are trying to do. We are making a beginning. We have a long way yet to go, but we have made a beginning. We have turned the corner. The price structure of farm commodities is not going down. It is now beginning to go up.

Mr. President, for years the farm producer has been subsidizing food for all of us. Dairy producers in my State have been driven out of business by the thousands because of inadequate dairy prices. Entire herds were liquidated—hundreds of them—when dairy price supports were between 75 and 85 percent of parity.

Feed grain prices were cheap. Oats were selling at 40 cents a bushel, and corn at 90 cents a bushel. Feed grain prices were cheap. So were cattle prices. Milk was also cheap.

Farmers were driven off the land. Farmers were forced to sell their herds. Farmers had their property foreclosed.

The record of the recent years is a tragic one.

This Senator has not spoken on this subject this year, because we have been making some progress. We have been moving ahead. We extended more farm credit, at reasonable rates of interest. We stepped up the food-for-peace program. We improved the conservation program and the diverted acres program. We passed a feed grains program. We instituted a new wheat program, a program for cotton, a program for rice, a program for tobacco, a program for other commodities. We are beginning to move ahead.

A spokesman for the opposition party says that this program is based upon artificial scarcity, and he says that it is an unwise program endangering New York's dairy farm economy by playing politics with agriculture.

I say, very frankly, American agriculture has been endangered for years by bad politics and poor economics. A corn program passed over my protest. That was the administration program of the the Eisenhower-Benson administration, which permitted unlimited planting, with a guaranteed price, and it filled the Commodity Credit Corporation bins with over $3 billion worth of corn surplus.

This Senator said that would happen. This Senator stood on the Senate floor and said, "If you people accept the Eisenhower-Benson foreign program on corn, you will have anywhere from three-quarters of a billion to a billion bushels of corn more than you ever had before, and you can expect 15 million to 18 million acres of new production."

I was mistaken. There were actually 1.1 billion bushels more than expected, and 17 million acres were opened up for new planting at a guaranteed price.

Whom did this help? No one. It hurt the taxpayers. It hurt the Commodity Credit Corporation. It hurt the farm prices. It injured the farm economy. It hurt everybody.

Mr. President, I say it is rather peculiar to observe the leading spokesman for a great national party being protectionist for one commodity in his home State and a freetrader internationally. I really do not see how the Governor by the wildest stretch of his Republican imagination can inject the word "scarcity" into any discussion of feed grains, when he knows what are the available supplies.

I say to Governor Rockefeller, we shall have to liquidate, after this year's crop, nearly 2 billion bushels of corn surpluses before we can talk about scarcity.

I do not see how anything can be considered to be scarce when it would cost the taxpayers $800 million a year simply to store the overproduction. That is what it would have cost had we not passed the feed grains program.

We would have had to spend this year an additional $800 million for the handling and the storage of the corn alone, exclusive of the grain sorghums, barley, oats, rye—other well-known feed grains.

The elimination of this tremendous drain on the taxpayers is what the administration is trying to achieve, and at the same time the administration is trying to help the farm families share in the prosperity which is being enjoyed by the rest of our economy.

It is true that the feed grains program costs over $700 million a year. To whom does that go? It does not go to the banking houses on Wall Street, I say to the Governor of New York. It goes to the farm families in some 40 States of this Union, who produce feed grains.

In the process of giving out some $730 million in payments, either in cash or in kind, we save for the taxpayers of this country and for the Commodity Credit Corporation over $800 million on corn alone. This represents a cash saving to the taxpayers of over $70 million. By the time we add in savings on the other feed grains program, the figure is considerably larger.

Every study I have seen on this subject has shown that a fair price for feed grains in the marketplace means a better price for cattle, and this in turn insures an adequate supply of milk. If the milk supply is allowed to move freely in interstate commerce without impediment and without artificial restraints, as the National Milk Sanitation Act would provide—those restraints would be gone—the health of the consumer would be protected, and so would his pocketbook.

I repeat that the Governor was unable to state that the feed grain prices had increased in his State, because they have not. He raises this specter for the future. I predict he will turn out to be as bad a prognosticator on this subject as was the former Secretary of Agriculture, whose advisers are now coaching Governor Rockefeller.

Mr. President, I happen to like Nelson Rockefeller as an individual. I think he is a fine American. I wish to be a friend of his. He has been very kind to me.

I make that statement in all sincerity and respect. Mr. Rockefeller is a fine and great American. My respect for him as an individual is very sincere and genuine. But I say to that good man, "Get yourself new advisers on agriculture, because if you do not, you will mislead a great number of people and, first of all, you will mislead yourself."

I fail to see how an efficient dairyman in the State of New York could be hurt in the New York milk market by a Minnesota, South Dakota, North Dakota, Wisconsin, or Iowa dairyman who would have to transport his milk a thousand miles in order to reach that market. By a national Milk Sanitation Act we would be able to remove the artificial restraints, the barriers to the free flow of commerce; and if the dairy producer in one part of the country could produce a high quality, clean, healthful, nutritious product which met high Federal standards, and if he could compete economically with the producer closer at hand, it would be for the benefit of all. It would be for the benefit of the Nation,

and it would be for the benefit of the consumer.

As a man who believes in free enterprise and competition, I believe the good Governor of New York would agree with me in that statement. I cannot help but believe he must feel that there is no justification for the restraint of trade between the States.

It is bad enough when there is restraint of trade between nations. But interestingly enough, the Governor of New York, who is international-minded, a former adviser in the State Department, a man who is able, intelligent, and deeply concerned about questions of foreign policy, complains about restraints between nations. In the main I find myself in agreement with his stand. He has been of great help to us in these areas of foreign policy.

But I say to him, "Governor, how can you condemn import controls, quotas, and embargoes between nations when some of those import controls might well benefit a local industry in your State—a manufacturing industry, the textile industry, the garment industry, and other plants in which people work? Yet you seek to justify, and urge the retention of, import controls, embargoes, and artificial restraints of trade relating to one product—milk." We are not speaking of apples, oranges, citrus fruits, wheat, corn, or vegetable oil, but only one product.

In the national interest, rather than in the parochial or local interest, I call upon this Republican leader to join with the administration in seeking to break some of the many special barriers which prevent the free flow of milk and milk products in interstate commerce.

I also call upon him to study the feed grains bill and see what its favorable impact is upon the economy and offer his constructive suggestions for the improvement of our agricultural policy so that we may improve farm income. The drop in farm income in this country is more responsible for unemployment than any other single factor in our economy.

Farm income dropped from $15½ billion net in 1952 to slightly above $11 billion net in 1960—a drop of over $4 billion in annual income under the Eisenhower-Benson administration. This sharp decline in farm income caused unemployment in the steel industry and the textile industry, and held down the gross national product. Therefore, in part, it was responsible for the drop in national income and for the continuing tide of unemployment.

One of the best answers to unemployment is to place the agricultural sector of our economy on an equal basis with other segments. We ought to improve the price level. Let no one talk to me about efficiency. The farm producer is the most efficient producer in the world. He is the miracle producer of the world. He has everyone else run out when it comes to production.

It is interesting that we have all kinds of international protections for other commodities, but when it comes to the farmer, he must compete in the open market. All over the world there are restrictions against the importation of American agricultural products.

I have been riding herd on the State Department to have its diplomats, as they negotiate trade agreements, negotiate some relaxation in the barriers that prevent the importation of American farm products into country after country, particularly in Western Europe. When I was studying the Office for Economic Development in Europe, where we are trying to improve our trade relationships, and where we are making an effort to coordinate our economic policies, I found out, to my surprise and dismay, that literally country after country had tariffs, embargoes, and import restrictions upon one American agricultural commodity after another.

A great number of people can see the other fellow's point of view before they can see our own. I shall be one of those who see the other fellow's point of view. I have been a firm internationalist, an exponent of the United Nations, and an exponent of freer trade. But freer trade means trade in two directions. The very same people overseas who are concerned about the importation of American agricultural commodities want to make sure that we buy their radios, textiles, and other products.

Japan is one of the great markets for American agricultural products. The balance of trade with Japan is in our favor.

I have meticulously studied the record of every other country and have found that there is great room for improvement.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. DOUGLAS. I am glad that the Senator from Minnesota is emphasizing this point. Is it not true that, in addition to the limitations which European countries impose upon the importation of American farm commodities, in many cases limitations have been placed upon the amount of American coal which can be imported?

Mr. HUMPHREY. The Senator is correct.

Mr. DOUGLAS. The limitation of foreign markets on American coal is one of the factors which causes the coal industry to wish to restrict the importation of residual oil from Venezuela. Is that not true?

Mr. HUMPHREY. The Senator's analogy is absolutely correct.

Mr. DOUGLAS. If some of these countries—perhaps I should be more specific and mention West Germany—were to loosen their restrictions upon American coal, so that we could export many million more tons of coal, the pressure for further restriction on Venezuelan residual oil would be reduced.

Mr. HUMPHREY. That is correct.

Mr. DOUGLAS. So that the practice of West Germany and the practice of other countries is having an indirect effect and is worsening conditions not merely between Europe and the United States, but also between the United States and countries in northern Latin America.

Mr. HUMPHREY. It might well have an adverse effect upon our relationship with the Middle East. We found out in recent days—and we should have known it for years, although the experts probably knew about it, but only recently there has been much public comment on it—that all our foreign aid in Latin America would do no good if there were a break in the commodity price of any sizable proportions. In other words, there are 14 countries in Latin America who are coffee producers. If the price of coffee were to drop 3 or 4 cents a pound, all of the money put into the Alliance of Progress would be lost. It would be consumed without having any impact on the economy at all.

I find that when I go to some areas of the world that some countries have heavy taxes on the importation of coffee. Some of these countries have a very favorable gold reserve, and a favorable balance of trade. If they would take off as little as half the tax on the importation of coffee, it would give a shot in the arm to Latin American countries far beyond even what our aid program could do.

That is true with West Germany and other countries in the NATO alliance.

I wish to conclude on this note. Our agriculture has been the victim of economic abuse by governmental policies. That abuse started in 1953. Farm parity in late 1953 stood at 100 percent of parity. That abuse and misuse of agriculture which started in 1953 continued right up until January 20, 1961, with the Kennedy administration coming into power.

The administration has a terrific problem and a great challenge on its hands. We have in the Secretary of Agriculture a man who knows how to meet these problems and these challenges. He did not come with all the answers ready made. He comes as a student of the law of economics, of agriculture, of farm people. He was the Governor of a great agricultural State.

The Department of Agriculture has many fine, wonderful people and competent experts in it. The Department is reevaluating the programs that are now on the statute books. A new farm program was presented to Congress. Some of it was accepted. About three-quarters of it was accepted, and about one-fourth of it was rejected. I am sure that my colleagues in the Senate in rejecting that portion felt they were doing the right thing. I had some doubts about portions of it myself. I am an administration supporter, but I am not an administration rubberstamp. I was sent to the Senate to represent the people of my State. I hope to be a U.S. Senator, not merely a Minnesota Senator. The Department of Agriculture under this administration is moving. I put in the RECORD a few weeks ago the record of the administration of the Secretary of Agriculture during the first 6 months.

The first act of our President was an Executive order for a broader distribution of surplus foods through the food stamp plan. We passed a law during the past administration granting the President such authority. I was the author of it. It stood around for 2 years, unused. President Kennedy put it into effect. We increased our soil conservation payments. We are extending our

Great Plains program, and our rural development program; also our Soil Conservation Service program. We are expanding and improving the agricultural research program. We have an emergency feed grain program which is working. In fact, the signup under that program is nothing short of amazing.

A distinguished Member of the House, Mr. HOEVEN, of Iowa, had this to say:

I find that in my section of the Corn Belt, the feed grain program is a very popular program. The degree of participation in the program certainly indicates that. The participation in Iowa is 65.4 percent; Minnesota, 50.2 percent; Missouri, 58.9; North Dakota, 73.5; and Nebraska, 71.5—all in the great feed grain area of this country.

This is not the language of a Democratic Senator or Representative. That is the language of a well-known and able Republican Representative. The farmers like the feed grain program. They have signed up. It is the greatest signup under a farm program since the late 1940's. The program is working. The program is going to save the taxpayers money. The program is going to raise agricultural income. We have had an increase of 10 percent this year already. The effect of the feed grain program has been felt in the cash registers of the country.

I put information in the RECORD 2 months ago, from the Federal Reserve district, showing what happened when these payments were made under the feed grain program; how the farmers used the money to repair machinery, to buy clothing, to repair their homes. We are beginning to move. What we need is a cooperative understanding on the part of prominent public officials, to get the farm economy where it belongs. When that happens, Detroit will be a happier city; so will Minneapolis. The farm implement industry of America has been a sick industry because of the farm recession which has been in effect for over 8 years. It will again start to become a vital, vigorous, prosperous industry. The farmer is the greatest user of steel products outside of the automobile industry. He is one of the largest users of lubricants and oils. He is one of the largest users of rubber products, and one of the largest users of electricity. That is, Mr. President, if he has money. One of the problems of having the capital on the eastern seaboard is that some people seem to forget in this part of the world what rural America is like, even though there are vast rural areas in this vicinity.

The miracle of American farming and the miracle of its production and efficiency is something which the other parts of the economy have never even come close to. Farmers have increased their productivity further than any other segment has accomplished. It has gone so far that no one even talks about catching up. The question is whether Maris or Mantle will equal Babe Ruth's record. They may or they may not. It is in the realm of the possible. However, no one ever asks whether American industry can ever catch up with the efficiency of agriculture. American industry is productive and efficient. It is all that in our economy, but it can never catch up with the efficiency and productivity of American agriculture.

All over the world, agriculture is failing. The greatest failure of the Soviet system and the greatest failure of communism is in its agriculture. The Soviet Union with all its atom testing and bluster and movement of troops has doubts in the mind of the Kremlin because of the colossal failure of its agriculture. Everywhere—China, East Germany, Rumania, Bulgaria, the Soviet Union—wherever there is communism and collectivism, agriculture is a failure. Wherever there is a reasonable degree of freedom, agriculture has a chance of succeeding. One of the great accomplishments of this Nation today is the tremendous achievement of our farm people. It is the great success story.

The American farmer has the food ready, if it is needed, for ourselves and our allies. The American farmer can produce more food the minute he is given the "go ahead." He will do it without injury to soil or man.

So I suggest that this is the kind of message, a little pat on the back for our farmers, a little word of encouragement, a little word of honor and respect, rather than "scarcity" or "injurious to our dairymen."

Someday I hope to have a talk with this able Governor. I think he needs a new direction in agricultural policy. Since I believe in a bipartisan foreign policy, I should like to help him out with a successful bipartisan agricultural policy.

I took the floor today to answer his address—an address which contained so much misinformation, yet got so much type and so much print. Is it not interesting that it got so much print? I have heard Governors from the Midwest who have said things to the contrary, but they have never been heard of. But if one speaks at Syracuse, N.Y., or in other great populated areas of the eastern seaboard about a subject of which he knows very little, and of which the greatest quality is its misinformation and misinterpretation, it makes the headlines day after day after day.

That speech was made on September 5. Yet even yesterday afternoon and last night, on the 6th of September, and this morning, too, there were news stories about the profound statement of the Governor of New York with respect to agriculture. The speech was just about as profound as to say that the moon is made of green cheese—which of itself suggests some agricultural philosophy.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "Cooperatives Called Answer to Communism," published in the St. Paul Pioneer Press of August 24, 1961. The article relates to an address delivered by Raymond W. Miller, a visiting Harvard University lecturer and a member of the Harvard School of Business, before the American Institute of Cooperation at the University of Minnesota.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HARVARD LECTURER SPEAKS AT UNIVERSITY MEET—COOPERATIVES CALLED ANSWER TO COMMUNISM

Cooperatives are one of the free world's principal answers to communism, a visiting Harvard University lecturer told 3,000 people attending an American Institute of Cooperation session at the University of Minnesota Wednesday night.

Raymond W. Miller, who also is president of a Washington, D.C., public relations firm, said the free world can reverse the losing trend against communism by "exporting cooperative capitalism, or the kind of economic system found in the United States."

Miller emphasized that freedom is most secure in those countries where cooperatives are a basic part of capitalist economy—citing Sweden, Denmark, Great Britain, Ireland, Greece, Canada, and the United States as examples.

"Communism is in a virulent state where cooperatives are nonexistent or very weak," he said. "Although our cooperative system isn't perfect, it is concerned with providing for the betterment of the human spirit and the dignity of the individual * * * something the Soviet system does not do."

Among other speakers at the 3-day meeting was Richard M. Hausler, director of the rural areas development (RAD) program of the Rural Electrification Administration.

Hausler said economic boosting of low-income rural areas can be done with new industries and cooperatives can help industries find new markets for food and fiber processing and services.

In the AIC's annual summer election, most officers were reelected. Skull Rutford of St. Paul was renamed board of trustees chairman. New vice chairmen are Howard Gordon, Richmond, Va., and K. N. Probasco, Columbus, Ohio.

New 3-year trustees are Foy M. Troute, Walla Walla, Wash.; Ramiro L. Colon, Ponce, Puerto Rico; Al Whitmore, Orlando, Fla.; J. L. Harpole, Jackson, Miss., and Russell Dennis of New York City.

Mr. HUMPHREY. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD excerpts from the Papal Encyclical entitled "Mother and Teacher," which were published in the magazine Catholic Rural Life for September 1961. The excerpts relate to agricultural philosophy and policy, and are entitled "Pope John Writes To and About Farmers." I commend the excerpts to the reading of all those who discuss agricultural philosophy and agricultural policy, because much is to be learned and gained from a careful reading of and thoughtful mediation upon the brilliant and profound words of the Holy Father, Pope John.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

POPE JOHN WRITES TO AND ABOUT FARMERS

A fundamental problem that arises in practically all political communities is the following: how to proceed in order that the disproportion in productive efficiency between the agricultural sector on the one hand and, on the other, the industrial sector and that of services be reduced; that the standard of living of the farm-rural population be as close as possible to the standard of living of city people, who draw their resources from the industrial sector and from that of the service sector; that

the tillers of the soil may not be possessed of an inferiority complex, but rather be persuaded that even in agriculture they can develop their personality through their toil and look forward to the future with confidence.

It is above all indispensable that great care be taken, especially by the public authorities, to insure that the essential services in country areas be suitably developed: good roads, transport, means of communication, drinking water, housing health services, elementary education and technical and professional training, conditions suitable for the practice of religion, means of recreation; and to insure that there should be a good supply of those products which enable the country home to be well equipped and to be run on modern lines. Whenever such services, necessary today for a becoming standard of living, are lacking in country areas, economic development and social progress become almost impossible or develop too slowly; and the consequence of this is that the flow of population away from the country becomes almost impossible to check and difficult to control.

The fundamental principle in a system of taxation based on justice and equity is that the burdens be proportioned to the capacity of the people to contribute. But the common good also requires that in the assessment of tax, it must be borne in mind that, in the sector of agriculture, the returns develop more slowly and are exposed to greater risks in their production, and that there is greater difficulty in obtaining the capital necessary to increase them.

Because the return per head is generally less in agriculture than in the sectors of industry and of services, it would not be in accordance with the standards of social justice and equity to set up systems of social insurance or of social security in which the allowances accorded to the forces of agricultural labor and of the individual families were substantially lower than those guaranteed to the sectors of industry and of services. We consider that social policy must aim at guaranteeing that the insurance allowances made to the people should not be materially different no matter in what economic sector they work or the income on which they live.

Given the nature of agricultural produce, it is necessary that an effective system of regulation should be enforced to protect prices, making use, to this end, of the numerous expedients which present day economic technique can offer. It is very desirable that such regulation should be, primarily, the work of the interested parties; though supervision by the public authority cannot be dispensed with.

It is also opportune to promote in agricultural regions the industries and services pertaining to the preservation, processing and transportation of farm products.

We should like to recall to your minds that in agriculture, as in other sectors of production, association is a vital need today, the more so as this sector has as its base the family size enterprise. Rural workers should feel a sense of solidarity one with another and should unite to form cooperatives and professional associations, which are both necessary if they are to benefit from scientific and technical progress in methods of production, if they are to contribute in an efficacious manner to defend the prices of their products, if they are to attain an equal footing with other economical professional classes who are likewise usually organized. They need to organize to have a voice in political circles as well as in organs of public administration, for today almost nobody hears, much less pays attention to, isolated voices.

There are countries which produce consumer goods and especially farm products in excess, while in other countries large segments of the population suffer from misery and hunger. Justice and humanity demand that the former come to the aid of the latter. To destroy or to squander goods that other people need in order to live, is to offend against justice and humanity.

In reducing social principles and directives to practice, one usually goes through three stages: reviewing the situation, judging it in the light of these principles and directives, deciding what can and what should be done according to the mode and degree permitted by the situation itself. These are the three stages that are usually expressed in the three terms: look, judge, act.

Certainly, the church has taught and always teaches that scientifico-technical progress and the resultant material well-being are truly good and, as such, mark an important phase in human civilization. Nevertheless, these things should be valued according to their true worth, namely, as instruments or means used to achieve more effectively, a higher end, that of facilitating and promoting the spiritual perfection of mankind, both in the natural and the supernatural order.

Mr. PROXMIRE. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. PROXMIRE. First, I wish to compliment the Senator from Minnesota upon his excellent statement. It should be written in words of fire, a mile high, that the farmers of America have done a magnificent job, the best job in terms of economic efficiency of any group in America. The American farmer is so far ahead there is no comparison with agriculture anywhere in the world or with any other American group. Somehow, this has escaped the people of America. Too many have the opinion that the farmers are on the backs of the taxpayers.

The fact is that the consumers of America have been subsidized by the farmer, as the able Secretary of Agriculture has said over and over again. I think it is so important that the people of America get a true picture of what the farmers are doing. I am certain the Senator from Minnesota will agree with me that there is no group in America who works harder or longer hours than the farmer.

I do not know of any group in America which has increased its efficiency as much as the farmers. There is no group in America which takes as big a risk as the farmer takes. There is no group in America which, in terms of per capita investment, has invested as much money and as much property in its operations as the farmer invests, considering what he gets out of it. With all that investment risks, his skill, and his hard work, the fact is that the farmers in Minnesota and Wisconsin earn less than $1 an hour.

Mr. HUMPHREY. And the farmers of Iowa, too.

Mr. PROXMIRE. The farmer in Iowa may perhaps earn more than the farmers in Wisconsin and Minnesota, but I am sure he must earn less than a dollar an hour.

The speech just delivered by the Senator from Minnesota is a wonderful speech also because it answers the Governor of New York. A little earlier this morning, I, too, spoke about the same speech made by the Governor of New York. I think it should be emphasized that the Governor of New York not only misunderstands the wonderful role, the vital role, which the farmer has played, and can play, and the way the administration is contributing to it, but it also overlooks the enormous benefit which will accrue to the consumers of America if we can adopt the kind of national milk sanitation law which the administration is now supporting. This proposal denounced by Rockefeller will vastly benefit the consumers, not only of Minnesota, Iowa, and Wisconsin, but also the 16 million consumers in New York State.

Once again, I have to—and I have to because it is true—say in conclusion that the Senator from Minnesota is truly the champion of the American farmer, and is properly viewed as the champion of the dairy farmers of Wisconsin and all over the Nation.

Mr. HUMPHREY. I thank the distinguished Senator from Wisconsin.

Mr. MILLER. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. MILLER. Mr. President, I would be remiss if I did not make it clear that the champions of farmers do not all come from the other side of the aisle; that there are champions of the farmers on the Republican side, as well.

Furthermore, I wish to emphasize that I have always believed that the championing of farmers and the concern over the situation of the farmers is something which must, if it is ever to be solved, rise above the arena of partisan politics; that the championing of farmers should have no line drawn between the Members of the Senate or the Members of the House.

I think it well to point out that there are two sides to the coin with respect to the feed grains program. I think it well to point out that statements which have been made for several months, now, about the $800 million which will be saved American taxpayers under the emergency feed grains program are mere statements, mere guesses, mere estimates. No one knows what the savings will be.

At the time the emergency feed grains bill was being debated by the Senate earlier this year, I asked the question how much it would cost. I received no answer. The reason was that no one knew what the answer was. We will not know what the cost of the feed grains program will be or what the savings, if any, will be to the taxpayers, or what the net effect upon the farmers' pocketbooks in terms of net income, not gross income, will be, until probably sometime early next year.

Reports from States such as my State of Iowa indicate that, overall, there may be a record production of feed grains per acre this year. A part of this increase, perhaps, is reflected in the fact that early this year, after Congress had passed the emergency feed grains bill, the periodical Wallace's Farmer, an article appeared which, in effect, said, "You might as well get into the program, because you can't lose."

Yet when one turned from that article to the next page, he found an article

entitled "How To Grow More Corn Per Acre."

The reports are quite strong that in many cases just as much seed and just as much fertilizer are being used on the remaining acres as were used on the original acres last year. So it can be expected that there will be a great addition to our production per acre from what was produced in previous years. This leads me to believe, as I am sure it will lead many others to believe, that the reduction in production may not be nearly so much as what the proponents of the legislation had intended.

Another point should be emphasized. Inflation is probably the cruelest tax of any which the American people have ever had. But there is no group in America upon whom inflation bears more heavily and with more distressing results than the farm group.

I have talked with many farmers who would be perfectly content with the prices they have been receiving during the last 2 or 3 years for their livestock and grain if the costs of production were where they were 10 or 12 years ago. Unfortunately, the costs of production are not where they were 10 or 12 years ago. Inflation has boosted them and has squeezed the farmers so that their net income has been cut down to the point where the average small farmer simply cannot make a go of it.

I am very much concerned about the inflationary tendencies which are taking place during this administration. We have received a report that during the months of May and June one-half cent for every dollar was eaten up by an increase in the cost of living.

The farmers are going to be hurt worse than any other group by inflation. I sincerely hope and trust that efforts will be made by the administration to see to it that there is not another round of inflation, because if there is, all the benefits which may be derived from emergency feed grains programs and food stamp plans and continuation of Public Law 480 will be eaten up and probably will be more than offset by inflation.

I thank the Senator from Minnesota for yielding to me.

Mr. HUMPHREY. I thank the Senator from Iowa. His remarks are always constructive.

Without being argumentative, I wish to say that I think all of us are deeply concerned about inflation of the economy. Inflation is bad enough in itself, of course, but the farmers have not only been victims of inflated costs of production, but deflated prices as well for what they produce. And when a football player catches both a high block and a low block, he certainly goes down. That is exactly what happened to American agriculture during the past several years.

I am pleased to note that the rise in the cost of living—or what we call inflation—from January through August of this year has been the lowest, percentagewise, during the last 12 years—since 1951. This administration is vitally concerned in holding down living costs.

Mr. President, I think the Senator surely makes a good point in regard to the cutback in production, and it is very difficult to know what the final answer will be. We know that the payments cost $730 million. But the Crop Reporting Service of the Department of Agriculture—and that Service is one of the most professional services of any in the Government—estimates that the reduction in the corn crop alone this year will be 650 million bushels less than had previously been estimated, and 540 million bushels less than 1960. The Crop Reporting Service is neither Democratic nor Republican. Everyone knows that the Crop Reporting Service is so sensitive because of its effect upon the market when its statistics come out, that it has to be as objective as mankind can make it, and it is one of the most professional units or agencies in the Government. I only hope it will always be that way.

THE ZABLOCKI-HUMPHREY AMENDMENT FOR THE AMERICAN RESEARCH HOSPITAL FOR CHILDREN IN POLAND

Mr. HUMPHREY. Mr. President, the Foreign Assistance Act of 1961, Public Law 87–195, which we have just passed continues authority—in section 215(b)—whereby the President may use foreign currencies accruing to the U.S. Government for assistance to "hospitals outside the United States founded or sponsored by U.S. citizens and serving as centers for medical treatment, education, and research.

The first use of such currencies is, I am gratified to say, well advanced under what is known as the Zablocki-Humphrey amendment for an American Research Hospital for Children in Poland.

PRESIDENT KENNEDY'S INTEREST

Yesterday's—September 6—New York Times contains two impressive accounts on this future 300-bed hospital and research center.

One article relates the welcome news that the site has just been visited by two sisters of President Kennedy, Mrs. Eunice Shriver, and Mrs. Jean Smith. It is very fitting that members of the President's family personally symbolized by their presence at the site, the deep interest of President Kennedy in the success of the project. Mrs. Shriver and Mrs. Smith symbolize as well the interest of American women generally in serving the needs of children in the United States and abroad.

The second article is a biographical presentation on Mr. Wladek O. Biernacki-Poray, the Polish-born architect who conceived the project and brought it to the attention of Congressman CLEMENT ZABLOCKI, other Members of the Congress, and myself. Mr. Poray has devoted himself unstintingly to the task of bringing the project into reality and deserves the thanks of the Polish and American peoples.

I have worked many hours and days with Mr. Poray on this project and with the agencies of our Government that can be helpful in connection with it.

MY THREEFOLD INTEREST IN PROJECT

It was a little under 3 years ago that I first began to work on this issue. I became interested in it as a member of the Committee on Foreign Relations, as sponsor of food-for-peace and health-for-peace legislation and as chairman of a Senate Government Operations Subcommittee. Since August 1958 this latter subcommittee has been conducting a study of international health, pursuant to Senate Resolution 347, 85th Congress.

On July 30, 1959, the subcommittee held a hearing on the American Research Hospital for Children in Poland. On that very day, based on the facts which were brought to light, I offered a specific amendment to make possible initial funding of the hospital through the allocation of $50,000 in Polish currency—zlotys—accrued to the United States—as a result, let me say, of sending American agricultural products to Poland.

The grant was approved, pursuant to a general amendment which Congressman ZABLOCKI had succeeded in offering to the mutual security authorization bill of 1959.

In the years which have followed, I have participated in a long series of conferences and exchanges of correspondence with the State Department, with the International Cooperation Administration, with the Polish Embassy, with CARE, the U.S. Public Health Service, and other sources in helping to overcome the many obstacles which inevitably developed in connection with this project.

I wish to say that if this distinguished architect, Mr. Poray, had not had a tenacious spirit and great perseverance, I doubt that the project would be a reality. Many are the times he has visited the offices of Representatives and Senators. The other day I received a telegram from him. He has traveled between the United States and Poland a dozen times or more, at his own expense, in his efforts to have this evidence of American concern and compassion for others established. It is interesting, Mr. President, that, when the Russians occupied Warsaw after World War II, that they built there a statue of Stalin. It is a rather ugly statue, but there it stands, as a constant symbol and reminder of the oppression by Communist power. But the American people, acting in cooperation with the people of Poland who love freedom—and this project will primarily be undertaken and financed by people in this country who are of Polish descent—are going to build a children's hospital at Krakow, one of the oldest universities in the world; this year it is celebrating its 600th anniversary. We are going to build there a 300-bed research and medical treatment center for children; it will be for the treatment of all children, without regard to national origin. It will be an amazing demonstration, again, of the difference between the political system of totalitarianism and the political system of freedom which we represent.

PERSEVERING IN NEGOTIATIONS

The fact that this project is so well advanced is confirmation of the need for perseverance in dealing with problems in Eastern Europe.

There is, I may say, too much of a tendency in some quarters to become

pessimistic, to throw up one's hands in dismay when negotiating with Communist-bloc countries and experiencing almost inevitable difficulties and delay.

Fortunately, the fact is that the Polish people have always been a friend of the American people. They love freedom, and they are a people of great nationalistic tendencies. We have had a high regard and friendship for the Polish people, as well. Our problems need never be unsolvable between us.

Moreover, a project such as this which is so humanitarian and selfless by its very nature unites peoples further and in ways which no ideological barrier can separate.

On March 6, 1960, I received a letter from Mr. Poray which summarized the larger symbolism of the hospital as being synonymous with brotherhood and nobility.

I ask unanimous consent that excerpts from that letter be printed in the RECORD at this point.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

MY DEAR SENATOR HUMPHREY: Within the next few days I shall be leaving for Warsaw. Many people in Poland know of your interest in their fortune, of your dedicated efforts to advance the realization of the project for children's hospital, medical aid and scientific exchange, food assistance and other forms of help which are so badly needed in the country so brutally devastated during the last war. And many of these people have asked me to convey to you their thanks, their respect and their blessings. You have made the name of the United States again synonymous with brotherhood and nobility—nobility and dignity of compassion, of human understanding, of hope.

Mr. HUMPHREY. Madam President, I also ask unanimous consent to have printed at this point in the RECORD two articles which appeared in the New York Times of September 6, 1961, one relating to Mr. Poray and the other referring to the particular hospital project I have referred to. The Times article pays appropriate respect to Mr. Biernacki-Poray. It is the story of how this wonderful project came into being.

I salute this fine American citizen. He has demonstrated the real qualities of being a gentleman, an American, a lover of freedom, and one who is motivated by the highest of principles and ideals.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

U.S.-BACKED CLINIC BEGUN IN KRAKOW—HOSPITAL PROJECT CONCEIVED BY POLISH-BORN ARCHITECT

(By Arthur J. Olsen)

WARSAW, September 5.—Two vacationing sisters of President Kennedy—Mrs. Eunice Shriver and Mrs. Jean Smith—made a small detour today in their sightseeing tour of Krakow, in southern Poland, and paused to stare at a hole in the ground.

The hole, in a wooded hilltop on the edge of Poland's ancient capital, represents the dream of a Polish-born architect who made his fortune in the United States.

It marks the start of construction of a 300-bed children's hospital and pediatric research center. It is expected to be, when finished in 1964, the only American hospital in a Communist country and one of the best pediatric institutions in Europe.

This will be the creation of Wladislaw O. Biernacki-Poray, who heads his own architectural firm in New York, with indispensable assistance from the U.S. Government.

While sitting up with his seriously ill daughter one night in April 1958, Mr. Biernacki-Poray conceived the idea of doing something for the benefit of children and also of his native Poland. The next morning he decided the project should be a children's hospital in Poland.

At first Mr. Biernacki-Poray planned to finance the project himself. But the four-story circular hospital that he designed, flanked by laboratories, teaching and surgical structures, exceeded even his ample means.

Mr. Biernacki-Poray heard about the U.S. accumulation of "frozen" zlotys in Warsaw, now in excess of 8 billion ($320 million at the tourist exchange rate). This bank account was built up from the sale of $360 million worth of surplus agricultural products to Poland since 1957.

The Battle Act, as enacted in 1950 to impose sharp restrictions on U.S. aid to Communist countries, forbade using funds from the zloty account to build anything for Polish use.

BATTLE ACT AMENDED

With the help of Senator HUBERT HUMPHREY, Democrat of Minnesota, and Representative CLEMENT ZABLOCKI, Democrat, of Wisconsin, Mr. Biernacki-Poray persuaded Congress to amend the act to authorize zloty expenditures on his hospital.

Then he flew to Poland to fight the battle of bureaucracy in Warsaw. In the last 3 years he has acquired more Polish visas in his passport than any other American.

Mr. Biernacki-Poray has negotiated with four Polish Government ministries over issues ranging from the amount of equipment he would provide—$1,500,000—to his insistence that a Roman Catholic chapel be built in the hospital.

Yesterday the soft-spoken architect, who lives at 195 Christopher Street, Montclair, received assurance that his 1958 inspiration would become a reality.

As president of the American Research Hospital for Children, Inc., Mr. Biernacki-Poray signed a construction agreement with the Ministry of Health.

WORK STARTED AT OWN RISK

In fact, his bulldozers were already at work at the site. In his urgency to get started, the architect assumed personal responsibility 6 weeks ago for all interim construction costs should the project eventually collapse.

Mr. Biernacki-Poray will be in Krakow next month for the formal ground-breaking, probably in the company of Senator HUMPHREY and Representative ZABLOCKI.

He has taken an apartment in Warsaw and plans to spend much of the next 3 years nursing his 146 million zloty ($6 million) hospital into being.

The timetable calls for the admission of the first patient in the spring of 1964. Judging from Mr. Biernacki-Poray's performance so far, the prospects are good that the schedule will be met.

ARCHITECT-HUMANITARIAN: WLADISLAW BIERNACKI-PORAY

Almost the last thing Wladislaw Biernacki-Poray would have wanted was celebration as an international figure. A warm, home-loving man, he prefers to avoid the spotlight. "He would even like me to accept his awards," says his wife.

But his devotion to the cause of humanity and his professional skills have brought attention to this modest Polish-born American architect.

Mr. Biernacki-Poray is the originator, designer, and construction overseer of one of the few U.S. institutions to penetrate the Communist world without arousing resentment: a children's hospital and pediatric research center on which work has just started in Krakow, Poland.

Mr. Biernacki-Poray, who is 37 years old, is an active member of the New York chapter of the American Institute of Architects. He has fared well as a designer of schools, hospitals, shopping centers, and other commercial and institutional buildings.

It was on an April night in 1958 that he thought of building the hospital in Poland. With the family doctor, the Biernacki-Porays were at the bedside of their 3-year-old daughter, Christina, who was ill with a cold virus.

In this quiet period of thought and consideration, the father wondered aloud: "How would it be in Poland at a moment like this?"

The reflection was followed a few days later by Mr. Biernacki-Poray's decision to go to Washington with his proposal for the hospital project. He had hit upon a way to serve humanity and help the country of his birth in one stroke.

WARSAW APPROVES PROJECT

Yesterday, the petite, dark-haired Mrs. Biernacki-Poray, also Polish born, received a telegram from her husband telling her that he had signed an agreement with the Polish Government that the work would go forward.

A short, compactly built man with dark hair, rosy cheeks and shining eyes, Mr. Biernacki-Poray is a tennisplayer and horseman who has had to give up most of his outside activities to give more time to his profession and his family.

It is a rare night, says his wife, Zofia, that he does not come home from his Montclair office, join the family for dinner and a short period of relaxation, and then return to his office until as late as 2 a.m.

His remaining leisure-time interests are card playing—bridge, poker, and almost everything else—and music. But it is the consensus of wife and friends alike that the center of his life is "his children and his home."

"He has very little time these days for anything but work and the children, whom he spoils terribly," Mrs. Biernacki-Poray said.

In addition to Christina, now 6, they have a 4-year-old daughter, Teresa, and a 2-year-old boy, Marek.

Mr. Biernacki-Poray was born in Lwow, in southern Poland, on June 9, 1924. He was brought to the United States by his parents when he was a small child. They returned to Poland for a visit shortly before World War II.

JOINED POLISH ARMY

When the Germans invaded Poland in 1939, Mr. Biernacki-Poray, then 15, joined the Polish army. Later a member of Polish army units abroad, he fought in the Middle East and was wounded at Monte Cassino, Italy. Both of his parents were killed during the war and he now has no close relatives in Poland.

After the war, he began his architectural studies in Rome and then went to the School of Architecture at the University of London. It was there that he met his wife, who was studying economics and commerce at the London School of Economics.

He worked at his profession in Britain from 1950 to 1952, when he returned to the United States. Mr. Biernacki-Poray is licensed also to practice in Britain and Canada.

RETIREMENT OF RUSSELL J. CALL FROM SENATE CLOAKROOM

Mr. COTTON. Madam President, I call to the attention of the Senate the

fact that Russell J. Call, of New Hampshire, has resigned his Senate cloakroom position.

A graduate of Plymouth Teachers College in Plymouth, N.H., Russ Call joined the staff of the secretary of the minority Mark Trice, upon the recommendation of Senator STYLES BRIDGES, of New Hampshire, and was placed in charge of the Republican cloakroom as supervisor of page boys, a position he has held since 1956. During his years of devoted service here, he earned his master's degree in education from George Washington University, and completed his work for a doctoral degree at American University.

In order to receive his degree, Mr. Call must now write his dissertation, which he will devote to a study of New Hampshire's educational system. In order to be closer to the research material available for this dissertation, he has accepted a teaching position at Bristol, N.H., where he will teach courses in mathematics and in problems in democracy.

To Russ Call, his wife, Connie, and their two children, Suzanne, 6, and Randall, 3, we extend our best wishes in their new home. We are sure that Mr. Call will be a fine addition to the educational life of New Hampshire, for in his work here he has demonstrated loyalty and devotion to duty which promise him success in his chosen field.

Mr. Call, of course, came into contact almost entirely with Senators on this side of the aisle because of his duties in the Republican cloakroom, but with whomsoever he came in contact, I know that Members of the Senate have witnessed his courtesy, his patience, his constant cheerfulness, his alert mentality, and his readiness to be of service.

RETIREMENT FROM FEDERAL BUREAU OF INVESTIGATION OF RICHARD D. AUERBACH

Mr. COTTON. Madam President, my senior colleague from New Hampshire [Mr. BRIDGES], as most of the Senate knows, is unavoidably absent from the Senate because he is convalescing, at his home in New Hampshire, from an illness. I am happy to report that he is fast regaining his health and will soon be back with us.

On his behalf and at his request, I desire to read into the RECORD the following statement prepared by my colleague:

A distinguished public servant has retired from Federal service and taken up employment in private enterprise. This event occurred 3,000 miles from Washington—on the west coast—but because of my close personal association with this very able man, I desire to bring his service to the attention of the Senate.

I well remember the day in June 1938 that Richard Dexter Auerbach, carrying a law degree from Boston University with the ink scarcely dry, walked into my office, announced he was a native of Massachusetts but a graduate of the University of New Hampshire and felt sure he could help me in my work as a U.S. Senator. His refreshing honesty and frankness were so impressive that I hired him on the spot as my legislative assistant.

He did a first-class job in my office and we soon became personal friends. He terminated his service with me in August 1940 to become a special agent of the Federal Bureau of Investigation. Dick Auerbach rose through the ranks of the FBI and served the greater part of his career in that great organization as a personal assistant to the Director and as a special agent in charge of one of its field offices. He was the top agent in charge in Richmond, Va., in Seattle, Wash., in Chicago, Ill., and finally in San Francisco, Calif., where he came to know the city so well that he is the only person alive who ever located a steam bath in the Palace Hotel.

His exploits in fighting crime and subversion while in the FBI were recognized by the ever-increasing responsibility assigned to him by J. Edgar Hoover. Throughout his entire career his basic honesty and human decency, together with a delightful sense of humor, his energy and his dedication to duty have been outstanding attributes.

On August 18 my friend Dick Auerbach officially ended his career as an employee of the U.S. Government after 23 years of faithful service. On September 1 he became vice president of the Pacific National Bank of Seattle, Wash., the hometown of his wife, Muriel. He will be assisting that progressive and forward-looking citizen of Seattle, Charles F. Frankland, president of the Pacific National.

I take this occasion to assure Dick Auerbach of my best wishes for his ever-continuing success. While he epitomizes the kind of person we like to see working for our Government, he has well earned his retirement and this splendid opportunity to devote his talents to the success of a private institution.

Mr. President, it has been my privilege and pleasure to read this statement from my senior colleague because I, too, know and have enjoyed the friendship of Dick Auerbach, and I, too, join in paying this well-deserved tribute to him.

On behalf of my colleague [Mr. BRIDGES] I ask unanimous consent to have printed in the body of the RECORD a number of letters and newspaper editorials and articles taking cognizance of the retirement of this outstanding American.

There being no objection, the letters, editorials, and articles were ordered to be printed in the RECORD, as follows:

FEDERAL BUREAU OF INVESTIGATION,
U.S. DEPARTMENT OF JUSTICE,
Washington, D.C., July 5, 1961.

Mr. RICHARD D. AUERBACH,
Federal Bureau of Investigation,
San Francisco, Calif.

DEAR AUERBACH: I received your letter of June 28, 1961, supplementing our telephone conversation concerning your retirement, and want to say again how sorry I am to see you leave the FBI. A summary of retirement information is enclosed in the hope that it will be of assistance to you.

You have helped build the Bureau's prestige over the years and have good cause to be proud of your many accomplishments in our organization's behalf. I want to express my gratitude for your splendid service.

I understand fully your reasons for retiring and hope that returning to Seattle will be the answer to the problems you mentioned. As I said on the telephone, I want you to always feel you are a part of the Bureau and I appreciate your thoughtful offer to be of assistance in the future.

Mrs. Auerbach and you have my very best wishes and kindest regards.

Sincerely,

J. EDGAR HOOVER.

FEDERAL BUREAU OF INVESTIGATION,
U.S. DEPARTMENT OF JUSTICE,
Washington, D.C., June 30, 1961.

Mr. RICHARD D. AUERBACH,
Federal Bureau of Investigation,
San Francisco, Calif.

DEAR AUERBACH: I want to extend to you my best wishes on your forthcoming retirement and to tell you how sorry I am that you are leaving the Bureau.

You may be justly proud of the record of achievements you have acquired over the years, and I know that in the future you will look back with a great deal of satisfaction on your contributions to the welfare of your country and your fellow citizens.

While your friends and associates in the FBI will miss you, you may be sure that you carry with you our best wishes for every success and happiness in the future.

I could not let the occasion pass without telling you that it has been a pleasure to be so closely associated with you in our mutual endeavors.

With kind personal regards,

Sincerely,

CLYDE TOLSON.

[From the San Francisco Examiner, July 6, 1961]

A SPLENDID RECORD

The retirement of Richard D. Auerbach after 22 years with the Federal Bureau of Investigation, the last two spent in charge of the San Francisco office, offers occasion for wishing him well in the private business career he now enters.

That this decision necessitates his departure from San Francisco is a matter of deep regret. Mr. Auerbach came here 2 years ago hoping to maintain the high law enforcement standards of the district. He succeeded superlatively in that intention. His administration of the local FBI office has been outstanding in the Nation.

It is the Nation's loss that his distinguished career in law enforcement ends. It is San Francisco's loss that his new work takes him elsewhere.

[From the Napa Register, July 20, 1961]

FBI OFFICIAL RETIRING SOON

Richard Auerbach, a man well known to Napa County law-enforcement men through his direction of FBI activities in northern California, is about to retire from Government service.

For the past several years Auerbach has headed FBI operations out of the San Francisco office, third largest in the Nation. Nearly 600 employees have been under his command.

While activities of the FBI are not generally exposed to the public, it is known that the organization's operations in the area have been effective and efficient. A large degree of this should rightly be credited to Auerbach.

Succeeding the well-liked, well-respected Auerbach is another FBI veteran, Frank Price, who has been directing operations in the San Diego area.

It would appear as though J. Edgar Hoover's organization will remain in capable hands locally.

[From the Oakland Tribune, July 10, 1961]

AUERBACH RETIRES

Seattle's gain will be the bay area's loss when Richard D. Auerbach leaves for the rainy city after 2 years as head of the Federal Bureau of Investigation in San Francisco.

Mr. Auerbach, one of the Nation's top bureau chiefs, announced his resignation from the FBI to be effective on August 18. He said he will make Seattle his new home.

A 20-year veteran of the FBI, Mr. Auerbach retires with a splendid record, having headed

several of the Nation's most critical FBI offices and serving during World War II as FBI Director J. Edgar Hoover's national supervisory assistant.

We are sorry to see Mr. Auerbach leave our area, but we want to wish him every success in his new incursion into the world of business. His loss to law enforcement will be felt.

[From the Seattle Times, Aug. 6, 1961]

Richard D. Auerbach, who was special agent in charge of the Federal Bureau of Investigation office here from 1951 to 1957, will become a vice president of the Pacific National Bank of Seattle September 1.

The announcement was made yesterday by Charles F. Frankland, president of the bank.

Auerbach will retire August 18 as chief of the FBI office in San Francisco. Since joining the FBI in 1940, his duties have included directing FBI offices here, in Chicago, and in San Francisco.

Frankland said Auerbach will be assigned to the bank's public relations and new business department.

Auerbach is a graduate of the University of New Hampshire and the Boston University Graduate School of Law. His wife, Muriel, was a Seattle resident before their marriage. The Auerbachs have a son, Eugene, 17, and a daughter, Meredith, 14.

Auerbach was honored last week by the San Francisco Junior Chamber of Commerce for outstanding public service.

CENSORSHIP OF TALKS BY MILITARY LEADERS

Mr. CURTIS. Madam President, I ask unanimous consent to have printed in the body of the RECORD an article entitled "Military Talk Censoring Bolsters Red Position," which appeared in the Omaha World Herald of August 27, 1961, written by Edith Kermit Roosevelt.

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MILITARY TALK CENSORING BOLSTERS RED POSITION

(By Edith Kermit Roosevelt)

Pentagon directives censoring talks by our military leaders lend respectability to a lie which the Communist Party has long tried to foist on innocent Americans: that the Communist Party is a political party and not an international conspiracy dedicated to the destruction of freemen everywhere.

The Defense Department's "gag orders" help validate the claim that communism is just another political philosophy by creating the misleading impression that to discuss communism is to discuss politics instead of to identify and expose the enemy.

Senator STROM THURMOND reveals that typical of the anti-Communist phraseology which the Pentagon's censorship office "persistently and invariably deletes" from officers' speeches as too political are:

"Communist conspiracy dedicated toward absolute domination of the world."

"The steady advance of communism."

"The Communist challenge."

"Insidious ideology of world communism."

"Nothing has happened to indicate that the goals of international communism have changed."

Furthermore, two proposed military seminars have been canceled—one in the Panama Canal Zone and the other at Fort Benjamin Harrison, Indianapolis, Ind.

The cancellation was inspired by the memorandum sent to the Pentagon by Senator J. W. FULBRIGHT and translated into policy July 10 which strongly indicates that military seminars should be abolished since these activities supposedly violate civilian control of the military. To support his argument in the memorandum Senator FULBRIGHT argues that the military should not educate the people on political issues.

While there may have been a few isolated cases in which local civilian speakers at seminars have touched on issues unrelated to military responsibilities, the seminars have dealt exclusively with military matters and the overall structure of the Communist world movement and Communist tactics.

The Fulbright memorandum, which seeks to set a new policy for the administration, states:

"Fundamentally, it is believed that the American people have little need to be alerted to the menace of the cold war."

These views are directly opposite to those held by President Kennedy, who on April 10 wired the Natinonal Military Industrial and Educational Conference, one of the groups conducting the seminars:

"It is important and vital work you are doing—alerting the attention of America's youth to the need for vigor as it prepares to face the realities of a world in conflict."

It is noteworthy that liberal and conservative Congressmen have participated equally in these nonpartisan, nonpolitical seminars. Those attending have included Senators HENRY L. JACKSON and PAUL H. DOUGLAS, as well as Senator ROMAN L. HRUSKA and Congressman WALTER H. JUDD.

Among the high figures in the Kennedy administration who have participated in the seminars are our Ambassador to the Soviet Union, Charles Bohlen; special advisers to the President, Walter W. Rostow and Dr. Henry Kissinger; and Assistant Secretary for Defense Paul Nitze.

GRANDMA MOSES DAY

Mr. KEATING. Madam President, I wish to pay, very briefly, a tribute to a gifted, beloved, and young-hearted citizen of the State of New York, Grandma Moses, who today celebrates her 101st birthday. This wonderful lady has become a legend in her time. It was not until she reached her seventies that she took up painting, but her gifts, though late flowering, were so unique, so infused with warmth, originality, and appeal that her fame has extended not only throughout this Nation but throughout the world of art.

Anna Mary Robertson Moses, of Eagle Bridge, N.Y., is 101 years old, but her spirit remains younger than springtime. She is in a rest home, under medical orders to relax, but inactivity is a prison to which Grandma cannot grow accustomed. She has told friends that she is impatient to get back to her board and brushes, for her mind has stories that her fingers want to tell.

It is not surprising, therefore, that all America remembers today that Grandma Moses is celebrating her birthday. She has entered the hearts of all of us, and we are the better, the richer, because her spirit and her talent have touched our lives.

I think, therefore, that I express the sense of the Senate and of the American people when I say that Grandma Moses must be classified not merely as one of our American artists, but as one of our national spiritual resources.

DEFENSE OF SUITS AGAINST FEDERAL EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 2883) to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes.

Mr. KEATING. Madam President, I call up my amendment "8–28–61—C" and ask to have it stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. On page 2, beginning on line 23, it is proposed to amend subsection (d) to read as follows:

Upon a certification by the Attorney General that the defendant employee was acting within the scope of his employment at the time of the incident out of which the suit arose, any such civil action or proceeding commenced in a State court shall be removed without bond at any time before trial by the Attorney General to the district court of the United States for the district and division embracing the place wherein it is pending and the proceedings deemed a tort action brought against the United States under the provisions of this title and all references thereto. Should a United States district court determine on a hearing on a motion to remand held before a trial on the merits that the case so removed is one in which a remedy by suit within the meaning of subsection (b) of this section is not available against the United States, the case shall be remanded to the State court.

Mr. KEATING. Madam President, H.R. 2883 represents the culmination of many years of effort to protect Government employees from personal liability for accidents occurring in the scope of their employment.

Under the present law, Federal maritime employees already enjoy such protection under the provisions of the Suits in Admiralty and Public Vessels Act. The pending bill is designed to provide equal treatment for thousands of nonmaritime Government employees.

I have proposed similar legislation for many years both in the Senate and while a Member of the other body. There always has been strong support for some such measure, but disagreement as to details has prevented enactment prior to this date.

Under the original language of the present bill, which was virtually identical to S. 202, which I introduced on January 6, 1961, suits against the United States would be the exclusive remedy for damages resulting from the operation by any Government employee of any motor vehicle while acting within the scope of his employment. Suits brought against the individual employee in such cases could be removed to the Federal court and be deemed a tort action against the United States.

Without such protection, Government employees driving motor vehicles in the course of their official duties must make a personal investment in insurance to protect themselves against damage suits. This imposes a heavy burden on a group

of employees who are not particularly well paid and who must incur this expenditure only because of their Government duties. In many large firms, such costs are reimbursed or assumed by the employer, but there is no provision for such reimbursement to Federal personnel. As a result, the employee must foot the bill for an expense which the Government should reasonably be expected to absorb.

There have been many different legislative proposals for coping with this situation. One approach has been to provide indemnity to the employee for his damages or to pay the cost of his insurance. But these alternatives raise serious administrative and practical difficulties which provision for assumption of liability by the Government avoids. This is what S. 202 and H.R. 2883 are intended to accomplish. In effect, the United States would be a self-insurer for its employees which would be much less expensive and much more efficient than paying for private insurance for each employee or reimbursing him after judgment.

Unfortunately, this purpose would be seriously undermined by an amendment to H.R. 2883 adopted in committee. As originally introduced, H.R. 2883, like S. 202, provided that when a Government driver is sued in a State court on a claim resulting from his operation of a motor vehicle while acting within the scope of his employment, such action would be subject to removal to an appropriate Federal court on the motion of the United States. There it would become an action against the United States under the Federal Tort Claims Act and be the plaintiff's exclusive judicial remedy. The committee's amendment, however, would allow such removal only with the plaintiff's consent.

The committee amendment is objectionable on several grounds:

First. The purpose of the bill is to make the United States wholly liable for any damages caused by its employees in the course of their duties and to protect the employee from any dual liability. This purpose would be frustrated if plaintiffs can continue to proceed against individual employees in State court proceedings.

Second. Under the committee's amendment, employees would have to continue to incur the expense of insurance to protect themselves against personal liability, which defeats another one of the objectives of the bill.

Third. Under the provisions of section 5 of the Suits in Admiralty Act—46 U.S.C. S 745—which is applicable to Federal maritime employees, the plaintiff has no option—the remedy against the United States is exclusive and suits must be brought in the district courts. The committee's amendment to H.R. 2883 would be inconsistent with this precedent and would establish different rules for maritime and nonmaritime employees of the United States.

Fourth. Under the Federal Tort Claims Act, the Federal courts have original jurisdiction over all other claims against the United States. The committee's amendment also is inconsistent with this scheme.

Fifth. The President last year vetoed H.R. 7577—a similar bill—because of the same amendment which the committee has again recommended. Approval of the committee amendment would invite the same action this year. The matter has been long delayed and it is unreasonable to jeopardize the legislation again this year.

The case against the committee's amendment is very well stated in this excerpt from President Eisenhower's veto message on H.R. 7577:

> This amendment is unfortunate, for any plaintiff, by refusing to give his consent, could prevent the conversion of the action to one under the Federal Tort Claims Act and thus thwart the sound purposes of the original bill. The amendment also makes the bill inconsistent internally and could give rise to needless litigation.

It should be pointed out that in his message, President Eisenhower reiterated his strong support of the legislation in its original form.

Following the report of the committee, I consulted other Senators and some of the employee groups most directly affected in an effort to find a basis for preserving the original purpose of H.R. 2883 without dealing unfairly with the legitimate interests of any potential plaintiffs. The result of this effort is the amendment designated as "8-28-61—C." This amendment would not require the plaintiff's consent to removal of suits against individual employees, but it would require the Attorney General—as a condition for removal—to certify that the employee was acting within the scope of his employment at the time of the incident out of which the suit arose.

This amendment avoids all of the objections to the committee's amendment and at the same time gives full protection to the plaintiff's interests. It makes certain that suits will not be removed improperly, but protects the employee from any personal liability where it is conceded that he was acting within the scope of his employment. Since the bill also provides that a suit will be remanded to the State court upon a determination after removal that the United States is not liable under the Federal Tort Claims Act, the plaintiff will be effectively spared any disadvantage under the proposed amendment.

The distinguished Senator from North Carolina [Mr. ERVIN] and the distinguished Senator from South Carolina [Mr. JOHNSTON] have cooperated and have worked hard on the preparation of this proposed legislation. It has been the subject of discussion at some length in the Committee on the Judiciary. I believe that this amendment reconciles all points of view and that its adoption will assure the enactment—at long last—of this important legislation. This amendment deserves the support of everyone interested in fair treatment for our dedicated Government employees. I hope it will be approved.

Mr. JAVITS. Madam President, will the Senator yield?

Mr. KEATING. I am happy to yield.

Mr. JAVITS. I see the distinguished Senator from South Carolina [Mr. JOHNSTON] is on his feet, which makes this a very auspicious moment. I shall take only a moment to express my support of my colleague's amendment, and also to express my pleasure because of the initiative he has shown in bringing about a resolution to this longstanding and apparently very trying problem, which will be very helpful to postal employees and to other civil service employees.

I thank my colleague.

Mr. KEATING. I am grateful to my colleague.

Mr. JOHNSTON. Madam President, the Senator from North Carolina [Mr. ERVIN] and I agree with respect to the value of the amendment which the Senator from New York has offered. We feel it will help a great deal. It will help also in regard to procedure.

It is possible, if we do not agree to the amendment, that some suits would be removed to the Federal court and then a question raised as to whether the employee was acting at the time the accident happened in the regular line of employment under his regular duties of employment. That being so, we believe the amendment is a very fine amendment.

We have worked in the committee a great deal on this, not only for 1 day, but day after day.

The Senator from North Carolina [Mr. ERVIN] has given this a great deal of thought, as has the Senator from New York [Mr. KEATING].

I am glad we have reached an amiable conclusion, which I think will be beneficial to Government workers and, at the same time, will be beneficial to the Government.

After a man has been sued and a judgment rendered against him, it is too late for the Government to raise the point as as to whether the matter should have been properly handled in the court. For that reason I think passage of the proposed legislation is necessary.

I am proud that all parties have gotten together. It looks as if we are on the road to having the bill approved by the President of the United States.

Mr. ERVIN. Madam President, I think the bill before the Senate, like similar bills considered in previous Congresses, illustrates in about as forceful a way as can be illustrated the truth of Woodrow Wilson's statement that Congress in committee is Congress at work.

The members of the Committee on the Judiciary, and particularly the able and distinguished senior Senator from South Carolina [Mr. JOHNSTON] and the able and distinguished junior Senator from New York [Mr. KEATING], have put in many hours of work in an effort to reach a satisfactory conclusion in respect to the interests of two different groups of people and a reconciliation with the tradition that cases against the Federal Government should be tried in Federal courts rather than State courts.

The first interest with which we have been concerned is the interest of parties injured by Government employees. These parties are entitled to have their cases adjudicated, and they are entitled to be protected against unnecessary removals of the cases to Federal courts,

where there is no liability on the part of the Government under the Federal Tort Claims Act.

The second interest with which we are concerned is that of the Federal employee, whether he be a postal employee or an employee in some other Federal activity, who causes injury unintentionally in the performance of his duties as an employee of the Federal Government. He is certainly entitled, under modern theories, to have liability for the act which he does for the Government borne by the Government, and he is entitled to have his cause defended by the Attorney General.

We have had the tradition that actions against the Federal Government should be tried in Federal courts.

This has not been an easy problem to resolve. There have been many different formulas proposed for its solution. In my judgment, the proposal which is embodied in the amendment offered by the able and distinguished junior Senator from New York is the best formula which has yet been devised.

The amendment, which would take care of the interests of the injured party and the Government employee and respect the tradition that actions against the Federal Government shall be tried in the Federal court is about as fine a solution as could be devised. For that reason, I support the amendment. So far as I know, there is no opposition to the amendment among those who have been interested for a long time in this particular problem.

I commend the able and distinguished senior Senator from South Carolina [Mr. JOHNSTON] and the able and distinguished junior Senator from New York [Mr. KEATING], for the interest they have taken in the problem and the many hours of work they have contributed to its solution.

Mr. KEATING. Madam President, will the Senator yield?

Mr. ERVIN. I am delighted to yield.

Mr. KEATING. I think the Senator is unduly modest. His learning and legal acumen had a great deal to do with the preparation of the amendment. As he will remember, although in his modesty he would not so state, he was the first member of the committee to raise the question which culminated in the amendment. He was very cooperative, and I express my gratitude to him for his generous treatment of all of us in the committee.

Mr. ERVIN. Madam President, I thank the Senator from New York for his far too generous remarks concerning myself.

Mr. JOHNSTON. Madam President, will the Senator yield?

Mr. ERVIN. I yield.

Mr. JOHNSTON. I join in the remarks of the Senator from New York concerning the Senator from North Carolina. The Senator from North Carolina devoted a great deal of effort to this particular bill. He probably gave more time to the subject than almost any other member of the committee. At times questions were assigned to him to work out solutions to the problem that we had in hand and bring them to the committee. He has done a distinguished piece of work in putting the proposed legislation in the condition in which it is today. I am proud to tell the public that the Senator from North Carolina ought to be given credit for the work he did.

Mr. ERVIN. I appreciate the generous remarks of my good friend from South Carolina. I am indeed happy that we have apparently reached a solution of a very thorny legal problem in a manner which is fair to the various interests involved.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

Mr. PROXMIRE. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Madam President, what is the pending business?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

Mr. HUMPHREY. Madam President, may I ask what the amendment of the Senator from New York is?

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On line 23, it is proposed to amend subsection (d) to read as follows:

Upon a certification by the Attorney General that the defendant employee was acting within the scope of his employment at the time of the incident out of which the suit arose, any such civil action or proceeding commenced in a State court shall be removed without bond at any time before trial by the Attorney General to the district court of the United States for the district and division embracing the place wherein it is pending and the proceeding deemed a tort action brought against the United States under the provisions of this title and all references thereto. Should a United States district court determine on a hearing on a motion to remand held before a trial on the merits that the case so removed is one in which a remedy by suit within the meaning of subsection (b) of this section is not available against the United States, the case shall be remanded to the State court.

Mr. HUMPHREY. May I ask the chairman of the Committee on Post Office and Civil Service as to his views on the amendment?

Mr. JOHNSTON. We have agreed to the amendment. We feel it will make the bill much more workable, and for that reason we have agreed to it.

Mr. HUMPHREY. The Senator from New York generally has a good amendment.

Mr. KEATING. I am grateful to the Senator for his complimentary reference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 2883) was read the third time and passed.

THE GRANTING OF LAND AND BUILDINGS TO RELIGIOUS-AFFILIATED SCHOOLS UNDER THE SURPLUS PROPERTY ACT OF 1944

Mr. GOLDWATER. Madam President, on July 20 of this year I submitted for the RECORD a partial list of religious-affiliated schools which have been granted land and buildings under the Surplus Property Act of 1944. At that time I stated that I would offer a complete list to the Senate as soon as a tabulation had been made by the Department of Health, Education, and Welfare.

I have now received this information from the Department of Health, Education, and Welfare, and it shows that 488 grants of lands and buildings have been made to religious-affiliated schools under the Surplus Property Act of 1944.

Madam President, I ask unanimous consent to have printed in the RECORD at this point, as a part of my remarks, a compilation of these schools, together with a tabulation bearing on this subject, prepared by the Department of Health, Education, and Welfare.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

35 religious denominations which have received Federal Government grants for educational facilities under the Surplus Property Act of 1944

	Number of grants
1. Roman Catholic	185
2. Seventh-day Adventist	120
3. Baptist Church	31
4. Methodist Church	26
5. Protestant	19
6. Lutheran	19
7. Christian	15
8. Assembly of God Church	11
9. Church of Christ	8
10. Presbyterian	6
11. Mennonite	5
12. Episcopalian	4
13. Interdenominational Church	4
14. Nondenominational	4
15. Mormon	3
16. Brethren Church	3
17. Berean Mission	2
18. Moravian Church of America	2
19. Congregational Church	2
20. Japanese Holiness Church	2
21. Brethren-in-Christ Church	2
22. Congregational Methodists	2
23. Gospel Mission Church	1
24. Church of the Nazarene	1
25. Fundamental Baptist Church	1
26. Church of the Brethren	1
27. Disciples of Christ Church	1
28. Evangelical Church	1
29. Quaker	1
30. Pilgrim Holiness Church	1
31. Jewish	1
32. Church affiliated (denomination unknown)	1
33. Church affiliated (denomination unknown)	1
34. Church affiliated (denomination unknown)	1
35. Church affiliated (denomination unknown)	1
Total number of grants to sectarian schools	488

Transfers of real properties to denominational-sponsored organizations for health and educational uses through June 30, 1961

LEGEND

1. On site—Land and/or buildings conveyed by deed with restrictions.
2. Off site—Buildings and other facilities transferred for removal and relocation.
Department has no records of transfers made prior to Jan. 1, 1950, by predecessor agency.
3. H—Health transfers.
4. E—Educational transfers.
5. PBA—Public benefit allowances granted of fair value.

LABOR DAY, 1961, MESSAGE BY GEORGE MEANY, PRESIDENT, AFL–CIO

Mr. BEALL. Madam President, I ask to have inserted in the RECORD the Labor Day message of George Meany, president of the AFL–CIO, given on that day.

In placing this message in the RECORD, I wish to express my appreciation of the great contribution which the trade union movement has made to the development of our Nation. In the early colonial days, even before we were a nation the guilds and other associations of craftsmen were giving their moral and material support to the principles which were to become the basis of ideals to be written into our Constitution. That great skilled craftsman—silversmith, coppersmith, woodworker and master of many other trades—Paul Revere, literally carried the message of freedom to his fellow citizens. But it is not only the acts of individual workers like Paul Revere, but also quite as much the leaders of the early trade unions who led men to work with them for significant, broad principles, whom we honor on Labor Day. We honor them for having played so important a part establishing our public schools, for their fight against child labor, for their fight won less than a hundred years ago against imprisonment for debt, for the great printer Peter Zender who by daring to print the truth did much to assure our country a legally protected free press—and for many more great movements in which they have led our America.

History is replete with these accounts. But most histories do not tell the story of the basic philosophy which has guided our indigenous free labor movement. Let it here be told that while American trade unions are like trade unions all over the free world in standing together in a fight to improve living conditions for all who toil, our unions do this because they want all Americans to have the chance to improve their life and the life and opportunities of their children.

Our American trade union movement is not a class conscious movement. We do not revel in class hatreds. In fact, while we have passing and temporary economic gradations, we do not have classes, fixed by law, by tradition, by custom. The so-called American myth or American dream in which pseudo social scientists may delight just simply is no dream, no myth. Abraham Lincoln and Andrew Jackson are not myths. They lived in and by the American ideal. Every man has a legal chance to rise. And today, thanks in a great part to the dedication of the American free trade union movement, we are rapidly removing economic and social barriers which made it hard, and at times almost impossible, for certain men and women to enjoy the rights which a loving God and a free Nation guaranteed them. And for the help our unions have given our Nation to make this possible, we thank them, and we honor them.

And now, I would thank these courageous idealists in our American trade unions for another magnificent role: More than almost any other large and potent force, they have fought communism in our country. They want freedom; they treasure their freedom. They know there can be no freedom under communism. They made the advance of communism impossible in our country. They kept their freedom.

I have voted for many bills, practically all of the social legislation for which they have asked. Why not? It is for the good of all of us. I am glad to have joined them in supporting the improvements signed into law by the President, in the Labor Standards Act; to have shared their pious hope for world peace and to have voted as they asked, for the aid for a suffering world while building our national defenses. On and on I have shared their hopes for a better America, made richer and more beautiful to a large degree by the ideals of our free trade unions.

While I have thus far here paid tribute to the great national organization, the AFL–CIO, I want to pay tribute to the men and women in the Maryland State-District of Columbia Federation of Labor and to the leaders they have elected. Their executive council gives me particular pleasure to honor for it is so firmly, so typically all-American composed of Catholics, Protestants, and Jews, of Caucasians and Negroes, men of various incomes of varied national and social backgrounds, but all loyal, devoted Americans, serving together to make our America—their America, better for each Labor Day to come.

The officers of the Maryland State-District of Columbia Federation of Labor whom I regard as my personal friends are: President, Woodrow F. Strong; secretary-treasurer, Charles Della; first vice president, C. B. Windsor; second vice president, J. C. Turner.

Area vice presidents: Walter Bierwagen, Joseph W. Burke, Benita Canfield, Joseph Curtice, Calib Davis, William K. Edwards, J. Metz Emory, Francis Filbey, Raymond C. Fogarty, Jack Gerson, James Gildea, F. H. McGuigan, Nettie Mehaffey, Josiah E. Mullenax, Charles T. Muntain, Joseph F. Palerico, Donald Parker, Charles C. Robinson, John Schaffer, and Cypriam Tilghman.

There being no objection, the message was ordered to be printed in the RECORD, as follows:

LABOR DAY, 1961, MESSAGE

(By President George Meany, AFL–CIO)

Labor Day is completely different from all other national holidays—unique in origin, in purpose and in spirit. It does not commemorate an historic event or a national hero. Instead it salutes the ordinary workingman. During the rest of the year, very little glamour touches the average American worker. But on Labor Day he and his fellows are given recognition for their collective achievement in building America, making it strong and keeping it free.

In other countries and in other civilizations labor has been looked down upon, frequently enslaved. Here in America, on Labor Day, leaders in public life, from the President down, join in paying tribute to labor's great and undeniable contributions to the Nation's well-being and security.

It is too much to expect that this basic truth should be acknowledged every day, not merely on Labor Day. American workers and the trade unions that represent them do not need to be cajoled and praised to do their part. But it must be said that they deeply resent the constant barrage of criticism and attack, the foul blows that are aimed at them in almost every publication and over the air. American labor wants to be treated with respect and fairness not only on Labor Day, but throughout the year. It deserves nothing less.

Those who deliberately seek to poison the public mind against labor are only hurting themselves. They cannot match the invective hurled at us by Moscow. The Kremlin realizes that the strongest and most effective force against communism in the United States is the free trade union movement. The newspapers, magazines, and broadcasters are merely playing into Moscow's hands when they try to defame and destroy our free trade union movement.

Their efforts are doomed to failure, in any event. The workers of this country have earned the confidence and good will of their fellow Americans. Through the trade union movement, they have helped to raise the American standard of living to the highest level of all time. They have supported every worthwhile liberal cause and have won great benefits for all the people of this country by economic, legislative and political action. America's vitality and progress during the past half century are due in no small part to the unyielding struggles of organized labor in behalf of the common good.

Labor Day is a serious holiday. Most Americans take time out to have fun and recreation of course. But they also pause to reflect on the way we have traveled and on the road stretching into the future. This traditional inventory gives us the opportunity to evaluate our objectives and to survey the problems that must be overcome before we can hope to attain them. For the workers of this country Labor Day represents a day of rededication to the American ideal of freedom and justice.

Just as a plant needs sun and water, our free way of life needs peace and progress in order to grow. The preservation of peace has become the common goal of all freedom-loving people everywhere in the world.

For some years past and to this day, the threat of war comes from one source and one source only—the Communist conspiracy.

Of course, there is a great deal of talk in the so-called neutral and uncommitted countries to the effect that they are caught in the middle of a gigantic power struggle between Soviet Russia and the United States.

This attempt to equate the policy and position of the two nations and to make them equally culpable for the critical international tension that exists today is nothing but undercover Communist propaganda.

It is Soviet Russia, not the United States, which menaces the peace of the world. It is Soviet Russia, not America, which seeks territorial aggrandizement, as the record since World War II proves. It is Soviet Russia, not the United States, which has vetoed every attempt in the United Nations to seek peaceful solutions for international problems.

Yes, it is Soviet Russia, backed up by Red China, which is the aggressor—the only aggressor.

If the United States were bent on an aggressive course, would we tolerate for one moment the insults, the provocations and the property seizures of the bearded dictator in Cuba?

If the United States wanted war, wouldn't we have started it years before, when America had a monopoly on atomic weapons and could have destroyed all the cities and industry of Soviet Russia within a week?

Surely it must be obvious to every unbiased and intelligent person on both sides of the Iron Curtain that America wants peace.

Khrushchev also talks of peace, but it is strictly doubletalk. When he uses the word, it means peace only under subjection to Communist terror. When we refer to peace, we mean peace with freedom.

America has now served notice that we will defend the free way of life in the strategic areas of the world despite any warlike moves the Kremlin may make. If we have to fight, we will fight in support of our treaty obligations and in defense of our allies. Clearly, if were to fail to do this, we would only be hastening the day of our own downfall.

The trade union movement stands 100 percent behind President Kennedy in the firm stand he has taken to resist any further Communist pressure.

I do not pretend to be a military expert, yet I am fully confident that in the event of an ultimate showdown Soviet Russia would lose and the United States would be victorious.

My confidence is based on two factors:

First, the military significance of Russia's achievements in space have been exaggerated far beyond actuality for the twin purpose of boosting Russian morale and intimidating the free world.

Second, experience has shown that free labor can outproduce slave labor and it will take Russia many, many years to match America's industrial capacity.

We proved that in the last war against Hitler. We will prove it again, if necessary, against Khrushchev.

The Kremlin knows this, just as well as we do. That is why it has launched a new 20-year plan to match the American standard of living, and American levels of production.

There has been a great deal of concern in this country about the state of our missile program, and justifiably so. It is not pleasant or encouraging to realize that the Russians have been able to outperform us in space.

When President Kennedy took office in January, he gave a new emphasis and priority to the missile program that were previously lacking. The Air Force followed up by calling in union leaders to the Pentagon for the first time in February to brief them on the urgency of expediting the program. Less than 2 weeks later, the Building and Construction Trades Department of the AFL–CIO adopted a no-strike policy on missile base jobs. Soon afterward all labor gave the Government a no-strike pledge and industry a no-lockout pledge to speed the missile program. On this basis, President Kennedy issued an Executive order establishing machinery for the equitable adjustment of disputes at missile sites. Since then, according to official records, time lost due to work stoppages of any kind has been reduced to the vanishing point.

This is an example of the position of the trade union movement in any national emergency. Traditionally and presently, the trade unions have put the public welfare first.

But other actions must be taken too, if the United States is to pull ahead in the space age. The emphasis the administration is giving to the space program and the prompt action of the Congress in supplying the President with the legislative measures he needed is, in our opinion, a good sign—a sign that America is once again moving ahead.

I wish that I could be as optimistic on other fronts but the truth is that the legislative situation is not generally good. On the domestic economic front there are a multitude of problems—and these problems have a direct bearing on the international situation and on our capacity to meet the Communist threat.

The military buildup which the Communist threat has made necessary and the additional costs of the missile and space program have provided a segment of America with the excuse they wanted for an attack not only on wages and working conditions but on social justice legislation.

The reactionaries in Congress are trying to tell the people of this country that we can't have guns and butter too. What do they mean by butter? They mean decent housing, they mean adequate social security, they mean school lunch programs, Federal aid to education, assistance to widows and orphans, and unemployment compensation.

Yet these are the things that strengthen America, not weaken it. America is not a bank, not a corporation, not an inanimate budget. It is people. Services and programs which help people in the most trying circumstances get back on their feet, which promote better education and health and wider understanding of American ideals are not only worth spending for—they are worth fighting for.

The one thing we have to fear is that our national economy will not keep pace with our growing population. With full production and full employment America will become invincible. But if our economy turns anemic, if it continues to suffer recurring bouts of recession, if mass unemployment becomes truly chronic, then we are in for serious trouble.

And we are in for serious trouble if we do not meet the problem posed by our growing work force. In the last decade, the work force grew at the rate of 820,000 a year—820,000 additional people came into the labor market annually. We were not able to find jobs for them—the unemployment figures prove that.

Starting this year, and for every year of the sixties, the labor force is going to grow at the annual rate of 1,350,000; 1,350,000 more people every year. That's not a guess. That's a vital statistic—a fact of the wartime baby boom.

That means we must find 25,000 new jobs a week, every week for the next 10 years, just to put our new workers into gainful employment. That's a major problem for a democratic society—and it is one we can and must solve.

The Communists say our free economy is doomed, that it cannot provide full employment, that it is bound to collapse. We must prove—and we can prove—they are completely wrong.

We can prove it not by the Government doing less but by its doing more to keep the national economy healthy and steadily moving forward.

Only those with limited vision and small minds want to cut back and retreat. America has not come to the end of the road nor has it reached its last frontier. We can get nowhere if we are obsessed with fear. Labor has confidence in America's destiny. We look to our Government for bold and farsighted leadership that will safeguard peace and begin to build a new era of prosperity in the next decade.

THE BERLIN SITUATION—THE SITUATION IN BRAZIL

Mr. MORSE. Madam President, in my newsletter to Oregon constituents dated September 5, I discussed two matters of national importance, the Berlin situation and that in Brazil.

I ask unanimous consent to have the portions of the newsletter dealing with those subjects printed here in the CONGRESSIONAL RECORD.

There being no objection, the exerpts were ordered to be printed in the RECORD, as follows:

SEPTEMBER 5, 1961.

No. 12

DEAR FRIEND: The announced intention of the United States and Great Britain to discuss the Berlin situation affords at least a chance that a solution can be found that will avoid a nuclear war. Our experience in dealing with Russia over Germany does not give rise to any high hopes that this effort will be successful. But this time, both sides have the awful specter of nuclear war hanging over them more closely than ever before.

As I have said before, the agreements setting up the occupation zones in Germany were meant to be temporary, pending a permanent German peace treaty that would reunify all zones and guarantee free elections. When Russia rejected free elections in its zone, France, the United States, and Great Britain merged their zones and held free elections in 1949.

Russia has tried ever since to make its occupation zone of East Germany a separate, independent nation. As such, it is and has been little more than a Russian vassal, looted by Russia after the war and producing now largely for the Soviet Union rather than for its own people. No free elections have ever been held there.

Russia's moves to make East Germany a separate country have forced the Russians into making the tortured claim that the division of Germany must be considered permanent, while the division of Berlin must still be considered only temporary, even though both are provided for in the same agreement.

Khrushchev intends to sign a separate peace treaty with East Germany, turning over to it Russian occupation rights in Berlin. Thus, he hopes to force the West to deal with East Germany over access into West Berlin and in effect, recognize the East German Government. In my opinion, this treaty will be signed very soon, unless the pending negotiations bring about an entirely new situation.

U.S. PRESSURE FOR NUCLEAR ARMS TREATIES SHOULD BE CONTINUED

Khrushchev has repeatedly stated that he is determined to see East Germany established because he fears a West Germany rearmed with nuclear weapons. However, if true, his case is weak on three grounds.

First, adding East Germany to the Polish buffer between West Germany and Russia is not much of a safety feature in modern war. Khrushchev himself has warned that if Berlin erupts into nuclear war, Russian atomic bombs will rain down on the Greek Acropolis, Italian orange groves, and on Japan, to mention only the more recent rattlings of his nuclear arsenal.

Second, Khrushchev should also be told that the way to deal with possible German resurgence is to negotiate workable and fully inspected treaties banning nuclear testing and controlling both nuclear and conventional arms. We have denied having any plans to give nuclear weapons to Germany. But this is beside the point. We cannot keep West Germany from developing them any more than Russia can keep Red China from becoming a nuclear power within a few years.

France has developed its own nuclear capacity, and Israel is doing the same, without any help from us. If Russia really fears a rearmed Germany—and many other nations do, too—the place to do something about it is at the negotiating table for a nuclear test ban and a general disarmament agreement. We should keep the pressure on Russia to resolve its professed fear of Germany through workable treaty controls governing all nations.

Third, Russia's decision to resume nuclear testing can only have the effect of hastening nuclear development everywhere. In fact, this menacing and irresponsible decision by Russia is a long step toward a world war, whether West Germany has nuclear weapons or not.

The United States must continue to press the test ban and disarmament discussions wherever possible, and renew our interest

in them just as soon as the United Nations meets again in a few days. We should affirm our desire and intention of asking the U.N. to intervene in Berlin, if the negotiations with Russia fail to settle the problem. In fact, I think such negotiations should be under U.N. auspices.

It is always possible to meet force with force, when it becomes necessary. The great trial for American statesmanship is to find a policy which will prevent force from being used at all.

FOREIGN RELATIONS COMMITTEE STUDIES BRAZIL CRISIS

The Senate Foreign Relations Committee received a briefing from State Department officials on the political situation in Brazil, where the sudden resignation of President Quadros has left that country in the lurch of a power struggle between the political left and right.

Senator HICKENLOOPER, of Iowa, and I were unable to attend the recent alliance for progress conference because the Senate did not finish the foreign aid bill until the conference was over. But one misconception about it should be cleared up. The United States did pledge aid up to $20 billion over the next 10 years; but only on the assumption that reforms are undertaken in the recipient countries which will make our aid productive and meaningful. The U.S. position is: No reforms, no money.

This is why the resignation of President Quadros may have a strong bearing on the Alliance for Progress. Brazil has half the population and half the land area of Latin America. What happens in Latin America depends a lot more on the future course of Brazil than upon anything the United States does, even through the Alliance for Progress program.

At the time of his resignation, the Quadros program of land and tax reform was being blocked by determined opposition in Brazil. If Brazil is unwilling or unable to follow constitutional procedures and to live up to the alliance for progress requirements, the program may never get off the ground. Ambassador Gordon has a challenging and difficult time awaiting him in Brasilia.

AGREEMENT WITH GOVERNMENT OF FRANCE ON COOPERATION IN THE USES OF ATOMIC ENERGY—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read and referred to the Joint Committee on Atomic Energy:

To the Congress of the United States:

For some time members of the North Atlantic Treaty Organization have been taking steps toward the introduction of the most modern weapons into NATO forces. Among these measures is the introduction into forces of our NATO allies of weapons capable of delivering nuclear warheads. Such steps have been proceeding for some time following the considered judgment and agreement of the NATO governments. The objective is to achieve the most effective pattern of NATO military defensive strength. In view of the well-known purely defensive purposes of the alliance, the introduction of modern weapons into NATO forces to take account of technological developments is in no way a cause for legitimate concern on the part of other countries.

Article III of the North Atlantic Treaty calls upon the members of the alliance to maintain their capacities to resist armed attack through effective self-help and mutual aid. As part of its contribution to the strength of the alliance, the United States has entered into a number of agreements through which we cooperate with NATO allies in the uses of atomic energy for mutual defense purposes. These agreements have been concluded pursuant to the Atomic Energy Act of 1954, as amended. All of these agreements are designed to implement the NATO objectives for maintaining the most modern weapons and techniques in NATO forces.

We have just concluded an agreement with the Government of France which is essentially the same as agreements previously concluded with a number of other NATO allies for cooperation in the uses of atomic energy for mutual defense purposes. This agreement will make possible effective cooperation with France in NATO mutual defense planning and in the training of French NATO forces. Training of certain French NATO forces which play a significant role in European defense cannot proceed to conclusion until this agreement becomes effective. This agreement should be brought into effect as quickly as possible, in order that we can promptly and fully utilize the potential of French military forces in the development of our NATO defensive strength. In light of the probable time remaining for this session of the Congress and in view of the provisions of section 123d of the Atomic Energy Act of 1954, as amended, it appears that normally it would not be possible to bring this agreement into effect until the next session of the Congress. Accordingly, I would appreciate action by the Congress during the current session which would permit the agreement to come into force promptly.

I understand and respect the importance of mature consideration in the Congress of agreements of this sort, but I believe that in the present case there are compelling reasons for rapid action. The gravity of the international situation, and in particular the Soviet threat to the freedom of West Berlin, have made it a matter of first importance that the unity of the North Atlantic nations should be sustained. The Government of France, in this crisis, has behaved with great firmness, and the stanch and determined position of President de Gaulle, in particular, has reinforced the West. In these circumstances, I deem it of great importance that we should proceed promptly with such a joint undertaking as this one, carefully matured in prolonged negotiation. As has already been explained in informal discussions with interested Members of the Congress, the present agreement provides for a limited release of information to carefully selected personnel. Careful arrangements have been made to insure that all necessary security requirements are met, and the inclusion of France among NATO countries participating in this general undertaking is an important step forward at a moment in which such a step has a wider significance than usual. It is for these reasons that I urge upon the Congress appropriate special actions to permit the agreement to come into force.

In accordance with the Atomic Energy Act of 1954, as amended, I am submitting to each House of the Congress an authoritative copy of the agreement with the Government of France. I am transmitting also a copy of the letter from the Secretary of State which forwarded to me an authoritative copy of the agreement, a copy of the joint letter from the Deputy Secretary of Defense and the Chairman of the Atomic Energy Commission recommending my approval of the agreement, and a copy of my memorandum in reply thereto which contained my approval.

JOHN F. KENNEDY.

THE WHITE HOUSE, *September 7, 1961.*

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 200. An act to amend the act entitled "An act relative to employment for certain adult Indians on or near Indian reservations," approved August 3, 1956;

S. 902. An act to amend the Small Business Investment Act of 1958, and for other purposes;

S. 1719. An act to amend title 23 of the United States Code with respect to Indian reservation roads;

S. 2051. An act to afford children of certain deceased veterans who were eligible for the benefits of the War Orphans Educational Assistance Act of 1956 but who, because of residence in the Republic of the Philippines, were unable to receive such assistance prior to enactment of Public Law 85-460, additional time to complete their education; and

S. 2241. An act to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land.

The message also announced that the House had passed the bill (S. 1768) to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 4317) to amend the Internal Revenue Code of 1954 and incorporate therein provisions for the payment of annuities to widows and certain dependents of the judges of the Tax Court of the United States; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLS, Mr. KING of California, Mr. O'BRIEN of Illinois, Mr. MASON, and Mr. BYRNES of Wisconsin were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 7391) to promote the conservation of migratory waterfowl by the acquisition of wet lands and other essential waterfowl habitat, and for other purposes; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and

that Mr. BONNER, Mr. GEORGE P. MILLER, Mr. DINGELL, Mr. PELLY, and Mr. ELLSWORTH were appointed managers on the part of the House at the conference.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 8666. An act to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges; and

H.R. 9000. An act to extend for two additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes.

HOUSE BILL PLACED ON CALENDAR

The bill (H.R. 9000) to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes, was read twice by its title and placed on the calendar.

MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961

The PRESIDING OFFICER laid before the Senate the bill (H.R. 8666), to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges, which was read twice by its title.

Mr. SPARKMAN. Madam President, I move that the Senate proceed to the consideration of the bill.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. SPARKMAN. Madam President, the bill was passed by the House. I move that it be amended by striking out all after the enacting clause and inserting in lieu thereof the text of Senate bill 1154, to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. SPARKMAN. Madam President, I move that the Senate insist on its amendment, request a conference thereon with the House of Representatives, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. FULBRIGHT, Mr. SPARKMAN, Mr. HUMPHREY, Mr. WILEY, and Mr. HICKENLOOPER conferees on the part of the Senate.

Mr. DIRKSEN. Madam President, I ask unanimous consent that I may suggest the absence of a quorum without losing the floor.

The PRESIDING OFFICER. Without objection, it is so order. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOGGS in the chair). Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed, without amendment, the bill (S. 2395) to amend the Railroad Retirement Act of 1937 to provide reduced annuities to male employees who have attained age 62, and for other purposes.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 39) to print 3,000 copies of a compilation of the hearings, reports, and committee prints of the Subcommittee on National Policy Machinery.

The message further announced that the House had passed the bill (S. 1807) to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla., with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had receded from its amendment to the bill (S. 685) to amend the Coast and Geodetic Survey Commissioned Officers Act of 1948, as amended, and for other purposes.

The message further announced that the House had severally agreed to the amendment of the Senate to the following bills of the House:

H.R. 6309. An act to amend title VI of the Merchant Marine Act, 1936, as amended, in order to increase certain limitations in payments on account of operating differential subsidy under such title;

H.R. 6732. An act to amend the Merchant Marine Act, 1936, as amended, to encourage the construction and maintenance of American-flag vessels built in American shipyards; and

H.R. 6974. An act to amend section 607 (b) of the Merchant Marine Act, 1936, as amended.

The message also announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 1777. An act to amend title 18 of the United States Code to prohibit the transportation of fraudulent State tax stamps in interstate and foreign commerce, and for other purposes;

H.R. 7259. An act to waive section 142 of title 28, United States Code, with respect to the U.S. district court for the western district of Louisiana, Lafayette division, holding court at Lafayette, La.;

H.R. 7932. An act to amend the act of July 2, 1948, so as to repeal portions thereof relating to residual rights in certain land on Santa Rosa Island, Fla.;

H.R. 8291. An act to enable the United States to participate in the assistance rendered to certain migrants and refugees;

H.R. 8556. An act to amend the National Science Foundation Act of 1950 to require certain additional information to be filed by an applicant for a scholarship or fellowship, and for other purposes;

H.R. 8558. An act to amend section 303(a) of title 23, United States Code, relating to the organization of the Bureau of Public Roads, and for other purposes;

H.R. 8678. An act to provide for the conveyance of a portion of the Henry G. Shirley Memorial Highway and other highways on the Pentagon road network to the Commonwealth of Virginia, and for other purposes; and

H.J. Res. 459. Joint resolution to provide for the preservation and protection of certain lands in Prince Georges and Charles Counties, Md., and for other purposes.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles, and referred, as indicated:

H.R. 1777. An act to amend title 18 of the United States Code to prohibit the transportation of fraudulent State tax stamps in interstate and foreign commerce, and for other purposes; and

H.R. 7259. An act to waive section 142 of title 28, United States Code, with respect to the U.S. district court for the western districts of Louisiana, Lafayette division, holding court at Lafayette, La.; to the Committee on the Judiciary.

H.R. 7932. An act to amend the act of July 2, 1948, so as to repeal portions thereof relating to residual rights in certain land on Santa Rosa Island, Fla.; to the Committee on Armed Services.

H.R. 8291. An act to enable the United States to participate in the assistance rendered to certain migrants and refugees; to the Committee on Foreign Relations.

H.R. 8556. An act to amend the National Science Foundation Act of 1950 to require certain additional information to be filed by an applicant for a scholarship or fellowship, and for other purposes; to the Committee on Labor and Public Welfare.

H.R. 8558. An act to amend section 303(a) of title 23, United States Code, relating to the organization of the Bureau of Public Roads, and for other purposes; and

H.R. 8678. An act to provide for the conveyance of a portion of the Henry G. Shirley Memorial Highway and other highways on the Pentagon road network to the Commonwealth of Virginia, and for other purposes; to the Committee on Public Works.

H.J. Res. 459. Joint resolution to provide for the preservation and protection of certain lands in Prince Georges and Charles Counties, Md., and for other purposes; to the Committee on Interior and Insular Affairs.

AMENDMENT OF SMALL BUSINESS INVESTMENT ACT OF 1958

Mr. DIRKSEN. Mr. President, I ask that the Chair lay before the Senate the amendment of the House of Representatives to S. 902.

The PRESIDING OFFICER (Mr. BURDICK in the chair) laid before the Senate the amendment of the House of

Representatives to the bill (S. 902) to amend the Small Business Investment Act of 1958, and for other purposes, which was, to strike out all after the enacting clause and insert:

That this Act may be cited as the "Small Business Investment Act Amendments of 1961".

SEC. 2. Section 103 of the Small Business Investment Act of 1958 is amended—

(1) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) the terms 'small business investment company', 'company', and 'licensee' mean a company approved by the Administration to operate under the provisions of this Act and issued a license as provided in section 301(c);"; and

(2) by striking out "and" at the end of paragraph (5), by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding after paragraph (6) the following new paragraph:

"(7) the term 'license' means a license issued by the Administration as provided in section 301(c)."

SEC. 3 (a) Section 302(a) of the Small Business Investment Act of 1958 is amended by striking out the second sentence and inserting in lieu thereof the following: "In order to facilitate the formation and growth of small business investment companies, the Administration is hereby authorized, notwithstanding any other provisions of law (but only to the extent that the necessary funds are not available to the company involved from private sources), to purchase the debentures of any such company in an amount not to exceed the lesser of $500,000 or the amount of the paid-in capital and surplus of the company from other sources; but debentures of a small business investment company may be purchased by the Administration under this subsection only during such period (in no case ending more than three years after the date of the issuance of its license under section 301(c) or the date of the enactment of the Small Business Investment Act Amendments of 1961, whichever is later) as may be fixed by the Administration."

(b) Section 302(b) of such Act is amended by striking out "1 percent of its capital and surplus" and inserting in lieu thereof "2 percent of its capital and surplus".

SEC. 4. (a) The first sentence of section 303(b) of the Small Business Investment Act of 1958 is amended by inserting after "is authorized" the following: "(but only to the extent that the necessary funds are not available to the company involved from private sources)".

(b) The second sentence of section 303(b) of such Act is amended to read as follows: "The total amount of obligations of any one company which may be purchased and outstanding at any one time by the Administration under this subsection (including commitments to purchase such obligations) shall not exceed 50 percent of the paid-in capital and surplus of such company or $5,000,000, whichever is less."

(c) Section 303(b) of such Act is further amended by adding at the end thereof the following new sentence: "All loans made by the Administration under this subsection shall be of such sound value as reasonably to assure repayment."

(d)(1) Section 303 of such Act is further amended by adding at the end thereof the following new subsection:

"(c) The proceeds of loans made by the Administration to small business investment companies under subsection (b) shall not be used by such companies for investments and loans aggregating more than $500,000 in the case of any single enterprise. Accordingly, so long as any portion of a loan made by the Administration to a small business investment company under subsection (b) remains unpaid, such company shall maintain assets consisting of cash, eligible Government obligations, and portfolio investments and loans which do not exceed $500,000 in the case of any single enterprise equal in total face value to no less than the unpaid principal amount of the loan under subsection (b)."

(2) The amendment made by paragraph (1) shall apply only with respect to loans disbursed by the Small Business Administration under section 303(b) of the Small Business Investment Act of 1958 on or after the date of the enactment of this Act; except that such amendment shall not apply with respect to any such loans disbursed pursuant to a commitment or loan authorization issued by the Administration before such date.

SEC. 5. Section 304 of the Small Business Investment Act of 1958 is amended by adding at the end thereof the following new subsection:

"(d) Equity capital provided to incorporated small business concerns under this section may be provided directly or in cooperation with other investors, incorporated or unincorporated, through agreements to participate on an immediate basis."

SEC. 6. Section 305(b) of the Small Business Investment Act of 1958 is amended by striking out "other lending institutions" and inserting in lieu thereof "other lenders, incorporated or unincorporated,".

SEC. 7. Section 308(a) of the Small Business Investment Act of 1958 is amended to read as follows:

"(a) Wherever practicable the operations of a small business investment company, including the generation of business, may be undertaken in cooperation with banks or other investors or lenders, incorporated or unincorporated, and any servicing or initial investigation required for loans or acquisitions of securities by the company under the provisions of this Act may be handled through such banks or other investors or lenders on a fee basis. Any small business investment company may receive fees for services rendered to such banks, and other investors and lenders."

SEC. 8. Title III of the Small Business Investment Act of 1958 is amended by adding after section 308 the following new sections:

"ENFORCEMENT PROCEDURES

"SEC. 309. (a) A license may be revoked by the Administration—

"(1) for false statements knowingly made in any written statement required under this title, or under any regulation issued under this title by the Administration, for the purpose of obtaining the license;

"(2) because of facts coming to the attention of the Administration which existed prior to the time the license was issued and which, if known at that time, would have justified the Administration in refusing to issue the license;

"(3) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this Act;

"(4) for willful or repeated violation of, or willful or repeated failure to observe, any rule or regulation of the Administration authorized by this Act; or

"(5) for violation of, or failure to observe, any cease and desist order issued by the Administration under this section.

"(b) Where a licensee has not complied with any provision of this Act, or of any regulation issued under this Act by the Administration, the Administration may order such licensee to cease and desist from such action or failure to act; and the Administration may further order such licensee to take such action or to refrain from such action as the Administration deems necessary to ensure compliance with the Act and the regulations. The Administration may also suspend the license of such licensee until the licensee has complied with such order.

"(c) Before revoking a license pursuant to subsection (a), or issuing a cease and desist order or suspending a license pursuant to subsection (b), the Administration shall serve upon the licensee involved an order to show cause why an order revoking the license or a cease and desist order or an order suspending the license should not be issued. Any such order to show cause shall contain a statement of the matters of fact and law asserted by the Administration and the legal authority and jurisdiction under which a hearing is to be held, and shall inform the licensee that a hearing will be held before the Administration at a time and place stated in the order. If after hearing, or a waiver thereof, the Administration determines on the record that an order revoking the license or a cease and desist order or an order suspending the license should issue, it shall issue such order, which shall include a statement of the findings of the Administration and the grounds and reasons therefor and specify the effective date of the order, and shall cause the order to be served on the licensee.

"(d) The Administration may require by subpena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to the hearing from any place in the United States. Witnesses summoned before the Administration shall be paid by the party at whose instance they were called the same fees and mileage that are paid witnesses in the courts of the United States. In case of disobedience to a subpena, the Administration, or any party to a proceeding before the Administration, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents.

"(e) An order issued by the Administration under this section shall be final and conclusive unless within thirty days after the service thereof the licensee appeals to the United States court of appeals for the circuit in which such licensee has its principal place of business by filing with the clerk of such court a petition praying that the Administration's order be set aside or modified in the manner stated in the petition. After the expiration of such thirty days, a petition may be filed only by leave of court on a showing of reasonable grounds for failure to file the petition theretofore. The clerk of the court shall immediately cause a copy of the petition to be delivered to the Administration, and the Administration shall thereupon certify and file in the court a transcript of the record upon which the order complained of was entered. If before such record is filed the Administration amends or sets aside its order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, on notice to the Administration. The filing of a petition for review shall not of itself stay or suspend the operation of the order of the Administration, but the court of appeals in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition. The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way. The court may affirm, modify, or set aside the order of the Administration. If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the Administration to reopen the hearing for the taking of such evidence, in such manner and upon such terms and conditions as the court may deem proper. The Administration may modify its findings as to the facts, or make new findings, by reason of the additional evidence so taken, and it shall file

its modified or new findings and the amendments, if any, of its order, with the record of such additional evidence. No objection to an order of the Administration shall be considered by the court unless such objection was urged before the Administration or, if it was not so urged, unless there were reasonable grounds for failure to do so. The judgment and decree of the court affirming, modifying, or setting aside any such order of the Administration shall be subject only to review by the Supreme Court of the United States upon certification or certiorari as provided in section 1254 of title 28, United States Code.

"(f) If any licensee against which an order is issued under this section fails to obey the order, the Administration may apply to the United States court of appeals, within the circuit where the licensee has its principal place of business, for the enforcement of the order, and shall file a transcript of the record upon which the order complained of was entered. Upon the filing of the application the court shall cause notice thereof to be served on the licensee. The evidence to be considered, the procedure to be followed, and the jurisdiction of the court shall be the same as is provided in subsection (e) for applications to set aside or modify orders. The proceedings in such cases shall be made a preferred cause and shall be expedited in every way.

"INVESTIGATIONS

"SEC. 310. The Administration may make such investigations as it deems necessary to determine whether a licensee or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of any provision of this Act, or of any rule or regulation under this Act, or of any order issued under this Act. The Administration shall permit any person to file with it a statement in writing, under oath or otherwise as the Administration shall determine, as to all the facts and circumstances concerning the matter to be investigated. For the purpose of any investigation, the Administration is empowered to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpena issued to, any person, including a licensee, the Administration may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Administration, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found.

"INJUNCTIONS AND OTHER ORDERS

"SEC. 311. (a) Whenever, in the judgment of the Administration, a license or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of any provision of this Act, or of any rule or regulation under this Act, or of any order issued under this Act, the Administration may make application to the proper district court of the United States or a United States court of any place subject to the jurisdiction of the United States for an order enjoining such acts or practices, or for an order enforcing compliance with such provision, rule, regulation, or order, and such courts shall have jurisdiction of such actions and, upon a showing by the Administration that such licensee or other person has engaged or is about to engage in any such acts or practices, a permanent or temporary injunction, restraining order, or other order, shall be granted without bond. The proceedings in such a case shall be made a preferred cause and shall be expedited in every way.

"(b) In any such proceeding the court as a court of equity may, to such extent as it deems necessary, take exclusive jurisdiction of the licensee or licensees and the assets thereof, wherever located; and the court shall have jurisdiction in any such proceeding to appoint a trustee or receiver to hold or administer under the direction of the court the assets so possessed."

SEC. 9. Section 502 of the Small Business Investment Act of 1958 is amended—

(1) by striking out "$250,000" in paragraph (3) and inserting in lieu thereof "$350,000"; and

(2) by striking out "ten" where it first appears in paragraph (5) and inserting in lieu thereof "twenty-five".

SEC. 10. (a) Section 301(a) of the Small Business Investment Act of 1958 is amended to read as follows:

"(a) A small business investment company shall be an incorporated body, organized and chartered under State law solely for the purpose of performing the functions and conducting the activities contemplated under this title, which has succession for a period of not less than thirty years unless sooner dissolved by its shareholders and possesses the power reasonably necessary to perform such functions and conduct such activities. The area in which the company is to conduct its operations, and the establishment of branch offices or agencies (if authorized by the articles of incorporation), shall be subject to the approval of the Administration."

(b)(1) The second sentence of section 301(c) of such Act is amended by striking out "In determining whether to approve the establishment of such a company and its proposed articles of incorporation" and inserting in lieu thereof "In determining whether to approve such a company's articles of incorporation and permit it to operate under the provisions of this Act".

(2) The last sentence of section 301(c) of such Act is amended to read as follows: "After consideration of all relevant factors, if it approves the company's articles of incorporation, the Administration may in its discretion approve the company to operate under the provisions of this Act and issue the company a license for such operation."

(3) Section 301 of such Act is further amended by striking out subsections (d) and (e).

(c) The second sentence of section 308(b) of such Act is amended by striking out "organized under this Act" and inserting in lieu thereof "operating under the provisions of this Act".

(d) Section 308 of such Act is amended by striking out subsections (d), (e), and (f) and redesignating subsection (g) as subsection (d), and by striking out "organized under this Act" in the subsection so redesignated and inserting in lieu thereof "operating under the provisions of this Act".

(e) Section 309 of such Act (relating to approval of State chartered companies for operations under this Act) is repealed.

(f) Title IV of such Act is repealed.

(g)(1) The table of contents of such Act is amended by striking out

"Sec. 309. Approving State chartered companies for operations under this Act."

and inserting in lieu thereof

"Sec. 309. Enforcement procedures.
"Sec. 310. Investigations.
"Sec. 311. Injunctions and other orders."

(2) The table of contents of such Act is further amended by striking out

"TITLE IV—CONVERSION OF STATE CHARTERED INVESTMENT COMPANIES AND STATE DEVELOPMENT COMPANIES"

(h)(1) Section 202 of such Act is amended by striking out subsection (b).

(2) Section 20 of the Small Business Act is repealed.

(3) The first sentence of section 4(c) of the Small Business Act is amended by inserting after "by law" the following: "(including the payment of administrative expenses)".

SEC. 11. Section 4(c) of the Small Business Act is amended—

(1) by striking out "$1,000,000,000" each place it appears and inserting in lieu thereof "$1,150,000,000"; and

(2) by striking out "$250,000,000" in the eighth sentence and inserting in lieu thereof "$400,000,000".

Mr. DIRKSEN. Mr. President, I move that the Senate disagree to the amendment of the House, request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. ROBERTSON, Mr. SPARKMAN, Mr. DOUGLAS, Mr. PROXMIRE, Mr. LONG of Missouri, Mrs. NEUBERGER, Mr. BEALL, Mr. BENNETT, Mr. JAVITS, and Mr. TOWER conferees on the part of the Senate.

AMENDMENT OF INTERNAL REVENUE CODE OF 1954, RELATING TO PAYMENT OF ANNUITIES TO CERTAIN WIDOWS AND DEPENDENTS OF JUDGES OF U.S. TAX COURT

Mr. BYRD of Virginia. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4317.

The PRESIDING OFFICER (Mr. BURDICK in the chair) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 4317) to amend the Internal Revenue Code of 1954 and incorporate therein provisions for the payment of annuities to widows and certain dependents of the judges of the Tax Court of the United States, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. BYRD of Virginia. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BYRD of Virginia, Mr. KERR, Mr. LONG of Louisiana, Mr. WILLIAMS of Delaware, and Mr. CARLSON conferees on the part of the Senate.

CONTINUAL EXPANSION OF FEDERAL ACTIVITIES AND CONTINUED GROWTH OF FEDERAL PAYROLL

Mr. BENNETT. Mr. President, in its issue of August 31, 1961, the Iron County

Record, published in Cedar City, Utah, printed an editorial expressing dismay with the continual expansion of Federal activities in the American life, and a continued growth of the Federal payroll.

Because the editorial expresses so aptly the problem which grows out of the natural tendency for bureaucracy to expand, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DRAW IN THE HAND

Some startling statistics regarding Federal employment were brought out recently in a newsletter of Senator WALLACE F. BENNETT, of Utah. In the letter Senator BENNETT stated that at the end of June the Federal Government had 2,419,681 on the payrolls.

Our Government is growing and it is a constant growth that we in southern Utah cannot help but see and witness.

As Senator BENNETT points out the big buildup in defense is not the only reason for the steady growth. He states: "Today we are in a phase of military expansion. Is this the reason for this fantastic increase in Federal personnel? Can we blame it on defense?"

In answer to his own question he pointed out that "of the 31,519 (Federal employees) added to the Government payroll in June, for example, only 1,874 were in the Department of Defense. The remaining 29,645 were in other agencies of the Government."

Utah, it has been pointed out in the past, has the largest ratio of Federal employees of any of the 50 States; Cedar City, it is safe in stating, has the largest ratio of Federal employees in the southern Utah area.

Just look around you and see the growth of our governmental offices in Cedar City alone and none of these offices are connected with the military and defense increase of the Government.

At one time the Federal building, or post office building, was sufficient to house the Federal agencies of the U.S. Government in Cedar City. At the present time the Federal building is so completely inadequate that at least three separate office buildings are housing Federal agencies.

The Forest Service has expanded its offices to a location on Harding Avenue and at the present time is looking for additional office space. Additional needs as reported to the Cedar City Chamber of Commerce is 4,000 square feet.

Last year the Selective Service office, once located in the Federal building was forced out and offices were relocated above Mullett Jewelry on Main Street. This office requires one employee and of course an extensive filing system, but it nevertheless overflowed the Federal building.

Other governmental agencies include the Bureau of Land Management which has taken over a sizable area of the second floor of the Parks Office Building just this last year.

On the State level the growth in Cedar City has been as great as or greater than the Federal agencies. Not too many years ago the employment security offices were built in Cedar City to house that operation. The State road department and the State highway patrol have expanded their facilities on North Main Street and the fish and game department has taken over several offices in the Parks Office Building when the regional office, one of four in the State, was opened in Cedar City. Plans are now being formulated for the construction of a new building to house the fish and game regional offices.

In addition the State engineer has opened up an office in Cedar City, also located in the Parks Office Building.

Then there are other agencies such as the division of vocational rehabilitation, located in the Parks Office Building—a State agency; the Iron County Committee on Agricultural Stabilization and Conservation, a Federal assistance program located in the Parry Building at 170 North Main in Cedar City; the Soil Conservation Service, a federally controlled program that was previously located in the Parry Building but which now has taken offices in the Bulloch Building along with the ASC offices and an office of the Bureau of Internal Revenue is slated to open, also in the Bulloch Building.

Federal Aviation Agency is located at the Cedar City Municipal Airport and construction work is now being performed on a powerline and radar unit to be installed on Cedar Mountain which will be operated on a year-round, 24-hour-a-day basis, it is understood.

The Farmers Home Administration is also located in the Federal Building as are the offices of the Iron County extension agent and the home demonstration agent, a part of the Federal land grant system and connected with the State and county organizations as well.

If you want to list all of the groups it would also be necessary to point out that the National Guard Armory and unit are financed by the Federal and State governments. There is also a Utah State Tax Commission office located in the First Security Bank Building, a separate office in itself.

Then there are some county offices including the department of Public Welfare located at 66 North Main, above the Cowley Drug, the Iron County Hospital, the county officers of the assessor and surveyor and the Iron County sheriff's offices located in the city and county building, in addition to the new county road yards north of Cedar City, and the department of health offices located at 224 South 200 West, next to the hospital.

There are also the facilities of our city government including the offices at the city and county building, the city and jail facilities there plus the road department sheds north on Highway 91.

And last but not least the county offices and courthouse located in Parowan in addition to the county and city facilities located in other communities and towns of the county.

It is a creeping thing, this expansion of agencies from the city to the Federal Government level.

We are not saying that the agencies in themselves are not justified in their expansion program. In most cases the increase in personnel, the increase in facilities and increase in jurisdiction and control is directly based on needs that our citizenry have demanded.

The individual demands of the citizens on our various levels of government—that includes the city right along with the rest—have resulted in the necessary growth of these various agencies.

Only when citizens take upon themselves the responsibility to say no, only when individual citizens draw back the "give me" hand, only when we as individual citizens take it upon ourselves to provide services, to provide wants and needs will this growth stop.

After all our Government agencies are doing for us only what we ask them to do, only what we demand of them and until citizens stop making demands the growth is going to continue.

It isn't our city government, nor our county, State or Federal Government, it is the citizens who are responsible for the growth and it is the citizens, as individuals, who will determine when that growth, and the demand for services, is to stop.

It is up to you citizens of Cedar City, citizens of Iron County, citizens of Utah, and citizens of the United States of America.

UKRAINIAN INDEPENDENCE

Mr. HRUSKA. Mr. President, two decades ago, on June 30, 1961, Ukrainian nationalism expressed itself courageously in the proclamation of the Ukrainian State. The spirit of an oppressed people, which produced this brave act, gains renewed fervor in our commemoration this year of Ukrainian Independence Day.

Among the captive nations Ukrainian holds special claims on world opinion. It is the largest of those nations forcibly assimilated by the Soviet Union, its individual character and distinctive culture systematically suppressed. The people of the Ukraine met terror and brutality in their struggle to be free. The famine of the early thirties in which millions perished, the mass murders of the citizens of Vinnitisia in 1937, and the sweeping purges that came later under the personal direction of Khrushchev are only the well known repressions suffered by them.

The proclamation of independence in 1941 represented the Ukrainian defiance of two oppressors—the recent German occupation forces and the Soviet regime itself forced upon it since 1920.

That courageous stand for Ukrainian freedom was held fast and honored at the 10th mass rally of the Ukrainian American Youth Association conducted jointly in Elbenville, N.Y., and Chicago, Ill., on September 3 of this year. This country and liberty-loving people everywhere join these youths who demonstrate so vividly, by the loss of their native land, the Communist design for world domination.

The United States, long protector of the principle that government must guarantee the inalienable rights of man and protect the inviolability of sovereign nations, will never be reconciled to the subjugation of the Ukrainian people.

On this 20th anniversary of the Ukrainian proclamation of independence, the Ukrainian American Youth Association does not stand alone. The duty to preserve its national sovereignty belongs to all free democracies. Its message of Soviet tyranny is heard by all free people. To spread this truth and to restore that freedom is the task which lies ahead.

THE DOUBLE STANDARD OF MORALITY OF THE NEUTRAL NATIONS

Mr. BENNETT. Mr. President, now that the meeting of the so-called uncommitted nations in Belgrade has ended, I think it is appropriate to express the disappointment which the people of the United States and, I think, most of the citizens of the so-called neutral nations have felt as a result of this conference.

In the first place, I think it is unfortunate that at this critical point of the world's history there should be any unalined countries. The countries who call themselves neutrals picture the world as an arena in which two powerful countries—the United States and the Soviet Union—are battling each other for the selfish goal of greater power and inuflence. They see themselves as mere

bystanders whose duty it is to refrain from getting involved in a battle which does not directly concern them. And they believe that, like the bystanders in any street fight, they have a duty to remain neutral and to do everything possible to break up the fight and make both contenders listen to reason.

Unfortunately, this analogy has no relationship to the realities of the world we live in. The United States and its allies are not pursuing purely selfish ends; they are working for a world in which all mankind will have both freedom and security. They are not working to prevent the people of the Soviet Union from having any sort of government they prefer; they oppose communism only because communism has sworn to destroy the existing institutions in every non-Communist country.

In light of these facts, it is incredible that the neutral nations, nearly all of whom profess to be independent of the Soviet Union, should permit themselves to be used by the Soviet Union to further its own ends. Yet to a large extent that is what is happening. At the Bandung Conference 6 years ago, the neutrals adopted resolutions generally critical of the West and generally in support of Soviet claims. And now at the Belgrade Conference, held just as the Soviet Union has threatened civilization with extinction, by brandishing the threat of the thermonuclear bomb, the neutral nations have passed up an excellent opportunity to demonstrate that they are truly neutral, instead of being neutral against the United States. Instead of passing a firm resolution censuring the Soviet Union for its disregard of human welfare, the 25 nations came forth with nothing more than an expression of regret and a decision to urge the United States and the Soviet Union to resume negotiations. Clearly, the neutrals have a double standard of morality—one set of standards to be applied to the United States, and another to the Soviet Union.

The implication of this resolution is, of course, that the United States must share the blame for the disarmament deadlock. No one who has studied the record of the disarmament talks, as I have, could fail to appreciate what a gross distortion of truth that is. In session after session the Soviet Union has continued to take an obdurate attitude toward the inspection proposals; and it is incredible that the so-called neutral nations, who should be aware of what has happened in the Geneva talks, should give any credence to the Soviet arguments.

Particularly disappointing is the attitude of the Conference toward the problem of Berlin. Although Archbishop Makarios, President of Cyprus, and Premier Adoula of the Congo urged that the principle of self-determination be applied in the case of Berlin, the Conference refused to accept this recommendation.

In the words of the Washington Post:

> The Conference was primarily one of eloquent silences. The Soviet Union's breach of the voluntary ban on atmospheric testing of thermonuclear devices brought no rebuke from the delegates. The harsh treatment of the hapless citizens of East Berlin by the new imperialists of the modern world escaped the notice of victims of the last century's imperialism. No one at Belgrade pined for the freedom of Hungarians or other Eastern Europeans. Nor was the invasion of Tibet denounced. These seem remarkable defects of vision, odd examples of astigmatism, in view of the ability of the delegates to see colonial exploitation in the existence of a base at Guantanamo.

It has been suggested by some that the actions taken by the neutral nations at Belgrade reflected, not so much their own real views, as their fear of the Soviet Union. These nations realize that however much they may protest against the colonialism of the Western Powers, they do not need to fear aggression from the West. On the other hand, they know that the Soviet Union has no scruples against expanding its dominion, and that it will use any means, however ruthless, to attain its goals. It is suggested, therefore, that the course of the neutral nations is determined more by the fear of the Soviet Union than by their respect for the United States.

If this is true, it is a shortsighted attitude, and is a betrayal of the principles in which the neutral nations profess to believe. If the Soviet Union finds that fear is the easiest way to influence the neutral nations, those nations can look forward to a long period of increasing pressure from Moscow.

The United States and its allies are devoting their efforts and wealth toward creation of a world in which the neutral nations and all nations of the world will have the right of self-determination, a world in which the greatest degree of justice will prevail. The greatest obstacle to that kind of world is international communism, and international communism is the chief beneficiary of the present attitude of the neutral nations. The sooner the neutral nations realize this simple fact, the better it will be for all of us.

WAGES, PRODUCTIVITY, AND PRICES IN THE STEEL INDUSTRY

Mr. DIRKSEN. Mr. President, pursuant to notice which I gave last week, and in consonance with an agreement with the majority leaders, we felt that it was necessary to make some response to the discussion which was had recently on the whole question of steel and steel prices, and an alleged impending increase in the cost of steel and the price of steel, as of October 1, 1961.

On many occasions, I have observed that George Bernard Shaw once said that fear is the only universal passion. I think anybody, if he takes a little time, can spell that out to his own satisfaction, because almost from the age of consciousness until the shadow of the grave is upon an individual, he is constantly beset by the fears which are like shadows abounding in life. One wonders whether fear will become a secret weapon, and he also wonders when it will end, or where it will end, or if it will end in a control of the American economy.

I refer particularly to what I call a campaign to thwart any increase in steel prices without a chance for industry to be heard. I emphasize that idea because I do not categorically say, one way or the other, whether there should be an increase in the price of steel. I do say, though, with respect to an industry of such dimensions, having an abiding interest in the future of the country, having such a large capital investment, and directed by people who are thinking of the steel industry not in terms of a year or 5 years or 10 years, but perhaps in terms of 100 years, because of what it must contribute—not what it may, but what it must contribute—to the security, the survival, and the growth of the country, it seems strange, indeed, that there should be a threat to make it appear that there will be developed ultimately what I would call psychological price control. That is a matter of concern for us. It is a question of method. It is a question of whether an industry—any industry—shall have its day in court, because if psychological pressures can be used, if threats can be used, upon one industry, they can be used upon another. If successful in the first instance or in the second instance, who shall say that the same weapon, fear, will not be employed on other occasions?

The campaign seems to have started with a press briefing; and later a briefing occurred in the old Supreme Court chamber. That was referred to in the New York Herald Tribune of August 27.

I think I am correct also in stating that on August 22 at least 10 Senators on the majority side of the aisle engaged in an all-afternoon discussion of steel prices. Strangely enough, about the same time, the Secretary of Agriculture was writing to the American Bakers Association and was saying to them that an increase in the price of bread might "have possible public reaction."

This appears, so far as I know, to be the first attempt at psychological price control by using threats, and by using persuasion, as weapons and as appeals to a kind of fear instinct.

In the long discussion which took place on the Senate floor, in the matter of steel prices, and so forth, the following points were made, substantially: First, that a Federal deficit threatens the revival of inflationary forces. I do not quarrel with the fact of a Federal deficit. I think one of the astounding things is that after the last Eisenhower budget was submitted, in which it was estimated and hoped that there would be a $70 million surplus from fiscal 1961, and a $1.5 billion surplus for 1962, when the books were balanced, the line was drawn, and the totals were cast, we found ourselves confronted with a deficit of $3.9 billion in 1961, and an estimated $5.3 billion in fiscal 1962. So in 7 months there was a modification aggregating $10,700 million; and that is the record of the New Frontier, and I give it in all its nakedness, and let the figures speak for themselves.

But the first point made the other day was that the Federal deficit threatens the revival of inflationary forces.

The second point which was made was that rapid recovery from the recession threatens instability. That may or may

not be. I presume that it is a matter of opinion. I do not quarrel with it one way or the other.

The third point was that a scare buying psychology might be developed and might have an impact on the consumers of the country and might in addition contribute to inflationary fever.

The fourth point made in a long discussion was that an increase in steel prices would affect the entire economy. That may or may not be, but I am inclined to feel that too often we overexaggerate what that impact might be.

The fifth point was that there was no justification for a steel price increase, and that the cost developed as a result of the 3-year program could be absorbed by the industry without a price increase.

The sixth point was that such an increase would affect international trade and international gold balances.

The seventh point was that steel profits are up.

The eighth point was that wage increases can be absorbed.

And then we came to the threats.

The first threat—and I try to use my words very carefully, because I would not do injustice to any Member of this body—but the first threat, as I understand and interpret it, came from the Senator from Tennessee [Mr. KEFAUVER], and was stated as follows in the formal statement he made on the floor of the Senate—and I now quote from what he said:

> The proposition which I wish to advance is that if the steel companies do raise their prices in a manner similar to their advances of recent years, and if there exists at the time a substantial volume of unused capacity, such action under the circumstances which I shall describe would raise the serious question of whether there had been a violation of the consent order entered into in 1951 by the steel industry under section 5 of the Federal Trade Commission Act.

What the distinguished Senator from Tennessee was saying was, in effect, that "If you raise your prices on October 1, we will make sure that with every force and agency at our command we will comb through the statutes and through the consent decree which was entered into 10 years ago, and maybe we can find a violation of the consent decree; and then, by implication, if we do, you, the steel industry, are in for it." Mr. President, if that is not a threat, then I do not know what the English language means.

Mr. KEFAUVER. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I prefer not to yield at the moment. I did not intrude before in the presentation, and I should like at least to continue with this statement. Then I shall be glad to yield.

The second series of threats came from the other distinguished Senator from Tennessee [Mr. GORE], and they were stated as follows—I shall not state them in their entirety, but all of them are in the RECORD, in case anyone wishes to read the full context, and I am quite sure that I do no violence to the whole context when I state them in this form:

First, the President of the United States is possessed of great powers, both legal and moral, if he will but use them.

In effect, that is saying to the steel industry, "If you raise your prices on the first day of October, we admonish you now that the President of the United States is possessed of great legal and moral powers; and, if he will but use them, then of course you may be called to account."

I think that can be called something of a threat, because the action is still inchoate; it has not been consummated; it is still 3 weeks or more away. All this was said in ample time so it would sink in to those who give direction to the steel industry, and it came as something of a threat.

Then the distinguished junior Senator from Tennessee said:

> Second, the Federal Trade Commission, with a vigorous new chairman, could move to police the steel industry according to the mandate laid down for it by the Congress.

First, I must say that the new chairman of the Federal Trade Commission is a vigorous chairman and an aggressive chairman. He was the chief of staff of the Subcommittee on Antitrust and Monopoly, of the Judiciary Committee, of which the distinguished senior Senator from Tennessee is the chairman. That gentleman's name is Rand Dixon, and he is a fine and a good person. I disagree with him violently in respect to many of his theses and much of his philosophy, but I admit that he is vigorous and I admit that he is aggressive. But it was then stated as follows:

> The Federal Trade Commission, with a vigorous new Chairman, could move to police the steel industry according to the mandate laid down for it by the Congress.

What is that mandate? It is a whole series of mandates—the Federal Trade Commission Act, the Clayton Act, the Sherman Act of 1890, the Robinson-Patman Act, and all the amendments thereto, and all the authority which now is on the statute books which can be invoked by the Federal Trade Commission. "So, Mr. Steel Industry, you had better watch out, if you are going to raise your prices on the 1st of October."

And there was no question as to whether it would be necessary, because they had not had their day in court, except in 1958, when, before the Antitrust and Monopoly Subcommittee, they went into the whole question of administered prices. I heard virtually all the testimony. A 200-page report was filed, and some 62 pages of it are the individual views of the minority leader of the Senate, in violent disagreement with what the majority reported. Now, after all that, it is said, "If you raise your prices on the first of October, you might be called to account by the Federal Trade Commission, under a vigorous new Chairman, with the mandates that exist in the law today."

The steel industry is not asked to appear before an appropriate body and be heard and justify whatever it wishes to do. No, Mr. President; that was a psychological threat and a warning to the steel industry not to take that step. But the steel industry has not been invited to appear before an appropriate body of the national legislature.

Third, the junior Senator from Tennessee said that the antitrust division of the Department of Justice can get busy or be activated by presidential direction.

Yes, the Department of Justice is clothed with broad powers in the whole field of antitrust enforcement. So if steel prices are raised, is it a violation of any act? Is there some way they can be touched? Perhaps not, but, Mr. Steel Industry, watch out.

First, we have the President who can get busy, and, second, we have the Federal Trade Commission under a vigorous chairman. And third, Mr. Steel Industry, we have the antitrust division of the Department of Justice, and they can get busy when they are activated by presidential direction.

If that is not a psychological threat to prevent the industry from raising prices, no matter what the equities and the facts may be, then I have never seen one.

It is no wonder that U.S. News and World Report, in its edition of September 4, should have a very considerable article on the subject, under the caption, "A New Move to Control Prices"—psychological price control, Mr. President, by referring to all the enforcement powers that are in Government, all of which are alluded to, all of which have been alluded to, weeks and weeks before this price increase, under a 3-year program, is imminent.

Then the fourth threat came. What is it? It came from the junior Senator from Tennessee, for this is what he said in his statement:

> Lastly, if all else fails, steel prices can be brought under utility type regulations, much as various Government agencies now regulate prices in other fields characterized by monopoly controlled, such as railroads, air, truck, bus transportation, pipelines, and many other fields.

"So, Mr. Steel Industry, beware. If you raise your prices on the 1st of October, we may convert you, by legislation, into a public utility, and then we will set your prices for you." If that is not a threat, I have never seen it, coming as it does roughly 5 weeks or more before the alleged price increase is supposed to take place.

I now comment on an editorial in the New York Times under the caption "Price Fixing in Congress," and I ask unanimous consent that the editorial be made a part of my remarks in the RECORD. Mr. President, I shall not read it. I will place it in the RECORD, but the caption of the editorial speaks for itself and discloses fully what the editorial is about—price fixing in Congress. It goes on to say that this looks like some endeavor, by resort to certain instincts, impulses, and attributes of humankind to frighten them a little bit and then to exercise price control powers on the floor of the Senate.

The distinguished Senator from Tennessee has answered that editorial, and his answer went forth and was published on, I think, the 27th day of August. So, in all fairness to him, I think his answer should be incorporated in the RECORD, also, immediately following and in con-

nection with the editorial from the New York Times, and I ask unanimous consent that they be printed accordingly.

There being no objection, the editorial and reply were ordered to be printed in the RECORD, as follows:

PRICE FIXING IN CONGRESS

Fundamental issues are raised by the campaign against a steel price increase that has been started by Senator GORE and some of his senatorial colleagues. These Senators are determined to prevent the steel industry from raising its prices after October 1 although the industry is committed to giving its unionized workers a significant wage increase then.

The scheduled wage increase results from a steel labor settlement imposed by the Eisenhower administration, acting through Vice President Nixon. Nevertheless, Senator GORE is threatening the steel industry with a deliberate Government campaign to break its large units up into small rival companies, or with imposition of public utility type Government price fixing if it raises prices.

If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequence could be a great change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

However, it must be recognized that the sentiments Senator GORE and his supporters are voicing can ultimately be traced back in part at least to a conviction or suspicion that price setting in too much of American industry today reflects little or no real competition. While that sort of thinking has been around for many years, it received a strong acceleration from the shocking disclosures several months ago resulting from the Government's case against the electrical equipment industry. The collusion in price setting and division of markets there revealed was not only a betrayal of the elementary ethics the community expects of businessmen, but was a damaging blow to respect for the private-enterprise system.

Yet despite the electrical equipment case and other examples of formal or informal collusion in setting prices, competition is probably a much more real force in the American economy than Senator GORE believes.

In the case of steel, for example, there is not only the elementary competition of different producers and sellers, but also the competition to steel from other metals and plastics, and the significant competition given domestic steel by imports of foreign steel. The steel company executives, wondering whether to raise prices to compensate for the next wage increase, have, we suspect, a much more complex problem before them than Senator GORE suggests.

SENATOR GORE'S LETTER

To the EDITOR OF THE NEW YORK TIMES:

Perhaps you will be willing for me to express some views on the Times editorial of August 24 regarding recent Senate speeches by me and others on the subject of the threatened price increase of steel.

Steel being so basic to our industrial economy, the raising or lowering of steel prices in itself not only triggers percentage price markups that compound and pyramid all the way to the retail outlets, but it creates a psychological climate which carries over into the price-making process in many other industries.

The influence of steel on all other prices has been demonstrated many, many times. One of the most recent studies was conducted by the joint economic committee in 1959 under the staff direction of Dr. Otto Eckstein, associate professor of economics at Harvard University. This study proved beyond reasonable doubt that administered prices played the key role in the inflation of recent years.

Forty percent of the rise in the wholesale price index during the period 1947 to 1959, competent studies have shown, was due to the fact that steel prices were pushed up faster and further than the average of all other commodity prices

EFFECT ON WAGE STRUCTURE

Too, the wage of steelworkers is a bellwether in the wage structure throughout our economy. Should wages in the steel industry bound above reasonable and comparable levels, then a determined drive of others to catch up would ensue.

Now all of this has an important bearing on our whole domestic economic structure. But this is not all. It has played and will play an important part in our foreign trade and in our balance of payments difficulties.

From 1953 to 1958, U.S. iron and steel export prices rose 20 percent more than the export prices of our foreign competitors. During the same period, our share of world exports of steel fell from 18 percent to 12 percent.

Many people may wonder why they now find in hardware stores so many imported metal items. Perhaps one reason for this is that the export price of Belgian steel decreased 3 percent during the period 1953 to 1959, while the export price of United States-made steel was increasing 36 percent.

The public interest is involved then, in the threatened increase in steel prices. Such an increase in steel prices, and the consequent unusually favorable profit position of the steel industry, would almost automatically call for an increase in steel wages next July. This increase in wages would, in turn, be used as justification for another round of price increases.

Since this is so obvious, the subject-matter which I and my colleague debated for several hours appeared to me to be appropriate for discussion on the floor of the U.S. Senate.

Moreover, I thought the quality of the discussion was commendable. Where is there a more appropriate place for the discussion of a problem which so vitally affects the public interest, the cost of living for all Americans?

Your editorial states, "the private enterprise system operates on the assumption that prices should be set in the marketplace and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace."

LACK OF COMPETITION

It is agreed that the Senate floor is not "the marketplace" for steel, but from whence comes the assumption that steel prices are fixed in "the marketplace." The record is replete with evidence to the contrary. Indeed, there is a remarkable lack of price competition in the steel industry.

As is so well known, all the steel companies have practically identical prices. Price rises have traditionally been put into effect by all the companies almost simultaneously. In 1958, for instance, there was a good deal of sparring back and forth as to which company would be the "price leader" in boosting the price of steel.

The sparring over, Armco increased prices on July 29. By July 31 United States Steel and all the other steel companies had announced similar price increases.

Now it is true that this price increase was not fixed on "the Senate floor." It is equally true that it was not "set in the marketplace."

All of these facts and a myriad of others were involved in the Senate debate. Perhaps I will be pardoned, since I was a participant, but I thought that it was a worthy debate and in the public interest. Many others have also expressed their view that this was a meaningful debate and that the public interest was well served.

You refer to my suggestions of possible courses of action by the Government to protect the public interest as "threats" to the steel industry. Although I did not intend to make threats, I do respectfully suggest that unless big industry and big labor, particularly in monopoly controlled but basic industries, are able to exercise self-restraint, then action by the Government, regulatory or otherwise, within the framework of the free-enterprise system will be necessary in order to safeguard the public interest.

ALBERT GORE.

Mr. DIRKSEN. Mr. President, next I refer to the American Metal Market for August 25, 1961, under the title "How Gore Predicted Steel's Profits." That article is somewhere on my desk. Perhaps I ought to allude to it in a little more detail, if I can put my hand upon it in this welter of material that one collects under circumstances like these. It will come to light directly.

Meanwhile I refer to one other item I want to put in the RECORD, from the Post-Gazette and Sun-Telegraph of Pittsburgh of August 24, 1961. The title of the editorial is "One-Sided View of Steel."

That is the point I make. That is my thesis.

I do not for a moment contend one way or another what the price of steel ought to be, but I do say one has no business trying, through the powers of Government and through threats, to tell the producers what the price shall be unless they have had an opportunity to present their case, because that is an ex parte action, if I have ever seen one.

I would not do that to the humblest person in the land, because his rights are fully guaranteed by the Constitution of the United States. He will have his day in court. And so long as American industry has its day in court, it will have nothing to worry about, because, as we have gone through the investigations of the oil industry, the steel industry, the motors industry, the bread industry, the milk industry, the drug industry, year after year and year after year, and have given them a chance to state their case, they lay the facts on the line. That is all they have ever asked.

But I think it might be well to read the editorial into the RECORD. The editorial is captioned, "One-Sided View of Steel," and it reads:

Democratic Senators who have been denouncing the steel industry for an anticipated price increase this fall take a very one-sided view of the national economy. While they put the blast on the steel industry, they wholly ignore cost factors, principally wages, that influence prices.

Senators GORE and KEFAUVER, of Tennessee, for example, can see the gravest dangers in higher steel prices while pointedly ignoring automobile contract negotiations in Detroit. Don't they know that if the union monopoly in the auto industry gets a fat new contract that the higher employment costs will be reflected in higher automobile prices? Why aren't they screaming their heads off about that?

Similarly, we can't recall that the Democrats now filling the Senate with angry protests raised their voices at all (except to agitate for a settlement favorable to the

union) when the union monopoly shut the steel industry down for 116 days in 1959–60. When the Government finally forced a settlement, it cost the steel industry an estimated billion dollars plus. And Roger Blough, chairman of the United States Steel Corp., said then that the settlement could hardly be considered noninflationary.

Under the terms of that settlement, the steelworkers will get another raise in wages averaging 7.9 cents an hour on October 1. That will add hundreds of millions of dollars to operating costs. Unless there has been a fully compensatory increase in productivity, where is the industry to offset the added costs except in the price of its product? The Senators are hardly realistic in arguing that the increased costs can be absorbed from profits.

Now this is not intended as an apologia for the steel industry. We would like very much to see the industry hold the line on prices. In fact, we would like to see that done generally, including the automobile industry. We have a very real fear that American industry is in serious danger of pricing itself out of world markets in the face of steadily growing industrial competition. That would be done with the direst consequences to the national economy. Those consequences must certainly include widespread unemployment, of which the Pittsburgh district has suffered a particularly bitter dose.

If Senators GORE, KEFAUVER, et al., can rise above purely political considerations and look at the economy whole, they will appreciate the elementary necessity of thinking about wages and prices in the same context. Then they might be as quick to try to head off inflationary labor contracts as they are to lambast price increases once the cost damage has been done. But that sort of statesmanship probably is much too much to expect.

It is a fact that in the entire discussion I heard very little about wages and their possible impact upon steel prices.

I know that after weeks and weeks and weeks of hearings in 1958 I filed individual views. I said, among other things, with respect to prices, as point 1 in my individual views, set down on page 153 of the report on administered prices for the steel industry:

After careful analysis of the testimony adduced at the hearings, the minority finds that the position in the majority's report that the steel industry has made unjustified price increases is erroneous and unfounded.

There follows, Mr. President, a good deal of reference to the testimony which was taken over a long period of time on exactly that point.

I referred a moment ago to the American Metals Market, a daily newspaper of the metal industries, under the title "How GORE Predicted Steel's Profits."

The subhead is "Data From White House Aid Who Feared 'Hazards.'"

I do not know Mr. Freeman Bishop, who wrote the article. It was written under a Washington dateline. It refers to the data used, so I ask unanimous consent that the article be printed in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW GORE PREDICTED STEEL'S PROFITS—DATA FROM WHITE HOUSE AID WHO FEARED "HAZARDS"

(By Freeman Bishop)

WASHINGTON.—On what data did Senator ALBERT GORE base his prediction that the steel industry's rate of return in the fourth quarter this year would average 10.5 percent after taxes?

This is a question which has intrigued steel producers since Tuesday, the day the Tennessee Democrat took to the Senate floor to warn steelmakers of dire consequences if they lifted prices this fall.

Ostensibly these price boosts would be to compensate for the third round of wage increases under the existing contract with the United Steelworkers.

Mr. GORE, Metal Market has learned, made his prediction on the basis of a letter from James Tobin, acting chairman of the White House Council of Economic Advisers.

And Mr. Tobin did not project the same assurance which Mr. GORE displayed on the Senate floor that his forecast was correct.

Estimating future earnings, Mr. Tobin said, is "a most hazardous undertaking." Further, he continued, "Such projections are, of course, subject to error from a number of sources in this case most prominently from the lack of detailed information on first quarter costs, from necessarily arbitrary allocations of costs and revenues by quarter on the part of the industry's accountants, and from the difficulty of projecting seasonal changes in the composition of output and hence revenue per ton."

Whether one realizes it or not, the preceding represents only one sentence and perhaps Mr. GORE became lost between the subject and the predicate. This, maybe, is why he was so positive on the Senate floor.

The communication from Mr. Tobin, of course, contains statistical data on which the Senator based predictions of high profits in this fourth quarter.

"It is of some interest," Mr. Tobin wrote the Senator, "to try to project * * * into the fourth quarter of this year * * * to provide background for the discussion about the possibility of a price increase at this time.

"It should be noted," the communication continues, "that the profit rate in quarters subsequent to the fourth quarter of 1961 should be higher for any given level of operation, since productivity can be expected to continue to advance at about 3 percent per year, while employment costs per hour should remain fairly constant through mid-1962."

The letter from Mr. Tobin predicted that at a 70 percent rate of "capacity utilization, profits after taxes as a percent of equity" would be between 7 and 9 percent—at 80 percent, between 10 and 12 percent.

The method used to project these fourth quarter "magnitudes" was qualified by Mr. Tobin in this way:

"Productivity was projected by means of an equation which explains output per man-hour as dependent on the rate of operation of the industry, an underlying trend, and seasonal variations. The equation was obtained by the technique of multiple regression.

"It is of interest that productivity reaches its seasonal low in the fourth quarter. The projections for the fourth quarter reflect this fact. Projections for the first quarter of 1962 would show a 4.5 jump in each of the indexes due to seasonal factors, and a 1-point rise due to the trend.

"Profit rates were projected by using financial and production information published by the AISI (American Iron and Steel Institute) and projecting changes to the fourth quarter in revenues, Federal and other taxes, depreciation, interest, materials cost, employment costs, and stockholders equity for each assumed level of output, using the first quarter as a benchmark.

Still unsettled, however, is whether Mr. Tobin wrote the letter to Senator GORE on his own volition, whether the Senator asked Mr. Tobin to write such a letter, or whether it was White House inspired.

Mr. DIRKSEN. Mr. President, I refer to what appeared in the U.S. News & World Report of September 4, 1961. I think the article was particularly well written. I refresh the Senate again on the caption, which is "A New Move to 'Control' Prices."

In the box which sets out a heading for the article the language appears:

A campaign—of threats and persuasion—is being pressed by the Government to head off price increases. First to be warned: the steel industry and the bakers.

Look for more warnings on prices. This article tells the full story.

It pretty well does, so at this point in my remarks I ask unanimous consent to have it printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A NEW MOVE TO CONTROL PRICES

(A campaign—of threats and persuasion—is being pressed by the Government to head off price increases. First to be warned: the steel industry and the bakers.

(Look for more warnings on prices. This article tells the full story.)

The Kennedy administration, with the aid of Democrats in Congress, is now beaming this warning at key American industries:

Don't raise prices. If you do, you may be sued under the antitrust laws. At the very least, you will be subjected to public censure by high officials, possibly even by the President himself.

A campaign to get industry to hold prices down, even in the face of rising costs, moved into high gear on August 22 with these two moves:

First, 10 Democratic Senators, with blessings from officials of the Kennedy administration, warned the steel industry not to raise prices this autumn. The industry's contract with the United Steelworkers calls for a wage boost of about 8.5 cents an hour on October 1, and some company executives have suggested that prices ought to be raised.

PRICE WARNING

The Democrats claimed that profits in the steel industry will be "normal," in spite of the wage boost. Senator ALBERT GORE, Democrat, of Tennessee, said that, if prices are raised, the Federal Trade Commission and the Antitrust Division of the Justice Department should look for violations of the antitrust laws. He also threatened that the industry might be subjected to "utility-type regulations" of prices.

Second, on the same day, Secretary of Agriculture Orville L. Freeman published a letter to the head of the American Bakers Association attacking plans to increase the price of bread. Mr. Freeman warned of possible public reaction.

At the White House, an official who was asked if these attacks on possible price increases were approved said, "I certainly hope they succeed."

Estimates used by the Senators in their speeches on steel prices were supplied, in part, by the President's Council of Economic Advisers and reflected the Council's views.

PRICE CONTROLS COMING?

This campaign against price boosts raises these questions in the minds of many businessmen:

Does the Government have any legal power to prevent prices from being raised? Is the administration getting ready to seek such power from Congress? Are all price increases to be called into question? Just what is the official policy on wages as well as prices?

What's up, really, is an effort to control prices by threat and persuasion.

The Government has no legal authority to forbid a price increase. It can act only when it can be shown that the markup results from a conspiracy or monopoly situation.

In such cases, companies can be prosecuted under the antitrust laws.

This is part of the threat now being held over the heads of the companies moving to raise prices. It is the position of some administration officials that a uniform rise in steel prices would be evidence of conspiracy or monopoly. Senator GORE even talked of breaking up the large steel companies under orders of the Federal courts.

At the same time, you hear talk of reviving direct controls over wages and prices. The administration has no such plans now, but officials do not rule out the possibility of asking such powers later if an inflationary spiral should develop.

The broad policy, as now disclosed, is to induce business to offset wage increases through savings from more efficient operations and new equipment. Federal economists argue that business should rely on expanding markets, rather than higher prices, to maintain and increase profits. They add that, if business takes this approach, the unions will have less reason to enforce excessive wage demands.

The first tests of this policy are coming in the steel and baking industries.

WHAT FIGURES SHOW

The Senate was told that steel prices have risen too far already, and that any further rise will be inflationary here at home and make it more difficult for U.S. industry to meet the competition from abroad.

Government figures were cited in the debate to show that steel prices have gone up by more than 100 percent since 1947, while industrial prices generally have risen only 35 percent.

If allowance is made for increases in efficiency and output per man-hour, the cost of union labor in the steel mills has risen less than prices, according to the estimates of some congressional economists.

On that basis, the Senators argued, the companies, not the unions, have been to blame for inflation.

Senator GORE drew on information from the Council of Economic Advisers to show that increasing efficiency, due to higher output, will cover just about all of the cost of the October 1 wage boost and that the industry's profits will be at normal levels without a price boost.

COUNCIL'S MATHEMATICS

The Council believes the steel mills, now operating at about 68 percent of capacity, will be going at a rate of 70 to 80 percent in the fourth quarter of this year and at 80 percent or higher in 1962.

The Council estimates also that, after the pay raise takes effect and without any boost in prices, the industry will be able to earn from 7 to 9 percent, after taxes, on its investment when operating at 70 percent of capacity; and from 10 to 12 percent when operating at 80 percent. The average rate of return, after taxes, was 11.5 percent in the 1947–60 period, Government figures indicate.

Is the Government going to try to hold down prices but not wages? Officials deny their attitude toward increases is one sided. They point to speeches by Economic Adviser Walter W. Heller, Treasury Secretary Douglas Dillon, and others that warn against the danger of inflation in wages as well as prices.

If industry holds prices down and takes only reasonable profits, officials argue, the unions will be more restrained. "I hope we can break into the price spiral and that this will have an effect on wage negotiations in the steel industry next year," a White House aide explains.

HOW INDUSTRY FEELS

The steel producers, on the other hand, say they have not raised prices generally since August 1958. Since then, their figures indicate, wages and other costs have gone up, profits have gone down.

The industry's records show a rise of about $11.55 a ton in steelmaking costs since 1958, even after allowing for improvements in plants and processes. The October 1 pay raise, company economists believe, will add an additional $3.40 a ton to costs, after it has been fully reflected in fringe benefits, salaries, and the prices of purchased services and materials.

Thus, the companies contend, costs will be up nearly $15 a ton without any price boost to cover them.

The industry's profits on a dollar of sales was about 11 cents in 1958 and about 6 cents in the first quarter of 1961. Total profits after taxes were a little over a billion dollars in 1959, in spite of the longest strike in the industry's history. Profits dropped to 945 million in 1960 and were running at a rate of less than 700 million in the first half of 1961.

No one in industry is suggesting a price boost to cover all the estimated rise in costs since 1958. Officials talk of a boost of $4 to $5 a ton, and it was this talk that touched off the attack on the Senate on August 23.

Foreign competition puts a limit on U.S. prices for steel, the producers say. Exports were at an unusually low level in June, while imports were the highest in more than a year.

Steel users in the United States already are balking at high prices. Prices on a number of steel products were recently reduced. On August 22, the Youngstown Sheet & Tube Co. reinstated a 5-percent discount from prices of rigid steel conduit after trying to sell at list prices since June 30.

Now the industry finds itself operating under a new pressure, in the form of a Government campaign to keep prices down.

BATTLE OVER BREAD

The campaign is also being aimed at a possible increase in the price of bread.

On August 15, E. E. Kelley, Jr., president of the American Bakers Association, said, "It will be a little short of a miracle if bread prices are not increased in the near future." He pointed to the fact that the Government support price for wheat harvested in 1962 will be $2 a bushel—a 21-cent increase over this year's figure of $1.79. Mr. Kelley also pointed to higher prices of other materials, labor costs and some scarcity of high-protein wheat flour.

Wheat is now selling in Chicago for about $2.02 a bushel, up from $1.93 a year ago. Flour costs about $6.55 a hundred pounds in New York, up from $6.25 a year ago.

Secretary Freeman's letter accused the industry of raising prices at "every opportunity" and said it was strange to propose a price boost now, on the ground of a "small increase" next year in the farmers' price for wheat.

The increased support, Mr. Freeman said, will add only one-fourth of a cent to the cost of a loaf of bread. A minimum increase in price, of 1 cent, would be four times this much.

"I hope you and your organization will give thoughtful consideration to the proposed action you have announced, especially in view of the possible public reaction to an increase in price which will not benefit the farmer," Mr. Freeman concluded.

Thus, the campaign against price increases got under way with attacks on two industries. Other businessmen were wondering if the campaign would hit them, too, and how effective it would be in preventing price increases.

BACKGROUND OF THE ARGUMENT: HERE ARE THE HARD FACTS ON STEEL

Steel wages: $3.19 an hour average. Factory wages, average for all lines: $2.35.

Wage rise in steel: Up from $1.44 in 1947, a gain of $1.75, or 122 percent. Gain for all factory workers: $1.10, or 90 percent.

Coming raise in steel wages: 8½ cents an hour, average, on October 1.

Labor cost: $68.76 per ton of steel, against $32.47 in 1947. Increase: 112 percent.

Steel prices: According to "Iron Age," $124 average per ton of finished steel, compared with $60.30 in 1947. Increase. 106 percent.

Steel profits: $945 million, after taxes, in 1960. By comparison: Profits were $651 million in 1947, and $1.34 billion at the high in 1956. Annual rate, first half of 1961: $692 million.

Profit per ton: $9.80, before taxes, in first quarter of 1961, compared with $16.68 last year, $20.23 in 1956, and $8.73 in 1947.

Basic data: U.S. Department of Labor, American Iron & Steel Institute, other trade sources.

Mr. DIRKSEN. Mr. President, I do not wish to take too much time, and I shall not go into great detail. I recur to the thesis on which I began. When there is a threat to industry and industry is not given its day in court, then we shall have departed from the American concept as I understand it.

All this is capped off by the telegram which the President of the United States has sent to the leaders of the larger segments of the whole steel industry, which was released as of today. I hope we can have the entire statement in complete context, so that it can be included in the RECORD at this point in my remarks.

The report from the ticker reads as follows:

WASHINGTON.—President Kennedy warned the steel industry today—

I repeat:

warned the steel industry today that "restrictive monetary and fiscal measures" may be necessary if steel prices go up this fall.

What is a restrictive monetary measure or a restrictive fiscal measure if it is not control? We are in peacetime, not wartime. This is a threat to an industry. Shall it be done on an ex parte, one-sided basis, instead of permitting the industry to tell its story before a proper tribunal or a proper forum, before which the onus would be upon the industry to justify a price increase?

If that is not the American concept, then I fear my indoctrination in the history and in the law of this country has been sadly neglected.

A natural question arises in connection with this effort to use the fear technique to control prices. What would prevent the Federal Government from using it in labor disputes? If it can be done with respect to industry, certainly it can be done with respect to labor. What will prevent the Federal Government from using a similar technique against the farmers or against the merchant seamen or against any other group in the country? In proportion, their demands may have an impact upon the economy of the country and may have an inflationary effect or, on the other hand, they may not. If that can be done with respect to one, it can be done with respect to another.

Have we finally reached the point in the peacetime of our country that the threat of the Federal Government invoking the powers which reside in the enforcement agencies is to be used well in advance, to say to any economic group, "Don't do it, for if you do the long arm of the Antitrust Division, the long arm of the Federal Trade Commission, and the longer arm of the President of the United States and all the powers inherent in that office, and a good many other things, will be brought to bear."

This is an amazing thing, Mr. President. Are we on the threshold of government by fear and, finally, the loud knock on the door, when someone will say, "Open up. We are agents of the Government. We have come to warn you not to raise your prices and not to take a certain course of action, because there is a great array of enforcing agencies, with the Federal Treasury behind them and unlimited power under the laws upon the statute books today, which will discipline you in good time if you do."

Does the Government propose now, on the basis of ex parte representation—I add, by a Harvard economist, who certainly honestly takes that view—to tell industry what it must do, and to threaten the use of every enforcement power within the realm of the Government if it fails to do so?

If this is the new technique of the New Frontier, we have gone pretty far down the authoritarian road. This can well be called psychological price control with the Government holding all the weapons.

Mr. President, I now ask unanimous consent that I may yield to the distinguished Senator from New York [Mr. JAVITS] without losing my right to the floor.

The PRESIDING OFFICER (Mr. BOGGS in the chair). Is there objection to the request of the Senator from Illinois? The Chair hears none, and it is so ordered.

Mr. JAVITS. Mr. President, before stating my views on the steel price increase debate, which has been touched off by the very able presentation made by the Senators from Tennessee [Mr. KEFAUVER and Mr. GORE] and other Senators on the other side of the aisle, I wish to state, because I think it gives a proper frame of reference, the political philosophy which animated me to urge my side to debate this issue. I think it is important that we understand the issue in the context of this philosophy.

Mr. President, it is rather a primitive idea politically today to assume that the Democrats represent labor and that the Republicans represent business, yet I think that is an idea popularly held in this country. The reason why I think it is primitive is that the definitions of "labor" and "business" are so obscure in the minds of too many people. By "labor," we should include not only 16 million people, in round figures, who are unionized but all the 67 million Americans who work, a figure far and away beyond the 16 million who are unionized.

Yet, when a person speaks of labor, generally he means unionized labor. When a person speaks of business, most often he still thinks in 19th-century terms of either barons who sit in seats of power in Chicago, New York, or some other essential place, or he thinks of stock manipulators in the old tradition of the Fisks and others who manipulated securities up and down pretty much at will.

Today business includes not only the owners of business, who now constitute approximatley 12 to 14 million Americans with all their stockholdings and bondholdings, but also approximately 3 million to 5 million people who are small owners of business. Today business includes between 2½ million and 5 million farmers depending on how we define the size of the family-owned farm. Business today includes all consumers. I think that is a perfectly fair definition. Business includes also approximately 80 million Americans who have either life insurance policies or deposits in savings banks which are absolutely dependent for their viability and worth upon securities which, in turn, those institutions hold in all American business.

Under those circumstances, I come now to what motivated me in urging that the debate take place. It seems to me that the subject now involves a totally new concept for both the Republican and Democratic Parties, in which both can take great pride, and in which both can serve very effectively, and that the debate can give us a frame of reference, a clue to that kind of service, for it comes down to this point.

If it is a fact that labor generally has confidence in our Democratic colleagues, then a duty is imposed upon our Democratic friends, because we are a national body. We do not represent labor exclusively any more than we represent only capital or business interests. A duty is imposed to lead labor in the path of the public interest.

So, too, on this side of the aisle the debate represents an opportunity for us, for business generally, and for people who have a stake in ownership, no matter how big or small. There are those who have confidence in us. The philosophy on the Republican side is something they like and admire. We are given a great opportunity to use that confidence and lead those people in the path of the public interest.

We now have a debate in which both sides can admirably serve that purpose. But unless the issue is joined, it may be written off as a piece of special pleading by certain Senators for the trade unions, whether it be the steel union or all unions. I have felt, too, that on our side the debate might be written off as a defense of management.

Therefore, unless we can raise the debate constructively and effectively above that level, we shall serve no purpose except to confirm old and outworn prejudices and fears which I believe no longer have a fundamental grounding in the future of our country.

I have uttered those words, which may sound academic to many, only because I think it is important when we have an opportunity—and this is an opportunity—to elevate ourselves to a new plateau.

We are really in a grim struggle for the survival of freedom. If we believe, as I am sure 100 Senators believe, that the system of private economy is the basis of our freedom, the thing that enables us not to be Government slaves but to have an opportunity to live out our lives in the sunlight of freedom, then we must make our system work. In order to make it work, I am convinced that somehow or other it must be directed toward serving the national interest, and that mere struggle, the rule of tooth and claw, as it was conceived in 19th-century terms, will bring us to ruin and destruction.

The Russians have solved that problem by centralized control and authoritarianism, which is completely abhorrent to us. We would prefer the danger of atomic war, which we are now facing, to enduring the kind of society that exists in Russia. But if we are to endure, we must find some way within the framework of our institutions to make the public interest paramount. If this debate contributes in the smallest way to putting us upon that path, I think it will have served a most effective and constructive purpose.

Coming to the basic issues of the question of a steel price rise, the issue is fundamental to the private economic system of the United States.

In the Senate we are asked to lend our weight and influence to advising the steel industry to refrain from raising its prices after October 1, when the industry is committed by contract to give its workers a wage increase. I do not wish to see steel prices raised at this time. I want to see a general price rise avoided. I agree that a rise in steel prices may set off a new spiraling general increase in prices. But I believe that to stabilize steel prices, management self-restraint, which is so fall all we have gotten in terms of a proposal, is an inadequate basis upon which to rely. I think we must also call, in this free debate, for greater responsibility by labor union leadership, and for Federal Government cooperation.

I should like to lay out in detail before I am through precisely how I implement and define both those ideas.

I saw in the recent Democratic campaign and in the campaign which originated on the other side of the aisle against the steel price increase a tendency to make a whipping boy of steel company management without adequate recognition of the roles of labor and Government in the economic situation which gives us the danger of an increase. There is a tendency to overlook the right of investors in the steel companies to a fair return, a tendency to gloss over the responsibility of trade unions, a tendency to encourage the Federal Government to play a punitive role of imposing antitrust sanctions if its pricing dictates are disregarded. That is the point made by the Senator from Illinois [Mr. DIRKSEN]. There is a tendency to seek to regulate the U.S. economy by speeches on the floor of the Senate. I am all for debate on the floor of the Senate, but I do not think it can be unilateral and at the same time be salutary to our eco-

nomic and social system. That is not the way to bring about price stability and to counter inflationary price rises in steel.

The distinguished Senator from Tennessee [Mr. GORE] said that if the steel industry raises prices, it may be threatened with a Federal Government campaign to break up its larger units into smaller competitive companies, or with the imposition of a Government public-utility-type price regulation.

Economics by fiat would destroy the basic concept of economic freedom on which this Nation was founded—a concept that because of its success, has become the hope of the entire free world.

As I said a moment ago, the vast capital invested in the steel industry comes directly or indirectly from the savings of our people, workers included, who were willing to put these savings at risk in the hope of a profit, and it is only profitable operation that can pay adequate wages and give proper conditions to men at work.

We all know that broken down, beaten up industries which do not operate properly generally have the worst conditions.

While we are on the subject of profits, I think it is interesting to note that the biggest profiteers are the Communists. All the statistical analyses of the Russians' figures we have had in the Joint Economic Committee show that the Russian leaders take far more out of their own people in terms of profit than we dream of in terms of what is a reasonable rate of profit, because of their practice of practically forced savings in order to achieve very high rates of reinvestment.

When we discuss the basis on which steel profits are determined, we must remember that there exists in the industry not only the element of competition of different producers and sellers of steel, but also the competition to the steel industry from producers of other metals and plastics—and, very importantly now—and that is evidenced organically from the figures our colleagues have produced—from competition by foreign steel producers.

So the steel executives have a far more complex problem in determining their pricing policies than Senators suggest.

Mr. President, the dangers of an increase in the price of steel cited by the Democratic Senators are real, and were brought out well in their discussion on the floor of the Senate. At this point I should like to pay tribute to the amount of documentation with which they brought out these facts and figures under discussion on the floor of the Senate. Indeed, I believe that the document entitled "Steel Facts Brought up to Date," issued under the auspices of Senator KEFAUVER, is an admirable document. I have some supplemental figures to submit, but on the whole the argument can still proceed on the basis of the figures which have been supplied, with the addition of some points which I will make. Essentially these figures contribute greatly to the debate between the two parties.

Of special significance is the relationship of such a price rise to the position of the United States as economic leader of the free world. The implication of a revival of inflationary pressures in the United States, touch on our ability to compete with foreign products abroad and at home and thus affect our balance-of-payments position, affect the continuation of our liberal trade policies which give free world nations a stake in our markets, affect the acceptance of our products by nations with which we must tighten and strengthen our bonds of trade, affect the discharge of our economic and military aid responsibilities throughout the world, and, in the broadest sense, affect the basis of the free world economic structure which rests on the strength of the dollar.

It must be made clear, however, that the responsibility for the existence of these dangers involves responsibilities not only of management but also of labor. In an economy where prices, even those of steel, are determined by the market to an extent much larger than admitted in the presentation made by our colleagues in the Senate on the other side of the aisle, the effect of wage costs on prices cannot be ignored.

Using even the controversial base year and limited average hourly earnings data of Senator Kefauver's presentation, to which I have already referred, we find that wages increased more rapidly than steel prices between 1947 and 1959. We also find that profits, both as a percentage of net worth and as a percentage of sales, have decreased over much of this period, especially during the last 3 years.

In our economic system, whether it expresses itself in terms of oligopoly or full free market competition, whether it resorts to the practice of price leadership or competitive pricing, success depends on meeting demand. It is therefore unrealistic to ascribe decreasing profits to any management refusal to produce and sell as much as demand will accept.

With these preliminary remarks, Mr. President, I should like to state that as representatives of all the people of the United States, it is not our job to follow the complex calculations by which the businessman and labor leader attempt to gain the most for the interests each represents. That is the job of the businessman and labor leader. Our job is to look at the national effect of these calculations.

When we are told, as we were in the colloquy between our very gracious and distinguished colleagues, Senator NEUBERGER and Senator Moss, that a $3 per ton increase in the price of steel supposedly costs $97 to the purchaser of a tractor, we must consider that nearly 40 percent of the price of steel is determined by employment costs, while profits in 1961 for the steel industry were estimated at 4.5 percent of sales, or one-tenth of the labor cost, and that this year, while a 3-percent increase in the price of steel is being talked about, a 3-percent rise of employment costs is actually stipulated by the terms of the contract.

Mr. President, I want to see labor well paid. That is the American way. I am one Senator who is able to say that that is the way I have voted in all of the last 16 years which I have spent either in the Senate or in the House, with the exception of the 2 years which I spent in Albany.

In considering the leverage respecting the price of steel, it is important to understand that labor costs mean about 10 times more to the price of steel than profits.

The time has come to serve notice that Congress and the President of the United States represent the national interest. That goes for the President too. It is time to serve notice that this national interest must be served by the policies of labor as well as by management in the steel industry.

It is always an enviable position to be able to speak when one finds in respect of a certain area one's whole record to be favorable to that particular economic group. I believe I can say without any reasonable ground for challenge that my own record and my advocacy record have been constantly in favor of labor. Therefore I believe I have a right to speak to that issue in a very frank and open way. I may say that I never hesitate to do that in the many addresses that I make to trade union groups themselves.

Here is what I think is the basis for a real set of actions in the national interest with respect to this present discussion of the subject of steel prices:

First, an agreement from labor that, if the industry holds the price line during the coming 10 months, labor will switch from demands for increased wages in the 1962 wage negotiations to a policy of profit sharing and stockownership in the business, with suitable cost of living adjustments. This is a major decision on the part of trade union leadership. The experience now being gained in the auto industry contract with American Motors and in the negotiations with General Motors may well provide valuable guidelines to this approach.

This is a real, a positive, an affirmative contribution which could be made by every union leadership, right now, to the whole fundamental idea of maintaining the stability of the price structure.

Second, and as a corollary, an agreement from management to refrain from an immediate steel price rise and to be receptive to profit sharing and stockownership on the part of labor, without yielding any of management's responsibility for operations.

I point out, for example, that we are informed currently that General Motors Corp. finds itself unwilling to agree to any profit-sharing idea in the new labor contract. I hope that is not their final view. I hope they will change that view. I say that because I cannot see management contributing to the spiraling set of costs and further price increases. If management can find a common road with labor, as is indicated by the American Motors agreement, under which agreement and in connection with which effort labor can get, to use Samuel Gompers' word, "more," then a step forward will have been taken in an economic

sense to the maintenance of price stability.

Third, support from labor, industry and government for a measure giving statutory basis to the President's Labor-Management Committee to enable it to function as a Peace Production Board, with authority to make recommendations to the President regarding legislation for price, wage, commodity and materials controls and allocations. Such a Board would also encourage and assist in the organization of labor-management-public committees designed to increase productivity, reduce labor management tensions and absenteeism, and smooth the transition to greater automation and technological advance. Essentially a Peace Production Board would be able to promote the voluntary allocation of national resources, material and human, to gear up this Government and our people to meet the great crisis of the Communist challenge. I have introduced legislation, S. 2204, the Peace Production Act, for this purpose.

Finally, a labor-management agreement to endeavor to increase productivity by eliminating make-work practices in labor or management, to encourage automation, provided security is given to those employees affected, to seek better means to avoid work stoppages and to afford equal opportunity to all workers without regard to race, creed, or color.

That would complete what I consider to be necessary action in the public interest on the part of these economic groups.

Now I should like to state why it is so very dangerous for us to try to substitute ourselves for the operation of the economic processes rather than to concentrate our activities on fundamental considerations of basic policy within the framework of which operational decisions may be made.

I shall deal with some of the statements which appear in the document entitled "Steel Facts," issued by the subcommittee of which the Senator from Tennessee [Mr. KEFAUVER] is the chairman, and which were essentially the basis for the findings and arguments made by our Democratic colleagues in first bringing this case before the Senate. I shall consider these statements as they pertain to my argument, as it is affected by the level of steel wages, trends in unit labor cost and price of steel, and the cost of the wage increase called for under contract on October 1, 1961. Such an analysis should put into perspective the broad range of fact upon which we must base our appeal to labor and management in the steel industry.

According to Bureau of Labor Statistics data—the only source from which interindustry comparisons are available—less than 2 percent of the wage earners in manufacturing industries have average hourly earnings higher than the steelworker. This is a major improvement in the steelworker's position over prior periods such as 1940 when 15 percent of such workers had higher average hourly earnings. As recently as February 1954 the comparable figure was 9 percent. There are material layoffs in the steel industry, yet the annual wage of steelworkers remains among the highest in industry.

The "Steel Facts" sheet released by Senator KEFAUVER indicates that between 1947 and 1959 average hourly earnings in the steel industry rose by 113 percent, that the increase in "man-hour productivity" was 42 percent in this period, and that the resulting increases in unit labor costs was "slightly more than 50 percent."

In using these statistics, we should note, however, the testimony presented by Mr. Robert C. Tyson, chairman of the finance committee, United States Steel Corp., before the Antitrust and Monopoly Subcommittee of the Senate in 1957. He stated that—

> During the war period, preceding 1947, his company's employment costs and wholesale prices in general rose rapidly, both increasing by over 50 percent from 1940 to 1946. On the other hand, steel prices under regulation during the war were not permitted to rise at all until 1945, and in 1946 were only 12 percent greater than in 1940. Profits were squeezed down to a low in 1944 of less than 3 percent of sales despite a 95-percent operating rate. In no prewar year had United States Steel ever operated at 90 percent or more and experienced an income percentage of less than 14 percent. Owing to this wartime factor, steel product prices in 1946 and 1947 relative to wholesale prices in general were more out of line on the downside than they have been within the past half century for which we have records. A postwar readjustment was absolutely required if the steel industry was to escape gradual disintegration.

Besides the controversial 1947 base period, Senator KEFAUVER's comparison used earnings for wage employees only instead of for all employees. Using data only for wage employees ignores the substantial and growing contributions made by research scientists, engineers, accountants, mathematicians, and the myriad of other management jobs so essential in achieving gains in output. Secretary of Labor Mitchell in reporting on "Statistics Bearing on the Steel Dispute," during the 1959 steel strike indicated that the number of production workers has fluctuated considerably in the postwar period with little net change. The Secretary indicated that the number of administrative, professional and clerical workers, on the other hand, has risen substantially in the postwar period and that between the first half of 1947 and the first half of 1959 these employees in the steel industry increased by 34,000 or by nearly 50 percent. Thus, to attempt to compare a period such as 1947 versus 1959, while ignoring the effect of the increase in the number of salaried employees and their corresponding man-hours needed to achieve steel output, results in misleading conclusions.

The reference to "man-hour productivity" and then simply to "productivity," and the attempt to relate unit labor cost to prices can also be misleading. Dr. Solomon Fabricant, Director of Research of the National Bureau of Economic Research, stated in the February 1961 issue of Challenge magazine:

> Productivity statistics should take account not only of the input of labor in the form of man-hours; they should also take account of the input of other resources, such as tangible capital equipment.

To ignore cost substitution factors which may have taken place renders comparison of component costs, such as the cost of labor, in a vacuum and leads to unwarranted cost-price comparisons. The Bureau of Labor Statistics has been quite clear in cautioning all that the figures which they issue represent output per man-hour and do not represent total productivity.

Steel production facilities require vast investments and a considerable amount of time to build. They are created by the savings of millions of shareowners. These facilities cannot be created overnight to meet increased demand, nor abandoned when demand falls off. Yet the steel industry is one of the most cyclical of all industries—during a business cycle the demand for steel falls and rises twice as fast as the average of all manufacturers.

The facts are that the industry increased its capacity from 81.6 to 91.9 million tons during the war period of 1940–46, and from 91.2 to 148.6 million tons in the succeeding period of 1947 to 1960. Obviously, the economy of the country requires that peak capacity be considerably higher than average demand. We do have such a capacity, principally because the industry has invested huge sums to keep its facilities in pace with or ahead of the economy as a whole.

Let us note that, if the steel industry could not operate at a reasonable profit at less than capacity operations, the investment funds would not have been and would not be available to maintain a growing industry sufficient to take care of the needs of a growing economy.

I strongly favor operation by the steel industry at a level of capacity which will meet growing needs. I believe that policies at home and abroad commensurate with the responsibility we must assume in the development of the less developed countries, the facilitation of trade which will come with the wise application of common market and free trade area principles in the Atlantic Community and other parts of the world and the reform of the free world's credit mechanisms to utilize the full potential of the free world's use of credit would serve together to materially increase this rate of steel operations.

These are all Government policies, not policies dependent on the steel industry at all.

Our Government and people cannot accept in any industry operation at less than the maximum possible capacity according to the going demand. I cannot see why the industry would not be willing to impose the self-restraint of no price increase upon itself if, through the commitments to be undertaken by labor and management as I have described them above, the industry's feet may be put upon the road of expanding utilization of capacity. As the issue of profits is raised, however, to justify a theory that the industry can refrain from raising prices without regard to the wage increase now and the general policy of labor as to its compensation, it is fair to make some observation about the

profits analysis as it appears in "Steel Facts."

The concluding statement in "Steel Facts" on profits states, "The rise in the profit rate in relation to the operating rate can only mean that prices have risen more than costs."

But it is claimed that profits expressed as a rate of return on net worth are not a meaningful measurement in an industry heavily invested in long-lived facilities, such as steel, because profits are recorded in current-day dollars and net worth is based on dollars invested in facilities many years ago before much of the inflation in the last two decades took place.

It could hardly be expected that industry would not, of itself, just as labor would not, of itself, deal with its own problems of survival in advance of correlative action on the part of other factors concerned: the labor factor and the factor of government.

A simple illustration will show why and how much the use of net worth as a basis can overstate profit rates. Suppose 20 years ago a steel company had a million dollar investment or net worth and sold a million dollars of steel and made a profit of $50,000. That profit was equal to a 5-percent return on investment and 5-percent return on sales. Then inflation pushed costs and prices up 100 percent. Now they do the same business but their sales are $2 million and if they still earn 5 percent on sales they have a profit of 100,000 inflated dollars. But their investment, which turns over very slowly, is still valued on their books at not much more than the original, historical $1 million. Thus it appears that their rate of return on net worth is almost 10 percent—the illusion of inflation. For example, to build a new fully integrated steel mill would require an investment equal to almost $400 per ton of finished steel product of such a mill. The product might sell for $150 per ton and earn a 6-percent profit or $9 per ton. That $9 is equal to a 2.25-percent return on their investment—not 10 percent or more.

Expression of profits as a percent of sales, it is claimed, avoids the inflation distortion because both facts are recorded mostly in current dollars. I call attention to a table which I ask unanimous consent to insert in the RECORD at this point showing the relationship between net worth sales and profits.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Steel: Relationships between production and profits

Year	Steel industry				United States Steel			
	Ingot production (thousand net tons)	Operating rate	Rates of return on—		Ingot production (thousand net tons)	Operating rate	Rates of return on—	
			Net worth	Sales			Net worth	Sales
1920	46,183	76.7	12.1		21,501	86.2	11.5	8.5
1921	21,639	34.9	2.2		12,282	48.3	4.3	5.0
1922	38,945	61.7	3.8		18,012	70.9	4.6	4.9

[1] Not available.

Sources: Ingot production, operating rate and rate of return on sales, AISI and United States Steel annual reports, return on net worth, "Steel Facts."

Mr. JAVITS. Mr. President, probably it is best to consult both percentages to determine fair profit margins: net worth and sales.

This tabulation shows how profits, when compared to sales in the same kind of dollars, show no significant trend while it appears that the return on net worth figures results in overstating earnings, because of their book value basis. It should be noted that when all of the years since 1939 are compared on the basis of return on sales, it turns out that in no year have steel industry profits exceeded the rate of return earned in 1940. The conclusion elsewhere that the steel industry can absorb another wage increase and still earn the same rate on profit on net worth is not as meaningful as "Steel Facts" would contend because this rate of profit is a percentage of the dollar value invested at a time of much lower investment costs.

Mr. President, I shall not take the time of the Senate to discuss more details of costs and other factors. In closing my remarks, I would like to emphasize that we are all workers and want good wages. We are all consumers and want quality products at low prices. But we cannot forget that both of these objectives require in our private enterprise economy that the businesses and industries of the Nation make sufficient profits to stay in business and pay the shareholders a reasonable return on their invested capital.

An editorial published in the New York Times, which the Senator from Illinois placed in the RECORD, makes essentially the same point.

So, too, an editorial entitled "A Challenge to Labor," published in the Washington Post of September 4, has essentially the concept which I have expressed in this speech.

Mr. President, I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A CHALLENGE TO LABOR

Labor's spokesmen have been in the vanguard of the movement for faster economic growth. In this they have performed a national service; the Nation needs to grow rapidly if it is to meet its international and domestic challenges. But there is a real question how far labor's customary attitudes are compatible with faster growth. Samuel Gompers formulated the traditional demand: "More." Labor has always pressed for a larger share in the national income, and it has made good progress in that direction. Compensation of employees has

risen from 65 percent of national income to 70 percent over the last decade. But labor income goes mostly into consumption. It takes saving and investment, along with good consumer demand, to produce growth.

This simple truth is brought home by the experience of the countries that today are growing faster—Japan, Italy, France, Germany, and others. In these countries, investment in plant, equipment, housing, and the public sector has been high—as much as 25 percent of gross national product, in contrast to about 17 percent in the United States. In terms of net investment, after depreciation, the comparison is even more adverse, because close to half of American investment is needed simply for replacement. High investment in the other countries has been made possible by labor's willingness to accept a smaller share in the pie. Because the pie has grown so much more rapidly, the absolute size of labor's slice has grown rapidly too.

In a growth-oriented economy, it is unhappily true that labor, through no fault of its own, finds its immediate advantage at odds with longer term benefits. Business, through no merit on its part, finds its immediate interests in accord with the needs of growth. American labor refers to this as the "trickle down" theory. In its place, labor has argued that faster growth can best be achieved by increasing consumer demand. The best way to do that is to raise wages. In this way the traditional demand for more has been brought into an illusive harmony with the dictates of growth.

The harmony is illusive because the prescription works only in recessions. When there is large unemployment, rising consumer demand can stimulate both consumption and investment. But most of the time, the economy confronts the Nation with the hard choice between consumption on one side and saving and investment on the other, just as his personal finances do any individual. A choice for increasing the share of consumption is a choice to reduce investment and growth.

These facts of economic life are recognized by economists of all persuasions. They found expression in the administration's proposal for an investment tax credit. By rejecting them, labor is in danger not only of impeding more rapid growth, but also of locking itself into an intellectual isolation where it is bound to be uncomfortable.

Some compromises that allow investment to be raised without first raising profits may be available. Investment can be expanded in the public sector, but in our economy that is bound to be a relatively small part of the total. Some extra savings can be generated by means of a budget surplus, which can be made available for private investment. Profit sharing of the kind introduced in the American Motors settlement of the UAW can aid saving and investment, if the proceeds are left to accumulate and to provide funds for expansion. But in each instance, some consumption must be forgone in favor of investment. The sooner labor can rally the economic statesmanship to accept this, the more growth we can have.

Mr. JAVITS. Mr. President, the same point is made in an interesting letter written by a group of economists from five of our leading institutions of higher education, and published in the New York Times of September 3, 1961. The letter is headed "Wage-Price Issue." The writers of the letter come pretty much to the same conclusion, namely, that the relation of wages to prices is a chain reaction proposition. If there is an increase in wages, it is bound to have correlative application in prices; and, if restraint and discipline are desired, together with service to the national interest in the form of prices, it must be obtained through wages, including steel wages.

I ask unanimous consent that the letter from the group of economists may be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WAGE-PRICE ISSUE—ECONOMISTS ADVOCATE HOLDING LINE IN AUTO AND STEEL INDUSTRIES

(The writers of the following letter are members of the faculty of the University of California (Berkeley), University of North Carolina, Cornell, Princeton, and Swarthmore, respectively.)

To the EDITOR OF THE NEW YORK TIMES:

A critical element in any period of business expansion such as the economy is now experiencing is the way in which wages and prices respond to an improvement in business conditions.

During the past 3 years wholesale and consumer prices have remained relatively stable. Over the next 12 months, however, the price line may be breached by a series of wage and price increases in the automobile and steel industries.

It is difficult to speak with much assurance about the justification for adjustments in particular industries. But the national interest clearly demands that the price line be held in these two fields if at all possible. Consequently, the burden of proof will fall squarely on the parties involved if this is not done.

The first test will come early this fall in the negotiations between the automobile workers and the major automobile manufacturers. If the union limits its demands for improvements in existing contracts to the most urgent aspects of job security, the pressure on the companies to raise prices on new models should not be excessive.

RISE IN PROFITS

Profits of automobile companies are already up sharply and, with increasing sales in prospect, are due to go higher. A sustained expansion in sales volume, which is almost sure to yield more jobs and higher profits, can best be assured if car prices are maintained or even reduced.

There is, therefore, reason to hope that neither group will find any serious conflict between its own objectives and the country's welfare.

The second critical test will come in the steel industry when the 8½ cents per hour increase provided under the 1960 labor contract goes into effect October 1. As in the case of automobiles, steel output has recently been on the rise and is expected to go higher. With fuller utilization of capacity, important cost advantages are already beginning to be realized. Technological improvements are also yielding significant cost savings. As a consequence, profits are starting to improve and almost surely will increase further.

In view of the competitive position of steel both in domestic and international markets, it can at least be argued that the industry's own interests would not be served by a price increase at this time. This suggests that the industry would not sacrifice much, if anything, if it kept its policies within a framework dictated by national requirements.

The third and perhaps most critical test will come in mid-1962 when the Steel Workers Union and the steel manufacturers enter negotiations for another contract. It is, of course, impossible to anticipate all the developments that may intervene to affect the outcome of these negotiations, but it is not too early to review possible approaches now.

JOB SECURITY AND EXPANSION

As in the case of the automobile industry, the principal problems lie in the area of job security and job expansion. With the increase to be put into effect October 1, average earnings in basic steel will be about $3.25 an hour, and earnings plus benefits will be well above $4 an hour.

The question that will confront the union next year is whether a further substantial rise would contribute to the welfare of the bulk of its members. By concentrating on job expansion and employment security, the union might well do more for the workers in this industry than by pushing wages and related costs still higher. If this were done any direct conflict between the union's interest and the national interest could be avoided.

These three sets of decisions are closely related. Failure to hold the line on prices in automobiles and steel this fall will lay the basis for exorbitant wage demands by the steel union next year. A substantial rise in wages in steel at that time will lead to a further rise in the price of steel and to additional increases in wages and prices in other industries.

This sequence of events, especially in light of mounting tensions abroad, could well result in the imposition of direct controls by the Federal Government. This latter eventuality is almost a certainty if the major union and employer groups cannot find ways of reconciling their own needs with those of the country as a whole.

The time to stop this chain of events is before it gets under way. We think that time is now.

FRITZ MACHLUP.
FRANK C. PIERSON.
CLAIR WILCOX.

Mr. JAVITS. Mr. President, the pattern of profit sharing in the auto industry is bound to extend itself to the steel industry and to other industries. I ask unanimous consent to have printed at this point in the RECORD an article entitled "Profit-Sharing Spread to Steel Thought Likely," published in the Washington Post of September 3, 1961.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PROFIT-SHARING SPREAD TO STEEL THOUGHT LIKELY

(By Robert M. Lewin)

CHICAGO, September 2.—The breakthrough of a profit-sharing plan in the auto industry is likely to spread to the basic steel industry, with Kaiser Steel Corp. the spearhead.

Joseph B. Meier, administrative vice president and secretary, Council of Profit Sharing Industries, said today that Kaiser has obtained data from the council on profit-sharing and employee stockownership plans.

Kaiser representatives also have been at meetings of the council on such plans, added Meier.

"Kaiser is seriously studying them," he said.

American Motors Corp. and the AFL–CIO United Auto Workers a few days ago negotiated the first profit-sharing plan in the auto industry and also in a major mass-production industry.

American Motors, the Nation's fourth largest auto producer, employs 25,000 UAW members. They will be eligible to participate in the combined profit-sharing and stockownership plan.

TWO MILLION UNDER PLANS

The council, headquartered here, is a nonprofit association of nearly 1,000 employers with a total of 2 million workers, that cooperates in the establishment and development of such plans.

Kaiser, the Nation's 12th largest basic (raw) steel producer, employs some 10,500 AFL–CIO United Steelworkers of America.

Contracts in the basic steel industry, with about 500,000 workers, expire June 30, 1962.

Some steel companies now have plans under which their workers may buy a specified amount of stock at a price below market value, a sort of profit-sharing plan.

But the American Motors-UAW plan, and most others, are much broader.

Profit-sharing plans are nothing new. In the United States alone, more than 34,000 companies have them, according to Meier. He estimated that $850 million in profits was shared by their 2 million workers in 1960.

That averages $425 apiece, but hundreds collected several times that amount.

In the last year, Meier said, the Treasury Department approved 5,000 "deferred payment" profit-sharing plans—the money to be paid on retirement or death.

SEARS IS LARGEST

The Sears, Roebuck & Co. plan, started in 1916, is ranked as the Nation's largest. Some 150,005 of the far-flung merchandising organization's more than 200,000 employees share in the plan. A year's employment is required for eligibility to participate.

Sears employees have invested $368 million in the plan, mostly through deductions from their paychecks, which mainly goes for purchase of Sears stock.

They have withdrawn $838 million, including payments to retirees. And $1,429,262,038 still was left in the savings and profit-sharing fund December 31, 1960.

A veteran truckdriver not long ago retired with more than $200,000 from the fund.

But Sears said the average value of the profit-sharing account of employees with 10 to 15 years of service is $11,238; 15 to 20 years, $22,950; 20 to 25 years, $51,825, and 25 to 30 years, $84,643.

BEGAN IN FRANCE IN 1742

Historians trace profit-sharing plans back to 1742 in France.

Swiss-born Albert Gallatin started the first American profit-sharing plan in 1794 for the handful of employees in his glass works in New Geneva, Pa.

Procter & Gamble Manufacturing Co., soap firm, with more than 30,000 employees, mostly unionized, has had a profit-sharing plan since 1887—longest continuous plan in the United States.

Roger H. Cushman, profit-sharing fund trustee of Chicago's Signode Steel Strapping Co., said he recently reviewed the 5-year record of 23 companies with profit-sharing plans that are listed on the New York Stock Exchange.

Cushman added that, in a 4-year period, "the average appreciation of the profit-sharing company stock was 129 percent—compared with a 44-percent rise in the 30 Dow-Jones industrial stocks."

Meier called the American Motors-UAW combined profit-sharing and stockownership plan an important breakthrough in a highly unionized, mass-production industry.

"Whether the plan is successful can be demonstrated within a year by the reaction of the employees," said Meier. "It will depend upon the attitude of the employees, the quality of their work, their efficiency, their elimination of waste.

"Management's job still belongs to management. If employees just look at the plan as a handout it may not last long."

Mr. JAVITS. Mr. President, what all these things teach us is the following: That he is blind who cannot see that it will take labor, management, and Government to do the job which Senators on the other side of the aisle, and I think Senators on this side, also, commonly want done. We know that Congress has a real opportunity to use its influence on labor, management, and Government policies, in terms of the national interest.

As I view the situation, the national interest relates to three factors:

First, the need to have some more effective mechanism than we have today to utilize and allocate the material and human resources in the United States to meet the common and deadly Communist challenge we face today, which I think is very heavily in the economic field.

Second, to have a new road opened by the negotiations between labor and management—a road similar to that which I think has been blazed so auspiciously by the American Motors Corp.-UAW negotiations, a road to profit sharing and better cooperation between labor and management. I pointed out that there is much to be desired in that respect by both, for now we see that General Motors Corp. finds the American Motors Corp.-UAW pattern of settlement unsatisfactory to it.

Finally, Mr. President, by some correlation in an organizational sense, as we did during World War II, by means of a combination of labor and management efforts in the national interest, to deal with the problems of so-called featherbedding and automation and the very real efforts which must be made in order to see to it that the workers are not deprived of security and retraining opportunities and, if they are displaced by automation, that they have new opportunities, and to seek better means to avoid national strikes and work stoppages, as compared with the means available to us today, and to afford all our workers equal opportunities, without regard to race, creed, or color.

Mr. President, that is a national program, as I see it, and a framework within the dynamism of economic interest and responsibilities which should be exercised; and in my opinion it will result in the very restrained action in the public interest to which I believe all Senators have deep devotion.

I thank the Senator for yielding to me.

Mr. DIRKSEN. Mr. President, I yield now to the distinguished Senator from Connecticut [Mr. BUSH].

Mr. BUSH. Mr. President, I wish to congratulate the able Senator from New York on his usual classic presentation. I believe he has made an excellent contribution to our thoughts on a broad and important subject affecting the Nation quite seriously today.

I am happy again to congratulate the distinguished minority leader [Mr. DIRKSEN] on the presentation he made this afternoon on the subject of the steel industry.

Mr. President, I agree with the Senator from New York; I do not wish to see a price rise in the steel industry. I do not think any Senator wishes to see a price rise in that industry. What we want is, first, to have the workers in the steel industry, as well as those in other industries, gain all the advantages they can from their jobs. But if excess pressures result in wage increases upon wage increases, we shall place ourselves in a dangerous position. We shall weaken ourselves as a nation if we allow such increases to affect our costs to such an extent that we price ourselves out of both world markets and domestic markets. We are interested in more jobs, not less jobs. But if we follow policies which create less jobs, the result will be exactly what we do not want it to be.

If in this national emergency we are not able to exercise discipline, and if management and labor cannot together exercise self-discipline and restraint in regard to increases in wages in excess of increases in productivity, we shall be faced with a very dangerous situation.

So, as I have stated, we are interested in more jobs, not less jobs.

The incumbent President of the United States has called upon the country this year to exercise restraint in the matter of wage increases. He has called upon both management and labor to exercise restraint in connection with the renewal of contracts, and he has pointed out that our position as a competitive nation is involved at a very important critical time in our history.

Of course everyone wants to see the workers get more money if they can do so and still have our industries remain on a competitive basis. But this matter involves general levels and the question of whether the expiration of a contract automatically makes a wage increase essential, and we are discussing controlling general wage increases, so as to keep them in line with increases in productivity.

The 1960 Republican Party's platform states, in a section which I helped write, that, as President Kennedy has said:

> We favor relating wage and other payments in production to productivity—except when necessary to correct inequities—in order to help us stay competitive at home and abroad.

This is the big issue. This affects one of the most serious problems today facing the Nation—the problem of our so-called balance of payments. If we do not improve the trend in connection with our balance-of-payments deficit, we shall be in very serious trouble. But if we continue to take action which will increase our costs, and which therefore no doubt will be reflected in increased prices, we shall make it more and more difficult for us to increase our exports and we shall make it more and more likely that our imports will increase. So, instead of widening the gap between imports and our exports, which is one of the most essential things we have to do in connection with the balance of payments, we shall by that kind of action be going in the other direction, and shall be causing the gap to narrow.

So this is the serious situation. It is essential that we keep our industries and our products competitive, so that we can actually widen the gap in our favor, improve our chances of doing business abroad in competition with other nations, and also make it more difficult for

increased imports to enter our country, because such increased imports may well result in the loss of jobs for a growing population.

The Senator from New York has raised the question: Who constitutes business in this country? I am glad he made that point, because business in this country is almost everyone in the United States. In addition to what the Senator from New York said on that subject, I would say that, generally speaking, business management represents the investments of 100 million American people who own life insurance policies and the more than 90 million American people who have savings accounts in savings banks, mutual savings funds, building and loan associations, and the like. Those funds are invested in the enterprises we are discussing, such as the steel industry.

So this is not a time to harass business. Instead, it is a time to offer some encouragement to business and to take a sympathetic attitude toward its problems, realizing that in doing so we are not only acting in the interest of the 100 million American people who have an interest, by means of investments, in American busines, but we are also acting in the interest of the American workers in these industries.

Mr. President, I believe that those of us who are speaking this afternoon have the deepest sympathy with these working men and women. They are the backbone of our country. But I believe it is up to Senators to protect them by means of the actions we take when their security and their jobs are threatened by policies suggested by those across the aisle.

The question of inflation is involved here, Mr. President. If we keep on pushing up prices, through increased costs, in violation of what President Kennedy has called on us to do, of course, we shall play into the hands of inflation, and it will result not only in further inflation, but also in further instability of the currency of the United States.

Mr. President, upon that currency, upon the American dollar, depends the security not only of our country, but of the whole free world. We must take care, in these critical times, not only to keep down the flames of inflation, but check an increase in the inflation which, unfortunately, one sees beginning to creep out from hiding.

The damage that inflation can do to our country, the damage that debasing our currency can do to this country, cannot be overestimated.

I have said before that living in a country with an unstable currency is like living in a place where nobody tells the truth. Our subject today involves directly the fight against inflation, the fight for a stable currency, in order that the savings of the 100 million people we have been talking about this afternoon may be preserved for the purposes for which those savings were created.

While I agree with the hope that the steel industry may find it possible to avoid an increase at this time, I am glad to have had this opportunity to express my views about the whole general situation as related to the issue raised by the Senator from Tennessee [Mr. GORE], and other Senators across the aisle. This is a time when President Kennedy is right in calling upon this country to relate wage increases to increased productivity. If that is not done, we are going to find ourselves at an even further disadvantage, and at an increasing rate, than we have faced in recent years, when the recovery of our friends overseas has begun to make them very strong nations in international trade, and whose competition we have begun to feel very seriously.

So I again congratulate the Senator from New York and the minority leader and thank them for giving me the opportunity to discuss the subject this afternoon.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, first I wish to join with those Senators who have complimented the Senator from New York for his part in engaging in this debate, in the interest of Senators on this side of the aisle. I think we Republicans too often allow our friends on the other side of the aisle to speak without proper rebuttal. I think the Senator from New York has performed a great service in this body for the American people in urging us to air the differences which exist between the two sides of the aisle in this important economic field.

Likewise, I wish to congratulate the distinguished minority leader for his part in "kicking off" the subject this afternoon. I think all three of the contributions so far this afternoon have been noteworthy and will rebut successfully the major points made by the opposition.

I was particularly impressed with the repetition by the Senator from Connecticut [Mr. BUSH] of the point made by the Senator from New York [Mr. JAVITS], namely, in pointing out that when we speak of workers and management, we are not speaking of two different classes. All of us are workers. All of us earn wages. We all work for wages. The attempts that were made over the past 30 years to divide the American people have proved to be fruitless, because the emerging capitalist is the one earning wages, either the union or nonunion worker, the man who is working with his hands or his brains for a living. It is these particular individuals who are interested in taxes and deficits.

All persons, therefore, are concerned with activities that promoted this debate. They are all concerned because they sense an approach to another period of Government controls. I do not know that I can quite classify myself as being fortunate for having done so, but I lived through a period, as a businessman, when we saw the Government's first efforts, seeking, in an earnest and sincere way, to control the economy to the end that this country might emerge from the depression. John Kenneth Galbraith, now in India, but late of Harvard, was responsible for this remark. It does not come out of my mind. He stated, in 1952 or 1953, that had it not been for World War II, the United States would not have come out of the depression in 1939. We were, in fact, the only major country in the world that was still in a depression in 1939, and the war brought us out of that condition. As a businessman, I feel we would have come out of it earlier if the Government had played a less active part in the daily lives of all of us. We do not like the idea of the Government's again getting into activities in the whole area of the economic field. We do not like the idea of the Government's having control, either by actual statements or implied fear.

To illustrate that this fear is taking hold, I read from a ticker tape I just tore off, timed 3:04 this afternoon at New York:

> A Presidential warning against steel price boosts put damper on the stock market today, sharply reducing big early gains session of heavy trading.
>
> Popular market indicators, which hit record highs early in the session, went into reverse following the Kennedy statement that a steel price increase would force restrictive Government measures on the economy.
>
> Steel shares and electronics were among the first to feel the reaction, the former losing all their early gain and the latter tumbling sharply.

Mr. President, this is an indication of fear. It cannot be called anything else. When a man has a stock that he believes is good, and good for future gain, he is not going to sell it. But when he feels that the steel industry may be affected by governmental action, or that the electronics industry may be affected by governmental action, his natural reaction is to get rid of that stock at the price it is worth on that particular day. I am afraid the tone of the statements made by our colleagues on the other side of the aisle and the President is going to bring about this kind of reaction across America.

Preparatory to getting into the details of some of the rebuttal, I should like to make this preliminary statement:

On Tuesday, August 22, Senator GORE—together with Senators HUMPHREY, KEFAUVER, DOUGLAS, CLARK, SYMINGTON, and others—made comprehensive statements before the Senate concerning the probability of inflation. They attributed its basic causes to a price-wage spiral largely induced by a monopolistic steel industry having the economic power to administer prices.

In reality, their speeches are prima facie evidence that they believe the current administration is heading inevitably for inflation and that an investigation of the steel industry will distract the public from the true causal factors behind the inflationary buildup taking place.

The Senators have sufficient access to economists to know that the administration is pursuing a premeditated policy of induced inflation, regardless of its fiscal-monetary consequences. It appears certain, therefore, that the country will be faced with sharply rising prices, inelasticity in the labor market, Government-supported wage settlements shoving prices even higher, increased

Government expenditures, and pyramiding national debt—all of which will signal for these Senators the need for comprehensive price controls.

By starting the fire now, they hope to place themselves in a favorable position before the public. They can warn the public of impending price rises in steel, and then "hit the industry over the head" with a psychological club when and if some steel prices are actually raised. If prices are not raised appreciably, they can accept credit for preventing a much higher increase.

In either case, they are laying the groundwork for controls.

They must, however, explain why they have not taken vigorous anti-inflation action on unnecessary Government spending, or have not exerted equal pressure on current wage demands which, in the past, have proved to be the most contributory factor behind "cost-push" inflation.

One of the most potent—and unanswerable—arguments is that all prices should be set in the marketplace by the competition of buyers and sellers. This is the heart of a free enterprise and capitalistic system. The Senate, a political body, is not the place to set steel prices, or for that matter, any price at all. In the past, Congress has all too frequently provided the governmental apparatus for setting prices in virtually all important areas of our economy through Government contracts, farm subsidies, public power projects, transportation, and interest rates.

The New York Times, in its editorial of August 24—previously referred to in the debate and already inserted in the RECORD—had this to say, in part:

Fundamental issues are raised by the campaign against a steel price increase that has been started by Senator GORE and some of his senatorial colleagues. These Senators are determined to prevent the steel industry from raising its prices after October 1 although the industry is committed to giving its unionized workers a significant wage increase then.

If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequence could be a great change in our economic system. The private enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

In the case of steel, for example, there is not only the elementary competition of different producers and sellers, but also the competition of steel from other metals and plastics, and the significant competition given domestic steel by imports of foreign steel. The steel company executives wondering whether to raise prices to compensate for the next wage increase, have, we suspect, a much more complex problem before them than Senator GORE suggests.

The fundamental question is whether these Senators are sympathetic with or antagonistic to a free enterprise economy which, together with our political freedoms, makes up our American way of life.

American industry is the last economic area relatively free from Government price fixing and regulation. It is imperative, therefore, that the Senate look upon this political threat as a fight for economic freedom and survival rather than as a side-skirmish involving the steel industry.

Sometimes it is good to get the opinion of an outsider about what is happening to our free enterprise economy as a result of increasing Government control. Edward Hallett Carr, who is a confirmed Socialist, states the case in his book "The New Society":

After the Second World War American policy was still committed to the defense of private enterprise and apparently oblivious of the immense inroads that had been made into it in the United States. A highly artificial attitude came to prevail. The defense of private enterprise became a required article of faith of an established church. Many professed, with varying degrees of sincerity, to believe in something they no longer really believed in; others sincerely believed in what they no longer practiced; most repeated the creed without asking what it meant.

The performance of these rites does not alter the fact that private laissez-faire capitalism, dead everywhere outside the United States for 20 years, has there too been mortally stricken.

Today, laissez-faire is no more accepted in the United States than in any other Western country as an adequate guide to economic policy.

The principle of state intervention and control is tacitly admitted; the only difference is in the greater or less efficiency of the intervention and in the greater or less frankness with which the role of the state is admitted. * * * The major issues of American economic policy were price fixing and wage fixing; and controversy turned only on the question where to fix them, not whether to fix them. The principle was no longer contested.

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. GOLDWATER. I am happy to yield.

Mr. BUSH. In connection with the steel industry, I wonder if the Senator would agree that one of the difficulties faced, for a long time, results from inadequate depreciation authority. The industry has not been able to acquire the necessary depreciation reserves to meet the problems of natural growth and the increased demand upon the industry for production, so the industry has had to create earnings which would sustain very large debt, and has had to go to the marketplace to borrow hundreds of millions of dollars to finance an expansion which had to take place in the interest of the country. The result of this, of course, has been that in order to make profits which would sustain the debt, the industry from time to time has had to raise prices as costs of everything else have gone up.

I ask the Senator from Arizona if it would not be in line with what we are trying to do, in the interest of stability, to give the companies greater freedom as to the setting of depreciation policies, so that the pressure upon them to make large enough profits to sustain very heavy debt would not be so great?

Mr. GOLDWATER. The Senator, in my opinion, has hit upon one of the weak points of our present economy. He has hit upon a point of great importance. If President Kennedy would follow the suggestion made, President Kennedy would soon see the economy really get into high gear. In my opinion, we would witness a manpower shortage in this country within a few months, rather than unemployment.

It is interesting to notice in the economic indicators for August that in the third quarter, which is the last quarter reporting, expenditures for new plant and equipment in this country were running at the rate of $34.6 billion. This is a rate behind the third quarter of 1960, behind the total for 1960, behind 1957 and behind 1956. The only reason why the new capital expenditure is lagging is that the American businessman, the investor, does not feel he has an adequate depreciation allowance.

To back up the argument made by the Senator, of the eight leading economies in the world, seven are growing at a faster rate than ours. I am not too concerned about the rate of growth, which so engrossed the opposition in the campaign last year, but I feel the economy could grow at a faster rate than at present—not twice as fast or anything like that, but at a faster rate—if we would copy the seven other countries which have policies which range from a complete choice of depreciation period down to a series of limitations none of which approach the very tight boundaries around ours, which in effect say to the American investor, "Do not invest, because when you get ready to buy again it will cost two or three times as much, and you will have to borrow the money."

I sincerely hope, I say in the most nonpartisan way, that the Democratic Party will urge the President to release the restrictions now upon investments in this country. The money is certainly available for investment. Savings are at an alltime high. While earnings are low, the earnings are low to a large extent because of the necessity to make investments out of earnings rather than out of depreciation funds. The Senator has made a very good point.

Mr. BUSH. I thank the Senator.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. GOLDWATER. I am happy to yield.

Mr. THURMOND. Knowing the philosophy of the able and distinguished Senator from Arizona, I wonder if he would be in accord with three points I have in mind with respect to our economy.

We continually hear about the Government going into this phase of activity or this facet of life, when, under the Constitution, the Government does not have the right to do so and, furthermore, does not have the financial ability to do so.

First, would private enterprise be better off if we allowed a reasonable or a practical depreciation on machinery, which we are not now doing? Does the Senator think that would be correct?

Mr. GOLDWATER. I have indicated in my answer to the Senator from Connecticut that I am in wholehearted agreement. I quote one figure which comes to my mind from a study made by McGraw-Hill, which indicates that

there is about $95 billion worth of obsolete equipment in this country. This is not merely old equipment, but is obsolete equipment. I know of one wire-pulling plant in the South whose machinery was installed in the 1890's, yet this equipment is supposed to compete with the highly mechanized and automated machinery produced in Belgium and Germany.

Mr. THURMOND. A second point is that we should limit imports to a reasonable quantity.

I know that imports of textiles have come in in unreasonable quantities. Textile mills by the hundreds have been closed. I understand that the same impact is now being felt in other industries. While our own industries are closing and people are losing their jobs, imports continue to come in in excessive amounts.

Does the Senator feel that that problem is one which deserves greater consideration?

Mr. GOLDWATER. I certainly think it deserves consideration. I am not ready at this point to say how broad import duties should be. I have never believed that we should protect American industries that cannot make it on their own in the face of outside competition. We have in this country today several industries that, in spite of protection, face a preference by consumers for an imported item.

One specific thing I have in mind that the Government could do which might help textile producers would be to stop selling to Japan our surplus cotton at 2½ cents below the price. I believe 2½ cents is the figure. Am I correct?

Mr. THURMOND. I inform the Senator that the figure is 6 to 8 cents.

Mr. GOLDWATER. The Senator is correct. There was an increase in the difference of 2½ cents during the past year, and now surplus cotton is being sold to Japan at 8½ cents below the price. I thank the Senator.

Mr. THURMOND. Is it the Senator's opinion that wages in industry which are obtained through collective bargaining should be based upon an increase in production? In other words, there must be some basis for increasing wages; otherwise the economic situation would be thrown out of kilter and industries would be caused to close down.

Mr. GOLDWATER. The Senator is eminently correct.

I shall reach that phase of the question in a moment. Unearned wage increases which result in unearned price increases are really the source of our problem in the country today relative to the cost of living. If we add to that problem deficit spending and high taxes, we virtually have the whole problem wrapped up in one sheet. But wage increases that are not earned should not be sought. When they are earned, they should be sought.

Mr. THURMOND. When such unearned increases are granted when there has not been an increase in production, is not inflation increased?

Mr. GOLDWATER. Any unearned increase in price which has been occasioned by an unearned increase in wages is bound to have an inflationary effect.

Mr. THURMOND. The Senator from South Carolina does not want to see the price of steel or other goods to the consumer in this country rise. However, the Senator from South Carolina has felt that the more Government is injected into the process and the more we try to threaten industry—those who are providing jobs to the millions of people in our country—the more we shall get into trouble.

Mr. GOLDWATER. The Senator need only look at the field of agriculture to find out how correct he is. Regulations cover about 30 percent of American agriculture. That 30 percent is in trouble. It is getting into increased trouble. If we do not get it out, we can very well destroy markets such as the cotton market. I do not think tobacco will be affected too much. But we may destroy some of our major sources of agricultural income today if we do not get the Government out of the legal practice of meddling with the law of supply and demand, which regulates prices, and therefore should in turn regulate the supply.

Mr. THURMOND. Does the Senator from Arizona feel that today the Government has taken such an important part in business that business people now must consider not only the capital and employee elements of the business, but must also take in a third partner—the Government? Is it not true that the Government now plays such a vital part in the regulation and control of industry that, in effect, it controls the life and death of industry?

Mr. GOLDWATER. The Senator again is correct. I might add to his observations that we are also tax collectors for the Government. I say "we." A businessman is a tax collector for the Federal Government, and he is not paid for that service. I have been looking into the proposal whereby the businessman might be paid for collecting taxes through the withholding clause.

The average businessman of any size today, from the smallest to the biggest, is saddled by Government regulations, Government bureaucrats, and Government agents prying into his business. I could discuss this point all afternoon, from my personal experience in a business of a rather limited size, in which I believe we now employ a total of five people to do nothing but keep up with Government reports.

Mr. THURMOND. I commend the able Senator from Arizona for the statement he has made.

Mr. GOLDWATER. I thank my friend from South Carolina.

It is ironic that, at the very time when we are asked to defend freedom and liberty abroad, the Senate should be used as a forum for threatening private industry because it operates on the very principles of a free society in whose name we are asked to commit so much of our resources and manpower.

In the last analysis, the Senators are really saying that free enterprise—the competitive marketplace—is not the proper place to set prices. They are also saying that American business is not public-interest minded, but is avaricious to the point where it must be broken into little pieces or completely regulated by a political body.

This, by any other name, is socialism. It puts America where England was when the Labor Party came to power.

With these points in mind, let us examine their statements regarding "Inflation: Who Causes What"; "Competition and Prices"; "Prices, Costs, and Profits."

INFLATION: WHO CAUSES WHAT

To discuss the subject of inflation is a rather difficult undertaking for anyone because there are so many factors involved in it. Fundamentally, inflation means that the value of money is decreasing because the level of all prices is rising.

However, not every price rise is inflationary. Indeed, some price increases are necessary if a company is to perform its functions efficiently and at quality levels demanded by the market. At a given time, some companies and industries will experience rising prices while others will experience falling or stable prices.

New growth companies—though small and lacking monopolistic power—are often able to command the greatest price premium for their products. The competitive market determines what these companies can charge since the consumer is free to decide at what level he is willing to buy.

A competitive market cannot function without some changes in price. Higher prices for some companies are as important to the economic system as lower prices for the consumer. Competitive prices signal a need—and if we kill the signal, we cripple the economy. We no longer know for sure what the consumer wants, or where our productive resources should be allocated.

Inflation is a complex subject, so it is impossible to determine with certainty the effect of one industry's price movements on the economy as a whole. When widespread inflation does prevail, however, we can generally find broad influences at work, which go far beyond the confines of a single company or industry.

Today, these pervasive influences take three basic forms:

First. Deficit spending by all levels of government: The Federal Government's budget for the next fiscal year is set at about $89 billion—with tax receipts estimated at $82 billion—leaving a $7 billion deficit. When this Federal spending is added to the increased spending of our local and State governments, the volume of money in circulation will rise rapidly during the next 12 months.

This government spending is the strongest, single economic force that will affect prices during the coming year.

Arthur F. Burns, in his address before the American Iron & Steel Institute on May 25, 1961, pointed out that continued spending and deficits, including those in our international accounts, are the real long-term grounds for the American dollar losing its status as a hard currency.

Second. Cost-push inflation: Employment costs have risen beyond any rea-

sonable calculation of our increase in national productivity.

Although the average company's direct employment costs may be less than half its total costs, the other half is comprised largely of the employment costs of its suppliers of goods and services. Thus, employment costs ultimately constitute more than three-quarters of our national income.

The impact of employment costs on prices is quite apparent. If a company is going to survive, its prices must cover the direct employment costs of its own employees and the indirect employment costs passed on by its suppliers of goods and services.

When the increases in employment costs exceed the gains in productivity, prices must rise or profits will fall, or completely disappear. Price increases are required to bridge, in part, the gap between fast rising costs and more slowly rising output.

Third. Better business conditions: The third main cause of the inflationary buildup is the reemployment of production resources which have been idle for the past year and a half.

Higher production costs and increased government spending would already have been reflected in higher prices, except for the fact that American industry had adequate capacity and was faced with severe domestic and foreign competition.

The combination of excess capacity and severe competition kept prices at an unusually low level in relation to costs.

Today, better business conditions and delayed buying to replace depleted inventories are increasing the output of the steel industry and might cause the steel companies, for the first time in almost 2½ years, to seek price adjustments which could well have gone into effect long ago. It is estimated, for example, that the wage increase in October will cost the steel industry over $100 million during the next year.

If a company cannot raise its prices for sound economic reasons in a competitive market, when can it do so? It certainly cannot raise prices when market factors are unfavorable; for at that time, it has to be content with keeping its customers, covering its costs, and little else.

We can say, then, that the steel industry is in an economic-political dilemma. On the one hand, economic conditions during bad market periods prevent it from raising prices, even though its costs continue to rise. On the other hand, if an attempt is made to regain lost ground when market conditions improve, Government action tries to prevent an adjustment to a better price-cost relationship.

These three broad influences—deficit financing, cost-push inflation, and better business conditions—require the Senators' attention if they are to combat inflation.

They should give more attention to the Government's role in inflation, and use the power and prestige of their office to reduce Government spending in nonessential areas.

Mr. President, I may say that in this particular area the President and his party could make the greatest single contribution to the American economy and to the domestic scene today if they would only call back some of the high-spending schemes they are adding to the total deficit. No one is going to object to higher military costs, even though some of them are hard to justify. The safety of our country comes first. However, there is just as much danger from economic ruin as there is from Communist triumph. In fact, I recall reading in my literature that the Communists have often referred to their attempts to destroy our economy.

These Senators should address themselves, with equal vigor, to the whole question of inflationary wage settlements and the Government's pressure role in these negotiations. For as a result, the cost floor has been raised beneath all American-made products, making it difficult to compete at home and abroad.

COMPETITION AND PRICES

The second main area centers on the charge that the steel industry is not competitive and has succeeded by monopolistic power and administered prices in making profits at rates of operation as low as 30 percent.

To clarify the situation, we must remember that price competition is just one phase of many forms of competition—like improvements in quality, extras, freight absorption, and all the rest.

Competition makes it impossible for the quality of steel product produced by one mill to be appreciably different from that produced by other mills. As a result, one company cannot charge more than its competitors. The industry is so competitive that a company will lose customers if it raises its prices above the industry level.

During recent years, the steel industry has felt intense price competition in a growing number of products—like reinforcing bars, line pipe, nails, fence, and stainless steel. These indicate anything but monopoly behavior.

At the end of World War II, for example, a group of small nonintegrated and partially integrated rolling mills scattered over the United States made a precarious living producing reinforcing bars. They had a steelmaking capacity of about 700,000 tons a year.

There comes to my mind an interesting development in relating these facts. There is a process now available for medium priced electricity to make steel out of the slag dumps from the western copper mines. One of my friends who is engaged in this work told me that he can produce 500 tons of structural bars by this method. That is indicative of the high competition that is taking place in this industry.

By the end of 1960, their capacity had grown to 2½ million tons, and they had captured a very large portion of the reinforcing bar business. They did this by holding costs down, performing extra services, and selling their products at lower prices. They were so successful that there is, within the steel industry, an all-out price war in the traditional economic sense.

Another area of substantial price competition is line pipe, which is used to convey gas and oil. Recently, price cuts of up to $17 per ton were common in this market.

Pipeline builders found that, by protecting the outside of a steel pipe against corrosion and using stronger steels, thinner pipe could be used. Some steel producers put in new equipment capable of making this thin-wall pipe, and they captured a substantial share of the market. This forced other producers to follow suit. The end result was another price war, with consumers getting a better as well as a cheaper product.

There are other situations like these, which illustrate that, in the steel industry as in most American industries, rewards go to the producer of a better and cheaper product.

When a producer finds a better or cheaper method of producing, his success is reflected in higher profits, which inevitably attract other manufacturers into his product area. The ultimate result is a better product, increased competition, and lower prices.

The Senators also stated in their presentation, that steel prices have increased more rapidly than those of other commodities. By use of elaborate statistics, they try to prove that steel prices are more rigid and do not reflect changes in supply and demand.

Several comments are in order at this point. First, the Senators used statistics which favored the argument they were advancing. They selected nontypical base years and price series.

They said nothing about the extremely low prices that prevailed in the thirties, which in turn were frozen by price controls in the forties, and then released after the war in a world demanding all shapes, sizes, and qualities of steel.

The point they miss completely is that the price rises show the postwar period assured the additional investments which ultimately added 50 million tons of new steel capacity.

Another point to remember is that the Bureau of Labor Statistics indexes of steel prices tend to overstate the actual prices prevailing in the market.

The BLS indexes are made up of one size and quality for each of the common forms of steel products—like cold rolled sheet. This serves as an indicator of the price movement for all grades, sizes, and qualities of each product.

The Bureau of Labor Statistics admits that its procedures do not reflect the true movement of steel prices. They do not measure increases or decreases in freight absorption. They do not show all the extras being added by a steel company. And they do not take into account changes in the quality of the product. As a matter of fact, the Bureau men who construct the steel price index are concerned because it reflects higher prices than the average prices actually realized by the steel companies.

To be accurate, a price index must measure precisely the same product over a given span of time. It is not a true measure if the product increases or decreases in quality or composition.

When you talk to the men who actually use steel, you soon discover that there has been a tremendous change in the quality of steel products from just a few years ago.

Every sizable steel consumer buys steel from two or more suppliers. If a given supplier does not furnish a quality product, the buyer can decrease that supplier's share of the business and thus penalize him quite effectively.

As a result, there is an item-by-item competition among steel producers to maintain and to improve their share of a consumer's business. These countless competitive battles determine the total share which each producer is able to secure of the available steel business. From the consumer's standpoint, this competition is more valuable to him than small changes in the published price of steel mill products.

Why is this? Well, take the case of cold rolled sheets—the product from which auto bodies and refrigerators are made. Every user of steel sheets is constantly searching for a way to reduce fabricating costs. These costs are substantially reduced when his machines are operated at optimum speed. Accordingly, most stamping plants have abandoned the purchase of single, cold rolled sheets and now demand coils of steel which can be fed continuously into their presses. This, in turn, increases the productivity of their equipment.

The larger the coil, the longer the presses can operate without being shut down. Thus, the steel producer who furnishes the largest coil has a distinct competitive advantage, and gets a bigger share of the business.

Each steel producer, therefore, is striving to improve his equipment to produce larger coils. But this is a costly process, and it requires tremendous investments in capital. In some cases, it forces a steel company to install completely new rolling equipment.

Here is another example. A refrigerator manufacturer wants steel sheets flatter than normal so that the outside of the box will have a pleasing appearance to the housewife. Accordingly, he plays one steel producer against another until he gets a sheet that is table flat.

This, too, is costly for the steel producer. He secures the additional flatness by installing high-priced leveling equipment, by rejecting steel that is not flat enough, by cutting down his yields and increasing his cost. Ultimately, this can lead to scrapping equipment which was adequate not too long ago and replacing it with the latest and most modern mills.

Costly capital investments are required to turn out new products to retain a market where older products cannot compete. Whenever this kind of investment is required, the company ends up with duplicate facilities—some obsolete or marginal and the new ones demanded by the current market.

Today's rolling mills are capable of making a product that is closer to tolerance, smoother, and flatter. Each mill of this kind sets new competitive standards of quality, forcing all other producers to take extra care, perform additional operations, and incur higher costs to bring their products up to this new competitive standard.

This is real competition—competition of the most rugged type. Failure to meet it is a death warrant for most producers.

The important point is that the BLS Steel Price Index does not measure this type of competition. No statistics can dig this deeply into the true competitive situation. As a matter of fact, an excellent case can be made for saying that steel prices have actually dropped in the face of rising costs.

All in all, then, the steel industry has had to contend with many competitive situations during the past 3 years: rising production costs, increased foreign and domestic competition, design changes, leading to a reduced use of steel per unit and higher quality levels, lower prices in effect for some of its products, competition from substitute materials, high quality levels and specifications.

To be able to meet these problems, and to do so without a price increase in the last 2½ years, is itself nothing short of phenomenal. Rather than being criticized for the possibility that steel prices might go up, the industry should be commended for having done so efficient a job during the most difficult period in its history.

If it had had the power to do so, the industry could have solved its problems by simply raising prices. The fact is the industry has only the power over prices that a competitive market justifies.

This explains why it had to take the hard road to meager profits—improve facilities, cut operating costs, raise efficiency—the very features that make our productive market economy what it is today.

Finally, when discussing competition, the Senators said that our foreign trade balance was adversely affected because of our inability to compete abroad. The impression was left that the steel industry was largely responsible. But the figures do not justify this conclusion.

It is true that the steel industry's export-import ratio has changed dramatically since 1955. Exports exceeded imports by about 4 million tons a year from 1946 to 1950. During the last 5 years, exports exceeded imports by a little over 1 million tons.

This trend, however, is paralleled by virtually every American industry. In 1950, we exported $3.63 of finished manufactured goods for every $1 of manufactured imports. This fell progressively from $3.51 in 1952 to $3.39 in 1954, to $2.89 in 1956, to $2.40 in 1958, and to $1.99 in 1960.

The trend is similar for foodstuffs and capital equipment.

The Senators give the impression that only steel is affected, and largely because of higher steel prices. They have not emphasized the wide gap in wages between the United States and foreign countries in all areas of production. They overlooked, as well, the complete industrial rehabilitation of Japan and Western Europe.

When World War II ended, these countries had to be rebuilt from the ground up. They could not compete under any circumstances because they lacked the necessary capital equipment. They did have—and continue to have—cheap labor. This labor, together with American foreign aid in excess of $100 billion, made these countries strong competitors in the world's markets. As a result, extreme foreign competition is common in such diverse items as sewing machines, toys, foreign cars, musical instruments, typewriters, optical lenses, electronic and electrical equipment, and even earthmoving machinery.

Today, there is a comparatively minor difference in the efficiency of American productive equipment and that of the Europeans or the Japanese. The big difference is employment cost, which favors all foreign producers. In most cases their employment costs are only one-third or one-fourth of ours. And even when these figures are adjusted for worker productivity, the gap in net employment cost is considerable. At the same time, productivity is rising faster abroad than it is at home.

These factors explain why so many American companies are being forced overseas with their production facilities. Even to compete in our own domestic markets, as well as abroad, they must take advantage of the lower production costs in foreign countries. At the last count, over 1,100 American plants, employing more than 1 million workers were stationed abroad. They represented a net investment of more than $32 billion.

Again, the Senators are involved in a dilemma. They are worried about the steel industry's ability to compete with foreign producers, but they refuse to direct their attention to the prime cause behind that inability to compete—employment costs that have risen faster than the productivity level of the work force. On top of that, the American investor is not being paid for the productivity increases resulting from the more and better capital equipment which his savings make possible.

To compete and produce, American industry needs the best of equipment which only private investors can provide. We must, therefore, keep alive the profit incentive if we want to meet our obligations at home and abroad.

PROFITS, COSTS, AND PRICES

The crux of the entire argument is this: If the steel industry, because of administered prices brought on by monopolistic power, was able to charge whatever it wanted, its exorbitant prices should be reflected in the one figure important to any industrial company—rate of profits on sales and rate of return on investment.

The steel industry's profit figures, filed with the Securities and Exchange Commission, show beyond a doubt that the industry has not been anywhere near as profitable as other industries.

If the steel companies charged too much, they must have made too much money. Yet, every investment yardstick shows just the opposite—steel is a victim of lean profits brought on by lower operations, increased competition, and weaker prices.

Here are just two ratios to consider:

	Year 1959	Year 1960	1st half 1961 (estimated)
Profit as a percent of sales	5.9	5.7	4.5
Profit as a percent of investment	5.3	5.1	4.2

When all the detailed arguments in the CONGRESSIONAL RECORD are examined, and the confusing mass of figures dissected, you still come up with the irrefutable fact that the steel industry has not been able to raise its profit position in spite of the tremendous power which the Senators contend it has.

If it has that kind of power—and ended up with that kind of result—it is the most public spirited private enterprise in the history of this country. Certainly, no amount of public control and regulation could do as well.

It is a mistake to think that the steel industry wants to see its prices go up, or that it is not sensitive to the problems of inflation. As an industry, it has a large amount of long-lasting capital equipment. Its replacement costs and competitive position are more hurt than helped by inflation. That is why the industry's 1959 wage negotiation was centered on the dangers that inflation held for American companies, workers, and consumers.

The Senators contend that, because of its monopoly power and without economic justification—the steel industry has rapidly increased the prices of steel mill products. It is also alleged that these price increases were used by steel consumers as an excuse to secure additional profit by passing on the full price increase plus an additional amount for their own profit.

They refer to the increase in the price of a farm tractor following the steel price increases of 1958. They contend that the half-ton of steel used in the tractor represented an increase in cost to the tractor manufacturers of $3. But this $3, when passed through the economy to the farmer, resulted in a $97 increase. Accordingly, everyone from the tractor producer to the salesman who sold the tractor enhanced his profit position in the process.

What the Senators forgot to mention was that the tractor manufacturer, like all manufacturers, was subjected to the same cost squeeze that motivated the steel industry to raise its prices. These increases were not caused by avaricious producers trying to seize unwarranted profits, but were required by cost increases which had become unbearable.

There are several other fallacies in this argument.

No one knows what other factors raised the price of this particular tractor. It might have gone up without a wage increase. As a matter of fact, many tractors in that year went to a higher power and more expensive design.

We do know this: If everyone, particularly the steel manufacturer, made windfall profits as a result of his price increase, these profits should show up in the U.S. Department of Commerce's data on corporate profits. Yet, an examination of this data proves conclusively that corporations did not make any windfall profits. As a matter of fact, since 1950, the profits of all industrial corporations did not increase—and if a reasonable allowance is made for inflation, corporate profits have actually declined.

On top of that, the steel industry's return on net assets has been consistently lower than the average of all manufacturing industries in 17 of the 20 years since 1940. In no year has it ranked higher than 14th among the industries—and in many years, it has ranked at or near the bottom of the list. Out of 41 manufacturing industries in 1960, there were 32 industries in which the return on net assets was greater than that for the steel industry. The steel industry was also near the bottom of the list in 1959. In the last 3 years the rate of return averaged only 8.1 percent.

Actually, the rate of return on sales is a better measure of the trend of profitability for the steel industry. Other measures, like return on investment, compare "old dollars" of fixed cost against current dollars of income. The percent of profit on sales is much more up-to-date from this point of view. Also, it measures how much an industry or company is earning from its customers.

The average profit per dollar of sales for the steel industry in 1940, as indicated in the table below, was 8 percent. At no time during the last two decades has it exceeded this amount—and in only 1 year, 1950, has this rate been equaled. The rate of return has not been increasing—even without adjusting the profit figures for the impact of inflation on stated depreciation.

Steel industry profits per dollar of sales

	Percent
1940	8.0
1941	6.0
1942	3.4
1943	2.8
1944	2.7
1945	3.1
1946	5.5
1947	6.1
1948	6.7
1949	7.1
1950	8.0
1951	5.8
1952	5.0
1953	5.6
1954	6.0
1955	7.8
1956	7.3
1957	7.3
1958	6.3
1959	5.7
1960	5.8

Source: Annual statistical reports, American Iron & Steel Institute.

Since 1940, hourly employment costs have increased 322 percent and total costs per man-hour have risen 282 percent. During this period finished steel mill product prices have risen only 174 percent, even using the overstated BLS index.

Profits, as a percent of the sales dollar, reached the 8-percent level in only 1 year since 1940. It has declined steadily to a level of 5.7 percent in 1960.

In the last 5 years, total corporate profits, as a share of the national income, have been well below the 14-year postwar average of 6.9 percent.

If the steel industry—and all American industry—is gouging the consumer and making windfall profits, where did the profits go? The answer is: There were not any windfall profits. And there was no gouging.

In the 2 years since the last wage negotiations, steel companies—to stay alive—have had to raise their quality levels and lower their cost position by investing hundreds of millions of dollars in new equipment—not to add capacity but to improve competitive position with regard to substitute materials, intense domestic competition, and foreign producers. At the same time, the steel companies have absorbed higher employment and material costs. In spite of these pressures, however, there has been no general increase in prices for 2½ years, thanks largely to the introduction of efficient new facilities and intensive cost reductions.

This new capital equipment must be paid for and the required investment must be reasonably profitable to the owners of the business. If it is not, the industry cannot adequately replace its rapidly growing obsolete equipment, nor can it compete or provide the job opportunities for the future.

When profit margins shrink, and costs continue to rise, price increases are needed to maintain a sound and virile industry. No one worries about the competitive price increases in other industries. Why, after 3 years of stable prices, rising costs, and lower profits, do these Senators concentrate so earnestly on the steel industry?

CONCLUSION

Since 1959, the steel industry has absorbed two pay increases without a general increase in steel prices. For this the steel industry deserves great credit.

Now, Members of the Senate are demanding that steel companies absorb a third major pay increase without additional price compensation. Such a demand endangers the country's welfare and national security.

Our economic welfare is endangered because, if steel companies bow to the threats of Senate Members, their profits will be seriously jeopardized.

These profits are invested in modern equipment designed to produce new products, raise production, and increase overall efficiency. Their capital investments are the best insurance of an expanding industry with an increased ability to compete with lower cost foreign producers.

Steel workers would be the first to suffer were the industry to follow the unrealistic program urged by these Senators.

The most serious consequence of their program affects our long-term national security. The steel industry is vital to our national defense. Is it not national suicide to take punitive measures which interfere with the orderly expansion of the steel industry?

Remember, without an essential cost-covering price increase, the steel industry could not have provided the fifty million tons of new capacity we now have on hand to meet the developing emergencies of the cold war.

Finally, I sense in this attempt to throw fear into the steel companies the beginning of the setting of a situation whereby, by Christmas, the country will be operating under a national emergency again. I have sensed this for several months. It is becoming increasingly evident to me that the administration may loosen some of the inflationary forces, so that it may appear, at the next yearly tax collection period beginning in April 1962, that we have increased the economy to the point where we are able to cover much of the deficit.

This is the type of economic chicanery which we cannot allow to take place. It does not involve only the steel companies and the users of steel—the ultimate consumer; it also involves the stability of the dollar, upon which most of the currencies of the world rest for their credit.

If we wish to hasten the day of our destruction, then the way to do it is by throwing fear into the hearts of the American businessmen by setting up a situation whereby the President can say, "Well, it is necessary for manufacturers to raise prices anyway, so we shall have to control wages and prices. Let us get the Government back into the active control of the economy as it was during World War II and immediately thereafter."

Mr. President, during that time occurred the greatest increase in inflation we have ever had.

I thank the distinguished Senator from Illinois for yielding to me for the purpose of adding my few remarks to this rebuttal. I think it was necessary that this be completely done.

Mr. SALTONSTALL. Mr. President, many of us are concerned about price increases in the steel industry. Of course, no one wants price increases, whether in steel or in any other commodity. We all hope that the prices of things which consumers need can be kept down to a minimum.

But the question before the country today, as the steel industry faces a new wage increase, is not so easy as some would make it appear.

Some persons in Washington seem to feel they can achieve the economic miracle of uncontrolled wages, but controlled prices. Lacking any congressional sanction for a return to the hated price controls of wartime, some officials seem bent on achieving price controls by public statements.

I do not believe that a majority of the Members of this body favor the regimentation of this or any other domestic industry. And I do not believe we can produce a healthy domestic economy by Government interference with the delicate balances of a free enterprise system.

I am advised that there have been three wage increases in the steel industry since the end of the 1959 strike—one in January 1960, one in December 1960, and the third which is scheduled for October 1, 1961. And about 43 percent of the total price of steel is paid out in wages. Yet there has been no increase in steel prices since 1958.

Over the 3-year term of the present contract, wages will be increased slightly more than 10 percent. Yet there has been a deterioration in profits in recent years. Net income was lower in 1960 than in 1959, even though 1959 was especially low because of the prolonged strike. Net income for 1960 was 28 percent lower than for 1957.

Net income as a percent of sales also declined from 9.6 percent in 1957 to 8.3 percent in 1960.

The industry has increased its long-term debt in the past 3 years by $1.1 billion, pouring huge sums into new machinery, new techniques, and new types of steel so necessary for survival and progress of the industry.

Steelmaking costs have gone up $11.55 a ton since 1958, and the October 1, 1961, pay increase will boost them an additional $3.40 a ton, according to industry records. So, the steel companies are being asked to assume $15 per ton in increased costs, without additional price boosts. How is this miracle to be achieved?

We propound for ourselves a serious economic question: Do we want a free economy or do we want a controlled economy? This question was answered once and for all when we wiped out price and wage controls after the end of World War II, to the joy and relief of business and labor and the consumer as well.

Price controls under the law were repugnant to the American people then. I am convinced that price controls by Government threat are even more repugnant to the American people now.

The free-enterprise system is capable of dealing with the steel pricing problem with its own built-in price controls. If the price of steel is pegged too high by the industry, then steel will suffer from increased foreign competition, and it will suffer from a gradual shift by steel users to aluminum, concrete, plastics, and to other substitute materials.

Steel imports increased sharply during the 1959 strike, and they were the highest in more than a year during June of 1961. Domestic steel must be produced efficiently and economically to meet this competition.

Plastics and aluminum are taking a steadily larger share of the boat and automobile market. Concrete is making inroads on the heavy use of steel in large buildings. Steel must be priced fairly to compete.

To meet this stiff competition, both foreign and domestic, the steel industry must remain a healthy industry, capable of paying high wages and high taxes, and at the same time capable of making a fair and reasonable profit. We all favor the industry paying the best possible wages. But it must be capable also of continuing to make substantial investments in new plant and equipment, and to pay for them out of dependable earnings. Only by keeping pace with scientific progress in steelmaking can we hope to compete with the rapidly developing nations of the world, which will soon be as ready and willing as we are to supply foreign markets.

We can all hope that good wages can be paid without price increases. But I do urge that the way to accomplish this desired result is through healthy competition and healthy modernization of steelmaking facilities, not through repressive measures of the Federal Government, whether by acts of Congress or words of warning issued by the executive departments.

The free-enterprise system has worked pretty well. The inexorable laws of supply and demand are even more immutable than those we enact here. I suggest that we should permit these laws to operate in the steel industry, as elsewhere.

The results can only be beneficial—to the industry, to labor, and to the country.

Mr. BENNETT. Mr. President, I am fearful that the attack on the steel industry which took place on the Senate floor on August 22 will create in the minds of many Americans confusion concerning some basic and simple economic facts of life. I am even more disturbed over the philosophical and political dangers represented by this attack.

I agree wholeheartedly with the New York Times, which in its editorial of August 24, in commenting on this display, said:

> If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequence could be a great change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

I am sure the steel industry is not anxious to increase prices; and no one in the Senate can say whether the steel industry plans to raise them or not. But irrespective of speeches or threats, there are certain facts which cannot be brushed aside in a situation such as this. My purpose is to examine some of these facts. I hope this examination will help to illustrate that any action taken should be taken on the basis of economic considerations, measured against the public interest.

USE OF 1947 AS BASE PERIOD IS UNJUST AND FALLACIOUS

In the August 22 display, the junior Senator from Minnesota [Mr. McCARTHY] inserted in the RECORD, at page 16695, a table illustrating two trends in productivity indexes for steel, dating back to 1947. I shall not quarrel with those figures; I am sure they are accurate. But I do quarrel with that particular selection of dates for measurement purposes. The use of 1947 as a base period has the effect of ignoring the substantial pressures on steel costs, which were not accompanied by a corresponding adjustment in steel prices, in the preceding war years and the early postwar years. Changes in steel prices since that date represent necessary ad-

justments to an intolerable situation. I shall illustrate what I mean.

A comparison of the increase in finished steel prices and wholesale prices and industrial prices, over the period 1939 to 1947, reveals a decided lag in finished steel prices through the war years and the immediate postwar years. Finished steel prices increased 31 percent during that interval, while industrial prices increased 64 percent—more than twice as much. The general wholesale price index grew by 92.4 percent over that period—or three times as much as the increase in finished steel prices. Similarly, important ingredients of steel costs also increased in price much more than did steel prices. By 1947, steel scrap prices had more than doubled, construction costs had risen 77 percent, and employment costs per manhour had risen 67 percent. Mr. President, I ask unanimous consent to have printed in the RECORD a table showing these figures.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—*Increases in wholesale price index, industrial price index, selected steel costs, and finished steel prices, 1939–47*

	1939	1947	Percent increase
Finished steel prices (1947–49=100)	68.0	89.1	31.0
Wholesale price index (1947–49=100)	50.1	96.4	92.4
Nonfarm, nonfood index (industrial prices) (1947–49=100)	58.1	95.3	64.0
Steel costs:			
Steel scrap	$16.39	$36.36	121.8
Employment costs	$0.89	$1.49	67.4
Construction costs (ENR) (1947–49=100)	52.1	92.2	77.0

Mr. BENNETT. Mr. President, the rapid price movements which followed 1947 largely represented a catchingup process, not a pace-setting influence for the economy. By emphasizing the changes which have taken place since 1947, the antagonists ignore the fact that the increases since that date reflect in part a catchingup of steel prices with the inflation which had developed on a significant scale in virtually all the rest of the economy during and immediately after World War II. Moreover, in terms of any significant economic criteria, there are good reasons why the year 1947 should not be used as a base period. The postwar inflation was still in effect; the readjustments from the war economy were still taking place; there were the growing pressures of our early postwar aid programs to Europe; many goods were still in scarce supply; and the economy was still in its first postwar phase of expansion, reflecting in part the deferred demand of the war years. That combination of factors, as well as other pressures which were at work, indicates that the year 1947 has many limitations or defects as a basis for determining the significance of subsequent price increases and their relationships.

THE LONGRUN PICTURE

The interaction of wages, prices, and productivity is a complex economic problem which has received increasing attention from economists, and deserves even greater attention. The late Prof. Sumner Slichter, of Harvard University, and A. D. H. Kaplan, of the Brookings Institute, referred to any spread between wage and productivity increases as an "inflationary gap." Barring other economic forces, this gap can only express itself in increased prices. Let us examine what has happened in the steel industry.

Using figures dating back to 1940, we observe the creation of an inflationary gap through sharp increases in employment costs alongside of only moderate productivity increases.

Mr. President, at this point I ask consent to have printed in the RECORD, a table listing indexes of output per manhour, employment costs—including such fringe benefits as social security, pensions, insurance, and supplemental unemployment benefits—and finished steel product prices, over the two decades, 1940 to 1960.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—*Indexes of employment costs, output per man-hour and finished steel mill product prices, 1940–60 (1940=100)*

	Employment costs per hour worked [1]	Output per man-hour	Finished steel mill product prices
1940	100.0	100.0	100.0
1947	172.7	115.1	130.8
1948	185.5	115.4	148.8
1949	193.7	115.4	161.1
1950	210.8	126.9	169.2
1951	233.6	125.2	182.8
1952	255.8	122.0	186.8
1953	269.6	127.1	201.0
1954	277.6	120.5	209.7
1955	300.8	140.5	219.5
1956	326.4	140.7	238.0
1957	355.4	139.2	260.6
1958	388.2	130.1	269.8
1959	419.7	147.5	274.3
1960	422.1	139.6	273.9

[1] Wage employees engaged in the production and sale of iron and steel products.

Mr. BENNETT. Mr. President, in examining the total period, and using 1940 as the base 100, we find that the employment cost index stood at 422.1 in 1960; the index of output per man-hour stood at 139.6 in the same year; and the finished steel price index was 273.9. Employment costs, therefore, increased 322 percent between 1940 and 1960, while output per man-hour increased only 40 percent. This represents an inflationary gap of 282 percentage points. Prices were bound to increase under such pressures. And this they did, to the extent of 174 percent.

The Democratic Senators attempt to put the entire blame for past inflation and the whole burden of preventing future inflation on steel producers. Although their own statistics show that wage cost increases have far surpassed any productivity gains, this fact is passed over without any condemnation of the labor leaders who have had the power, by virtue of a legally constituted monopoly, to force these cost increases, and without any demand that the Steelworkers cease their incessant demands for ever-higher wages and costly benefits. Although these Senators point out that the increase in steel prices is multiplied by the users of steel, in increasing their own prices, and that other manufacturers use a steel price increase as an excuse for raising their prices, it is argued that somehow the fault is entirely that of the steel producers themselves.

THE SHORT RUN

Let us examine the short-run effects of the wage settlement of last year. In so doing, I wish to set forth a warning that 1-year or 2-year comparisons are dangerous, inasmuch as annual fluctuations vary greatly. But let us examine the figures used by the Democratic Senators. The junior Senator from Minnesota [Mr. MCCARTHY] pointed out, on page 16694 of the RECORD, that the total cost effect, including fringe benefits, of the increase that took effect last year and the increase which will go into effect on October 1 is about 20 cents for the 2-year period. The Senator says that the average annual increase in productivity since 1947 has been 3 percent per year. Inasmuch as steel wages are approximately $3 per hour, this would allow for a 9-cent-per-year wage increase, or 18 cents for the 2 years. Thus, the wage advance of 20 cents in the 2-year period is only slightly more than the productivity increase for those years. However, there are three things wrong with this analysis.

In the first place, it is highly doubtful that we can count on a 3-percent productivity increase every year. In fact, the historical average is well below this figure. The following table shows the compound rates of increase in output per man-hour over the two decades, 1940–60. The average over the period is 1.7 percent.

Compound annual rate of increase in output per man-hour in steel

1940–60	1.7
1940–50	2.4
1950–60	1.0

My second concern is with the figures for employment costs. The figures cited by the Senator from Minnesota were for basic wage rates. The American Iron & Steel Institute puts the total employment costs before the strike at $3.70 per hour, and for the first 6 months of 1961 at $3.98. This is an increase of 28 cents, or 3.7 percent, over the 2-year period; and this is prior to the increase which is to go into effect next month.

The third error in this analysis, and the one that concerns me the most, rests on other grounds. And, for purposes of discussion, let us assume that the figures cited by the Democratic Senators are proper and accurate.

If prosperity rests on constantly increasing productivity and if measures showing both the money values we produce and the rate at which we increase them are sound and dependable, we still face the problem of making an equitable distribution of the rewards and benefits of productivity.

Before we can consider the relative shares to which each of the segments of

the economy might be entitled, let us set down for reference the different forms in which these rewards come to the various participants:

Those who work for wages or salaries receive their share through increases in their salary scales, and in the fringe benefits they receive. Those who supply capital to buy the new and more productive machines, which provide the greatest increase in productivity, also receive increases in income through profits and dividends. All producers then benefit through increases in income.

But the consumer's share, represented ultimately by the wife and homemaker, is recorded and measured solely in terms of prices of the goods and services she buys. If she is to receive any share of the benefits, it will have to come in the form of lower prices. But pressures at the bargaining table seem to always squeeze out the consumer.

A statement by Theodore O. Yntema before the Senate Finance Committee during hearings conducted in 1958 is very significant on this point:

> We would like to see the productivity advances in the economy distributed more in lower prices and less in higher money wages of reduced purchasing power.
>
> * * * * *
>
> Certainly we should not tolerate attempts by any power group to grab such benefits for themselves.
>
> * * * * *
>
> The productivity of society is reflected in the physical volume of output per man-hour worked. This output per man-hour is usually called the productivity of labor. The term, however, is a misnomer because laborers are not responsible for much of the increase in productivity. The increases in productivity come mainly from management's utilizing capital and putting into operation the improvements discovered by scientists, engineers, and others. It is somewhat ironical that productivity should be expressed as output per man-hour, and it is most unfortunate that the term "productivity of labor" should be misinterpreted as productivity attributable to labor.

Certainly, labor should have its fair share. I will always defend labor's right to that. But I wonder if it should have more than its share. I think it is obvious to both management and labor that, if the steel industry had attempted to absorb all the cost increases which have taken place since World War II, there would be no steel industry today. And it is sad to observe that the forgotten party in all of our bargaining is the consumer. In recent years the American consumer has received an ally in the competition from imports. Perhaps this will add strength to the consumer's position.

Referring again to table II, inserted earlier, observe that the steel industry has been locked in and has been unable to lower prices due to the huge gap between increases in employment costs and increases in output per man-hour. The following quotation from an editorial in the Wall Street Journal of September 6 bears consideration:

> How odd it is that the Federal Government really becomes alarmed about a possible inflationary reaction only when business thinks about boosting prices. When the labor leaders clamor for higher labor prices, rarely is a cautionary note sounded in Washington.

In my State of Utah just now we are having a very tragic and dramatic demonstration of the truth of these words. The great Kennecott Copper Co. has been strikebound for 3 weeks. Five thousand men are out of work because 188 men belonging to a small union have refused to settle on the same terms that other employees have accepted. If the strike goes on for another week, an additional 1,000 men will lose their jobs, because the stocks of copper on hand that can be refined are fast being used up. Yet nothing is being done by the Federal Government; there are no telegrams from the White House saying to these 188 men, "You are creating a tremendous problem for your fellow employees. You are building up the unemployment statistics."

This is the sort of economic myopia that disturbs many Senators.

Apparently some persons would argue that, in spite of general inflation in the economy and rising costs in the steel industry, there is never a time when an increase in steel prices is warranted.

This problem is not a singleheaded coin. I have merely tried to present facts bearing on the case to offset some of the fallacious and dangerous reasoning which appeared on the Senate floor on August 22, and which reviewed only one side of the coin. Again, I remind my colleagues that the Senate floor is not the marketplace; nor is it the force behind the economic relationships between wages, productivity, and prices.

We cannot, from our vantage point, flatly say that the steel industry will or will not raise its prices; but, based on an examination of the facts, some of which I have presented here, it can be certain that such a step will not be taken unless the companies see that they have no alternative.

Mr. DIRKSEN. Mr. President, I yield to the Senator from Indiana [Mr. CAPEHART].

Mr. CAPEHART. Mr. President, the controversy over steel prices can be solved and the present debate and future debates can be stopped by adopting a socialistic or communistic system in the United States, under which the Government would control all prices and wages and operate all businesses. That is one way to do it. That is the simple way to do it.

In my opinion, if we do not quit harassing and strangling and throwing roadblocks in the way of the free enterprise system in America, this is exactly what will happen.

I do not know that it is the business of the Senate or of any individual Senator whether any individual company in the United States or any group of companies increases prices.

I do not believe it is any of our business. I do not believe we should talk about it or even discuss tampering with such action, but certain Senators brought up the subject on the floor some days ago.

There are those in the Senate and in our Government who adopt the same tactics the Communists use in this respect. The Communists and Mr. Khrushchev constantly needle the United States and the free world. They do everything in the world to hamper our operations. Khrushchev has forced us to spend many billions and billions and billions of dollars for national defense. He has forced us to do many other things.

For reasons I simply cannot understand, some have adopted the same sort of tactics with respect to the private enterprise system in America. They harass and throw roadblocks in its way. They never say a kind word about it. Apparently, they think they know how to operate business.

Actually, we should encourage and assist the private enterprise system, because only the private enterprise system, other than the Government, provides jobs in the United States.

The stronger we make the private enterprise system the more jobs there will be and the higher wages there will be for our workers. Despite this, some constantly seek to pass legislation, make speeches and statements, and do every other conceivable act to embarrass and strangle the private enterprise system.

Someday we shall have to make up our minds as to whether we believe in private enterprise. I believe 100 percent that we ought to prosecute any little man or any big man, any little business or any big business, which violates the law. That is not what we are talking about. That is not what we do here.

It is said that the steel industry should not increase prices. I do not know.

Not a single one of the other 99 Senators knows whether the industry should or should not increase prices.

I do not have the costs of the industry. I do not know how many hundreds of millions of dollars the industry feels will have to be spent to expand its productive capacity to create more jobs in the next year, 2 years, 3 years, 4 years, or 5 years. Nor does any other Senator know whether prices should be increased.

I personally do not know whether prices are too high or too low. One can gather a mass of statistics purporting to show that the steel industry is making too much profit, but when that is done it unquestionably is necessary to take into consideration the money needed to build new facilities to expand the business.

We do not know. We have no way of knowing. I do not know that it is any of our business, under our kind of government, our kind of life, and our kind of society, so long as the steel industry does not violate any law.

I have always thought that the purpose of the U.S. Congress and of the Government of the United States is to make laws, not to harass, not to try to punish, not to try to do things to interfere with business.

Either we shall have to stop, or we shall create a climate in the United

States which will not promote private enterprise, but will ruin it.

Senators talk about the steel industry and steel prices. What are the costs which enter into the manufacture of steel?

First, there is a labor cost. That is the biggest cost.

Second is the transportation cost, in and out, of the raw materials and the finished products.

Third is taxes. Those are breaking the backs of both big and little business in the United States. There are all kinds of taxes. The number is almost inconceivable. Senators should try to operate a business today and sign checks for the dozens of different kinds of taxes to see what they amount to. Senators would be amazed.

Another item which goes into the manufacture of steel is power, electricity.

There are also raw materials. The raw materials are coke, coal, and iron ore.

The labor rates are the same in all the factories. The labor rates are set by the Steelworkers Union. The union has been given a monopoly by the laws of the United States. Therefore, the steel companies have no choice other than to pay the labor rate demanded.

The transportation costs are set by governments, by the States, and by the Interstate Commerce Commission. The costs are set for railroad freight rates and truck rates. There is nothing any company can do about such costs, which are set by governmental agencies.

They also all pay the same tax rates. All companies have the same labor rates, the same transportation rates, and the same tax rates.

All companies pay the same rates for power, because some governmental agency establishes the price of electric power.

Companies are now permitted to bargain as to prices they will pay for raw materials such as iron ore and coke and coal, but that is the only cost under their control. They do not control the transportation cost of the raw materials into the plant. That cost is set by a Government agency.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. CAPEHART. If the Senator will permit me to finish, then I shall yield.

The company does not set those rates. Those rates are set by the Government agencies.

There is not much which goes into the cost of steel as to which some governmental agency does not either directly or indirectly set the cost.

As I said a moment ago, what we should do is quit kicking business around. If we do not, we shall ruin the private enterprise system of America. Then we shall have a Government-controlled enterprise system. It will not be private enterprise any longer, but it will be enterprise controlled by the Government.

What right have we in the U.S. Senate to do that? Under what law or what constitutional right can we continually harass the steel companies or any other portion of our industry? What legal right have we to do that? We are crippling industry. We are hurting business.

We hear talk to the effect that the steel companies should not increase their prices. I do not know whether they should or should not. I am not arguing that point. I hope it will not be necessary for them to do so. I do not have their costs; therefore I do not know.

The Congress has 100 percent jurisdiction and 100 percent control over taxes. We control expenditures. We have something to say about deficits.

The things which are causing inflation in the United States are huge governmental expenditures and high taxes.

It has been said this afternoon that the President says we should all get together, economize, and not do those things which will be inflationary. Yet, he is the biggest offender, and the Congress of the United States is going along with him, because we are spending money regardless of whether there will be income to pay expenses or not.

I do not know what Senators are thinking about when they try to control prices in the United States. Do they likewise have enough courage to try to control wages? Will they complain as loudly when some group insists upon a wage increase?

Wage earners have a right to do that. They may deserve a wage increase. I do not think it is any of the business of Members of the U.S. Senate, or of the Senate itself, to be talking about it.

Let us get out of American business. Let us get out of labor. Let us permit labor, management, and ownership to operate their own business. Let us create a climate that will encourage them to do so. Let us start to eliminate some of the controls we now have. Let us eliminate some of the taxes and other measures which are strangling business.

We have heard it said that measures must be taken in order to stop communism and Khrushchev. Yet we turn around in many instances and adopt socialistic or communistic methods toward business, as for example, with respect to the foreign aid bill.

Do we want to ruin the private enterprise system? Do we want to ruin the kind of system that made America the greatest industrial nation in the world?

To those who put roadblocks in the way of private industry, discourage and embarrass them, I say, "You are not the friends of the laboring man. You are the enemies of the laboring man." I talk from experience as one who has met a great number of payrolls. I wish some Senators would sit behind a desk and try to operate a business today and try to make both ends meet.

Business is very simple. Many people have an idea that business is a complicated affair. It is not. It is this simple. One must figure his costs and then figure what he can sell his product for. The difference between the two figures is either a profit or a loss. That is how simple the problem is.

Every business in the United States is different. No two of them are exactly alike. No two of them, except in the large industries, such as the steel industry, have exactly the same costs. Their costs are practically the same. We talk about the steel industry not being competitive. I do not know anything more competitive, because any businessman may pick up a telephone and call any one of 25 steel companies in order to buy steel. When he has called all 25 manufacturers, he can place his order with the company which has the lowest price. That is why, as a rule, steel prices are all the same.

The same is true with respect to coal and many other commodities. One company manufactures a product, for the purpose for which a consumer wants it, which is just as good as the product of another company. So the businessman buys 100 percent on the basis of price and price alone.

I have pointed out to the Senate how the Government, directly or indirectly, sets the price in the steel industry.

I do not know what we are talking about. I see the able Senator from Tennessee [Mr. GORE] smiling. He has said that steel prices are too high. I do not know how he knows it. I do not know whether or not he was ever in the steel business. I do not know how he can arrive at his conclusion. I cannot arrive at it. I have no facts or figures with which to arrive at such a conclusion. I can read the statements of the companies. They show a profit. Thank God that they do, because the steel companies are literally owned by thousands of people in the United States, many of whom are wage earners.

Most businesses are owned by stockholders. As has been said before today, approximately 90 million people have an interest in the life insurance companies in the United States.

All the income of the life insurance companies, except premiums received from the insured, comes from earnings through investments which the life insurance companies make in businesses in the United States. The life insurance companies buy mortgages, bonds, and stocks, from which they receive income. If they did not, we could not have the great life insurance system that operates in the United States.

I repeat the question. Where do we get the idea that we in the U.S. Senate have the right to harass industry? Upon the basis of what information or knowledge, or under what law, are we entitled to harass the steel industry, for example? Tomorrow it may be some other industry, and the next day it may be still another industry. Where have we gotten that idea? Where do we think we are going?

What will substitute for the great private enterprise system we have in the United States if we destroy it?

The answer is that we shall go socialistic or communistic. We will nationalize our industries. The Government will take them over and operate them, because people must have jobs, eat, and buy the necessary things for their living. If we cripple the private industrial system, our people cannot do those

things. Then the Government will have to do it. Is that what we want? Is that what we are looking for? Is that the intention? Is that the idea of the Senate as to the most effective way to meet communism?

Should we educate our American youth to believe that we must adopt this sort of scheme, patterned after socialism and communism? Is that what Senators want to do? Or should we educate the youth of our country to believe that our private enterprise system is better?

I repeat that I am in favor of prosecuting anyone, big or little, who violates the laws. That statement goes for the steel companies or any other company.

Beyond that, have we any authority under our system of government? Have we any responsibility beyond that under our system of government? Why do we not let business conduct its own affairs? Why do we not let labor organizations conduct their own affairs? Why do we interfere with collective bargaining? Where do we think we shall end? When will we stop doing this sort of thing?

Why do Senators feel that we can defeat communism if we constantly harass the system opposite to communism, which is the private enterprise system?

How shall we teach nations throughout the world that we have the best system when we are constantly beating its brains out?

How can we expect the youth of America to believe in our system if Members of the U.S. Congress are constantly beating its brains out? How do Senators expect us to teach the other nations of the world to adopt our free enterprise system, our kind of life, if we constantly talk about it, condemn it, and throw roadblocks in its way? Where do we think we are going?

I am a private enterpriser. Does the Senate know why? Because it is the best system in the world. I make no apologies for being a private enterpriser in every sense of the word. It is private industry that furnishes jobs. We should pass laws to protect labor, management, and ownership. We must guard one as jealously as we guard the other. We ought not constantly to take sides, taking the part of one against the other.

I have been a Member of this body for 17 years, and I have continually observed the process. Too many people take sides.

I learned as a young salesman that I was never able to sell a man who did not have any money or who did not have a job. If he had a job or if he had money I was able to sell him. But if he did not have a job I could not sell him anything. How can we operate the private enterprise system without providing jobs in private industry? Of course, one can work for the Government. Our Government costs are going up and up.

We should be ashamed of ourselves for talking about private industry raising prices and raising costs, when constantly the cost of Government is going up every day. New schemes for spending money and new schemes for competing with private enterprise are always being brought forward. All these schemes require taxes to pay for them.

We should stop putting roadblocks in the way of the great American free enterprise system. I am not now in any sense defending a violation of laws. I am not in any way defending monopolies. I am saying that if we can talk about the steel industry and talk about controlling its prices, we can do it with respect to every other industry in America.

My closing plea is, Let us stop it. We either believe in our system and our kind of life and our economy, or we do not. The time has come when the American people should make up their minds whether they believe Congress and the Government should promote the private enterprise system, the free competitive system, as we have it in America, or whether they want us to become a socialistic or communistic nation—by whatever name we wish to describe it—with the Government constantly getting into the ownership, management, and operation of businesses.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from Pennsylvania.

Mr. SCOTT. Mr. President, I commend my colleagues who have spoken on this subject today for their splendid presentation of facts and figures, which so clearly speak for themselves.

There are just a few points I would like to make in this connection.

A great deal has been said about wages and employment costs in the steel industry, and much of this has been misleading. I hope to help set the record straight.

Now, the distinguished Senator from Tennessee [Mr. KEFAUVER], apparently using Bureau of Labor Statistics figures, said average hourly earnings in the steel industry "run slightly more than $3 an hour," and the October 1 wage increase represents "a basic rise of slightly over 8 cents per hour." He noted that the union estimates the addition of fringe benefits would bring the "total cost effect per man-hour" to 10.5 cents.

These figures greatly understate the steel industry's employment costs for two principal reasons. One, the BLS statistics do not take into account the truly significant number of hours paid for, but not worked. This omission results in a wholly unrealistic picture.

The only really accurate way to determine employment costs is to include this payment for hours not worked. The American Iron & Steel Institute, recognizing the reality of this payment, came up with an hourly earnings figure of $3.35, which reflects honestly the cost per hour worked.

The considerable difference between this sum and the "slightly more than $3 an hour" cited by the Senator from Tennessee is all too apparent.

The second reason the figures quoted by the Senator from Tennessee represent an understatement is that they do not include the cost of such benefits as pensions, insurance, State unemployment benefits and social security. Last year, the cost per hour worked of these benefits totaled 47 cents, again according to the American Iron & Steel Institute. This, added to the payroll cost, gives a total hourly employment cost of $3.82.

And this is the only sum that actually shows how much the steel industry pays on the average for an hour's work.

Now, I would like to point out also that employment cost data for 1960 do not reflect fully the cost effect of the first 2 years of the labor agreements. This is because the 1960 wage increase did not take effect until December 1, 1960. Current costs of the agreement are reflected in an American Iron & Steel Institute estimate for the first 6 months of this year of $3.98 per hour, an increase of 28 cents over the first 6 months of 1959, which were prior to the steel strike.

Another fact too often overlooked in discussions of steel industry wages is that the American steelworker is one of the highest paid industrial workers in this country or anywhere else on earth. According to the Labor Department, which is the only suitable source for interindustry comparisons, fewer than 2 percent of all wage earners in all U.S. manufacturing industries draw more pay per hour than the American steelworker. I might point out that this position of supremacy has not always been held. Steelworkers were topped in pay by 15 percent of other wage earners back in 1940, and their earnings gain since then serves as a graphic illustration of the fact that the steel industry has paid out wages at a rate much greater than that of many industries.

Also highly illustrative of this trend is an article in the September 4 issue of U.S. News & World Report. In stating the "hard facts on steel," the magazine places steel wages at $3.19 an hour and the average factory wage at $2.35 an hour. It also points out that steel wages rose from $1.44 in 1947, a tremendous gain of 122 percent, while all factory workers gained an average of 90 percent. And whereas labor costs increased 112 percent—from $32.47 per ton in 1947 to $68.76 per ton—steel prices rose a lower 106 percent over the same span.

As U.S. News & World Report so bluntly stated, these are the hard facts on steel. But even these hard facts do not tell the whole story of what the steel industry faces in meeting ever-mounting employment costs today. I certainly am not qualified to tell the whole story. But I think perhaps I can draw upon experience to present a small but significant part of that story in a few more minutes here today.

Not long ago I learned that one of our enterprising steel companies completed its planning for major capital improvement. The blueprints were all ready, and the money to pay for their fulfillment was earmarked. The money was to come from two sources: Borrowing and retained earnings. The borrowing presented no great problem. That part

of the total was readily forthcoming. But not the retained earnings portion. Here the company hesitated. With the October 1 employment cost increase looming on the horizon, there was a question whether there would be enough retained earnings available.

The result at this moment is that the company is holding up its planned and needed improvements.

It should be said at this point that industry statisticians estimate that the October 1 increase will cost about $145 million a year from now on. So you can appreciate this one company's hesitation in proceeding with a large outlay at the same time it must assume its share of this staggering burden.

What makes this lone company's situation ironically significant is its relation to the administration's stated wish for modernization of American industry. On the one hand, this business is asked to go ahead and spend heavily for improvement, but on the other it is asked in effect to refrain from earning enough money to do so.

The entire steel industry is urged to make vast outlays for new plant and equipment, and at the same time it is required to absorb a monumental loss of $145 million a year through added employment costs. And it is expected to do both, yet stay as economically healthy as it is today.

This in truth is unfair and unjust to the hopes of those whose jobs depend upon continued and expanding prosperity in the steel industry, to shareholders whose taxes—before and after their returns from their investment—help support their Government and to an industry which is under pressure to absorb added costs. The Government gets added taxes to cover extra appropriations to cover increased costs. Would the Government apply to its business the standards it proposes be applied by private industry?

I thank the distinguished Senator from Illinois for yielding to me.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from California [Mr. KUCHEL].

Mr. KUCHEL. Mr. President, I recall that in the early months of my tenure in the Senate the Korean war had come to its conclusion, and emergency legislation which had prevailed when this country was committed to conflict was expiring.

One of the laws which was ready to expire was the law providing for compulsory Federal wage and price control. I remember that a group of Senators from the other side of the aisle, in good faith viewing the situation as they viewed it, said that the time had come in the development of America when wage controls and price controls should be a permanent part of America's economy. We disagreed. We on this side of the aisle, and many Senators on the other side of the aisle, as well, conceded that in an emergency this country would voluntarily submit itself and its economic system to such restrictions as were necessary to gear the Nation to success in overcoming the emergencies which it faced; but that under no circumstances would we permanently shackle ourselves and place a manacle on the unique free competitive economic system of America, by which 180 million people have grown strong and mutually prospered.

Today, I have listened with great interest to Senators who have discussed the economics and policies of the steel industry. These comments were prompted by the round-robin discussion held on August 22, by some of our Democratic friends. In reflecting on this discussion, I remembered some of the language which was used by Dr. Otto Eckstein when, as Technical Director of the Report on Employment, Growth and Price Levels issued by the Joint Economic Committee, on December 24, 1959, he commented with respect to the general problem of wage and price legislation. I quote from page 437 of that document. Said Dr. Eckstein:

> We turn, finally, to the whole spectrum of potential courses of action which involve a greater or lesser degree of Government participation in the price-wage setting process. Before proceeding with this, however, the point must be emphasized that, as a general rule, there should be a strong presumption against any type of Government interference or control unless the circumstances are such as to make it essential. There is always the danger that the Government participation in the determination of wages and prices will interfere with the proper allocation of resources among industries, will have an adverse effect on the incentive of labor and capital in the industry, and will, particularly in the long run, create more serious problems than it solves.

To his credit, Dr. Eckstein, who believes in and who thereafter discussed the occasional necessity for Federal action in this field, aptly called attention to the hazards of government intervention in our industrial life.

The U.S. Senate is a parliamentary body. It performs a highly essential legislative function. It sits in judgment, together with the executive branch, on matters of the most urgent international and domestic concern.

The U.S. Senate is also a forum. Any Senator speaking in this Chamber, or in the country, speaks with some authority by reason of the title of the office which he temporarily holds. When a Member of Congress speaks, he speaks in a somewhat different manner, and presumably with an even higher sense of responsibility than he did before he came here or after he returns to private life. Thus, when a number of Senators spoke in this Chamber and pointed the finger at the steel industry and said that there should be no increase in the price of steel after the previously agreed-upon wage increase goes into effect in October, and when some "threats," to use the word which the New York Times used, were made in this Chamber, it was somewhat different and far more important than if a group of citizens who were not public servants had made such statements and had suggested such specific courses of action.

For example, one able Senator said that if this increase takes place, perhaps the way to solve the problem would be to make the steel industry of the United States a public utility.

I come from the West—from the State of California, which continues to pioneer. I come from a State which also has a burgeoning steel industry. In the future this relatively new industry will inevitably develop even further in order to meet the growing needs of our people and our economy in the great, farflung reaches of the Pacific coast. I am interested in the future of steel, the well-being of its workers, its stockholders, and all Americans who benefit from a responsible, and progressive industry. I am also interested in the economy of our country, exactly and precisely as you are, Mr. President.

I abhor inflation which eats into the pocketbooks and living standards of every person, young or old, who maintains his life and his livelihood on a fixed income. The American people are vitally concerned with the threat and scourge of inflation. I am hopeful, as I know all of us are, that there will not be an ever-upward spiral of inflation in our country.

But I believe the responsibility for inflation and the problems of the steel industry are not as simple as was suggested the other day by our colleagues. Let us explore for a moment the editorial published in the New York Times on August 24, which reads in part:

> In the case of steel, for example, there is not only the elementary competition of different producers and sellers, but also the competition to steel from other metals and plastics, and the significant competition given domestic steel by imports of foreign steel. The steel company executives, wondering whether to raise prices to compensate for the next wage increase, have, we suspect, a much more complex problem before them than Senator GORE suggests.

I agree. We are discussing far more than the simple question of what decision the management of one industry in the United States will or will not make. We are discussing the industrial practices and the economic future, at home and abroad, of not only the steel industry, but of those industries which are competitive and related to it. But the effect of our action is broader than this.

Mr. President, I listened with keen attention to the remarks made by the able minority leader, the Senator from Illinois [Mr. DIRKSEN]. Certainly it is true that if, by threats and intimidation, speeches made on the floor of the Senate can affect the setting of prices in our country, then those speeches and those threats will have performed a disservice to the system of free, competitive enterprise in the United States of America. Such conditioning is a two-edged sword. If we condition prices today, we must inevitably condition wages tomorrow. To do either is to violate the spirit of decisions voluntarily arrived at by free collective bargaining and the interplay of a free economy. To do either, without a compelling and overriding grave

national emergency, is to sell short the sense of public responsibility of both management and labor. The New York Times editorial also noted:

Fundamental issues are raised by the campaign against a steel price increase that has been started by Senator GORE and some of his senatorial colleagues. These Senators are determined to prevent the steel industry from raising its prices after October 1 although the industry is committed to giving its unionized workers a significant wage increase then.

The scheduled wage increase results from a steel labor settlement imposed by the Eisenhower administration, acting through Vice President Nixon. Nevertheless, Senator GORE is threatening the steel industry with a deliberate Government campaign to break its large units up into small rival companies, or with imposition of public utility type Government price fixing if it raises prices.

If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequence could be a great change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

Mr. President, I ask unanimous consent that the entire text of the editorial be printed at this point in the RECORD, in connection with my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 24, 1961]

PRICE FIXING IN CONGRESS

Fundamental issues are raised by the campaign against a steel price increase that has been started by Senator GORE and some of his senatorial colleagues. These Senators are determined to prevent the steel industry from raising its prices after October 1 although the industry is committed to giving its unionized workers a significant wage increase then.

The scheduled wage increase results from a steel labor settlement imposed by the Eisenhower administration, acting through Vice President Nixon. Nevertheless, Senator GORE is threatening the steel industry with a deliberate Government campaign to break its large units up into small rival companies, or with imposition of public utility type Government price fixing if it raises prices.

If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequence could be a great change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

However, it must be recognized that the sentiments Senator GORE and his supporters are voicing can ultimately be traced back in part at least to a conviction or suspicion that price setting in too much of American industry today reflects little or no real competition. While that sort of thinking has been around for many years, it received a strong acceleration from the shocking disclosures several months ago resulting from the Government's case against the electrical equipment industry. The collusion in price setting and division of markets there revealed was not only a betrayal of the elementary ethics the community expects of businessmen, but was a damaging blow to respect for the private-enterprise system.

Yet despite the electrical equipment case and other examples of formal or informal collusion in setting prices, competition is probably a much more real force in the American economy than Senator GORE believes.

In the case of steel, for example, there is not only the elementary competition of different producers and sellers, but also the competition to steel from other metals and plastics, and the significant competition given domestic steel by imports of foreign steel. The steel company executives, wondering whether to raise prices to compensate for the next wage increase, have, we suspect, a much more complex problem before them than Senator GORE suggests.

Mr. KUCHEL. Mr. President, I do not pose as an economist. I am a consumer, as you are, Mr. President, and as are all the rest of the people of the United States. We do not want inflation to occur in our country.

Mr. President, you and I, as U.S. Senators, have voted—as we would vote again—for increased appropriations from the Public Treasury for the defense of our country. With inadequate revenues such increased expenditures can have serious effects insofar as inflation is concerned.

Mr. President, as I close, I suggest that the Government might well set an example and take the lead in getting its own house in order. This determined action would be a marked and major contribution to the control of the unhappy and unfortunate inflationary spiral in present-day America. Such an example of fiscal responsibility and fiscal integrity would have the gratitude of us all.

Mr. HRUSKA. Mr. President——

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from Nebraska.

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). The Senator from Nebraska is recognized.

Mr. HRUSKA. Mr. President, the steel price discussion which began here in the Senate on August 22, presented in a political setting a complicated subject in economics.

The political part of the debate is understandable in this body. In fact, it is a routine situation; and it is well that such a forum as this exists. Every day of the year, one brand of politics or another is exhibited on the floor of the Senate, as well as in its committee rooms and elsewhere in the vicinity.

As to economics, however, it should be recognized that any attempt at control by parliamentary debate just will not work. This will not be achieved even by formally enacted statutes.

Insofar as such debate engages in threats, intimidation, and attempted coercion, it is not in order. In fact, it is harmful. The same holds true as to threats which emanate from the executive branch.

We can all be in agreement that a steel price rise is not to be desired. It can have harmful impact in many ways.

But there should also be common agreement that the Senate floor is no place to decide whether a price increase should or should not be made. The factors bearing on that subject were made elsewhere. So will the decision.

PRICE FLEXIBILITY AND COMPETITION IN STEEL

The broadside manner in which the discussion against a steel price rise occurred apparently left only one thing to be desired in the minds of many who engaged in it—namely, the determination of Congress by talk or by law, to forbid the prices of certain products to increase, and preferably to reduce them.

If only oratory were able to hold in abeyance the operation of certain economic factors and principles, the result of preventing price increases of steel would be assured.

If only oratory could selectively emphasize certain desirable phases of the problem, and could ignore or destroy factors, some of which are ugly, but inescapable, the mission of the orators would be easy of achievement.

Fortunately, however, the price of steel, as well as the prices of other commodities, will be determined in the marketplace, not on the floor of the Senate. Not only is that inevitable, it is desirable. The subject is far too complex and dependent on too many matters to permit of any readymade legislative decision.

This complexity is quite easy to appreciate when we consider a relatively simple proposition of whether the price of steel should advance or retreat when demand for it exceeds the supply.

Two conflicting views on this subject by Members of this body were recently expressed.

One of these views is held by the distinguished senior Senator from Tennessee, who has spent a great deal of time and effort in his study of competition with particular reference to the problems of the steel industry. As chairman of the Senate Antitrust and Monopoly Subcommittee, he had an opportunity to review the price policies of that industry during its study of administered prices.

In the spring of 1958, he formulated the concept that prices should decline when demand falls off. During the course of extended discussion of the steel industry on the Senate floor on August 22 of this year, he made some additional observations which are found in the CONGRESSIONAL RECORD, and I shall quote directly from his remarks:

When demand is in excess of supply, it is of course anticipated under competitive conditions that prices will rise. Moreover, if there exists a price leader in the industry, a plausible argument can be made that the other producers will not charge more than the leader, and, since they can sell all of their output at the higher price, none will charge less. But this rationale ceases to have validity when there exists a substantial volume of excess capacity. During a buyer's market, producers in an industry such as steel would have a strong incentive to try to get additional orders, thereby increasing their volume of production, and thus their profit rate. Nonetheless, the price of steel has been increased during each

of the three postwar recession years, 1948, 1954, and 1958.

The conclusion drawn by the Senator from Tennessee [Mr. KEFAUVER] is that during a buyer's market, prices should decline.

Mr. President, the other of the two schools of thought on how prices should vary over the course of a business cycle was stated by the distinguished senior Senator from Missouri [Mr. SYMINGTON], who has spent many years of his life in the conduct of successful manufacturing enterprises, and who made some interesting observations during the course of the same debate. I shall once again quote from the RECORD:

My point is that, inasmuch as we know we are entering a recovery and we know, therefore, that any theoretical estimate of fixed overhead per unit of production, as volume increases, will be reduced: therefore, an amount of the estimated overhead will actually turn into profit.

I am sure that my distinguished and experienced friend from Illinois would agree, with his vast knowledge of the subject of economics.

The point I want to make is that, whereas there might be some justification, if business were sliding off in any serious fashion, for raising prices, there is no justification to raise prices when there is assurance of at least as much, if not more, future volume.

The conclusion drawn by the Senator from Missouri [Mr. SYMINGTON] is that during a period of greater production and demand, prices should decline.

Mr. President, it is difficult to reconcile the views of two of my esteemed colleagues. Is there any time that prices should rise? Evidently, the colleagues whom I have just quoted think not. Apparently, in spite of a general inflation in the economy and rising costs in the steel industry, there is never a time when an increase in steel prices is warranted.

If demand is below capacity—and peak capacity must be in excess of demand most of the time if it is to be sufficient to meet the peak demands of the economy—some Senators say that it is against the laws of economics for prices to go up, and accuse the industry of monopoly practices. If demand pushes the capacity of the industry, the Senators say the steel producers make so much profit that they do not need price increases and should restrain themselves.

The law of supply and demand is a two-way street, except in the view of some Senators, who seem to believe that it should operate always to force prices down and keep them down. If the law did operate in this fashion, any business, whether a steel company, a hardware store, or a drugstore faced with constantly increasing costs would sooner or later become bankrupt.

Irrespective of our personal views, however, we must recognize that, in our competitive system, prices of steel are not determined on the Senate floor, but in the marketplace.

IS THERE COMPETITION?

The question we should be directing ourselves is: Do we have competition in the steel industry today? Evidently the Senator from Tennessee [Mr. KEFAUVER] thinks not, for a good portion of his remarks made on the Senate floor on August 22 suggest that the steel industry is in violation of a consent order entered into between the steel industry and the Federal Trade Commission in 1951, which prohibited, and I quote from Senator KEFAUVER, "any planned common course of action, understanding, or agreement to adopt, establish, fix, or maintain prices." He alleges that "the steel price increases can be explained only as a result of such prohibited conduct."

His obvious conclusion: We do not have competition in the steel industry, and the price increases prove it.

I submit that the facts show differently. There are many forces of competition at large in the steel world. Several have already been referred to. I shall mention a few.

COMPETITION OF FOREIGN IMPORTS

First, let us look at the competition from foreign imports. On August 14 of this year Mr. R. Conrad Cooper, executive vice president of United States Steel Corp., testified before the Subcommittee of the Impact of Imports and Exports on American Employment of the House Committee on Education and Labor. He stated that domestic steel companies have many more world competitors than ever before. I read:

Since 1950 steel ingot production in the rest of the world has been increasing rapidly—much more so than in the United States—with the result that the U.S. share of total world steel ingot production has declined by nearly one-half, from 46 percent to 26 percent. Paralleling this development, the tonnage of steel exports from the United States declined from 15 percent of world steel trade in 1950 to only 7 percent in 1960, while steel imports into the United States increased from 1½ percent of domestic supply in 1950 to almost 5 percent in 1960.

On September 4 the Washington Post carried a story on the proposed steel price increase and quoted from the Steel Magazine to the effect that imports of steel products jumped to 227,000 tons in June—the highest level in 14 months—while exports slipped to 146,000 tons.

My distinguished colleague from Tennessee has recognized this type of competition from foreign steel producers, and the steel industry is well aware of its existence. There is no doubt that the problem is one of growing intensity—a problem that steel companies are determined to meet and are facing up to with competitive vigor.

DECLINING PROFITS SHOW COMPETITION

Second, let us look at profits. Do profit figures indicate a lack of competition?

The concluding statement in Steel Facts on profits states:

The rise in the profit rate in relation to the operating rate can only mean that prices have risen more than costs.

In reality, if one would examine the facts that have been made available to the subcommittee and which appear in the record of the subcommittee, one could only conclude that the facts are "upside down." If the facts indicate any trend, they indicate that costs have risen more than prices.

PROFITS BASED ON NET WORTH ARE MEANINGLESS

There has been a considerable amount of discussion to the effect that profits should be based on net worth. That is an idea we have encountered from time to time in the Antitrust and Monopoly Subcommittee. I want to say, as I have said repeatedly, that the calculation of profits based on net worth is meaningless. It is misleading.

It is alleged that since 1955 the steel industry profit rate of return on net worth has risen above the historical relationship. The only thing historical about such a trend relationship is the dollars of net worth on which the whole spurious calculation is based—and this historical basis of net worth is precisely what discredits the measurement. This was pointed out by the steel companies to the Senator from Tennessee [Mr. KEFAUVER] in great detail as far back as 1957, but somehow these misleading data keep turning up.

Profits expressed as a rate of return on net worth are a meaningless measurement in an industry heavily invested in long-lived facilities, such as steel, because profits are recorded in current-day dollars and net worth is based on dollars invested in facilities many years ago before much of the inflation in the last two decades took place.

A simple illustration will show why and how much this basis can overstate profits rates. Suppose 20 years ago a steel company had a million dollar investment or net worth, and sold a million dollars of steel and made a profit of $50,000. That profit was equal to a 5 percent return on investment and 5 percent return on sales. Then inflation pushed costs and prices up 100 percent. Now they do the same business, but their sales are $2 million, and if they still earn 5 percent on sales, they have a profit of 100,000 inflated dollars. But their investment, which turns over very slowly, is still valued on their books at not much more than the original, historical $1 million. Thus it appears that their rate of return on net worth is almost 10 percent—the illusion of inflation.

Such a calculation of return on investment is known in statistical circles as a "horses and apples" comparison. To see how unrealistic a 10-percent return on investment in the steel business is today, let us set up a hypothetical business. To build a new fully integrated steel mill would require an investment equal to almost $400 per ton of finished steel product of such a mill. The product might sell for $150 per ton and earn a 6-percent profit or $9 per ton. That $9 is equal to a 2.25-percent return on the investment—not 10 percent or more, as the "Steel Facts" figures indicate.

Even on the basis of such distorted expressions of profit rates, however, steel industry profits compare unfavorably with other industries. For many years the First National City Bank of New York has compiled return on assets data which show those of the steel industry to be consistently lower than average in 17

of the last 20 years, and significantly lower in 1959 and 1960.

Another way to see how overstated is the return on net worth figures is to compare that trend with the trend of return on sales. Expression of profits as a percent of sales avoids the inflation distortion because both factors are recorded mostly in current dollars. Here are some return-on-sales figures to compare with the return on net worth figures provided by Senator KEFAUVER's staff:

Steel industry profits

Year	Percent of sales (AISI)[1]	Percent of net worth (Steel Facts)
1940	8.0	8.2
1950	8.0	15.3
1955	7.8	14.7
1957	7.2	12.4
1960	5.7	7.8

[1] American Iron & Steel Institute.

This tabulation shows how profits, when compared to sales in the same kind of dollars, indicate little trend while the return on net worth figures have been overstated because of their book value basis. The complete tabulation of return on net worth appearing in Steel Facts follows, supplemented by return on sales and production data which provide a less distorted basis of judging steel profit rates on the basis of official AISI data.

As a matter of fact, when all of the years since 1939 are compared on the basis of return on sales, it turns out that in no year have steel industry profits exceeded the rate of return earned in 1940, despite a manifold increase in volume since that time.

The conclusion in Steel Facts that prices have risen more than costs is thus unwarranted. Moreover, the conclusion elsewhere that the steel industry can absorb another wage increase and still earn the same rate of profit turns out to have no meaning at all because the same rate of profit is not based on the same kinds of dollars of investments or profits.

It would seem, therefore, that profit figures, objectively viewed, indicate the presence of intense competition rather than the lack of it.

COSTS OF DOING BUSINESS

Of course, many factors influence the "competitive price" most important of which are labor costs and material costs. An increase of one or more of these factors will, in many instances, affect the price paid in the marketplace.

PRICES INCREASED BY MATERIAL COSTS

Let us examine material costs.

Steel Facts erroneously states:

To the extent that it has exceeded the increased labor costs, the increase in steel prices does not appear to be due, except in small part, to increase in material costs. Most of the materials consumed in the making of steel are produced by the steel companies themselves.

This is a highly misleading statement and does not reflect the actual facts. The bill for purchased products and services in the steel industry ranged between $6 and $7 billion during each of the past 5 years and represented between 42 and 45 percent of the sales dollars. It is the largest element of cost in the steel industry. By comparison, employment costs as a percent of sales dollars have ranged between 35 and 39 percent during the past 5 years.

Over the long term, substantial increases have been experienced in both of these major cost elements.

Prices of a large number of purchased items have increased significantly over the past several years, for example:

April 1961—Percent increases[1] over December 1956

Coke	9.02
Electric power	8.70
Lubricating oils	12.17
Explosives	13.53
Ferrosilicon	8.21
Power handtools	11.68
Small cutting tools	16.12
Precision measuring tools	12.42
Electrical instruments	21.10
Pumps	12.75

[1] Computed from BLS indexes of wholesale prices.

The continually rising trend of prices of such major items of cost to the steel industry as fuels and rail transportation is of course well known to all of us.

My distinguished colleague, Senator GORE, stated in his remarks on the Senate floor August 22:

Competent studies have shown that during the period 1947 to 1958, 40 percent of the rise in the wholesale price index was due to the fact that steel prices were pushed up faster and further than the average of all other commodity prices.

This seems to be an impressive statement—but it does not tell the whole story. It is true that steel prices have increased more than average from 1940 to date but why have they increased? Not because of increased profits for profits have declined.

Let me quote from Professor Livernash, of Harvard, who prepared a report for the Department of Labor and published by then Secretary Mitchell in January 1961. This is what he said on page 177:

Increases in steel prices have been caused primarily by cost increases. The size of steel price increases differs from those of many other industries because of the fact that steel has had substantial increases in material costs. * * * Obviously, while price policy can be debated in the short run, in the long run all cost increases must be met. Steel has done no more than this. But to cover its cost increases in the postwar years it was necessary for steel to increase its profit margins if its rate of return on capital were to be comparable with the return on American capital generally.

LABOR COSTS

What about labor costs? There has been much discussion about labor costs during the course of this afternoon's discussion.

Steel Facts states that the impending wage increase in the steel industry represents a basic rise of slightly over 8 cents per man-hour, and when fringe benefits are considered, the total cost effect, according to an estimate of the union, will be 10.5 cents per man-hour.

When the labor contract was signed in January 1960 the total cost of the three increases to become effective under its provisions was estimated at 39 to 41 cents per man-hour worked, or an average of between 13 and 14 cents per increase. It should be noted that the 41-cent estimate was adopted by the union representatives, including Mr. McDonald and Mr. Goldberg.

Steel Facts further states that the increase that went into effect last year makes a total for the 2 years of around 20 cents. This completely ignores the fact that there was a significant increase in employment costs in January 1960 as well as to the increases in wage and other costs effective December 1, 1960, and October 1, 1961. Employment costs were substantially increased in January 1960 as a result of the contract provisions with respect to pensions, insurance, and supplemental unemployment benefits.

The American Iron & Steel Institute estimates total employment cost per hour for the first 6 months of 1961 at $3.98. This is an increase of 28 cents over the $3.70 per hour reported for the first 6 months of 1959, prior to the steel strike, which of course substantially exceeds the 20 cents contained in Steel Facts.

In addition, Steel Facts by using 3 percent per year as an estimate of increases in productivity, implies that the total of the cost increases under the contract is almost entirely offset due to this factor. However, the "productivity"—more accurately "output per man-hour"—increase of 3 percent a year is greatly overstated. Over the period 1940 to 1960 steel industry shipments per man-hour increased at the compound annual rate of less than 2 percent, which is substantially less than the claimed 3 percent and less than half of the 3.7 percent annual increase in employment costs under the present labor contract cited in the Basic Steel Industry issued by former Secretary of Labor Mitchell.

SUMMARY

Mr. President, I submit that with foreign competition, with increased costs in both labor and materials, resulting in lower profits, there is strong evidence of intense competition in the steel industry—and as long as competition exists, we as legislators have no business substituting our judgment for the judgment of those in the industry as to what the price of steel should be. The price is determined in the marketplace. Of course, none of us likes to see a rise in prices. But as one steel executive put it, rising prices are merely the measure of inflation, not the cause of it, "rising prices cause inflation like wet streets cause rain."

The Senator from Tennessee [Mr. KEFAUVER], in his argument on August 22, stated there must be a violation of the Federal Trade Commission consent decree by the steel industry:

It should be stressed that the evidence which I shall present concerns price increases, and does not relate to other types of identical price actions. When one firm lowers its prices, it is often necessary for its

competitors to lower theirs, in order to meet competition. With a fine disregard for logic, the same rationale is used for price increases; prices must be raised, it is contended, in order to meet competition—a type of action referred to by former Senator O'Mahoney as "upside-down competition."

Later in his remarks, the Senator from Tennessee [Mr. KEFAUVER] alluded to the testimony of Mr. Homer, president of Bethlehem Steel Corp. as the source of the "upside-down competition" principle. During the hearings which the subcommittee conducted on steel, former Senator O'Mahoney asked Mr. Homer:

I have often heard persons who represent management speak of the necessity of following the price up in order to maintain competition. That seems to me to be a peculiar definition of competition.

The answer given by Mr. Homer, from the hearings was this:

On your first point, regarding putting prices up to meet another price, our situation today, as I have explained it, is that we have a competitive price level. And even putting a price up to that level on account of increases in costs does not by any means give us the equivalent of the increases in costs. And the price level also is below an average rate of return for manufacturing industry, so that we do not have today in the steel industry the situation that one might suppose from your comments to exist, which is that we have a high profit level and that everybody comes up to that high profit level. We do not have that.

We are forced by costs, or else we get into difficulties as I have explained in my opening statement to come up to the level that exists today.

Now, I am quite in accord with what you say about inflation. We are just as much concerned with inflation as anyone. We are very seriously affected by inflation.

Senator O'MAHONEY. But if the average rate of profit for all industry should happen to be an excessive rate, then the action of a particular unit in the industry to strive to get to that high excessive rate of profit would not be in the public interest, nor would it be in the interest of that unit, assuming, of course, that the unit was already making some profit.

Mr. HOMER. Well, I think, Senator, you have a good point there. If your average profit is in line with the average, then you are in a position to do the many things that you have to do in connection with your financing, your stockholder situation, you are on a comparable basis.

Senator O'MAHONEY. I was told——

Mr. HOMER. If you go above that, Senator, if you go above that, then maybe there is not justification for it and someone will come along and just say, "Well, I am going to go out and take business at a lower price than what you are."

What do you do then? You come down to that established competitive figure, and somewhere it seeks its level. And our level today, in my opinion, it is not high enough. I do not think we are up to where we ought to be. * * *

It is obvious that when a company can recover its costs competitively it must increase its price—but it must be reasonable—or his competitor will undersell him. To suggest that this type of activity is noncompetitive is sheer folly. It is because of competition that it exists.

Earlier today, Mr. President, commendations were given by my colleagues to the senior Senator from New York [Mr. JAVITS] for his reply and refutation of the discussion which occurred a few weeks ago on the other side of the aisle. I wish to add my commendations to those of my colleagues.

In particular, what impressed me in the thoughts expressed so ably by the Senator was his reference to and his description of what really constitutes business. Along the same lines, Mr. President, I might observe that there is "business" and there is "funny business."

I recall the hearings held by the Subcommittee on Antitrust and Monopoly earlier this year. Witnesses testified regarding conspiracies and agreements to fix prices in violation of the antitrust laws of this country. Great was the exhilaration of certain members of the committee when it was announced in the newspapers that current prices were to be reduced on various classifications of electrical equipment or particular pieces of equipment. It was felt by everyone that the policy of the administration was to help reduce prices—certainly not to increase them. That is, at least, the contention of our colleagues on the other side of the aisle.

It did not take very long for that exuberance to become somewhat diminished, however, as it came to our attention, both individually and officially, that another department of the administration was taking a totally different tack. The Antitrust Division of the Department of Justice, in dealing with the same electrical companies which had sent witnesses to our committee, insisted that the companies include in the consent decrees which followed the prosecutions of last year a provision that they would not sell at unreasonably low prices. The Government did not undertake to and did not volunteer to include any definition of what was unreasonably low, nor were there furnished any guide lines, any standards, or any indication as to what that would be.

Within the same organization, on the one side were people saying, "We want to reduce prices," and on another side, "You must not sell too cheaply."

There is business to be considered, and also funny business.

I think that incident demonstrates the complexity of the entire subject and our inability, certainly by parliamentary debate, to establish prices or to restrict an increase of prices.

The Senator from New York [Mr. JAVITS] was correct when he expressed himself on the subject of business. He was correct when he said that labor is not only the 17 million or 18 million members of the labor unions. That is the common concept of labor, but actually labor includes some 60 million or 65 million jobholders in the Nation.

When we consider business, what is it? What is meant when it is said that a party or an individual is antibusiness or probusiness? Frequently we have heard the majority party accused in recent months of being antibusiness. If it is, or if the charge is leveled against anyone, what is it that is being talked about? Is it an opposition or a hostility toward investors, toward a person who manages a business, toward an owner or a stockholder or a coupon clipper?

How narrow a concept. Business includes many others besides such people and those interests. It includes the jobs which business creates and maintains, the articles which it manufactures and makes available for the use and enjoyment of the greatest number of consumers possible, the service it renders for those same people, and the expansion of plant and many other things which go into the concept of business.

In that sense I certainly wish to be known and to be classed as probusiness. Everyone should.

I return to my original thesis, Mr. President. If there is to be any steel price increase, that is a subject which ought to be decided elsewhere than on the floor of the Senate. The factors which relate to price increase or which enable a price reduction are not made here. They are not within the control of this body. Therefore, the question of price should likewise be left to the marketplace and to the other areas where all the factors arise or are created or maintained.

Mr. President, I thank the Senator from Illinois for yielding to me.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from Colorado [Mr. ALLOTT].

Mr. ALLOTT. Mr. President, my remarks on this subject will be brief. In general, I wish to associate myself with the remarks of my colleagues. At this stage in our economy I think we would make a very serious mistake to adopt the philosophy which our friends on the other side of the aisle apparently have adopted. Being only a plain country lawyer, I find it impossible to go through the mental gyrations or adopt the so-called intellectual acrobatics by which they and the administration have arrived at their position. I do not pretend to know, and I do not believe that any other Senator, including those who spoke either on August 22 or today knows, whether or not a price in steel is justified. Only the companies who have control of their own affairs, accounts, and records, are able to say whether or not a price is truly in fact justified.

What I am concerned about is the apparent trend in this country to influence the price of steel by means of political pressure, and even by means of threats of prosecution. To me it is unthinkable that in this country we should come to the stage that anyone would threaten an antitrust suit, with its almost inevitable resultant criminal prosecutions under the antitrust laws, in order to fix the limits within which anyone may charge a price for his products.

I have before me numerous editorials. I wish to quote an editorial by Freeman Bishop of the 28th day of August, in which he stated very clearly:

These discussions on the floor of the Senate showed little understanding of business principles.

I could not agree with him more, because I do not know how we can possibly

start to fix the prices that people charge for their products without eventually fixing wages. I do not believe that the Federal Government should engage in fixing wages. Neither do I believe that the Federal Government should engage in fixing the prices of products. Of course, there is justification for this when we find ourselves in a war or in an acute national emergency. But there is no justification for it under the present circumstances.

As I recall my figures, two times steelworkers have been granted a wage raise without an increase in the price of steel following such an increase in wages. Somewhere along the way, if we are to justify the wage raises, and if we are to accept the principle of free enterprise—and let no mistake be made; I believe in the principle of free enterprise—there will come a rise in the price of the resultant product.

Earlier today Senator after Senator pointed out that the greater portion of the cost of production is the expense of wages. I have no quarrel with that argument, but I believe that the Government's function, and its only function, in the field of labor relations with respect to negotiations between labor and management is to provide the laws and the climate in which both labor and management can negotiate in a pari manu fashion, with their hands on the table where everybody can see them.

When the Government goes beyond that point in attempting to exert pressure on either one of the other, I think it exceeds its rightful authority. I did not agree with the intervention of the Government in the steel strike of 2 years ago, although I realize also that the repercussions of that upon the national economy were very great. In my own State we have one steel company—the Colorado Fuel & Iron Co. That company accounts directly for the support of at least 45,000 people in the city of my birth—Pueblo, Colo. I cannot fail to be impressed and concerned by policies which affect the welfare of those people.

As I have said, two wage increases, with another coming up in the steel industry, have occurred recently without a raise in the price of steel.

I do not contend that we know, and I do not contend that I know what the price should be. I should like to quote from an editorial published in the Washington Post, which, we certainly know, can hardly be classified as a free-enterprise newspaper or as one which is anti-labor. The editorial which appeared on August 30, 1960, stated in the last paragraph:

> Since the coming wage increase is fixed by contract, the next move is up to the companies. Hence public suasion must necessarily be directed at them. But, in the longer run, policymakers cannot disregard the fact that profits are a small part and wages a large part of the price of steel and everything else. Arguing with the tail helps little if the dog will not also listen. Public suasion can help to keep prices in line only if it is directed at labor as well as management.

In this morning's issue of the Wall Street Journal, an article appeared which has caused me to become alarmed at the policy which the President and the Secretary of Labor of our country are pursuing, a policy which Members of the opposite party have recently pursued on the floor of the Senate. In the article by Frederick Taylor, of Detroit, published in this morning's issue of the Wall Street Journal, appears the following:

> DETROIT.—General Motors Corp. bowed to Government pressure and a stubborn United Auto Workers Union and granted the union its chief demands.
>
> This was becoming increasingly clear as details became known of the significant progress made at the bargaining table which led to an extension of GM's labor contract with the UAW until next Monday at 10 a.m. The extension makes it highly unlikely that there will be a national strike in the auto industry this year, although local walkouts involving a fraction of GM's 310,000 workers started yesterday.

A little later in the same article the author stated:

> But a broad walkout at GM plants proved unnecessary for the union to win its key demands. The two sides negotiated continuously for more than 18 hours, starting Tuesday morning. While in these talks, they were hit by telegrams and statements from the White House and the Labor Department which implied, to the auto companies at least, that the Government was ready to step into the negotiations if a national GM strike started.

A little later in the article it is stated:

> The Government has played a prominent role throughout the negotiations, starting with a speech by Secretary of Labor Goldberg in Detroit just before bargaining started June 28. He warned that a strike would be "intolerable" and ending with President Kennedy sending telegrams to both the union and the company Tuesday. Mr. Kennedy appealed for a "just settlement" before the deadline yesterday morning. In between William Simkin, director of the Federal Mediation and Conciliation Service, requested the contracts be extended from August 31 to yesterday morning, and Mr. Goldberg made several speeches warning of the danger to the economy an auto strike would cause.
>
> Company officials, though denying that the latest contract extension was ordered by the Government, are known to have feared that if a walkout did occur the Government would move in with a factfinding committee or take some other action to settle the dispute. They believed GM would be better off to settle without the Government sitting at the bargaining table.

This is another example of what I believe to be a clear abuse of the Federal Government's participation in these affairs. It is not understandable to me, unless we are actually abandoning or have abandoned the free enterprise system. I am not willing to abandon it, and I am not going to stand by for one minute to see it cast aside. The Government would wage this force and would use these pressures in order to force one side of these two great elements in our economy to give in to the other.

It has been suggested that this arrangement is in the form of a trust. With that I heartily disagree. If there are Members of the Senate who believe that the steel industry is not a competitive industry, I ask them to join me in talking with officials of the Colorado Fuel & Iron Co. in Pueblo, Colo., which, as I said a moment ago, supports roughly 45,000 or 50,000 people in that city, and find out just how competitive the steel industry is. But these people are governed by all of the negotiations of big steel and all the things that happen to big steel, whether it be with respect to a labor contract or whether it be with respect to prices.

I want to make my position in this matter crystal clear. I believe that the position of the Federal Government with respect to management and labor relations is solely to provide the laws and the climate within which people can bargain in a fair hands-off-the-table attitude. When the Government and members of the opposite party assume an attitude that one or the other must assume all the burden for the constant rise in costs, we have exceeded our authority. This is not a question that should be settled on the floor of the Senate. There is competition. Again, I invite those who think not to join me in consultations with the Colorado Fuel & Iron Co., this comparatively small, although significantly large-for-the-West, company which is trying so hard to keep its head above the water and to provide a decent and adequate living for the people of my State, to further the economy of the State, of the West, and of the Nation.

The real issue is whether we are to use threats and coercion on the floor of the Senate, and/or whether we are to use threats and coercion from the executive branch of the Government. In my opinion it is highly improper and completely repugnant to the concept of free enterprise.

Moreover, it is morally unjustified. If we yield to it and allow it to happen now we can only go the long step down the road to surrender many of the rights which we consider sacred and which in the long run would keep the economy of this country prosperous, vital, and forging ahead.

Mr. DIRKSEN. Mr. President, I yield to the distinguished Senator from New York [Mr. KEATING].

Mr. KEATING. Mr. President, I read with interest the arguments a few days ago of my distinguished colleagues who are concerned about a possible increase in the price of steel and basic steel products.

I want to say categorically that I agree 100 percent on the fundamental need to study and evaluate potential inflationary forces in our economy.

I wish to depart slightly from the general approach which has been made today to this steel problem. I, too, am worried about inflationary forces in our economy that have been poking their ugly heads up lately, including the possibility of steel price increases; but also including even more serious forces, such as the projected $8 to $10 billion deficit in the Federal budget for fiscal 1962 and the subtle weakening of our international balance of payments.

I wish some of the Members who have taken such a vital and personal interest in steel prices would take an equal interest in the overall condition of our Federal budget. I think it is extremely dangerous for our country to ignore the need

for a balanced budget and for sound and responsible fiscal policies.

Facts about a possible steel price rise should be on the record. Much useful information has been provided, but there are other factors too. We must not lose sight of the forest because we have concentrated an overriding interest on one particular tree.

It should be noted that on page 16712 of the RECORD of August 22, I raised a question with my colleague Senator HUMPHREY on the subject of a possible steel price increase. The distinguished Senators discussing this subject had pointed out the profit rates of the steel industry at various operating levels. Information was provided for operations at 90 percent of capacity, 80 percent, 70 percent, and, I believe, 60 percent of capacity. The discussion stopped here. Thereupon, I asked the distinguished senior Senator from Minnesota, who had the floor, about the rate of profit in the steel industry at 50 percent of capacity. It is my recollection that during the recent months the industry, or a large segment of it, has operated at this level or below.

The Senator from Minnesota did not have this information available and said he would provide it for me. As I am very much interested in this subject, I addressed a letter to the Senator in which I reminded him of this query. I stressed my desire to work with him in curbing other potential inflationary forces that could affect our economy. I shall be happy to cooperate with the Senator in keeping a vigilant eye on the steel industry. I urge him to work with me, and others of our colleagues, in keeping the other eye on the Federal budget, a truly significant inflationary force that also bears watching.

I wish to make one point on steel price policies. While we in Congress can and should be concerned about broad Federal fiscal policy decisions which affect the price level, individual prices within our economy cannot be set, directly or indirectly, by the Senate of the United States. I call attention to a comment in an editorial on this subject which appeared in the New York Times. The entire editorial has already been printed in the RECORD, but I stress again that the Senate Chamber is not the marketplace.

I quote from the editorial:

> If the price of steel is to be determined by speeches and threats on the Senate floor, then a precedent has been set whose final consequences could be a great change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace, and reflect the force of competition among buyers and sellers. The Senate floor is not the marketplace.

The role of the Government in our economy is clear and well recognized. As far as the steel industry is concerned, it does not include price setting, price fixing, or any such function. The Senators who spoke the other day on this issue, of course, know this, but their comments and the main thrust of their arguments do not adequately reflect it.

There are some economists—and I disagree with them—who believe that inflation is just one of those things. They say it comes and it goes. Like a mosquito bite, there is not much we can do about it. This is a dangerous line of reasoning. Inflation tends to feed upon itself. It places a heavy burden upon the income of wage earners and pensioners whose earnings and pensions are relatively steady. It helps those who can speculate on the success of our economy, to make unwarranted gains at everyone's expense. If permitted to continue unchecked, it can bring about the gravest consequences.

It is for that reason that I am compelled to oppose Senators who spoke the other day and, very properly, called attention to the inflationary problem involved in a rise in the price of steel, which affects so many commodities. I appeal to them to join those of us who also have an eye on the problem, to attempt to achieve a balanced budget, to keep outgo within income in the structure of the Government, which today is a vastly greater and graver inflationary problem than would be even a rise in the price of steel.

Mr. MILLER. Mr. President, fundamental issues are raised by the campaign against a steel price increase that has been started by this administration, which is determined to prevent the steel industry from raising its prices after October 1, although the industry is committed to giving its unionized workers a significant wage increase then.

The scheduled wage increase results from a steel labor settlement during the Eisenhower administration, acting through Vice President Nixon. Nevertheless, the administration is threatening the steel industry with a deliberate Government campaign to break its large units up into small rival companies, or with imposition of public-utility-type Government price fixing if it raises prices.

If the price of steel is to be determined by speeches and threats on the Senate floor and by press releases from the White House, then a precedent has been set, the final consequence of which could be a fundamental change in our economic system. The private-enterprise system operates on the assumption that prices should be set in the marketplace and reflect the force of competition among buyers and sellers. The Senate floor and the White House are not the marketplace.

However, it must be recognized that the sentiments being expressed by some administration spokesmen can ultimately be traced back in part at least to a conviction or suspicion that price setting in too much of American industry today reflects little or no real competition. While that sort of thinking has been around for many years, it received a strong acceleration from the shocking disclosures several months ago resulting from the Government's case against the electrical equipment industry. The collusion in price setting and division of markets there revealed was not only a betrayal of the elementary ethics the community expects of businessmen, but was a damaging blow to respect for the private-enterprise system.

Yet despite the electrical equipment case and other examples of formal or informal collusion in setting prices, competition is a much more real force in the American economy than these spokesmen believe.

In the case of steel, for example, there is not only the competition of different producers and sellers, but also the competition to steel from other metals and plastics, and the significant competition given domestic steel by imports of foreign steel. The steel company executives, wondering whether to raise prices to compensate for the next wage increase, have a much more complex problem before them than most people realize.

Steel production facilities require vast investments and a considerable amount of time to build. They cannot be created overnight to meet increased demand, nor abandoned when demand falls off. Yet the steel industry is one of the most cyclical of all industries—during a business cycle the demand for steel falls and rises twice as fast as the average of all manufacturers. Since the demand for steel is relatively inelastic, no price changes could have any appreciable effect upon cyclical variations in demand. These are facts and circumstances which are not within the control of steel producers; yet they are constantly used by critics to condemn the industry at both ends of the cycle. The facts are that the industry increased its capacity from 81.6 to 91.9 million tons during the war period of 1940–46, and from 91.2 to 148.6 million tons in the succeding period of 1947–60. Several times during the past 20 years, the industry has been roundly condemned in hearings before congressional committees for deliberately refraining from increasing capacity and threats have been made that the Federal Government would enter the steel business. Obviously, the economy of the country requires that peak capacity be considerably higher than average demand, and this is the situation—only because the industry has invested huge sums to keep its facilities in pace with or ahead of the economy as a whole. As a consequence, when demand is not at the highest levels, the industry is condemned for overcapacity and accused of monopoly, conspiracy, and lack of public spirit if prices do not fall to unprofitable levels. If the steel industry could not operate at a reasonable profit at considerably less than capacity operations, the investment funds would not have been and would not be available to maintain a growing industry sufficient to take care of the needs of a growing economy.

AGRICULTURE AND INFLATION—FARM MACHINERY

Some would attempt to put the entire blame for past inflation and the whole burden of preventing future inflation on steel producers. Although their own statistics show that wage cost increases have surpassed productivity gains, this fact is passed over without any condemnation of the labor leaders who have had the power by virtue of a legally constituted monopoly to force these cost increases, and without any demand that the steelworkers cease their incessant

demands for ever-higher wages and costly benefits. Although these same people point out that the increase in steel prices is multiplied by the users of steel in increasing their own prices, and that other manufacturers use a steel price increase as an excuse to raise their prices, somehow it is entirely the fault of the steel producers.

Apparently, in spite of a general inflation in the economy and rising costs in the steel industry, there is never a time when an increase in steel prices is warranted. If demand is below capacity—and peak capacity must be in excess of demand most of the time if it is to be sufficient to meet the peak demands of the economy—some would say that it is against the laws of economics for prices to go up and would accuse the industry of monopoly practices. If demand pushes the capacity of the industry, some would say that the steel producers make so much profit that they do not need price increases and should restrain themselves. The law of supply and demand is a two-way street, except in the view of some who seem to believe that this law should operate always to force prices down and keep them down, but never to force prices up. If the law did operate in this fashion, any business, whether a steel company, a hardware store or a drugstore faced with constantly increasing costs would sooner or later become bankrupt.

Mr. President, I come from an agricultural State. Increases in steel prices will almost certainly be reflected in increased costs of farm machinery. I am deeply concerned about the impact of inflation upon our farmers because, as I stated earlier today, when inflation strikes, the group which feels it worst is the farmers. We have seen the devastation that has been worked on the small farmers, and how they have virtually been driven out of business by the price rises since 1940, with the result that today they have scarcely enough net income to be able to remain in business.

I must say that I look with misgivings on the prospect that this squeeze may be aggravated. But although I am concerned about inflation, this concern does not blind me to certain facts. One of those is that the steel companies are not the ones who are responsible for the inflation; furthermore, neither are the steelworkers, with their insistent demands for wage increases—demands which need not always be acquiesced in—responsible for the inflation. I have always felt that the onus for inflation falls squarely on the shoulders of the Members of Congress, and perhaps to a lesser degree on the occupant of the White House. But the Members of Congress are the ones who pass the appropriation bills and spend the Federal funds and spend our way into ever-increasing deficits. Deficit spending does not result from actions taken by the steel companies or from actions taken by the steelworkers. Deficit spending comes about because of actions taken by the Members of Congress who do not have enough political and moral courage—to use the words of the distinguished Senator from North Carolina [Mr. ERVIN]—to vote the taxes which will bring in sufficient revenue to match the Federal expenditures. It is the failure to do this down through the years which has caused the shrinkage in value of the U.S. dollar—with the result that today it is worth only about 46 cents, compared to the value it had when President Truman followed President Roosevelt in office.

Mr. President, I see no way out of this situation unless Congress and the White House—both of which are in control of the same party—will stop knuckling under and will begin to act in accordance with the fine words used by the President of the United States when, in his address to the Nation, he called for fiscal integrity and asked that Federal expenditures which may be desirable, but are not absolutely necessary, be deferred.

But I must say that I am still waiting—and I have been waiting all session, particularly since the night when the President spoke about Berlin—to see some indication that some of these programs are to be cut back or are going to be eliminated altogether. However, I have not seen even one of them cut back. Yet all of us know that some of these Federal spending domestic programs which are not necessarily tied in with the national defense have been voted by this body in amounts in excess of those requested by the President himself.

Mr. President, the net result of this deficit spending will be further shrinkage in the value of the U.S. dollar. Earlier today I pointed out that during June the value of the U.S. dollar shrank by one-half of 1 cent.

Mr. President, if the U.S. dollar becomes debased, neither the steelworkers nor any other workers who request wage increases in order to make up for the difference can be blamed. But Congress can be asked to stop taking action which will result in inflation.

Mr. President, another point should be made: I believe that perhaps too much criticism is made by both sides to this controversy. I think perhaps the steel companies have a tendency to blame the steelworkers too much, and I am sure that the steelworkers have a tendency to blame the steel companies too much.

But when the chips are down, both sides should look to Washington, particularly to the Members of Congress who are voting these expenditures, and to the leadership in the White House, which is in control of the Congress, for deeds, not just words, with respect to fiscal integrity.

Mr. President, it has been stated:

> To the extent that it has exceeded the increase in labor costs, the increase in steel prices does not appear to be due, except in small part, to increases in material costs. Most of the materials consumed in the making of steel are produced by the steel companies themselves.

Mr. President, I believe that what the American people have been led to believe with respect to the perennial problem in regard to steel price increases is that the steel companies have reacted to the demands of the steelworkers for wage increases by increasing the price of steel—not increasing it just enough to make up for the wage increases, but increasing the price of steel more than that. That sounds like a rather severe indictment. But this indictment fails to take into account the fact—and this is where the American people have been misled—that there is more to it than that. The steel companies—as is true of any other business—are affected by more than wage increases. They are also affected by increases in the overall cost of doing business—including increases in the cost of materials.

The bill of the steel industry for products and services purchased ranged between $6 billion and $7 billion during each of the past 5 years, and represented between 42 percent and 45 percent of its sales dollar. That bill is the largest element in the cost of making steel. By comparison, labor costs, as a percentage of the sales dollar, have ranged between 33 and 39 percent during the past 5 years.

So, Mr. President, we see that when—because of inflationary results—the costs of materials to the steel industry have increased, we are not fair if we say to the steel companies, "Increase the price you charge for the steel you make only in an amount sufficient to meet the wage increase." In order to be fair, the steel companies must be able to increase the price of steel sufficiently to offset the increases which have occurred in their other costs of production.

Mr. KEFAUVER. Mr. President, will the Senator from Iowa yield?

Mr. MILLER. I am happy to yield to the Senator from Tennessee.

Mr. KEFAUVER. I agree with the Senator's statement that other costs must be taken into consideration. But one of the main ingredients of steel is scrap; and it will be found that in 1958 scrap was selling for between $55 and $58 a ton, whereas today scrap is selling for between $35 and $36 a ton. In fact, the price of scrap today is the lowest it has been for some time.

So, in the case of this very substantial ingredient of steel, the price of scrap is today only a little more than half what it was 2½ years ago.

Mr. MILLER. In reply, let me say that I fully recognize that the price of scrap has not risen very much, if any.

However, granted the validity of the statement which the Senator from Tennessee has just made, it does not persuade me that the costs of materials, all taken into account, have not gone up. Over the long term, substantial increases have been experienced in both major cost elements, labor, and materials. In "Collective Bargaining in the Steel Industry," released by former Secretary of Labor Mitchell, employment costs per ton of product shipped are shown to have increased nearly threefold from 1940 to 1959, while materials and service costs per ton in 1959 were more than three times as much as they were in 1940.

Many other materials enter into this picture besides scrap. For example, I have in my hand a table, which I ask unanimous consent to have printed at this point in my remarks, listing some other major items of material, including, for example, coke.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

April 1961 percent increases [1] over December 1955

Coke	9.02
Electric power	8.70
Lubricating oils	12.17
Explosives	13.53
Ferro silicon	8.21
Power hand tools	11.68
Small cutting tools	16.12
Precision measuring tools	12.42
Electrical instruments	21.10
Pumps	12.75

[1] Computed from BLS indexes of wholesale prices.

Mr. MILLER. The percent increase in April 1961 over December 1956 on coke was over 9 percent. For electric power it was almost 9 percent. For lubricating oils, it was 12 percent. For explosives it was 13 percent. For power hand tools, 11 percent. For small cutting tools, 16 percent. Those increases were over a 5-year period.

So I point out to the Senator from Tennessee that, granted that scrap is a substantial material used in the production of steel, and granted that its price has not increased substantially over this period, there are many other items which enter into the cost, and the statistics which I am about to ask unanimous consent to have printed in the RECORD will bear that statement out.

Mr. President, I have in my hand some tables. One is known as exhibit 1, showing sales, costs, and income in the steel industry for the period 1940 and 1947 through 1960. A second table shows employment costs and steel prices; also steel revenue and production costs for a similar period. Another exhibit shows costs related to revenues. Finally, I have a table showing wholesale price indexes.

I ask unanimous consent to have those tables printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—*Employment costs, basic steel prices, average realized price per ton, and percent of capacity utilized (steel operations only), 1940 and 1947–59*

Year	BLS index of basic steel prices	Average realized price per ton [1]		Employment cost [2]				Operating rate (percent)
				All employees [3]		Wage employees		
		Dollars	Index	Dollars	Index	Dollars	Index	
1940	100.0	58	100.0	21.81	100.0	17.78	100.0	82.1
1947	131.4	88	151.7	32.05	146.9	25.69	144.4	93.0
1948	150.0	101	174.1	34.57	158.5	27.56	155.0	94.1
1949	162.6	107	184.4	36.69	168.2	28.09	157.9	81.1
1950	171.2	114	196.5	35.98	164.9	28.44	159.9	96.9
1951	184.6	125	215.5	40.21	184.3	31.93	179.5	100.9
1952	188.6	129	222.4	45.48	208.5	34.78	195.6	85.8
1953	203.6	135	232.7	46.14	211.5	35.87	201.7	94.9
1954	212.7	139	239.6	51.06	234.1	37.71	212.0	71.0
1955	222.9	142	244.8	47.13	216.0	35.93	202.0	93.0
1956	241.4	155	267.2	50.92	233.4	38.36	215.7	89.9
1957	264.6	165	284.4	56.17	257.5	41.80	235.0	84.5
1958	273.8	173	298.2	64.92	297.6	46.68	262.5	60.8
1959	[4] 278.4	178	306.8	[4] 58.93	[4] 270.1	[4] 43.64	[4] 245.4	63.0

[1] The average realized prices per ton for the years 1947 and 1949 through 1959 were derived from census data with adjustments for the years 1947, 1949, 1950, and 1954 to reflect the estimated amount of wire products made in the steel industry during these years so that the data would be comparable with other years. Prices for the years 1940 and 1948 were estimated with the estimates based on movements of the BLS wholesale price indexes for steel mill products.
[2] From "Background Statistics Bearing on Steel Dispute"—Bulletin No. S-1 U.S. Department of Labor—Source of data: Bureau of Labor Statistics estimates based on Iron & Steel Institute data.
[3] Assumes supplementary contributions per man-hour for all employees in steel operations same as for all employees covering all operations of steel companies.
[4] 1st half 1959.

Since the ratio of employment costs to average realized price has been roughly 35 percent, the increase in employment costs from 1940 through 1959 would explain something like one-third of the 178-percent rise in steel prices over this period.

TABLE 2.—*Steel revenue and production costs, 1940 and 1947–59*

Year	Revenue (in millions)	Revenue per ton	Cost per ton shipped		
			Total	Employment (all employees)	Materials and services
1940	$3,235	$73	$58.92	$27.19	$31.73

EXHIBIT 3

COSTS RELATED TO REVENUES: CONSOLIDATED ACTIVITIES

An analysis of employment costs not confined solely to steelmaking operations shows a fairly close relationship to the trends observed when considering steelmaking activities only. Employment cost (all employees) per ton shipped when considered in this context rose 184 percent from 1940 to 1959 (see table 2).

Since it is evident from this that only a small part of the steel price increase since 1940 can be attributed to increases in employment costs, consideration is now given to the part that increases in costs of materials and services may have played in such increases. The relation between increases in employment costs and material and service costs will also be considered briefly.

Purchased materials and services, including transportation, accounted for between 43 and 47 percent of total revenues during the 1940–59 period. Although varying from year to year, this category as a whole represented the largest single element of cost.

As shown by table 2, material and service costs per ton of steel shipped increased 205 percent from 1940 through 1959. Material costs accounted for 44 percent of total revenues in 1940, but the percentage has been higher in most postwar years with a range of about 44 to 47 percent. The lowest percentages were attained in the recession years 1954 (43 percent) and 1958 (42 percent); the percentage that material costs are of total revenues usually declines during recessions whereas that for employment costs increases.

If we accept 45 percent as roughly the approximate proportion that material costs are of total revenues, it follows that material cost increases accounted for roughly one-half of the rise in steel prices from 1940 through 1959.

Combining the effects of the increased costs of employment and materials it appears that they absorb something like 80 to 85 percent of the steel price increase that has taken place from 1940 through 1959.

MATERIAL COSTS RELATED TO STEEL EMPLOYMENT COSTS

In view of the fact that, as a trend over the years, material costs appear to rise slightly more than employment costs, consideration was given to the question of whether there is any causal relationship between the two. We were unable to prove or disprove any such relationship.

In most of the postwar years material costs per unit of steel shipped increased more than steel employment costs on the 1940 base. However, there were substantial differences in timing and in amount from one year to the next. Material costs went up more than steel employment costs in some years and less in others; in still other years the two moved in opposite directions. A study of the behavior of the two indicates:

1. In contracting years, when steel employment costs rise sharply, with some exceptions, material costs tend to rise weakly, or less than their percentage increase during years of peak or plateau.

2. Material costs have dropped in 3 of the 4 years of expansion following a decline. Hardly a typical year, 1959 was the exception.

3. Material costs have shown a pronounced tendency to rise during peak or plateau years, except for 1957. But, although they rise most in such years, steel employment costs rise most in contracting years. But both classes of cost show a tendency, different in degree, to rise when business conditions approach the end of a boom.

4. Although steel employment and material cost are both influenced by the business cycle, each variable appears to react to its own particular pattern rather than to a common pattern. The relationships between them appear to be erratic and variable, floating rather than fixed. No determinate connection between them is apparent.

1137	Precision measuring tools	152.1	135.3	12.42
1172	Electrical instruments	171.0	141.2	21.10
1141	Pumps	181.3	160.8	12.75

[1] Computed from BLS indexes of wholesale prices.

Source: Bureau of Labor Statistics.

Mr. KEFAUVER. Mr. President, if the Senator will yield, what was the increase in the cost of materials from 1956 to 1960? I did not understand.

Mr. MILLER. I will repeat a statement I attributed to former Secretary of Labor Mitchell in his release entitled "Collective Bargaining in the Steel Industry." Mr. Mitchell stated that the cost per ton of product shipped increased nearly threefold from 1940 to 1959. Materials and services costs per ton in 1959 were more than three times as much as they were in 1940.

Mr. KEFAUVER. I was interested, in the comparison with 1956, in the costs of lubricating oils and some other items the Senator mentioned.

Mr. MILLER. I am sorry if I did not follow the Senator's question. Lubricating oils are shown to have had an increase of 12.17 percent. These are percentage increases computed from the Bureau of Labor Statistics indexes of wholesale prices as of April 1961 over December 1956.

Mr. KEFAUVER. What was the increase in the case of coke?

Mr. MILLER. Nine and two one-hundredths percent.

Mr. KEFAUVER. I point out that from 1956 to 1959 the increase in the price of steel was 15 percent, which is a greater percentage increase than the cost of the items the Senator has been talking about. In 1956, for instance, the wholesale price index of steel was 181.9, using 1947 as the base. In 1959 it was 209.7, which is a 15-percent increase. The figures do not run into 1960.

Mr. MILLER. In response to the Senator from Tennessee, I do not have statistics readily available to indicate whether the price rise in steel has been proportionate to the increase of other costs of materials. That was not the purpose of introducing the figures into the RECORD. The purpose was to show that, notwithstanding the fact that the price of scrap has not risen materially, there are many other types of materials the cost of which has risen substantially, and, further, to make it clear that when we look at the overall costs of steel production, the costs of materials, certainly in the long run, are in excess of the costs of wages.

I wish to mention another point with respect to costs. This may possibly tie in with what the Senator from Tennessee was driving at a moment ago. Even if profits have gone up over, say, the last 5 years, if we are to have any hope of replacing capital investment in plant and heavy machinery, it will be necessary to have more profits in order to do so, because plant costs have gone up.

There is not a Senator who has not experienced the result of increased costs in connection with the purchase of an automobile. Today one has to pay $3,500 for an automobile that he could have purchased for $3,000 only 3 or 4 years ago. It does not do any good to say, "We want you to keep your profits at the same level each year, and you will come out all right," because profits must be increased in order to maintain the plant, as a result of the inflation we have been speaking about. I think this factor has been overlooked in the discussions about profits. There must be more profits in the bank in order to invest in an equal amount of capital plant today. This fact is particularly noticeable on the farm today. A tractor that formerly cost $2,000 costs $3,000 today. A farmer has to have more profit in order to keep

his head above water. That is the reason why so many have not been able to remain on the farm.

One last point, Mr. President. If the spokesmen for the administration would spend half as much energy in trying to seek an incentive form of Federal taxation for business as they do in trying to curb business, I do not think we would have any problems. Business is literally crying out to expand, but they do not have the incentive to expand. It is true that such tax reform has been talked about. It is very regrettable that nothing has been done in this session about it. We have reached the point where businessmen are not optimistic in looking forward to tax reforms which will give them an incentive to expand. They are looking forward to getting nicked with higher taxes in the years ahead.

Because of these factors, businessmen are not planning to expand and are not carrying out plans for expansion to any noticeable degree. That is the reason why there is so much unemployment. It does no good to talk about unemployment unless there is industrial expansion which will absorb the unemployed.

The continued talk we have heard lately about wage and price controls and higher taxes and deficits and ever-increasing Federal expenditures for nonessential, nondefense measures does not give rise to the type of atmosphere that encourages private business to grow.

There are two ways we can proceed. We can either encourage private enterprise to grow and to absorb this unfortunate unemployment which has presented such a problem to the present administration or we can go into a regimented, federally controlled economy such as we observed in England. I suppose, if we are to start that, the place to start is with the steel industry, because that is one of the industries with which Britain started. We do not observe that practice today, because after a while the British people threw out the program.

We can save ourselves much time and agony such as our friends across the ocean in Great Britain went through if we will follow their experience and learn from it and if we will guide our policy along the traditional line of encouraging business by stopping deficits.

Let us not talk about balancing the budget tomorrow, next year, or the year after. Let us talk about balancing the budget today. More important, let us do something about it.

Businessmen learned from the 1930's that one does not improve business by deficit spending. Businessmen remember history. They observe today's deficits, the $3 billion deficit for the fiscal year just ended and the $7 to $10 billion for the fiscal year now passing. Private business will not expand under those circumstances.

I conclude by saying I hope the administration and its spokesmen will not try to use the Federal Government as a means for controlling prices.

In today's Wall Street Journal was published an editorial entitled "The President's Busybodies," which points out that certain members of the administration are making an effort to put the onus for any inflation on private industry, whereas the onus should be placed here on the Members of Congress and on the Government itself. I ask unanimous consent that the editorial be printed in the RECORD.

The PRESIDING OFFICER (Mr. PROXMIRE in the chair). Is there objection to the request of the Senator from Iowa?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE PRESIDENT'S BUSYBODIES

The usefulness of the President's Council of Economic Advisers has always been open to some question. But, whatever its ostensible functions, it seems unlikely Congress intended it to be a political meddler in the affairs of private industry.

That is nonetheless what it is degenerating into at the moment. In an effort to whip up public opinion against any possible steel price increase that might result from automatic wage increases on October 1, the Council has come up with a bunch of statistical projections. These purport to prove that the industry can absorb the wage boost and still earn after-tax profits of 7 percent to 15 percent on the asset value of its outstanding stock in this year's fourth quarter.

We certainly don't know whether the steelmakers can absorb the wage boost without a price increase, at these or any other profit levels. Various industry officials privately say the projections are way off base.

Whatever methods the Council used to arrive at its conclusions, however, it is hardly in a position to foresee all the ramified practical market forces which will determine whether there are or are not price increases in various steel products. Even the Council, in a fleeting bit of candor that should have guided it away from this forecasting, confesses that "any effort to estimate the future earnings of an industry is a most hazardous undertaking."

And that kind of undertaking is none of the Council's business. It represents Government pressure to achieve a species of price fixing. (No complaint, of course, is made against the union-extorted wage boosts which would cause any price rises.)

Moreover, it is an attempt to put the onus for a new inflation on private industry. The best that can be said for that effort is that it is a dishonest exercise. If there is a new inflation, neither industry nor labor will cause it; it will be caused by the Government's own reckless fiscal and monetary policies.

Perhaps the administration thinks turning the Council of Economic Advisers into a group of busybodies is smart politics. We think it is a disservice to the Council and, more importantly, to the public.

Mr. DIRKSEN. Mr. President, perhaps I should take a minute or two to supply an epilog to the discussion which has taken place today.

In my earlier remarks I mentioned that every person, every entity, under our concept of government is entitled to his day in court. When I used that expression I used it in the symbolic sense. I did not wish it to be misinterpreted, because I remember that in the steel hearings in 1958 proposals were before us even at that time to provide some administrative agency with legislative authority to prevent any price increase in the case of major industries unless the industry first served notice to a Federal agency and then came to Washington and here defended what was proposed to be done. Along with it the industry would have been subject to testimony, and cross-examination by those whom the industry supplied, the consumers, and everybody else who had any interest whatsoever in the matter.

I do not have that in mind when I talk about having a day in court. That is the last thing I would wish to see in this free competitive country.

I only make the point with which I started this afternoon, if an industry is guilty of misfeasance, let it be charged under the law. There should not be any attempt to frighten and there should not be any attempt to threaten, as has been done in the observations which were made on this floor on the 22d day of August. That is a sound American concept. When we depart from it, woe unto us, for then the confidence and trust of the American citizen, of the American business enterprise in government, will begin to go downhill. It will be an intolerable day indeed when that happens in this blessed country.

We conclude the discussion at that point, Mr. President. I express my grateful thanks to the majority leader for his kindness in letting us have ample time to discuss this matter from our point of view.

Mr. President, in connection with remarks I made earlier today, I would like to have appended the material that appears on pages 153, 154, 155, 156, and 157 of the report on administered prices in the steel industry as a result of long hearings conducted by the Subcommittee on Antitrust and Monopoly of the Judiciary Committee in 1957, all of which is set out under "Minority Analysis of Majority's Charges."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

III. MINORITY ANALYSIS OF MAJORITY'S CHARGES

The minority has reviewed the record and the majority's report carefully. The majority's report largely adopts the unwarranted charges of the staff members; its conclusions are not justified; they are not based on the facts developed in the hearings and they demonstrate a complete lack of understanding of the practical operation of our competitive economy.

The minority has prepared its analysis of the principal charges made or inferred by the majority. The minority believes that these charges are erroneous and unfounded. A detailed discussion of each of these charges follows:

POINT I

After careful analysis of the testimony adduced at the hearings, the minority finds that the position in the majority's report that the steel industry has made unjustified price increases is erroneous and unfounded.

The majority's report charges that the July 1 price increase was not justified by the cost increase. It first attempts to determine the actual cost increase represented by the wage increase under the contract between the union and the companies. The majority's analysis is based on an unwarranted assumption stated as follows:

"For the purpose of trying to ascertain how much of the price increase has in fact been due to the wage increase required under the contract, it should be obvious that the starting point for discussion should be

19.4 cents and that this figure, itself, appears to be excessive." [1]

It then attempts to estimate the changes in other costs. It said:

"It appears that changes in costs of the major products purchased by United States Steel for its steelmaking operations do not support the company's statement that 'other costs' rise at the same time as, and in an amount equal to, any increase in employment costs." [2]

And, finally, it attempts to relate these costs to the price increase announced by the United States Steel Corp. on July 1. It said: "* * * In short, the evidence presented by United States Steel fails to provide any indication that the margin between increased labor costs per ton of steel and the $6 per ton price rise since July 1, will be absorbed by increases in 'other costs.'" [3]

The minority notes that the testimony received by the subcommittee indicated that in no instance was the July 1 steel price increase adequate in terms of the companies' cost positions at that time. It can find no justification for the majority's attempt indirectly to impose its pricing formulas over large segments of American economy.

It would do well at this point to analyze and refer briefly to the record. The majority report, itself, refers to a statement made by Jones & Laughlin, fourth largest producer in the steel industry, as follows:

"The announced price increase (July 1) is grossly inadequate insofar as covering our total anticipated cost increases is concerned." [4]

The inadequacy of the price increase was reflected by the testimony of various steel company officials who testified. Mr. Roger M. Blough, chairman of the board, United States Steel Co., stated:

"In other words, to put it in figures that you can understand perhaps a little more clearly, dollarwise a price increase which would have been, let us say, entirely justified based upon what we have just been through for 17 years, would have been in the area of $9 or $10. Now, that is the figure to compare with the $6." [5]

Mr. A. B. Homer, president, Bethlehem Steel Corp., stated that although Bethlehem Steel prices rose on an average of $5.20 per ton, the average costs were expected to rise to $8 per ton, thereby forcing Bethlehem Steel to absorb the loss of $2.80 per ton or a total of $35 million. [6]

Mr. George M. Humphrey, chairman of the board, National Steel Corp., stated that the total effect by reason of increases in the cost of purchased materials and services would be 2.5 to 2.75 times the increase in employment cost. [7]

The chairman, Senator ESTES KEFAUVER, in examining Mr. Humphrey at this point came to the conclusion that the increased cost per ton as a result of wage increases was $3.15 which he stated he found to be in line with United States Steel and with Bethlehem Steel. This $3.15 increased cost per ton as a result of wage increases, was lower than the approximately $4 per ton increase due to wage costs found by the steel companies.

It should be further noted at this point that the record adequately shows that for each dollar of increased employment costs, there is an additional dollar increase in material and service costs.

Mr. Robert C. Tyson, chairman, finance committee, United States Steel Corp., said:

"For each dollar that our employment costs increase, our total costs increase over $2. Economic arithmetic tells us that the new cost-push inflation can never be terminated until inflation in the biggest and most basic cost, employment cost, is terminated." [8]

Also, Jules Backman, professor of economics, New York University, writes:

"It is evident that over the years, the steel industry has had good reason to anticipate that an increase of $1 in employment costs would soon be accompanied by at least a similar rise in the costs of products and services bought." [9]

Summarizing this analysis of the testimony, the minority finds that the conclusion is inescapable that the average price increase of steel announced on July 1 ranged from $5.20 to $6 per ton.

Also, using Chairman KEFAUVER's $3.15 per ton increase in wage costs as a basis, the Tyson-Backman formula would give the steel companies total cost increases of $6.30 per ton which would more than justify the $5.20 to $6 per ton price increase.

If one uses the steel companies' view of approximately $4 per ton increase in wage costs and again using the Tyson-Backman formula, the total cost increase would be approximately $8 per ton and the steel price increase was not only justified, but that the steel corporations would have to absorb a loss of over $2 per ton of steel.

If Mr. Humphrey's formula of relationship of employment costs to material and service costs were used, the steel companies' loss due to total increased costs in relation to the price increase would be even larger.

Unless the majority believes that we should abandon our competitive philosophy and substitute Government controls, it has no basis for judging the "reasonableness" of the prices charged by any industry. The utter futility of such a procedure is demonstrated by the statements in the majority's report. It attempts to substitute its judgment of "reasonableness" arrived at without possessing the intimate knowledge and experience of the industry upon which the responsible decisions of management are based.

The steel companies consider their detailed cost data as confidential information which they should not be required to divulge to the subcommittee. The minority is in complete accord with this position. If such data had been available to the subcommittee, the staff would have had no knowledge or experience with which to relate it to the varying operating problems of the respective steel companies. In fact, the costs for any steel producer are affected by levels of operations, product mix, and many other factors not revealed by a study of statistical data relating to a limited time period.

The Subcommittee on Antitrust and Monopoly might have some interest in the subject of prices if they could be related to the question of competition within an industry. The majority's report, however, seems more concerned with relating the price increase to the direct cost increases resulting from the contract between the major steel producers and the United Steelworkers of America. The minority does not believe that the subcommittee should be concerned with the increases granted to other employees concurrent with the increases granted to members of the steelworkers union, and whether such increases were in a "just relationship" to those provided in that agreement.

The United States Steel Corp.'s witnesses testified that the employment cost increase on July 1, 1957, was 21 cents per hour. As previously indicated the majority states that the starting point should be 19.4 cents and that even this figure is excessive. This statement is based on the reasoning that increases to nonunion employees should not be taken into account, or, if at all, only on the same cents-per-hour basis as union members. The majority's report said: "* * * The union estimated that other employees would receive the same cents-per-hour adjustments as union members. Instead, nonmembers of the union received increases which averaged 37 percent more than the increases called for under the union contract. This may be excellent personnel policy, but there is some question as to the propriety of charging the cost of such a policy to the union agreement." [10]

The minority reiterates that this subcommittee should not be concerned with such a problem. However, it cannot help but point out that if such a philosophy were adopted, in time all differentials for added skill and responsibility would be eliminated. In fact, it would eliminate the very differentials presently recognized within the structure of the union wage agreements, themselves.

The majority also accepts the union's estimate of cents-per-hour increases under the labor agreement, branding the companies' estimates as excessive, although the companies are obviously better able to compute their cost increases. And, finally, in order to minimize labor-cost increases the majority attempts to invalidate industry testimony as to labor hours per ton of steel. It is obvious to the minority that the steel companies must take into account their total employment-cost increases and that they are in the best position to determine what these amount to.

With respect to changes in other costs the majority, by using very selected and unrepresentative items, has attempted to minimize the effect thereof. The majority's report completely ignores the testimony by responsible officials of the steel companies who had shown that over a long period of years other costs have risen at a higher rate than direct labor costs. Instead, the staff attempted to estimate cost changes by examining short-term price movements for a few selected items available to it during the period immediately preceding and following the July 1 price increase. The minority again stresses the utter futility of making short-term comparisons for a few selected items. This is obvious, since the effect on total costs of such items varies not only between the different steel companies but within the companies themselves at their several locations. It is affected by the level of operations, the extent of integration, and the product mix.

The minority notes the testimony by Mr. Humphrey, chairman of the board of National Steel Corp., who clearly showed the impossibility of developing meaningful cost estimates through the procedure adopted by the staff. He said:

"I cannot tell you, Senator, about the industry. I can tell you about our own situa-

tion. The effect that a change in the price of scrap has is a very complicated computation because it would depend very largely upon the amount of scrap that you use in making a ton of steel.

"You can vary the amount of the scrap that is used in the making of a ton of steel by a very considerable amount, and if you are using a large amount of scrap it will be one thing; if you are using a small amount of scrap it would be another.

"If scrap goes down and you increase the amount of scrap, that, in turn, affects the operation of your blast furnaces and your coke ovens and ore mines, and you have a lot of increased costs or idle expense to bear in the other branches of your business, which would suffer in volume if you increased the scrap.

"So I do not think that any calculation that does not take into account the change in practice of the various things that are effected is of any account." [11]

The minority believes that the only basis by which the public can appraise the pricing policies of any industry is to examine the long-term results of such a policy. Throughout the postwar period, the pricing policies of the steel industry have been subject to continuous congressional review. During earlier hearings, the inference was often made that wage increases could have been granted by reducing profits and without increasing prices.

The history and the testimony submitted show that if such a procedure had been followed (even allowing steel prices to rise enough to cover the additional direct-labor costs incurred) the steel industry would have been operating at a loss even during the years when the economy as a whole was enjoying its greatest prosperity. The minority notes this statement by Dr. Jules Backman from the record:

"Clearly, any claim that wage increases could have been paid out of profits without an increase in prices is without foundation in fact.

"If, since 1945, steel prices had risen only enough to cover the additional direct-labor costs incurred in producing finished steel, the steel industry would have experienced a loss in excess of $2 billion in 1955." [12]

In the light of these facts, the minority cannot accept the majority's judgment of reasonableness as a substitute for the responsible decisions of management. The subcommittee is not accountable to the stockholders for losses incurred or to customers who may find steel unavailable if its economic theories prove unworkable. Industry officials are responsible to their stockholders and customers for the decisions they make. Competition has proven itself the most effective method to limit price increases to the amount necessary to maintain the health of our producing industries.

Mr. MANSFIELD and Mr. KEFAUVER addressed the Chair.

The PRESIDING OFFICER (Mr. SMITH of Massachusetts in the chair). The Senator from Montana is recognized.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. KEFAUVER. The remarks of the Senator from Illinois, the minority leader, indicated he did not expect any further discussion about steel tonight. I assume the Senator was talking about his side of the aisle. I wish to give notice that some of us would have a few remarks to make about the steel industry, after the speeches made this afternoon.

Mr. DIRKSEN. Will that be in the nature of rebuttal?

Mr. KEFAUVER. It will be in the nature of clarification.

Mr. DIRKSEN. In the art of debate one speaks of rebuttal and surrebuttal, of rejoinder and surrejoinder. After the Senator has had his inning, I presume we must come along with surrebuttal, and if the Senator makes rejoinder, we must come along with surrejoinder, so that the whole story will be known.

Mr. KEFAUVER. I think that would be very much in the public interest.

Mr. President, I feel that the discussion today has been useful. While we may, of course, disagree on some points, I wish to compliment Senators on the other side of the aisle who have made speeches on the steel issue. Some have recognized the great public interest in this subject and the importance of public consideration. In fact, I think we all recognize the fact that what happens to the price of steel is very important to our entire economy. It is the bellwether and the underpinning of our economy. If we have a substantial price increase in the price of steel, everything else will go up. Following that we will have a demand for substantial increases in wages. Then the inflation circuit will go on and on.

The President of the United States regards it as a matter of great importance to the economy and indeed to the cost of government itself. In his letter, which was released today and which I know that my colleagues will read, he pointed out that Secretary McNamara has advised him that a $4 or $5 increase in the price of steel would ultimately mean an increase of about $500 million in the defense effort.

Of course, private industry and individuals would all have to pay more. It is the responsibility of the President—and he has fulfilled that responsibility—to do what he can in a persuasive way in trying to avoid the harm that would come to this country and to our people through an increase in the price of steel.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I am happy to yield to my colleague.

Mr. GORE. In the course of the address I delivered to the Senate several days ago on this subject I made references to the moral and political leadership of the President. I believe that the letter he has written is a proper and vigorous example of the kind of leadership I had hoped the President would render in this cause. I wonder if the Senator would be willing to have the President's letter inserted in the RECORD at this point?

Mr. KEFAUVER. I should be very happy to have that done.

Mr. GORE. I ask unanimous consent that the President's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR ———: I am taking this means of communicating to you, and to the chief executive officers of 11 other steel companies, my concern for stability of steel prices.

In the years preceding 1958, sharply rising steel prices and steel wages provided much of the impetus to a damaging inflation in the American economy. From the beginning of 1947 to the end of 1958, while industrial prices as a whole were rising 39 percent, steel mill product prices rose 120 percent. Steel wage rates also rose rapidly, causing employment costs per ton of steel to rise by about 85 percent. The international competitive position of American producers was impaired, and our balance of payments was weakened. Our iron and steel export prices from 1953 to 1958 rose 20 percent more than the export prices of our principal foreign competitors, and our share of world exports of iron and steel fell from 19 to 14 percent.

Since 1958, our price performance has substantially improved. Steel prices have been stable since 1958, as has the wholesale price index. Industrial prices have not risen since 1959. The rise in consumer prices has been held within tolerable limits.

This record of price stability was purchased, however, at the cost of persistent unemployment and underutilized productive capacity. In the steel industry itself, the rate of utilization of capacity for the last 3 years has averaged under 65 percent. In consequence of our recent price experience, many persons have come to the conclusion that the United States can achieve price stability only by maintaining a substantial margin of unemployment and excess capacity and by accepting a slow rate of economic growth. This is a counsel of despair which we cannot accept.

For the last 3 years, we have not had to face the test of price behavior in a high-employment economy. This is the test which now lies ahead.

Under the collective bargaining contract signed in January 1960, steel industry wages and other employment costs will increase at the end of this month. The amount of the increase in employment costs per man-hour is difficult to measure in advance with precision. But it appears almost certain to be outweighed by the advance in productivity resulting from a combination of two factors—the steady long-term growth of output per man-hour, and the increasing rate of operations foreseen for the steel industry in the months ahead.

The Council of Economic Advisers has supplied me with estimates of steel industry profits after October 1, calculated on an assumption that prices are not increased. These estimates indicate that the steel industry will be earning 7 to 9 percent on net worth after taxes if the rate of operations is around 70 percent; 10 to 12 percent if the operating rate is at 80 percent; and 13 to 15 percent if the operating rate is at 90 percent. The steel industry, in short, can look forward to good profits without an increase in prices.

The owners of the iron and steel companies have fared well in recent years. Since 1947, iron and steel common stock prices have risen 393 percent; this is a much better performance than common stock prices in general. Likewise, dividends on iron and steel securities have risen from $235 million in 1947 to $648 million in the recession year of 1960, an increase of 176 percent.

A steel price increase in the months ahead could shatter the price stability which the country has now enjoyed for some time. In a letter to me on the impact of steel prices on defense costs, Secretary of Defense

[11] "Administered Prices,' hearings before the Subcommittee on Antitrust and Monopoly, pt. 3, p. 810.

[12] "Administered Prices," hearings before the Subcommittee on Antitrust and Monopoly, pt. 4, p. 1428.

McNamara states: "A steel price increase of the order of $4 to $5 a ton, once its effects fanned out through the economy, would probably raise military procurement costs by $500 million per year or more."

Steel is a bellwether, as well as a major element in industrial costs. A rise in steel prices would force price increases in many industries and invite price increases in others. The consequences of such a development might be so grave—particularly on our balance-of-payments position—as to require the adoption of restrictive monetary and fiscal measures which would retard recovery, hold unemployment at intolerable levels, and hamper growth. The depressing effect of such measures on the steel industry's rate of operations might in the long run more than offset the profit-raising effect of a price increase.

In emphasizing the vital importance of steel prices to the strength of our economy, I do not wish to minimize the urgency of preventing inflationary movements in steel wages. I recognize, too, that the steel industry, by absorbing increases in employment costs since 1958, has demonstrated a will to halt the price-wage spiral in steel. If the industry were now to forego a price increase, it would enter collective bargaining negotiations next spring with a record of 3½ years of price stability. It would clearly then be the turn of the labor representatives to limit wage demands to a level consistent with continued price stability. The moral position of the steel industry next spring—and its claim to the support of public opinion—will be strengthened by the exercise of price restraint now.

I have written you at length because I believe that price stability in steel is essential if we are to maintain the economic vitality necessary to face confidently the trials and crises of our perilous world. Our economy has flourished in freedom; let us now demonstrate again that the responsible exercise of economic freedom serves the national welfare.

I am sure that the owners and managers of our Nation's major steel companies share my conviction that the clear call of national interest must be heeded.

Sincerely,

JOHN F. KENNEDY.

LIST OF STEEL COMPANIES RECEIVING THE LETTER FROM THE PRESIDENT, DATED SEPTEMBER 6, 1961

Mr. Logan T. Johnston, president, Armco Steel Corp., Middletown, Ohio.

Mr. Arthur B. Homer, chairman of the board, the Bethlehem Steel Corp., New York 4, N.Y.

Mr. Alwin F. Franz, president, the Colorado Fuel & Iron Corp., Denver, Colo.

Mr. Joseph L. Block, chairman of the board, Inland Steel Co., Chicago 3, Ill.

Mr. Avery C. Adams, chairman of the board, Jones & Laughlin Steel Corp., Pittsburgh 30, Pa.

Mr. J. L. Ashby, president, Kaiser Steel Corp., Oakland, Calif.

Mr. Merlin A. Cudlip, president, McLouth Steel Corp., Detroit 17, Mich.

Mr. Thomas E. Millsop, chairman of the board, National Steel Corp., Pittsburgh 19, Pa.

Mr. Thomas F. Patton, president, Republic Steel Corp., Cleveland 1, Ohio.

Mr. Roger M. Blough, chairman of the board, United States Steel Corp., New York 6, N.Y.

Mr. William A. Steele, chairman of the board, Wheeling Steel Corp., Wheeling, W. Va.

Mr. J. L. Mauthe, chairman of the board, Youngstown Sheet & Tube Co., Youngstown, Ohio.

Mr. KEFAUVER. I thank my colleague for presenting the letter which I agree should go in the RECORD at this point. The Senator from Illinois, the minority leader [Mr. DIRKSEN], criticized these efforts on the grounds that they constituted an attempt to prevent a price rise by issuing threats. I do not think he is correct in that statement. If he will examine history, he will find that other Presidents, being aware of the injurious effects of a substantial steel price increase have tried to use persuasion, both on the steel companies not to raise prices, and also on labor union or unions not to ask for a wage increase which would necessitate a price increase.

I recall quite well that President Eisenhower called upon both the steel industry and labor not to ask for a wage increase that would not be offset by the productivity increase.

I recall also that former Vice President Nixon, the Republican candidate for President, and Secretary of Labor Mitchell tried to use the force of public opinion in bringing about a settlement of the 1959 steel strike on terms which would not necessitate a price increase. Indeed, Secretary Mitchell, in a lengthy report entitled "Collective Bargaining in the Basic Steel Industry," at page 202, points out that over a long period of time Presidents of the United States, either acting on their own, as President Kennedy has acted in the present instance, through factfinding boards, or through other officials of Government, have sought by persuasion to prevent price increases in the industry and wage increases of such magnitude as would require a price increase.

In view of the minority leader's criticism, it may be interesting for Senators to read what Mr. Mitchell had to say about the historic role played by Presidents and their subordinates in matters dealing with steel and steel prices.

I therefore ask unanimous consent that the section entitled "Factfinding," found at page 202 and page 203 of the book be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The device of factfinding boards has often been adopted in response to a public demand that something be done about a given industrial dispute. The factfinding process itself can be used in various ways and for various purposes. In some cases it is used largely for the purpose of effecting delay of a strike. It may be a substitute for mediation, or, more often, a supplement to mediation. Factfinding may represent the final effort of Government to settle a dispute or may simply set the stage for even more vigorous intervention. It has been used in all of these ways in basic steel disputes.

During the Little Steel strike in 1937, Secretary of Labor Frances Perkins appointed a board that was to have the dual purpose of factfinding and mediation. When the company representatives refused to meet with the union, with or without the services of the board, the mediation function was doomed. The board then fell back on factfinding and as a result of its findings recommended that the companies make a written agreement with the SWOC. The companies rejected the proposal and attacked the board as biased, after which the board gave up its efforts.

Although factfinding as a process played an important part in the deliberations of the War Labor Board, the next use of factfinding in steel as a device for ending disputes occurred prior to the strike of 1946. The board, appointed by President Truman, was one of a series of 11 that were created during 1945 and 1946 in an effort to do something about the wave of disputes and strikes that occurred shortly after the war. The steel board, in actual fact, never held hearings in the dispute because the parties expressed a preference for further joint bargaining. The settlement which followed the strike was based upon a slight modification by the President of a factfinding recommendation made by another board appointed in the General Motors dispute.

Factfinding was again used in the 1949 steel dispute and became a source of major controversy. By this time the machinery of the Taft-Hartley Act for dealing with emergency disputes had been enacted. This machinery called for factfinding without power of recommendation as a part of the procedure. President Truman, however, decided to bypass these statutory provisions and appoint an ad hoc factfinding board that would have the power to make recommendations. Initially the industry balked at acceptance of a non-Taft-Hartley board, and even after it agreed to the procedure continued to protest the appointment before the board itself. The board's report was attacked by the industry on the basis that it recommend noncontributory pensions and insurance. It is generally conceded, however, that the industry's willingness to take the strike which followed was due not only to its objection to the recommendations themselves, but also in part to the feeling that the administration had favored the union in the timing and type of board that was appointed.

In the steel dispute of 1952 the factfinding role was undertaken by the Wage Stabilization Board established during the Korean war. A special panel of the Board took 2 months to hear the positions of the parties and to submit its findings as to the issues in dispute. The Board itself then made recommendations in a procedure similar to that employed by the War Labor Board. In this case, the industry refused to accept the recommendaitons of the Board, and a strike later occurred. It should be noted that the WSB had power only to make "recommendations" while the WLB had issued "orders," that there was no "no-strike" pledge by labor during the Korean war, and that the public acceptance of controls was much weaker during that period than during World War II.

Two different kinds of factfinding were used during the 1959 strike. Shortly after the strike began, Secretary Mitchell announced that the Department of Labor was preparing background statistics bearing on the economic questions surrounding the dispute. The report was issued in August 1959, and was intended primarily to inform the public. It dealt with such areas as wages, productivity, prices, and profits, but did not draw conclusions.

Later in the 1959 dispute the national emergency provisions of the Taft-Hartley Act were applied to a steel strike for the first time. Factfinding is a part of these procedures, but the law prohibits the board of inquiry from making recommendations. After the strike had been in progress for nearly 90 days President Eisenhower appointed a board of inquiry, the first step of the statutory procedure. The board not only held hearings to determine the issues in dispute but mediated as well. These efforts were unsuccessful, and the board's initial report summarized and attempted some evaluation of the major areas in dispute between the parties. The board's final report, issued 60 days later, was made public just as the settlement was being announced, and played no part in it.

Mr. KEFAUVER. Mr. President, I invite attention to the fact that one of the great predecessors of the minority leader, the majority leader in the 80th Congress, Senator Taft, was also chairman of the Joint Economic Committee. During that Congress he called in the leaders in the steel industry, and criticized them for the price increase which they had instituted. He was thus using the force of his position as chairman of an important congressional committee against an inflationary increase in the price of steel.

It has been suggested here that we have been critical only of the steel companies, and have not called upon labor to assume its responsibility for preventing inflation.

I invite the attention of Senators to the fact that in February 1959 when an increase in the price of steel was threatened, and when the union and the steel industry were in negotiations, I, as chairman of the Antitrust and Monopoly Subcommittee, called upon labor to limit its demands to a wage increase that would be offset by the increase in productivity, on the condition that the steel companies agree not to increase prices.

In response to my proposal Mr. McDonald, the president of the United Steel Workers, said that he wished I would keep my nose out of his business. My reply was that this was the public's business, not just the exclusive business of either the industry or the union.

I ask unanimous consent to have the documents referred to printed in the RECORD at this point.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

SENATOR KEFAUVER, OF TENNESSEE, OUTLINES NEW PROPOSAL TO PREVENT A FURTHER PRICE INCREASE IN THE STEEL INDUSTRY

Senator ESTES KEFAUVER, Democrat, of Tennessee, outlined a new proposal today to prevent a further price increase in the steel industry which he termed the bellwether of the economy. The Senator urged consideration of this proposal by Mr. Roger Blough, chairman of the board of the United States Steel Corp. and Mr. David McDonald, president of the United Steel Workers of America.

The proposal is that the union offer to limit its demand for a wage increase to an amount equal to the average increase in productivity in the steel industry. The rate of productivity increase could be determined by an impartial board. But this offer would be conditioned on the premise that the steel companies would not raise their prices.

The Senator pointed out that if the union were to so restrict its demands, there would be no increase in the cost of steel per ton and thus no justification for a price increase. If, however, despite this limited demand by the union, management were then to raise its prices, the restriction upon the union would end, and it could properly seek from management its fair proportional share of the price increase. The Senator urged Mr. McDonald to make such a proposal and Mr. Blough to accept it, pointing out that if it were offered and then rejected, the entire country would know on whose shoulders rests the responsibility for any further contribution to the inflationary movement.

The Senator called attention to the fact that the President in his Economic Report had urged that wage increases not exceed increases in productivity. "But," said the Senator, "This position by the President only goes part of the way, since it ignores the existence of the demonstrated power of large companies in concentrated industries to make price increases substantially greater than the increases in cost resulting from wage advances."

The Senator concluded by stating that the country simply cannot afford another increase in the price of steel which would result in reduced consumption and employment, further curtail our ability to compete in world markets, add further hardship to the unorganized workers and on all persons on fixed incomes, such as retired individuals and salaried workers.

Senator ESTES KEFAUVER, Democrat, of Tennessee, made the following announcement today:

"According to press reports, Mr. David J. McDonald, president of the United Steelworkers of America, was asked for his reaction to my proposal that the steelworkers limit their wage demands to the average increase in productivity in the steel industry, provided that the steel companies refrain from raising their prices, but that if the companies do raise their prices the steelworkers should be free to try to secure their fair share of the price increase.

"Mr. McDonald was quoted by the press as stating that he wished Senator KEFAUVER would 'keep his nose out of my business.' Mr. McDonald's language dramatizes my position exactly. The price of steel is not just Mr. McDonald's business. It is not just the business of Mr. Roger Blough, chairman of the board of the United States Steel Corp. It is the business of the people. The people of this country can ill afford the further impetus to inflation which would result from another increase in the price of steel.

"I hope that McDonald, for whom I have the highest admiration, will give my proposal more serious consideration. As Mr. McDonald must realize, inflation is just as hard on the members of his union as it is on people everywhere."

Mr. KEFAUVER. I point out also that the President of the United States, in his very excellent letter, which has been placed in the RECORD, calls attention to the responsibility of labor.

He points out quite correctly that if there is no increase in the price at this time, it would clearly then be the responsibility of labor to limit its wage demands next year to an amount consistent with continued price stability.

The President has acted in the tradition of other Presidents and in the best interests of the United States and the rest of the free world.

I feel that the Senators, of whom my colleague from Tennessee [Mr. GORE] has been the leader, have been performing a similar important act of public service.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. GORE. I thank my distinguished colleague from Tennessee for his generous references. Since both he and his junior colleague have been cited as examples of those unwilling to suggest restraint on the part of labor, I call his attention to a statement I made on the floor of the Senate in debating this subject on August 22, which is as follows:

Steel wages are a bellwether, too, and should not bound above proper and reasonable comparable levels. By refraining from raising prices of steel in October, the steel companies would improve their bargaining position when wage negotiations are again undertaken in 1962. This type of hold-the-line attitude will also be felt in other industry wage negotiations, particularly those pertaining to the automobile manufacturing industry.

If my colleague will further yield, I wish to cite also a statement I made on the same date, at page 16682 of the RECORD, in which I referred to the possibility of utility-type regulation of the steel industry. I said:

Few would want to do this, but it may be necessary. The public and Government must not stand idly by and be victimized by either big business or big labor, or both.

In the RECORD of August 29, on page 17325, is the text of a letter from me to the editor of the New York Times, in which I said this:

The public interest is involved, then, in the threatened increase in steel prices. Such an increase in steel prices, and the consequent unusually favorable profit position of the steel industry, would almost automatically call for an increase in steel wages next July. This increase in wages would, in turn, be used as justification for another round of price increases.

Later in the letter I said:

You refer to my suggestions of possible courses of action by the Government to protect the public interest as threats to the steel industry. Although I did not intend to make threats, I do respectfully suggest that unless big industry and big labor, particularly in monopoly controlled but basic industries, are able to exercise self-restraint, then action by the Government, regulatory or otherwise, within the framework of the free enterprise system, will be necessary in order to safeguard the public interest.

I ask my distinguished colleague from Tennessee if he thinks that statement constitutes a complete ignoring of the necessity for wage increases to be held in restraint in this basic industry?

Mr. KEFAUVER. My colleague has again indicated that the responsibility rests on the shoulders of both industry and labor. My colleague has made it very clear that this is a two-horse team, in which labor and industry must both cooperate.

Mr. GORE. Mr. President, will the Senator further yield?

Mr. KEFAUVER. I yield.

Mr. GORE. It seems to me that one important point of President Kennedy's letter is that in this basic industry, in which the wages of workers are favorable compared with the wages of workers generally in the United States, wage increases and additional benefits should be negotiated and obtained, if obtained, within the structure of price stability. This I believe to be a courageous position for the President to take, but, I think, in the circumstances, a necessary position and a necessary condition to be obtained.

Mr. KEFAUVER. There is no doubt about it. The distinguished minority leader had much to say about so-called threats. I am certain that no Senator on this side of the aisle intended to make any threats. A discussion of the economics of the steel industry and of the consequences of a steel price increase can hardly be called a threat.

The minority leader, on page 2 of his address, said:

The first threat came from Senator KEFAUVER and was stated as follows: "The proposition which I wish to advance is that if the steel companies do raise their prices in a manner similar to their advances of recent years and if there exists at the time a substantial volume of unused capacity, such action under the circumstances which I shall describe would raise the serious question of whether there has been a violation of the consent order entered into in 1951 by the steel industry under section 5 of the Federal Trade Commission Act."

I proceeded to describe specific circumstances, which, if they exist, might, in my opinion, raise a serious question as to whether that decree had been violated. It is the duty of a Member of the Senate to discuss circumstances which might indicate a violation of a decree of an antitrust agency. I feel, particularly, that as chairman of the Subcommittee on Antitrust and Monopoly I have a responsibility for so doing. I do not consider carrying out that responsibility to be a threat.

Mr. GORE. Mr. President, will my colleague yield?

Mr. KEFAUVER. I am happy to yield again to my colleague.

Mr. GORE. Since the distinguished Senator has referred to the consent decree, I believe it would be appropriate—if I may have the Senator's permission to do so—to have the decree printed in the RECORD, for public information.

Mr. KEFAUVER. Yes. The Senator has it available, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the decree was ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA BEFORE FEDERAL TRADE COMMISSION—DOCKET NO. 5508

(Commissioners: James M. Mead, Chairman; William A. Ayres; Lowell B. Mason; John Carson; Stephen J. Spingarn.)

(In the matter of American Iron & Steel Institute, an incorporated trade association, its directors and officers; and United States Steel Corp. and the following of its subsidiaries, American Bridge Co., the American Steel & Wire Co. of New Jersey, Carnegie-Illinois Steel Corp., Columbia Steel Co., Geneva Steel Co., National Tube Co., Tennessee Coal, Iron & Railroad Co., and Virginia Bridge Co.; Bethlehem Steel Corp. and the following of its subsidiaries, Bethlehem Pacific Coast Steel Corp., Bethlehem Steel Co.; Republic Steel Corp., and its controlled company, Truscon Steel Co.; the American Rolling Mill Co. and its subsidiary, Sheffield Steel Corp. of Ohio; National Steel Corp., and the following of its subsidiaries, Weirton Steel Co. and Great Lakes Steel Co.; Inland Steel Co., and its subsidiary, Milcor Steel Co.; the Youngstown Sheet & Tube Co.; Jones & Laughlin Steel Corp.; Wheeling Steel Corp.; Colorado Fuel & Iron Corp.; Crucible Steel Co. of America; Pittsburgh Steel Co.; Sharon Steel Corp.; Alan Wood Steel Co.

(Acme Steel Co.; Agaloy Tubing Co.; Allegheny Ludlum Steel Corp.; American Chain & Cable Co., Inc.; Atlantic Steel Co.; the Atlantic Wire Co.; the Babcock & Wilcox Tube Co.; Bliss & Laughlin, Inc.; Continental-United Industries Co., Inc.; Buffalo Bolt Co.; Bundy Tubing Co.; A. M. Byers Co.; the Carpenter Steel Co.; Central Iron & Steel Co.; Chicago Steel & Wire Co.; Columbia Steel & Shafting Co.; Columbia Tool Steel Co.; Compressd Steel Shafting Co.; Connors Steel Co.; Continental Steel Corp.; Copperweld Steel Co.; the Cuyahoga Steel & Wire Co.; Detroit Steel Corp.; Henry Disston & Sons, Inc.; Eastern Stainless Steel Corp.; Edgewater Steel Co.; Empire Steel Corp.; Firth Sterling Steel & Carbide Corp.; Follansbee Steel Corp.; Fretz-Moon Tube Co., Inc.; Granite City Steel Co.; Griffin Manufacturing Co.; Harrisburg Steel Corp.; International Detrola Corp.; Joslyn Manufacturing & Supply Co.; Judson Steel Corp.; Keystone Drawn Steel Co.; Keystone Steel & Wire Co.

(Laclede Steel Co.; Latrobe Electric Steel Co.; Lukens Steel Co.; the Mahoning Valley Steel Co.; the Medart Co.; Mercer Tube & Manufacturing Co.; the Midvale Co.; Moltrup Steel Products Co.; National Standard Co.; the National Supply Co.; Northwestern Steel & Wire Co.; Pacific States Steel Corp.; the Phoenix Iron Co.; Pittsburgh Tool Steel Wire Co.; Pittsburgh Tube Co.; the Pollak Steel Co.; Reeves Steel & Manufacturing Co.; John A. Roebling's Sons Co.; Rotary Electric Steel Co.; the Standard Tube Co.; Superior Steel Corp.; Sweet's Steel Co.; the Thomas Steel Co.; the Timken Roller Bearing Co.; Universal Cyclops Steel Corp.; Vanadium-Alloys Steel Co. and its subsidiary, Anchor Drawn Steel Co.; Vulcan Crucible Steel Co.; Washington Steel Corp.; Western Automatic Machine Screw Co.; Wheatland Tube Co.; Wisconsin Steel Co.; Worth Steel Co.; and Wyckoff Steel Co.)

FINDINGS AS TO THE FACTS AND CONCLUSIONS

Pursuant to the provisions of the Federal Trade Commission Act the Federal Trade Commission, on November 13, 1947, issued and subsequently served its amended complaint upon the respondents named in the caption hereof, charging them with the use of unfair methods of competition and unfair and deceptive acts and practices in commerce, in violation of the provisions of that Act. After the filing of respondents' answers to said complaint, testimony and other evidence in support of the allegations of the complaint were introduced before a trial examiner of the Commission theretofore duly designated by it, and such testimony and other evidence were duly recorded and filed in the office of the Commission. After counsel supporting the complaint rested their case, a proposal for the settlement of this proceeding was submitted by all of the respondents herein except those as to whom the Commission has determined the complaint should be dismissed, said proposal for settlement having been accepted and recommended by the Director, Bureau of Antimonopoly, and the Assistant Director of that Bureau and Chief of the Division of Investigation and Litigation, of the Commission. The Commission, being of the opinion that said proposal for settlement provided for an adequate and appropriate disposition of this proceeding, and that it would be in the public interest to accept same, on June 15, 1951, entered an order "tentatively accepting proposal for settlement; rejecting previously submitted proposal for settlement; providing for the issuance of a tentative decision and affording interested parties an opportunity to file memoranda or briefs with respect thereto; denying motion for leave to adduce additional evidence; withdrawing case from trial examiner and closing the record for the reception of evidence; and dismissing the complaint as to certain respondents" and issued its tentative decision consisting of findings as to the facts, conclusion and order to cease and desist in the form submitted with said proposal for settlement. No reasons having been presented, within the time provided therefor, as to why said tentative decision should not be entered as the Commission's final decision herein, and the aforesaid tentative order becoming by its terms an order of the Commission upon the issuance by the Commission of said tentative decision as its final decision herein, this matter came on for final hearing before the Commission upon the amended complaint, answers thereto, testimony and other evidence in support of the allegations of the complaint, and the proposal for settlement, which by agreement of the parties was amended to give effect to a change in the corporate name of one of the respondents and to correct an error as to the State of incorporation of another of the corporate respondents; and the Commission, having duly considered the matter and being now fully advised in the premises, finds that this proceeding is in the interest of the public and makes this its findings as to the facts and its conclusion drawn therefrom.

FINDINGS AS TO THE FACTS

Paragraph 1: The States of incorporation and locations of an office or principal place of business of the following-named corporate respondents are, respectively, as follows:

American Iron and Steel Institute, New York, 350 Fifth Avenue, New York, N.Y.

United States Steel Corp., New Jersey, 71 Broadway, New York, N.Y.

The American Steel & Wire Co. of New Jersey, New Jersey, Rockefeller Building, Cleveland, Ohio.

United States Steel Co. (designated in the complaint as Carnegie-Illinois Steel Corp., but which corporate name was changed on December 30, 1950, to that of United States Steel Co.), New Jersey, Carnegie Building, Pittsburgh, Pa.

Columbia Steel Co., Delaware, Russ Building, San Francisco, Calif.

Geneva Steel Co., Delaware, Geneva, Utah.

National Tube Co., New Jersey, Frick Building, Pittsburgh, Pa.

Tennessee Coal, Iron & Railroad Co., Alabama, Brown-Marx Building, Birmingham, Ala.

Bethlehem Steel Corp., Delaware, Wilmington, Del.

Bethlehem Pacific Coast Steel Corp., Delaware, 20th and Illinois Streets, San Francisco, Calif.

Bethlehem Steel Co., Pennsylvania, Bethlehem, Pa.

Republic Steel Corp., New Jersey, Republic Building, Cleveland, Ohio.

Truscon Steel Co., Michigan, Republic Building, Cleveland, Ohio.

The Youngstown Sheet & Tube Co., Ohio, Stambaugh Building, Youngstown, Ohio.

Jones & Laughlin Steel Corp., Pennsylvania, Jones & Laughlin Building, Pittsburgh, Pa.

Armco Steel Corp. (name formerly the American Rolling Mill Co.), Ohio, 703 Curtis Street, Middletown, Ohio.

Sheffield Steel Corp. of Ohio, Ohio, Sheffield Station, Kansas City, Mo.

National Steel Corp., Delaware, Grant Building, Pittsburgh, Pa.

Weirton Steel Co., West Virginia, Weirton, W. Va.

Great Lakes Steel Corp., Delaware, Detroit, Mich.

Inland Steel Co., Delaware, 38 South Dearborn Street, Chicago, Ill.

Inland Steel Products Co. (name formerly Milcor Steel Co.), Delaware, 38th and Burnham Streets, Milwaukee, Wis.

Wheeling Steel Corp., Delaware, Wheeling, W. Va.

The Colorado Fuel & Iron Corp., Colorado, Continental Oil Building, Denver, Colo.

Claymont Steel Corp. (name formerly Worth Steel Co.), Delaware, Claymont, Del.

Crucible Steel Co. of America, New Jersey, New York, N.Y.

Pittsburgh Steel Co., Pennsylvania, Pittsburgh, Pa.

Sharon Steel Corp., Pennsylvania, Sharon, Pa.

Alan Wood Steel Corp., Pennsylvania, Conshohocken, Pa.

Acme Steel Co., Illinois, 2840 Archer Avenue, Chicago, Ill.

Allegheny Ludlum Steel Corp., Pennsylvania, Brackenridge, Pa.

American Chain & Cable Co., Inc., New York, 230 Park Avenue, New York, N.Y.

Atlantic Steel Co., Delaware, Fulton County, Ga.

The Babcock & Wilcox Tube Co., Pennsylvania, Beaver Falls, Pa.

Bliss & Laughlin, Inc., Delaware, Harvey, Ill.

Continent..l Copper & Steel Industries, Inc. (name formerly Continental-United Industries Co., Inc.), Delaware, 345 Madison Avenue, New York, N.Y.

Buffalo Eclipse Corp. (name formerly Buffalo Bolt Co.), New York, North Tonawanda, N.Y.

A. M. Byers Co., Pennsylvania, Clark Building, Pittsburgh, Pa.

The Carpenter Steel Co., New Jersey, 101 West Bern Street, Reading, Pa.

Central Iron & Steel Co., Pennsylvania, Harrisburg, Pa.

Columbia Steel & Shafting Co., Pennsylvania, East Carnegie, Pa.

Columbia Tool Steel Co., Illinois, Lincoln Highway and State Street, Chicago Heights, Ill.

Compressed Steel Shafting Co., Massachusetts, 1587 Hyde Park Avenue, Readville, Mass.

Connors Steel Co., Delaware, Birmingham, Ala.

Continental Steel Corp., Indiana, Kokomo, Ind.

Copperweld Steel Co., Pennsylvania, Warren, Ohio.

The Cayahoga Steel & Wire Co., Ohio, Longwood Avenue, Maple Heights, Cleveland, Ohio.

Detroit Steel Corp., Michigan, 1025 South Oakwood Avenue, Detroit, Mich.

Henry Disston & Sons, Inc., Pennsylvania, Tacony, Philadelphia, Pa.

Edgewater Steel Co., Pennsylvania, Borough of Oakmont, Allegheny County, Pa.

Firth Sterling Steel & Carbide Corp., Pennsylvania, McKeesport, Pa.

Follansbee Steel Corp., Delaware, Third and Liberty Avenues, Pittsburgh, Pa.

Fretz-Moon Tube Co., Inc., Pennsylvania, Borough of East Butler, Pa.

Granite City Steel Co., Delaware, 20th and Madison Avenues, Granite City, Ill.

Griffin Manufacturing Co., Pennsylvania, Cherry and Union Streets, Erie, Pa.

Newport Steel Corp. (name formerly International Detrola Corp.), Indiana, Beard Avenue at Chatfield, Detroit Mich.

Joslyn Manufacturing & Supply Co., Illinois, 20 North Wacker Drive, Chicago, Ill.

Judson Steel Corp., California, 4200 Eastshore Highway, Emeryville, Calif.

Keystone Drawn Steel Co., Pennsylvania, Spring City, Pa.

Keystone Steel & Wire Co., Illinois, Peoria, Ill.

Laclede Steel Co., Missouri, Arcade Building, St. Louis, Mo.

Latrobe Electric Steel Co., Pennsylvania, Latrobe, Pa.

Lukens Steel Co., Pennsylvania, Coatesville, Pa.

Mahoning Valley Steel Co., Ohio, Niles, Ohio.

The Medart Co., Missouri, 100 Potomac Street, St. Louis, Mo.

Mercer Tube & Manufacturing Co., Delaware, 200 Clark Avenue, Sharon, Pa.

The Midvale Co., Delaware, 4320 Wissahickon Avenue, Nicetown, Philadelphia, Pa.

Moltrup Steel Products Co., Pennsylvania, Beaver Falls, Pa.

National-Standard Co., Michigan, Niles, Mich.

The National Supply Co., Pennsylvania, 330 Grant Street, Pittsburgh, Pa.

Northwestern Steel & Wire Co., Illinois, Sterling, Ill.

Pacific States Steel Corp., California, Niles, Calif.

Pittsburgh Tool Steel Wire Co., Pennsylvania, Monaca, Pa.

Pittsburgh Tube Co., Delaware, 323 Fourth Avenue, Pittsburgh, Pa.

The Pollak Steel Co., Ohio, 820 Temple Bar Building, Cincinnati, Ohio.

Reeves Steel and Manufacturing Co., Ohio, Dover, Ohio.

John A. Roebling's Sons Co., New Jersey, 640 South Broad Street, Trenton, N.J.

Rotary Electric Steel Co., Delaware, 21400 Mound Road, Warren Township, Mich.

The Standard Tube Co., Michigan, 14600 Woodward Ave., Highland Park, Mich.

Superior Steel Corp., Virginia, Pittsburgh, Pa.

Sweet's Steel Co., Pennsylvania, Williamsport, Pa.

The Thomas Steel Co., Ohio, Warren, Ohio.

The Timken Roller Bearing Co., Ohio, 1835 Deuber Avenue, SW., Canton, Ohio.

Universal-Cyclops Steel Corp., Pennsylvania, Bridgeville, Pa.

Vanadium-Alloys Steel Co., Pennsylvania, Latrobe, Pa.

Anchor Drawn Steel Co., Pennsylvania, Latrobe, Pa.

Vulcan-Crucible Steel Co., Pennsylvania, Aliquippa, Pa.

The Western Automatic Machine Screw Co., Connecticut, 900 Foster Avenue, Elyria, Ohio.

Wheatland Tube Co., Pennsylvania, Philadelphia, Pa.

Wisconsin Steel Co., Illinois, 180 North Michigan Avenue, Chicago, Ill.

Wyckoff Steel Co., Pennsylvania, Pittsburgh, Pa.

The above-listed corporations are hereinafter referred to as the respondents.

The Commission has dismissed this proceeding as to the respondent, the Phoenix Iron Co., a Pennsylvania corporation with its office and principal place of business at 121 Bridge Street, Phoenixville, Pa., which, on September 30, 1947, sold all of its steel producing facilities and withdrew permanently from the business of producing and selling steel products.

The Commission has also dismissed this proceeding as to respondent E. S. Liquidating Co. (formerly Empire Steel Corp.), an Ohio corporation with its office and principal place of business in Mansfield, Ohio, which is in the process of dissolution.

The record does not show that the following-named respondent companies have participated in the practices hereinafter found, and they are not included hereinafter in the term, respondents:

Agaloy Tubing Co., Inc., New Jersey, Wheel Street, Springfield, Ohio.

American Bridge Co., New Jersey, Frick Building, Pittsburgh, Pa.

Atlantic Wire Co., Connecticut, No. 1 Church Street, Branford, Conn.

Bundy Tubing Co., Michigan, Hern at Springfield, Detroit, Mich.

Chicago Steel & Wire Co., Illinois, 10257 Torrence Avenue, Chicago, Ill.

Eastern Stainless Steel Corp., Maryland, Baltimore, Md.

Harrisburg Steel Corp., Pennsylvania, Harrisburg, Pa.

Virginia Bridge Co., New Jersey, Roanoke, Va.

Washington Steel Corp., Pennsylvania, Washington, Pa.

Paragraph 2: With the exception of the American Iron & Steel Institute, the respondents, or one or more of their respective subsidiaries named in paragraph 1, are engaged in the production, sale and distribution of one or more of the steel products listed below, and, in the course of the sale and distribution thereof, each of them competes with others of said respondents, except to the extent that competion may have been restrained, lessened or destroyed by the acts, practices, methods, policies and other matters hereinafter described, and each of them in the regular course and conduct of its business sells and delivers one or more of such steel products or causes them to be sold and delivered or transports them or causes them to be transported from the State in which such steel products are produced to purchasers thereof at locations outside the State in which such steel products are produced and each of them regularly has maintained and now maintains a constant course of trade and commerce in one or more steel products in and among various States of the United States and is engaged in interstate commerce within the meaning and intent of Section 5 of the Federal Trade Commission Act.

The following steel products (not including stainless steel products) are involved in this proceeding:

Alloy Steel: Ingots, billets, blooms, slabs, bar shapes, hot-rolled strip, cold-rolled strip, hot-rolled bars, cold-finished bars, plates, standard structural shapes, seamless mechanical tubing, seamless pressure tubing.

Bars, carbon: hot-rolled and small shapes, reinforcing (new billet), reinforcing (rail steel), cold-finished, merchant (rail steel).

Clad Steel: Nickel, Inconel, Monel, carbon plates.

High-strength low alloy: Hot-rolled sheets, cold-rolled sheets, galvanized sheets, hot-rolled strip, cold-rolled strip, bars and small shapes, plates, standard structural shapes, wide flange beams.

Pipe and tubing: Pipe, including oil country, seamless mechanical tubing, seamless pressure tubing, mechanical electric-weld tubing.

Plates, structural, carbon: Plates, floor plates, standard structural shapes, wide flange beams, sheet piling, bearing piles.

Rails and railroad accessories: Light (new billet), light (rail steel), track spikes.

Semifinished, carbon: Ingots (forging), billets, blooms, slabs (rerolling quality), billets, blooms, slabs (forging quality), skelp, tube rounds, wire rods.

Sheets, carbon: Hot-rolled, 18 gage and heavier, hot-rolled annealed, 19 gage and lighter, cold-rolled, galvanized, enameling, long ternes, electrical.

Strip carbon: Hot-rolled, cold-rolled, electrical, coils, tin, terne and black plate.

Tool steel.

Wire and related products: Manufacturers bright (low carbon), spring (high carbon), nails and staples, merchant quality wire, barbed wire, woven fence, bale ties, fence posts, flat wire.

The term "steel products" as hereinafter used shall be deemed to mean some or all of such steel products.

Paragraph 3: Each respondent, through its direct membership or through the membership of a wholly owned subsidiary or its parent corporation, or a wholly owned subsidiary of its parent corporation, as of July 1, 1947, actively participated in or supported, in cooperation with other respondents, the respondent institute and its plans, programs and activities.

The steel industry is one of the basic industries of the Nation. At the time that the amended complaint was filed, the producer respondents in the aggregate produced and sold more than 85 percent of the steel products that were produced and sold in the United States. Such producer respondents include substantially all of the corporate members of the respondent institute which own, control or operate steel producing facilities in the United States. Steel products which they produce and sell are regularly used in the production of automobiles, agricultural implements, tools and machinery,

hardware, plumbing supplies, metal cans and containers, railroad equipment, homes, buildings, public buildings, bridges, dams, and other products and things, and are of great importance to the public generally. The Federal, State and municipal governments of the Nation purchase large quantities of steel products annually.

Paragraph 4: Respondents, from the close of NRA in May 1935 (or, if organized thereafter, from the respective dates of their organization), to the issuance of the amended complaint in this matter on November 13, 1947, in connection with the interstate sale of steel products, have engaged in the acts and practices as set out in the following paragraphs, paragraph 5 through paragraph 21. In making the following findings, the Commission recognizes that some of the respondents may not have engaged in all the separate acts, practices, methods and policies hereinafter described.

Paragraph 5: Steel products are, and for many years have been, manufactured and sold in many thousands of different combinations of size, gage, chemical composition, finish, quality, and other characteristics. The respondent institute, some of the producer respondents, and also various public and private agencies—among them the National Bureau of Standards, the Army Bureau of Ordnance, the Society of Automotive Engineers, the American Society for Testing Materials, and the American Society for Metals—have for many years studied the various qualities, grades, and uses of steel and steel products and have classified and described and published information concerning the various steel products and their nature and characteristics. In large part, the information so published consists of analytical statements of matters which have been developed and established over the years through usage, custom, and practice among steel producers and users. Technical committee of the respondent institute have also developed and published information concerning many new steels which has been made available to the consuming public.

Paragraph 6: Steel products are commonly classified into product groups related to the size and shape of the product, such as bars, structural shapes, plates, and sheets. Product groups are generally subdivided between carbon steel products and alloy steel products. Each steel product group has a common name which is generally understood and used not only by steel producers, but also by steel consumers. Similarly, there are common names and commonly accepted standards for all significant variations in steel product classifications. The names and standards thus used by steel producers and steel consumers have been developed, improved, and made more precise and useful by technical committees of the respondent institute and by other public and private agencies such as those named or referred to above in paragraph 5. In selling their respective steel products, steel producers, including the producer respondents, have long made use of such common names and standards.

Paragraph 7: Generally speaking, the announced price of any particular steel product is made up of two principal elements. The first is the "base price" or "price base," which is the announced price of a defined classification of products. The other element consists of the "extras" and "deduction" announced as additions to or deductions from the base price in respect of certain variations of the steel product.

Paragraph 8: Respondents, through committees of respondent institute and otherwise, defined and described the limits of steel product groups. The respondents used and followed those definitions and descriptions in the pricing of the products sold by them, respectively.

Paragraph 9: Respondents, through committees of respondent institute, defined and described the ranges of steel products within product groups. The respondents used and followed those definitions and descriptions in determining what products would be sold by them, respectively, at base prices without any extra charge or deduction.

Paragraph 10: Respondents, through committees of respondent institute, classified ranges of products, quantities and services. The respondent used and followed such classifications in their respective price announcements as the definitions and descriptions of products and services for which extra charges or deductions would be made.

Paragraph 11: The "base prices" and the "extras" and "deductions" announced by a respondent as applicable to any particular product at any particular place and time (as distinguished from the prices at which steel products were actually sold) were nearly always the same as those announced as applicable to steel products of the same classification at the same time and place by other respondents.

Paragraph 12: Prior to 1940, respondents jointly compiled with respect to various steel products average industrywide costs of performing the operations necessary to produce products not within the range of products sold at base prices, the costs of performing services other than those included in the production and handling of products sold at base prices, and averaged industrywide costs of producing and handling steel products in quantities different from those sold at base prices. The actual costs of performing these different functions varied from mill to mill depending upon the efficiency of the mill and varied from time to time depending upon the size of the particular product run and other cost factors.

Paragraph 13: The "extras" or "deductions" factors as announced by respondents were nearly always the same during any given period of time for any service, characteristic or quantity. Whenever the aforesaid averaged industrywide cost factors relating to different services or differences in material, necessary to produce different services, quantities or characteristics, were compiled, they have been used by respondents as a basis for determining and announcing their extra charges to be added to or deductions to be made from their "base" or "base prices."

Paragraph 14: Each respondent in its announcements of base prices has specified, not only an amount in terms of dollars and cents for a specified steel product, but has also specified that such amount was applicable to such product at a specified geographical point. Such geographical point or points were commonly referred to and used as "basing points." Each respondent did not necessarily announce prices at each of the points, but each did announce prices at or announce a willingness to equalize its prices with prices announced at certain of these points. Furthermore, in numerous instances, some respondents did not in their price announcements specify that their "base" or "base prices" had application at one or more geographical points at which they produced for sale and from which they shipped steel products.

Paragraph 15: Respondents quoted their prices of steel products on a basis of what they would cost the purchasers thereof at delivery points. These delivered quotations were, with exceptions, calculated by adding to the base price plus extras or minus deductions, a freight factor to the place of delivery from the basing point nearest freightwise to the place of delivery.

Paragraph 16: Respondents, through the respondent institute, collected and compiled lists of freight rate factors, which included freight rate factors from certain of the basing points to many of the consuming points for steel products. These lists of freight rate factors were printed in the form of books designated freight rate books which were sold to the respondents and others by the respondent institute for use in calculating the amount to be added to the base price plus extras or minus deductions to determine the delivered quotation. The freight rate tariffs published by the common carriers are complex. Due to these complexities, including alternate routes, switching charges, etc., experts in the field will often arrive at different rates for the same shipment. Respondents, by the use of these books, could quote, and generally did quote, identical amounts for the delivery cost factor of their delivered quotations.

Paragraph 17: Beginning during the period of the NRA steel code and continuing until the time of the complaint herein, respondent sellers have imposed a charge equal to 35 percent of the applicable all rail freight rate to the railroad freight station nearest to the point of use of purchasers desiring to use truck facilities for the transportation of steel products when delivery was taken at the plant.

Paragraph 18: Beginning during the period of the NRA Steel Code and continuing until the time of the complaint herein producer respondents have used arbitrary identical switching charges on purchases of steel products for delivery at basing points. These charges were made in lieu of actual switching charges and in some instances were more than, and in other instances less than, the actual switching charges. In most cases, such actual switching charges were practically impossible to determine in advance.

Paragraph 19: Respondents, through the traffic committee of the respondent institute, attempted to restrict the extension by the Interstate Commerce Commission of the fabrication in transit privileges available to purchasers of steel products.

Paragraph 20: Producer respondents which bid for governmental business in many instances have made identical delivered quotations for steel products to governmental agencies, State and Federal. These identical quotations have been made in sealed bids submitted to State and Federal agencies, each bidder representing, expressly or impliedly, that its sealed bid was made on the basis of independent action without knowledge of the price, terms, and conditions of sale which other bidders would submit, except knowledge of the previous prices and terms, methods and practices of selling of other potential bidders. Such identity has prevailed in the submission of bids, with respect to any given delivery point, although the place of production of the steel products, proposed for delivery to such point, varied widely among the respondent bidders. Use of the acts, practices, methods, and policies hereinbefore found and described promoted and otherwise contributed to such identity. The calculation of these quotations involved the use of identical base prices, extra charges, terms and conditions of sale, basing points and delivery charges.

Paragraph 21: On June 6, 1935, the members of the iron and steel industry adopted a formal resolution pursuant to the terms of which they ratified a similar resolution adopted by the board of directors of respondent institute on June 3, 1935, to the effect that each of said members declared its intention of maintaining as stated therein the standards of fair competition which had been described in the NRA Steel Code. The standards of fair competition thus referred to provided for and included the practices which are hereinbefore described in paragraphs 5 through 20.

The resolution of June 3, 1935, referred to above is quoted as follows:

"Whereas the chairman of the National Industrial Recovery Board has issued a statement with regard to the decision of the U.S. Supreme Court in the Schechter Poultry Corporation case in which he expressed the hope 'that all employers heretofore operating under approved codes and all their employees will cooperate in maintaining those standards of fair competition in commercial and labor relations which have been written into the codes with practically universal sanction, and which represent a united effort to eliminate dishonest, fraudulent trade practices and unfair competition in overworking and underpaying labor'; therefore be it

"*Resolved*, That it is hereby declared to be the sentiment of the board of directors of the American Iron and Steel Institute that the individual members of the iron and steel industry, acting voluntarily, during the present uncertainty, maintain the present rates of pay and maximum hours of labor and the standards of fair competition which are set forth in the steel code, and that the members of the industry continue to protect the employees' rights of collective bargaining."

The resolution of June 6, 1935, referred to above is quoted as follows:

"*Resolved*, That the members of the iron and steel industry in general meeting assembled this 6th day of June 1935, hereby unanimously ratify the resolution of the board of directors of American Iron and Steel Institute, adopted June 3, 1935, and each of us hereby declares that the company which he represents is in favor of supporting the position taken by such resolution and that it is the intention of such company, acting individually and voluntarily, insofar as it may do so, during the present uncertainty to maintain the present rates of pay and maximum hours of labor and the standards of fair competition which are described in the steel code, and that such company will continue to protect the employees' rights of collective bargaining."

At said meeting held on June 6, 1935, among those present were officers of the respondent institute and an officer or representative of each of the following of its members: Alan Wood Steel Co., Armco Steel Corp., Atlantic Steel Co., Bethlehem Steel Co., A. M. Byers Co., Columbia Steel & Shafting Co., Edgewater Steel Co., Firth Sterling Steel & Carbide Corp., Granite City Steel Co., Inland Steel Co., Jones & Laughlin Steel Corp., Keystone Steel & Wire Co., Laclede Steel Co., the Midvale Co., Moltrup Steel Products Co., National Steel Corp., Pittsburgh Tube Co., Republic Steel Corp., The Timken Roller Bearing Co., United States Steel Corp., Vulcan-Crucible Steel Co., Wheeling Steel Corp., Wyckoff Steel Co., the Youngstown Sheet & Tube Co.

In addition to those named above, there were also present at said meeting an officer or representative of each of the following respondents which were not members of the respondent institute on June 6, 1935: The American Steel & Wire Co. of New Jersey, Bethlehem Steel Corp., United States Steel Co. (designated in the complaint as Carnegie-Illinois Steel Corp., but which corporate name was changed on December 30, 1950, to that of United States Steel Co.), Columbia Steel Co., Great Lakes Steel Co., Lukens Steel Co., Mahoning Valley Steel Co., National Tube Co., Northwestern Steel & Wire Co., Sheffield Steel Corp. of Ohio, Tennessee Coal, Iron & Railroad Co., Truscon Steel Co., and Wierton Steel Co.

Paragraph 22: The acts and practices hereinbefore described and found, taken together and under the circumstances stated, have tended to lessen competition, are oppressive to the public interest and unfair within the intent and meaning of the Federal Trade Commission Act.

CONCLUSION

The acts and practices hereinbefore described and found, if not checked, would unduly suppress competition. Therefore, the public interest and the provisions of the Federal Trade Commission Act require that the respondents should be restrained as provided in the annexed order.

By the Commission.

[SEAL] JAS. M. MEAD, *Chairman.*

Issued August 10, 1951.

Attest:

D. C. DANIEL, *Secretary.*

UNITED STATES OF AMERICA, BEFORE FEDERAL TRADE COMMISSION—DOCKET NO. 5508, ORDER TO CEASE AND DESIST

(Commissioners: James M. Mead, Chairman, William A. Ayres, Lowell B. Mason, John Carson, Stephen J. Spingarn.)

(In the matter of American Iron & Steel Institute, an incorporated trade association, its directors and officers; and United States Steel Corp. and the following of its subsidiaries, American Bridge Co., the American Steel & Wire Co. of New Jersey, Carnegie-Illinois Steel Corp., Columbia Steel Co., Geneva Steel Co., National Tube Co., Tennessee Coal, Iron & Railroad Co., and Virginia Bridge Co.; Bethlehem Steel Corp. and the following of its subsidiaries, Bethlehem Pacific Coast Steel Corp., Bethlehem Steel Co., Republic Steel Corp. and its controlled company, Truscon Steel Co.; the American Rolling Mill Co. and its subsidiary, Sheffield Steel Corp. of Ohio; National Steel Corp. and the following of its subsidiaries, Weirton Steel Co. and Great Lakes Steel Co.; Inland Steel Co. and its subsidiary, Milcor Steel Co.; the Youngstown Sheet & Tube Co.; Jones & Laughlin Steel Corp.; Wheeling Steel Corp.; Colorado Fuel & Iron Corp.; Crucible Steel Co. of America; Pittsburgh Steel Co.; Sharon Steel Corp.; Alan Wood Steel Co.

(Acme Steel Co.; Agaloy Tubing Co.; Allegheny Ludlum Steel Corp.; American Chain & Cable Co., Inc.; Atlantic Steel Co.; the Atlantic Wire Co.; the Babcock & Wilcox Tube Co.; Bliss & Laughlin, Inc.; Continental-United Industries Co., Inc.; Buffalo Bolt Co.; Bundy Tubing Co.; A. M. Byers Co.; the Carpenter Steel Co.; Central Iron & Steel Co.; Chicago Steel & Wire Co.; Columbia Steel & Shafting Co.; Columbia Tool Steel Co.; Compressed Steel Shafting Co.; Connors Steel Co.; Continental Steel Corp.; Copperweld Steel Co.; the Cuyahoga Steel & Wire Co.; Detroit Steel Corp.; Henry Disston & Sons, Inc.; Eastern Stainless Steel Corp.; Edgewater Steel Co.; Empire Steel Corp.; Firth Sterling Steel & Carbide Corp.; Follansbee Steel Corp.; Fretz-Moon Tube Co., Inc.; Granite City Steel Co.; Griffin Manufacturing Co.; Harrisburg Steel Corp.; International Detrola Corp.; Joslyn Manufacturing & Supply Co.; Judson Steel Corp.; Keystone Drawn Steel Co.; Keystone Steel & Wire Co.;

(Laclede Steel Co.; Latrobe Electric Steel Co.; Lukens Steel Co.; the Mahoning Valley Steel Co.; The Medart Co.; Mercer Tube & Manufacturing Co.; the Midvale Co.; Moltrup Steel Products Co.; National Standard Co.; the National Supply Co.; Northwestern Steel & Wire Co.; Pacific States Steel Corp.; the Phoenix Iron Co.; Pittsburgh Tool Steel Wire Co.; Pittsburgh Tube Co.; the Pollak Steel Co.; Reeves Steel & Manufacturing Co.; John A. Roebling's Sons Co.; Rotary Electric Steel Co.; the Standard Tube Co.; Superior Steel Corp.; Sweet's Steel Co.; the Thomas Steel Co.; The Timken Roller Bearing Co.; Universal Cyclops Steel Corp.; Vanadium-Alloys Steel Co. and its subsidiary, Anchor Drawn Steel Co.; Vulcan Crucible Steel Co.; Washington Steel Corp.; Western Automatic Machine Screw Co.; Wheatland Tube Co.; Wisconsin Steel Co.; Worth Steel Co.; and Wyckoff Steel Co.

This proceeding having been heard by the Federal Trade Commission upon the amended complaint of the Commission, the answers thereto of the respondents, and upon testimony and other evidence to support the allegations of said complaint taken before an examiner of the Commission theretofore duly designated; and, the Commission having made its findings as to the facts and its conclusion and being of the opinion that it is in the public interest that it issue its order under the Federal Trade Commission Act, the Commission hereby does so, as follows:

I. It is ordered that respondents American Iron & Steel Institute, a membership corporation organized under the laws of the State of New York, and its directors, its officers, and United States Steel Corp., a corporation, the American Steel & Wire Co. of New Jersey, a corporation, United States Steel Co. (designated in the complaint as Carnegie-Illinois Steel Corp., but which corporate name was changed on December 30, 1950, to that of United States Steel Co.), a corporation, Columbia Steel Co., a corporation, Geneva Steel Co., a corporation, National Tube Co., a corporation, Tennessee Coal, Iron & Railroad Co., a corporation, Bethlehem Steel Corp., a corporation, Bethlehem Pacific Coast Steel Corp., a corporation, Bethlehem Steel Co., a corporation, Republic Steel Corp., a corporation, Truscon Steel Co., a corporation, the Youngstown Sheet & Tube Co., a corporation, Jones & Laughlin Steel Corp., a corporation, Armco Steel Corp. (name formerly the American Rolling Mill Co.), a corporation, Sheffield Steel Corp. of Ohio, a corporation, National Steel Corp., a corporation, Weirton Steel Co., a corporation, Great Lakes Steel Corp., a corporation, Inland Steel Co., a corporation, Inland Steel Products Co. (name formerly Milcor Steel Co.), a corporation, Wheeling Steel Corp., a corporation, the Colorado Fuel & Iron Corp., a corporation, Claymont Steel Corp. (name formerly Worth Steel Co.), a corporation, Crucible Steel Co. of America, a corporation, Pittsburgh Steel Co., a corporation.

Also Sharon Steel Corp., a corporation, Alan Wood Steel Co., a corporation, Acme Steel Co., a corporation, Allegheny Ludlum Steel Corp., a corporation, American Chain & Cable Co., Inc., a corporation, Atlantic Steel Co., a corporation, the Babcock & Wilcox Tube Co., a corporation, Bliss & Laughlin, Inc., a corporation, Continental Cooper & Steel Industries, Inc. (name formerly Continental-United Industries Co., Inc.), a corporation, Buffalo Eclipse Corp. (name formerly Buffalo Bolt Co.), a corporation, A. M. Byers Co., a corporation, the Carpenter Steel Co., a corporation, Central Iron & Steel Co., a corporation, Columbia Steel & Shafting Co., a corporation, Columbia Tool Steel Co., a corporation, Compressed Steel Shafting Co., a corporation, Connors Steel Co., a corporation, Continental Steel Corp., a corporation, Copperweld Steel Co., a corporation, the Cuyahoga Steel & Wire Co., a corporation, Detroit Steel Corp., a corporation, Henry Disston & Sons, Inc., a corporation, Edgewater Steel Co., a corporation, Firth Sterling Steel & Carbide Corp., a corporation, Follansbee Steel Corp., a corporation, Fretz-Moon Tube Co., Inc., a corporation, Granite City Steel Co., a corporation, Griffin Manufacturing Co., a corporation, Newport Steel Corp. (name formerly International Detrola Corp.), a corporation, Joslyn Manufacturing & Supply Co., a corporation, Judson Steel Corp., a corporation, Keystone Drawn Steel Co., a corporation, Keystone Steel & Wire Co., a corporation, Laclede Steel Co., a corporation, Latrobe Electric Steel Co., a corporation, Lukens Steel Co., a corporation.

Also, Mahoning Valley Steel Co., a corporation, the Medart Co., a corporation, Mercer Tube & Manufacturing Co., a corporation, The Midvale Co., a corporation, Moltrup Steel Products Co., a corporation, National-Standard Co., a corporation, the National Supply Co., a corporation, Northwestern Steel & Wire Co., a corporation, Pacific States Steel Corp., a corporation, Pittsburgh Tool Steel Wire Co., a corporation, Pittsburgh Tube Co., a corporation, The Pollak Steel Co., a corporation, Reeves Steel & Manufacturing Co., a corporation, John A. Roebling's Sons Co., a corporation, Rotary Electric Steel Co., a corporation, the Standard Tube Co., a corporation, Superior Steel Corp., a corporation, Sweet's Steel Co., a corporation, the Thomas Steel Co., a corporation, the Timken Roller Bearing Co., a corporation, Universal-Cyclops Steel Corp., a corporation, Vandium-Alloys Steel Co., a corporation, Anchor Drawn Steel Co., a corporation, Vulcan-Crucible Steel Co., a corporation, the Western Automatic Machine Screw Co., a corporation, Wheatland Tube Co., a corporation, Wisconsin Steel Co., a corporation, and Wyckoff Steel Co., a corporation, and their respective officers, agents, representatives and employees, in, or in connection with, the offering for sale, sale and distribution in interstate commerce of the steel products involved in this proceeding (hereinafter called steel products) do forthwith cease and desist from entering into any planned common course of action, understanding or agreement between any two or more of said respondents, or between any one or more of said respondents and others not parties hereto, and from cooperating in, carrying out or continuing any such planned common course of action, understanding or agreement, to do or perform any of the following things:

1. Adopting, establishing, fixing, or maintaining prices or any element thereof at which steel products shall be quoted or sold, including but not limited to base prices, the extras which shall be added to, or the deductions which shall be made from, any base price for any specified characteristic, or loading charge or delivery charge or terms of discount, credit, or other conditions of sale.

2. Collecting, compiling, circulating, or exchanging between or among respondents, or any of them, a list or lists of base prices or of prices by any other designation, or extra charges thereto or deductions therefrom for any specified characteristic or quantity of steel products or services connected therewith used or to be used in computing prices or price quotations of steel products; or using, directly or indirectly, as a factor in computing price quotations or in making, quoting, or charging prices any such list or lists so collected, compiled, circulated, or exchanged.

3. Collecting, compiling, circulating, or exchanging between or among respondents, or any of them, a list or lists of freight rate factors, transportation charges or other charges relating to transportation or loading or other services connected therewith, used or to be used in computing prices or price quotations of steel products, or using, directly or indirectly, as a factor in computing price quotations any such list or lists so collected, compiled, circulated, or exchanged.

4. Formulating, devising, adopting, establishing, fixing or maintaining methods or practices of quoting and selling steel products to railroads or other particular classes of customers.

5. Quoting or selling steel products at prices calculated or determined pursuant to, or in accordance with, any system of formula which produces identical price quotations or prices or delivered costs, or which establishes a fixed relationship among price quotations or prices or delivered costs, or which prevents purchasers from securing any advantage in price in dealing with one or more of the respondents as against any of the other respondents.

6. Failing to quote or to sell and deliver any steel products f.o.b. at the plant of manufacture thereof.

7. Causing to be done any of the things described in the preceding subparagraphs (1) through (6) through action of respondent American Iron and Steel Institute or any subdivision or committee of said institute or any individual, or other corporation or organization.

II. It is further ordered that each of the respondents do forthwith cease and desist from acting, individually or otherwise, so as knowingly to contribute to the maintenance or operation of any planned common course of action, understanding or agreement between and among any two or more of the respondents or between any one or more of them and others not parties hereto through the commission of any of the acts, practices or things prohibited by subparagraphs (1) through (6) of paragraph I of this order.

III. *Provided, however,* That, in interpreting and construing the foregoing provisions of this order, it is understood that:

1. The Federal Trade Commission is not considering evidence of uniformity of prices or any element thereof of two or more sellers at any destination or destinations alone and without more as showing a violation of law.

2. The Federal Trade Commission construes the phrase "planned common course of action" and the word "continuing" contained in this order as interpreted by the Supreme Court in *F.T.C.* v. *Cement Institute,* 333 U.S. 683, at page 728, and by the Court in *American Chain & Cable Co.* v. *F.T.C.* (CA 4th 1944), 139 F. 2d 622.

3. The Federal Trade Commission is not acting to prohibit or interfere with delivered pricing or freight absorption as such when innocently and independently pursued, regularly or otherwise, with the result of promoting competition.

4. The findings and the conclusion which the Federal Trade Commission has made in this case have been expressly set forth in the Findings as to the Facts and Conclusion that precede this order and are complete.

5. Nothing contained in this order or the understandings in connection herewith shall be construed to affect (a) the duty, authority or power of the Federal Trade Commission under the provision of section 5(b) of the Federal Trade Commission Act to reopen this proceeding and alter, modify or set aside in whole or in part any provision of this order whenever in the opinion of the Federal Trade Commission conditions of fact or of law have so changed as to require such action or if the public interest shall so require, nor to prevent representatives of either the Federal Trade Commission or of the respondents or any of them from moving to so alter, modify or set aside in whole or in part any provision of this order; or (b) any such right as the respondents, or any of them, may have under the law to question or contest any such action by the Commission in so reopening this proceeding or in so altering, modifying or setting aside this order, either before the Commission or upon review or otherwise in any competent court.

IV. It is further ordered that the respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

By the Commission.

[SEAL] D. C. DANIEL,
Secretary.

Issued August 10, 1951.

Mr. KEFAUVER. Mr. President, an understanding of what is in the consent decree is vital in connection with the consideration of this matter.

In 1948 the Federal Trade Commission issued a complaint against virtually all members of the steel industry, charging that there had been a conspiracy to fix prices, in violation of section 5 of the Federal Trade Commission Act. It was a major antitrust case. There were 1,237 exhibits and 5,458 pages of testimony. Finally, on June 15, 1951, the steel companies voluntarily entered into a consent decree which they, themselves, had proposed to the Commission. The most pertinent part is as follows: The steel companies are prohibited from jointly "adopting, establishing, fixing, or maintaining prices, or any element thereof, at which steel products shall be quoted or sold, including, but not limited to, base prices." And, as I pointed out earlier, certain provisions in the order do not apply to base prices which are the prices customarily changed when the industry raises prices.

Mr. President, I listened to the Senator from Utah [Mr. BENNETT] and the Senator from Arizona [Mr. GOLDWATER] expanding at considerable length on the proposition that steel is a very competitive industry, with its prices determined by the free play of market forces. But, Mr. President, nothing could be further from the truth. Over a period of many, many years the prices charged by the steel companies have been substantially the same. In some way they all happen to find the same level.

In sealed bids to the Government, the steel companies quote identical prices to the thousandths of a cent. We have put such data into the record of our hearings. There are simultaneous or practically simultaneous price increases. One, usually United States Steel, will act as a leader, and the others will immediately follow. Even in times of recession, such as in 1949, 1954, and 1958, the steel companies have raised their prices at the same time, to the same level, and have made the increases stick.

There is thus a solid basis for raising the question, in the light of these and similar circumstances of whether the steel companies are violating the decree into which they voluntarily entered in 1951.

It should be pointed out that Judge Hansen, the former Assistant Attorney General in charge of the Antitrust Division under the past administration, expressed grave concern about antitrust implications of previous steel price increases.

Mr. GORE. Mr. President, will my colleague yield?

Mr. KEFAUVER. I am happy to yield to my colleague.

Mr. GORE. The Senator has referred to the consent order which, as he has stated, was proposed by the steel companies themselves, and was adopted as an order of the Federal Trade Commission. But because the senior Senator from Tennessee and the junior Senator from Tennessee have referred to that order by the Federal Trade Commission and have called upon the Chairman of the Federal Trade Commission to enforce its terms, which were arrived at after hearing and investigation, and we pointed out that the decree was pro-

posed by the steel companies themselves, we are accused of threatening the steel industry. Why should not this order be enforced? The steel companies proposed it and consented to it, and the order was entered by an agency of the U.S. Government.

Mr. KEFAUVER. Certainly, the regulatory commissions should constantly examine the facts and determine whether their orders are being followed or are being violated. It is clearly the duty of the Members of Congress and of the appropriate committees of Congress—and certainly the duty of the Judiciary Committee and its Antitrust Subcommittee, which have a particular interest in this matter—to raise the question of whether such orders are being enforced. I do not think any Member of the Senate, on either side of the aisle, approves the violation of orders of a Government agency, particularly where the order has been proposed by the companies themselves.

In discussing whether or not the steel industry is competitive, pricewise, I wish to ask the Senator from Arizona [Mr. GOLDWATER], who had much to say about its competitive behavior, whether he knows of any other industry in which the companies can break even when they are operating at only 30 percent of capacity. That is the break-even point of the United States Steel Corp., and the break-even point of the industry as a whole is only slightly higher.

No, Mr. President, we are not here dealing with a competitive industry. As a matter of fact, Mr. Roger Blough testified before our committee that in 1957 he and three other officials of the United States Steel Corp. decided to raise the price of steel by $6 a ton, and of course, when United States Steel Corp. raised the price, all the other steel companies followed suit to the same level. Mr. President, when three or four men have the power to bring about a general price increase in a basic industry, I do not think it can correctly be called a competitive industry in any true sense of the word.

Furthermore, in 1958 the steel companies raised the price of steel $4 a ton, at a time when the industry was operating at less than 60 percent of capacity. Ordinarily one would think that when an industry was operating at such a low rate, it might lower its price in order to obtain more orders. But that does not happen in this industry.

Mr. HUMPHREY. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I am glad to yield.

Mr. HUMPHREY. I wish to join in the expression made by the junior Senator from Tennessee [Mr. GORE], in regard to the Federal Trade Commission orders. It is inconceivable to me that two responsible U.S. Senators would be accused of threatening an industry, when the established regulatory body of the U.S. Government has before it an order, in the form of a consent decree, to which the industry itself has agreed.

Mr. GORE. And the industry itself proposed it in the first place.

Mr. HUMPHREY. Yes, as the junior Senator from Tennessee [Mr. GORE] suggests, the industry itself proposed it in the first place. So I cannot understand why two Senators who have suggested to the Chairman of the Commission that the order be enforced should be confronted with a charge that they are threatening the industry.

The failure to enforce the order is a threat to the public. The prime and essential duty of these regulatory bodies is that of regulation. Those regulatory agencies were established in the public interest. They were established for the purpose of protecting the public welfare. The senior Senator from Tennessee, as well as his junior colleague, knows full well that one of the first attacks made by special interests, vested interests, powerful economic interests is upon a regulatory body, either by seeking to infiltrate it, or wear it down through a long process of legal attrition, or dilute the law under which these commissions operate, or make them ineffective in some way or another.

I have all too often felt that the argument between the so-called liberals and conservatives, when boiled down, amounted to something that was less important than the necessity for pointing to the attacks made upon the regulatory bodies established by the representatives of the people in Congress, and that it was their job to protect the public interest in the economic and social spheres.

The Federal Trade Commission is the guardian of the free enterprise system. The Federal Trade Commission was established back in the administration of Woodrow Wilson, literally under a Magna Carta for independence. When the Federal Trade Commission refuses or fails or in any way does not enforce the regulations or laws it is supposed to enforce, or fails to put into effect the decrees or judgments for which it is responsible, then it violates its purpose.

I have been interested in the enforcement of the Robinson-Patman Act, for instance, which comes under the jurisdiction of the Federal Trade Commission. I have reason to believe that many times there is a failure to adequately enforce the price discrimination provisions. We have tried to strengthen the Clayton Act and the Robinson-Patman Act and the antitrust laws. I see the Assistant Attorney General in charge of the Antitrust Division has been before the Senator's committee, making recommendations for strengthening the antitrust laws.

I compliment the two Senators from Tennessee—not them alone, because others have joined with them, but to compliment them particularly—for leading the fight to make this a truly free economic system. This is what we mean by truly free enterprise.

What disturbs me is that some of the self-appointed champions of free enterprise are the first to rush in and defend administered prices, and to defend, if not monopoly, oligopoly, or to defend at least a type of economic structure in which the preponderance of power is not in free enterprise.

Mr. GORE. They generally refer to it as private enterprise, not free enterprise.

Mr. HUMPHREY. Sometimes it does not become very private; it becomes very corporate.

The comments that took place a few days ago——

Mr. KEFAUVER. August 22.

Mr. HUMPHREY. Yes, August 22. I refer to the series of discussions in the Senate which were triggered by the two Senators from Tennessee. The junior Senator from Tennessee [Mr. GORE] led off on this fight. Those speeches have served a public purpose. I felt it was one of the few times when we did what we should do more often in the U.S. Senate by debate. By the way, there was full debate. There was no controlled time in effect, in which one can hardly "get inside" for a good, old-fashioned American argument such as we are witnessing today. That debate, first of all, precipitated a reply from the President of the United States. I gather that letter has been entered into the RECORD.

Mr. KEFAUVER. It has been.

Mr. HUMPHREY. It was the best answer that could be given to the argument made on the other side of the aisle. The letter was devastating in terms of a reply to the arguments that have been raised in contradiction to the speeches which were made in the Senate on August 22. I repeat, more discussions like this in the Senate will serve the public interest. If we had more debates on the subject of administered prices, controlled markets, taxation, fiscal and monetary policies, if we had more intelligent, well prepared, well thought-out discussions of this kind, I know the American people would be better informed and we would have a more viable and vigorous democracy.

The Senators from Tennessee have—in the tradition of Andrew Jackson, the great Tennessean, the greatest of them all, a giant—stood up for the people. Andy Jackson earned his reputation, in part, by his fight against the so-called Bank of the United States, which thought it owned the United States. He broke the back of the bank. They thought they were going to break the back of Andy Jackson, but they did not. Some powerful forces thought they could break the back of the senior Senator from Tennessee [Mr. KEFAUVER]. They failed. Others thought they could break the back of the junior Senator from Tennessee [Mr. GORE], but they failed. I do not know what kind of stock they have in Tennessee, but the men the people of Tennessee have sent to the Senate are certainly fine examples.

Mr. KEFAUVER. The Senator from Minnesota is very generous, but I remind him that we take trips to Minnesota.

Mr. GORE. The qualities may be a little rough.

Mr. HUMPHREY. Thank goodness. Some of these refined products become a little fragile.

Mr. KEFAUVER. Mr. President, it is gratifying to receive the kind of encouragement which has been given us by the Senator from Minnesota [Mr. HUMPHREY], because the criticism of corporations seldom brings encouragement or support. But we must maintain competition, and to do this we must enforce

the antitrust laws, we must give encouragement to the Federal Trade Commission, whose job is not regulatory in the sense of fixing rates or prices but in the sense of maintaining competition as the automatic regulator of prices.

It is these agencies, and the backing that they receive from the administration, from Congress, and from the people, which make the economy of the United States distinctive from that of any other in the world. Instead of constantly being subject to criticism, these agencies should receive our praise. Unhappily, they are usually the recipients of criticism and abuse. Yet, without them our free, competitive enterprise system would surely disappear.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. HUMPHREY. I think we ought to make the record, and if anyone reads the RECORD with any degree of objectivity, it ought to be clear that no Senator is advocating Government control of industry, or Government ownership of industry. We are not recommending that. We are not saying that any industry, or the steel industry, is not to make a profit. With the vast investments in those companies, it is imperative that they make a profit.

Mr. KEFAUVER. And a reasonable profit.

Mr. HUMPHREY. And the stockholders are entitled to make a profit. We do not criticize the juicy and generous pension plans, even though some of the officers of companies will criticize a $75 a month social security payment for grandma.

If they end up with $750 a month, there is no complaint. This is something worked out in the channels of their private negotiations in the company.

I think it should be clear that the spokesmen on this side of the aisle are advocating a competitive economy. We are advocating a private economy. We are advocating a profit economy. We are advocating an economy of abundance. We happen to believe that the United States of America will not stay strong in terms of competition with the steel industry operating at 60 percent of capacity, or 40 or 50 or 70 percent of capacity.

I should like to see the steel industry operate at full capacity. I should like to see the steel industry, when it operates at full capacity, enjoy the advantage of generous tax laws, which provide for depreciation and allowances and profits, but I also wish to be sure that there is not what is called rigging of the market or fixed prices. I wish to make sure that productivity is honored by a lowering of prices to the consumer or at least a sharing of the fruits of the industry with the workers, with the consuming public, and with the stockholders, through dividends, through wages, and through price adjustments.

This is what we are talking about. We have to make it clear.

I saw an article from Barron's Weekly. From such articles one might be led to believe that anybody who spoke up on this subject intended to do something evil to the industry.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I am happy to yield to my colleague.

Mr. GORE. A number of articles have been placed in the RECORD. Since the senior Senator from Minnesota has referred to the editorial in Barron's magazine, I should like to read a portion, as follows:

> Steel prices, in short, are the proper concern not of Congress but of those who own and operate steel mills. Pittsburgh alone must decide in October whether competitive conditions, current and prospective, warrant a higher price.

This statement assumes that the public interest is not involved in regard to steel prices, yet we are told that a $6 per ton increase in the price of steel will result in a $97 increase in the price of a tractor to a farmer, though there is less than a ton of steel involved.

If my senior colleague will yield for the purpose, I should like to inquire the views of the senior Senator from Minnesota on this concept that Congress should not be concerned with the public welfare, with the cost of living, with the general price level, with inflation, but that steel, the bellwether in our economy—the greatest and largest bellwether in our economy—should be the concern of Pittsburgh alone.

Mr. HUMPHREY. There are two mandates to the Congress in the Constitution of the United States. Other things are permissive. There are two mandates to the Congress.

The first mandate is to provide for the common defense. I am sure we wish to do that, and that we are doing it.

The second is to promote the general welfare. Under the head of promoting the general welfare the state of the economy is the concern of this Congress, or of any other Congress.

I hear speeches in the Congress about the threat of inflation. One of the biggest areas of inflation is the steel industry. I gather those on both sides of the aisle are concerned about the threat of inflation. I hear remarks on this side of the aisle and on the other side of the aisle.

One cannot be concerned about inflation without getting down to specifics. We are not concerned about inflated prices of seagulls. Very few people eat seagulls these days. We are concerned about inflated prices of transportation, of steel, of a host of manufactured and processed products.

When there is an increase in the price of steel of $3 a ton it is like an atomic shock to the entire economy. It affects everything from the can opener one uses for a can of beans or a can of tomatoes to a B–52 airplane, to an atomic reactor, to an automobile, to a washing machine, to a sewing machine, to a tractor or to a binder. Everything is affected.

No other industry in America so affects the total price structure of this country as the steel industry.

This is why on this floor we have said, not merely to management but also to labor, that there is a great public responsibility. That is what the President said. That is what the Secretary of Labor said. That is what the economists have said. That is what Dr. Heller, the Chairman of the Council of Economic Advisers, said.

Surely the Congress has an interest in the problem. This is why at times the Congress, under a state of national emergency, has established price controls.

I am not advocating price controls. One has to be careful of what one says. Somebody will say, "I heard Senator so-and-so say he wished to have price controls."

Let us get the record clear. We are not advocating price controls by Government or by industry. If I have a choice as between price controls, I should like to have the one imposed upon me as to which I have a vote. When there is an administered price, that is a price control. It is the price control for the benefit of a private group. A public price control is at least allegedly for the purpose of the public interest.

I wish to make it clear that this is merely an analogy, and that no one is recommending price control. In fact, I think all the Senators are recommending is that there be a little competition. I would not object if there were a little competition in October in Pittsburgh, but I do not think there will be.

The fact of the matter is that when the United States Steel Co. says, "This is the price of steel," that is it. That is the way it is.

Do Senators know what is done in Minnesota? There is a day when the people come to Minnesota to decide on the price of iron ore. They establish it on the day they take the first shipment of ore out of the docks at Duluth, when the ice breaks. That is it. They put a price on it.

Does Mr. Farmer have that kind of a deal when the price of eggs goes up or down like a child's fever or, shall I say, up or down like the desires of a hen? Who knows? One week eggs are selling for 25 cents a dozen. Then, if the roosters and the hens are not cooperating, the next week the price of eggs is down to 14 cents a dozen; or, if they are overcooperating, the price of eggs is down to 14 cents a dozen.

There is a price fluctuation in the grain market. There is a price fluctuation in the grocery store. There is a price fluctuation in the hardware store, and in the clothing store.

I will tell Senators what happens at the iron range of Minnesota. We know what the price of iron ore will be. Those people come in and take the first shipload out, and on that shipload they establish the price. The call it Erie, plus. In that way we determine how much tax the State will receive. The State receives a percentage, what some people might call a severance tax. That is based on the value of the ore.

Who establishes the value of the ore? It is established by the biggest company. When they pull it out, that is it. From that day on the price of iron ore remains rather stable. It does not make much difference whether the factories or the

furnaces are operating at 40 percent of capacity or at 80 percent of capacity; the price of iron ore is static.

But the price received by poor Mr. Farmer, if he raises a little more corn than he can sell, goes "kerplunk," down to the bottom of the barrel. If he raises a little less wheat or a little less rice than the market will take, then the price goes up.

If there happens to be a little extra iron ore, there is no effect. There is iron ore stacked up in piles in northern Minnesota, in what we call the reserves, which would equal 10 of these Capitol buildings in dimension. There are tons of the ore waiting to be taken away. Does the price go down? Not a bit.

If the farmer had the same amount of corn piled up, the price would go down. The price of iron ore does not.

Do Senators wish to know why that is? The answer is very simple. There are not quite as many immediate processors of iron ore as there are of wheat or of corn. There are 180 million people in the United States who have something to do with the food supply.

There are perhaps 12 or fewer large companies—what we could call major steel companies—that make the determination.

Mr. GORE. What I would like to know is whether the Erie-plus price which is fixed and prevails throughout the year until their port is frozen over again represents free enterprise, private enterprise, or is it something of a different nature?

Mr. HUMPHREY. It is a kind of deep-freeze enterprise. One is frozen in until he is frozen out. May I say that we have had quite a few frozen out.

Mr. KEFAUVER. I assume it is called industry price control.

Mr. HUMPHREY. The Senator's description is very apt.

Mr. KEFAUVER. Mr. President, I wish to hurry on, because the hour is very late.

The Senator from Utah [Mr. BENNETT] had a good deal to say about how low profits are in the steel industry. I wish again to point out, as was done in the subcommittee's Report on Administered Prices in Steel, at page 38, that profits per ton of steel in recent years have been at an alltime high. The profit per ton of finished steel for the United States Steel Corp. in 1960 was $16.27, in 1959, $17.73; in 1958, $17.71.

All of these figures are higher than ever before in the history of United States Steel. Even in the war year of 1916 before we had price control the profit per ton of steel was $15.87. In the 1920's it dropped to around $6 or $7 a ton, except in 1929 when it rose to $11.75. Then up to 1954 it did not rise as high as $10 per ton. But in 1955 it made a big jump to $14.51, and in recent years it has been in the area of $16 to $18 a ton.

Obviously, it would not be possible for the profit per ton of steel now to be as great as it is, and to have risen as it has, unless the price of steel had risen more than its costs. There are many other interesting points on steel profits which were made in the speeches of August 22.

I ask unanimous consent that a table showing the profit of the United States Steel Corp. per ton of steel over a long period of years be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE V.—*United States Steel Corp., net income (after taxes) per ton of steel products shipped, 1915–60*

1915	$5.92
1916	15.87
1917	13.25
1918	8.04
1919	5.70
1920	7.06
1921	4.18
1922	3.02
1923	6.85
1924	6.70
1925	6.14
1926	7.40
1927	6.14
1928	7.41
1929	11.75
1930	8.16
1931	1.55
1932	—16.47
1933	—5.74
1934	—3.34
1935	.14
1936	4.24
1937	6.73
1938	—1.05
1939	3.51
1940	6.81
1941	5.69
1947	6.28
1948	6.27
1949	9.11
1950	9.52
1951	7.48
1952	6.80
1953	8.85
1954	9.15
1955	14.51
1956	14.56
1957	17.91
1958	17.73
1959	14.07
1960	16.27

Mr. KEFAUVER. The Senator from New York [Mr. JAVITS] and the Senator from Utah [Mr. BENNETT] conceded that taking 1947 as a starting point, the price increase in steel has been greater than the increase in unit labor costs. I ask unanimous consent that a table on this matter be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Steel

[1947=100]

	Wholesale price index	Unit labor cost	Productivity (hours paid)	Average hourly earnings
1947	100.0	100.0	100.0	100.0
1948	113.7	109.3	100.4	109.7
1949	123.1	111.4	102.8	114.6
1950	129.3	104.9	111.9	117.4
1951	139.7	116.1	113.0	131.2
1952	142.8	117.5	117.6	138.2
1953	153.6	126.3	118.8	150.0
1954	160.3	131.8	115.9	152.8
1955	167.8	127.2	129.4	164.6
1956	181.9	134.2	130.4	175.0
1957	199.2	144.4	128.9	186.1
1958	206.2	158.0	126.6	200.0
1959	209.7	150.8	141.8	213.9

Source: Bureau of Labor Statistics; unit labor cost derived from productivity and average hourly earnings

Mr. KEFAUVER. The table shows that with 1947 as the base of 100, the wholesale price index of steel had risen by 1959 to 209.7. With 1947 also as the base the unit labor cost had risen by 1959 to 150.8. So obviously the wholesale price increase exceeded the unit labor costs, using 1947 as a base.

The Senator from New York [Mr. JAVITS] and also the Senator from Utah [Mr. BENNETT] objected to the use of 1947 as a base. But if we take some other year, such as 1953, as the base we come out with the same general conclusion. With 1953 as the base the increase to 1959 in the wholesale price of steel is 36 percent, and the increase in unit labor costs only 19 percent. Much the same result would be obtained if 1954 were taken as the base year. The conclusion that the increase in price has been greater than the increase in unit labor costs thus does not rest upon the use of 1947 as the base year.

One other point on which there has been some discussion today and which I would like to clarify is the close relationship that exists in the steel industry between the profit rate and the operating rate, that is, production as a percent of capacity. With the pickup in the economy resulting from the increased defense effort, the steel operating rate has recently risen to around 75 percent of capacity, and it is expected to go higher. Operating at 80 percent of capacity, the steel industry can expect to make a rate of return on net worth, after taxes, of around 11 percent; at 90 percent of capacity around 14 percent after taxes. Any industry should be satisfied with such high profit rates.

One other point that I would like to clear up is whether the increases in the price of steel have been in line with the price increases of other products. The price increase of finished steel has been greater than that of any of the BLS wholesale commodity groups from 1947 to 1960. It is also true that between 1947 and 1960 the increase in the price of finished steel was more than four times the increase shown in the all-commodity index. The increase in the price of finished steel was 105.5 percent. The increase in the all-commodity index was 24.1 percent. It was more than three times the rise in manufactured products other than food, which was 34.6 percent. If we leave out the metals and the machinery groups, whose prices are pushed up by the increases in steel prices, we find that the price rise in steel was more than twice as great as the advance in any other product group.

Since wage increases occurred not only in steel but also in other groups, a very interesting question is raised as to whether there can be any possible justification for a price advance in steel which exceeds by so much the increase in other industries.

We ought to ask ourselves the question: Why should the price of steel rise by more than 100 percent while the price of farm products and of textiles actually declines, the former by 11.2 percent and

the latter by 4 percent? The reason is, of course, that the latter two are competitive pricewise, and steel is not.

Mr. President, I ask unanimous consent to place in the RECORD a table showing price increases in major commodity groups and in finished steel.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Major commodity groups and finished steel: Percent changes in wholesale prices to 1960

Group	Percent increase to 1960 from—				
	1929	1947	1953	1956	1958
Finished steel	+170.6	+105.5	+37.1	+15.7	+2.2
All commodities	+93.2	+24.1	+8.6	+4.6	+.3
Farm products	+51.5	−11.2	−8.5	+.4	−6.4
Processed foods	+84.1	+9.7	+3.0	+5.9	−2.9
All commodities other than farm and foods	+95.9	+34.6	+12.5	+5.0	+1.8
Textile products and apparel	+49.7	−4.0	−1.2	+.8	+2.8
Hides, skins, leather, and leather products	+86.0	+9.2	+12.0	+11.1	+9.6
Fuel, power, and lighting materials	+62.1	+25.2	+3.9	+2.3	+1.0
Chemicals and allied products		+8.7	+4.3	+2.8	−.2
Rubber and rubber products	+73.3	+46.2	+15.8	−.8	−.2
Lumber and wood products	+280.3	+29.4	+.9	−3.3	+3.1
Pulp, paper, and allied products		+35.1	+14.7	+4.7	+1.7
Metals and metal products	+129.6	+68.4	+21.2	+3.6	+2.3
Machinery and motive products		+65.8	+24.7	+11.3	+2.4
Furniture and other household durables	+77.6	+28.8	+7.8	+3.4	−.1
Nonmetallic minerals, structural	+90.1	+47.0	+16.8	+6.4	+1.4
Tobacco manufactures and bottled beverages	+52.2	+35.6	+13.9	+7.8	+2.8
Miscellaneous products		−8.6	−5.8	+1.2	−2.2

Mr. GORE. Mr. President, I congratulate my able senior colleague on his very fine address. A number of tables and lists and statistical data have been inserted in the CONGRESSIONAL RECORD today by consent. Some of these I have had an opportunity to examine, and some I have not had an opportunity to do so.

At an early date it will be my intention to further reply to the statements made on the floor of the Senate today and to the data submitted for the RECORD.

Suffice it for the moment to say that the public interest is involved in the price level of our basic industries, the most basic of all of which in our industrialized economy is steel. As President Kennedy has said in his letter of today, steel is a bellwether. It is a bellwether in the price structure and it is a bellwether in the wage structure. It is also a bellwether in the psychology of our economic free enterprise system.

Therefore, few questions could be debated on the floor of the Senate which more directly affect our individual citizens, the cost of doing business, the cost of the products of business, the cost of living, than the steel prices.

I welcome the debates that have occurred here today, and shall look forward to making further reply.

VETERANS' ADMINISTRATION REVOLVING SUPPLY FUND

Mr. MANSFIELD. Mr. President, I move that the action of the Senate in passing H.R. 8414, a bill to amend section 5011 of title 38, United States Code, to clarify the authority of the Veterans' Administration to use its revolving supply fund for the repair and reclamation of personal property, be reconsidered, and I move that the House be requested to return the bill to the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana that the House be requested to return the bill to the Senate.

The motion was agreed to.

REPEAL OF SECTIONS 1176 AND 1177, REVISED STATUTES OF THE UNITED STATES, RELATING TO THE DISTRICT OF COLUMBIA

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 848, H.R. 7622.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 7622) to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. DIRKSEN. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. DIRKSEN. I think this would be an appropriate time to ask the majority leader concerning proposed action on the bill.

Mr. MANSFIELD. Mr. President, this is the trading-stamp bill. I hope it will be possible to pass the bill before the Senate adjourns tonight. It is my understanding that there is no disposition to have a yea-and-nay vote on amendments or on the passage of the bill. If there is, then, with the concurrence of the distinguished minority leader, we shall seek to have the bill go over until tomorrow.

LEGISLATIVE PROGRAM—ORDER FOR ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. DIRKSEN. Mr. President, I ask the majority leader, further, what his pleasure is with respect to the hour for convening the Senate tomorrow, and what the first order of business will be following the morning hour.

Mr. MANSFIELD. If the distinguished minority leader will agree, I ask unanimous consent that when the Senate completes its business tonight, it adjourn until 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. SCOTT. With respect to the trading stamp bill, on behalf of my wife I propose that she give up the habit of obtaining trading stamps for herself and go on record in favor of the majority leader, if he will only get us out of here.

Mr. MANSFIELD. Not having had anything to do with trading stamps, I will do my best to get all of us out of here for nothing.

Mr. SCOTT. If the Senator from Montana will do that, he will earn the undying gratitude of the Members of this body and their families.

Mr. MANSFIELD. And my own.

Mr. SCOTT. And the country and the taxpayers, if I may so amend my statement. Nothing serious will happen to the country if only Congress will go home.

Mr. KEATING. Mr. President, will the distinguished majority leader apprise us of the business for tomorrow?

Mr. MANSFIELD. It is anticipated that when the trading stamp bill has been disposed of, it will be followed by the disarmament bill, Calendar No. 864, S. 2180, which will be made the unfinished business.

That bill will be followed by the Mexican labor bill.

It is also hoped to have the Senate act on such bills as Calendar No. 734, S. 1563, to authorize the conveyance of certain lands within the Clark Hill Reservoir, Savannah River, Ga.-S.C., to the Georgia-Carolina Council, Inc., Boy Scouts of America, for recreation and camping purposes; Calendar No. 764, S. 923, to authorize the Secretary of the Interior to replace lateral pipelines and line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho; Calendar No. 752, H.R. 7447, to amend the Strategic and Critical Materials Stock Piling Act to provide for the immediate disposition of certain waterfowl feathers and down; and other bills of that nature, including the District of Columbia election bill, if possible.

REPEAL OF SECTIONS 1176 AND 1177, REVISED STATUTES OF UNITED STATES, RELATING TO THE DISTRICT OF COLUMBIA

The Senate resumed the consideration of the bill (H.R. 7622) to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia.

Mr. MANSFIELD. Mr. President, what is the pending business?

The PRESIDING OFFICER. H.R. 7622.

Mr. MANSFIELD. Mr. President, the distinguished Senator from Maryland [Mr. BEALL] has been very interested in the proposed legislation. The distinguished Senator from Tennessee [Mr. GORE] and the distinguished Senator from Iowa [Mr. MILLER] are likewise interested in the proposal.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. BEALL. Mr. President, the purpose of this bill is to repeal in its entirety the District's present gift enterprise law.

For many years retailers in the District of Columbia have been operating under a ban on some of the most commonly used merchandising techniques in use today. The practice of stimulating trade through the offering of free goods, premiums, manufacturers' coupons, or trading stamps is forbidden to District merchants by an old statute, enacted in the 1870's, which makes it a criminal offense to engage in any gift enterprise in the District. With the upsurge in retailing volume, and the growth of retail competition throughout the Nation, the consumers and merchants of the District have been put at a disadvantage by this obsolete restriction.

This bill proposes to lift this handicap on the retail business of the District.

The District gift enterprise law was adopted by the District Legislature in 1871, and later incorporated by the Congress in the District Code. It is clear that the merchandising situation in 1871 was very different from today's. At that time there were no antitrust laws, no restraints on monopolistic or unfair competition, no Federal Trade Commission, no regulations protecting the consumer—in short, none of the laws which today preserve competition and protect the interest of the public. What may have been, 6 years after the conclusion of the Civil War, a beneficial regulation of commerce in the District has now become senselessly irritating and burdensome to manufacturers selling in a national market, driving trade out of the District. It should be done away with—not piecemeal, and not in an effort to favor one kind of trading inducement over another—but in its entirety.

Examples of promotional activity which are apparently illegal under the present law are as follows: cigarette coupons, free sport schedules and informational pamphlets and blades given with the sale of razors, cereal box tops and package coupons redeemable for tableware and toys, grapefruit spoons given with sale of citrus fruit, trading stamps, and redeemable cash register tapes.

These examples of widespread merchandising practices which involve the offer or gift of some free service or item of merchandise in connection with the purchase of a service or an item of merchandise, are all prohibited by the existing law of the District of Columbia. It is the only jurisdiction in the United States which prohibits all of these practices. One other State, Kansas, forbids the use of trading stamps. The situation constitutes a burden on the merchants of the District, and a possible loss of revenue to the District, by reason of the fact that merchandise prepared for distribution on a national basis, and in connection with which there is a gift or the offer of a gift of some sort, must, upon its receipt by a merchant in the District, be repackaged, be returned to the supplier, or be transshipped to an outlet in Maryland or Virginia.

H.R. 7266 will end this intolerable situation for the retail merchants of the District of Columbia.

At the hearing on the bill before the Business and Commerce Subcommittee there was no opposition to any of the promotional giveaways which the bill would allow, except the use of trading stamps.

There seemed to be two arguments advanced against the use of trading stamps. The first argument was to the effect that trading stamps are an added cost for the retailer which must be passed on to the consumer. It was the feeling of the committee that this charge, if true, would have equal application to all of the other promotional devices and that there was no valid distinction on the ground between the use of trading stamps and any other so-called giveaway, whether cigarette coupons redeemable for merchandise or cereal box tops redeemable for toys.

The second objection to trading stamps was that the practice of trading stamp companies of granting exclusive franchises to a limited number of retailers constitutes an unfair business practice since it deprives some retailers of an opportunity to use the trading stamps of a particular company or companies.

The exclusive franchise system is completely legal and is not unique to the trading stamp industry. As a system of distribution it is commonly used by automobile manufacturers, farm equipment manufacturers, clothing companies, and small and large appliance manufacturers, to name but a few of the many industries employing the system.

There are numerous trading stamp companies operating in the United States. In a report issued in December 1958, the Department of Agriculture stated that there were at that time about 200 trading stamp companies operating throughout the country, and that 10 of these companies were doing business in more than 10 States.

With so many trading stamp companies in the market, a retailer in the District of Columbia who desires a trading stamp plan, should be able to obtain one. The fact that the exclusive franchise system of a company might prevent a retailer from obtaining a particular stamp plan, is no reason to single out this sales promotion activity for special legislative treatment.

Discrimination against trading stamps is without justification in fact or law. Trading stamps have long been recognized as a legitimate merchandising device, benefiting both merchant and consumer. Trading stamps are saved by millions of families in the United States and are in wide use in virtually every State of the Union, including Maryland and Virginia.

While the District merchants should indeed be liberated from restrictions that prevent them from engaging in modern practices of competitive merchandising, they should be free to adopt any of these practices they may choose, without arbitrary limitations.

Trading stamp companies are no fly-by-night economic phenomenon, but a long-established and growing business, an outstanding example of modern competitive practices in retailing. The total volume of trading stamp business will be approximately $700 million in 1961. Authoritative legal and economic studies, including those conducted by the Federal Trade Commission and the U.S. Department of Agriculture in cooperation with the Bureau of Labor Statistics, show that the issuance of trading stamps is a legitimate trade device, and offers no possible basis in public policy for a law discriminating against their issuance in the District of Columbia.

In closing, Mr. President, let me make it clear that if this 1870 gift enterprise law is not repealed, as provided in this bill, foreseeably the Washington business community faces real chaos. The majority of national manufacturers offer merchandise on the shelves of every store in this city, every day, prohibited by this law. As the law exists today, it places the Corporation Counsel of the District of Columbia in an impossible situation. He must choose between carrying out his sworn duty to enforce the law which Congress has enacted, or, throwing the merchandising business community of the District of Columbia into real turmoil.

Mr. GORE. Mr. President, I shall not detain the Senate for a long discussion, nor shall I ask for a vote, regrettable as I consider the passage of the bill to be for the people of the District of Columbia.

Mr. President, among the purposes and effects of the bill now before the Senate is that of legalizing trading stamps in the District of Columbia. This type of merchandizing promotion, as well as related practices, has been prohibited in the Nation's Capital for almost a century.

It is suggested that the use of trading stamps in the District should be permitted in order to remove a competitive disadvantage now suffered by merchants in the District who must compete with merchants in adjacent jurisdictions who use stamps. So far as I am aware, there is no clamor on the part of the District merchants to permit them to exercise this somewhat dubious privilege. Perhaps some of the supposed retailer beneficiaries of this legislation recognize that the alleged relief would inure largely to the benefit of the trading stamp companies rather than to the merchants who use stamps, their customers, or the general public.

The practice of issuing so-called trading stamps at the retail level has mushroomed tremendously in recent years. A study prepared by the Department of Agriculture in 1958 referred to the significant growth of this activity during

the years 1954 to 1956. During that period, the volume of business done by trading stamp companies more than doubled to about $375 million per year. Since 1956 the trading stamp business has increased more than 100 percent again and now approaches a total annual take of some $750 million to $1 billion each year.

Defenders of trading stamps allege that this is a somewhat utopian activity that benefits everyone—the merchant, the customer, and the general economy—and costs no one anything. My study of this operation leads me to an entirely contrary conclusion. Trading stamp operations are a burden on the economy. There is no appreciable benefit to the customer who saves stamps—and their use constitutes an unconscionable burden and expense to the merchant.

I hardly feel it necessary, Mr. President, to dwell upon the popular, though fallacious, theory that through savings stamps the retail customer gets something for nothing. Yet this is unquestionably the impression sought by subtle promotional efforts to be implanted in the minds of the public. In truth, the customer pays for the stamps because the cost thereof is included in the price of the groceries or other merchandise he buys.

It is argued that surveys and studies reflect only a minimal increase in prices charged by merchants using stamps. The Department of Agriculture study stated that prices charged by stamp-using merchants averaged six-tenths of 1 percent higher than those of nonstamp merchants. The value of the stamps was said to be estimated at about three times this amount, theoretically leaving the customer a profit in the form of premiums received for redeemed stamps. But, the fact is inescapable that the cost of the stamps, including not only the value of premiums but the expenses and a handsome profit for the stamp company, is included in the price of merchandise sold by a merchant issuing stamps. To the extent this extra cost does not result in increased prices it is reflected in lower profits than otherwise would be available to the merchant. There can be no other answer to the question of "who pays"? However the cost is allocated, an industry of newly expanding proportions is riding on the back of this country's retailers and their customers with the full cost being borne by the consumer.

But, Mr. President, the argument over allocation of the cost burden does not raise the most serious of the objections to the trading stamp operation. Once one of the companies succeeds in selling a grocery merchant, for example, on the alleged promotional value of its stamps, that merchant is more or less chained to the practice of forking over some 2 to 3 percent of his gross receipts for so long as he stays in business.

Moreover, competitors of groceryman A feel a compulsion to engage the services of a competing stamp company and they likewise are placed in the vice of paying tribute to the stamp merchants who, unless restrained, will gain an unbreakable stranglehold on the retailing industry in this country.

I have talked with small merchants, Mr. President, and they have expressed to me the dilemma in which they find themselves. The small grocery store, as everyone knows, is finding it increasingly difficult to remain in business in face of the competition from the chains. Use of trading stamps by the chainstores adds one more brick to an already overbearing load.

In brief, many a small merchant finds he cannot stay in business unless he joins the stamp racket, yet he cannot afford to pay the price demanded by stamp companies. In desperation he frequently signs up and we have the anomaly of a trading stamp company occupying a parasitic role making more money from the sale of groceries than does the owner of the store.

It is further suggested that trading stamps represent nothing more nor less than an ordinary promotion gimmick and that the cost of the stamps falls in the same category as does advertising. But it is not, Mr. President. For example, we do not permit newspapers or radio stations to pick out a single merchant in a given area and then state that only his advertising will be accpted. Yet this is common practice of most of the trading stamp companies who operate through an exclusive franchise device under which the company undertakes to assure a using merchant that none of his competitors will be permitted to distribute the stamps of that company. No such assurance can be given, of course, with reference to the stamps of other companies. Hence the development of a rash of stamp companies which seek what, for them, is the ultimate solution—every retailer dispensing some kind of stamp, with the profits which used to belong to the retailer winding up in the pockets of the stamp merchants; and with those merchants who ordinarily would sell the prizes offered for stamps out of business altogether.

In my opinion legalization of trading stamps within the Nation's Capital is undesirable and I oppose passage of the bill.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. MILLER. Mr. President, I offer the amendment I have at the desk, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The CHIEF CLERK. On page 1, after line 6, it is proposed to, insert the following new section:

SEC. 2. (a) No person, firm or corporation engaged within the District of Columbia in the business of issuing or selling trading stamps, tickets or coupons redeemable in cash, wares or merchandise, shall discriminate against any retailer, merchant or other dealer by refusing to sell such trading stamps, tickets or coupons to such retailer, merchant or other dealer solely because of the existence of any prior contract or agreement made with, or franchise issued to, any other retailer, merchant or dealer doing business in the District of Columbia.

(b) Any person, firm or corporation violating subsection (a) hereof shall be guilty of a misdemeanor and shall be punished by a fine not to exceed $1,000 or imprisonment for not more than one year, or both.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Iowa.

Mr. MILLER. Mr. President, my amendment places a very simple question before the Senate. As the Senate knows, we do not have trading stamps in the District of Columbia. The Congress has the power to permit trading stamps or not to permit trading stamps in the District of Columbia. For the past several years permission has not been granted. Under the bill permission would be granted.

All my amendment would do would be to provide that where trading stamps are allowed in the District of Columbia, they must be available to all. There can be no exclusive franchises granted.

I recognize that the granting of exclusive franchises is entirely legal. Exclusive franchises exist in many States. I am not suggesting that there is anything illegal about it at all. That is not the point. The point is whether or not it is desirable. In the States of Maryland and Virginia we have competitors to District of Columbia businessmen. It is for this reason, I think, that to permit our District businessmen to compete with Maryland and Virginia businessmen, they should be permitted to have trading stamps. That does not necessarily mean that they should be permitted to have a situation in which one trading stamp company can go to one chain or one group of stores and give them an exclusive franchise and his competitor in the District of Columbia cannot do so.

It does not answer the problem to say that a man can get another line of trading stamps, because we all know that in a particular area there may be only three or four types of trading stamps that have the consumer appeal which permits competition. I feel very strongly about monopolies. I feel very strongly particularly about monopolies in the District of Columbia. I believe that by opening this up and letting any merchant who wishes a particular type of trading stamp, we will open up competition in the District of Columbia, and at the same time we will enable our District merchants to compete with their neighbors in Maryland and Virginia, who are now permitted to have trading stamps.

The question is that simple. At this late hour in the evening I certainly do not propose to keep the Senate any longer, but I believe the amendment should be offered and should be voted up or down.

Mr. BEALL. Mr. President, the exclusive franchise system is completely legal and is not unique to the trading stamp industry. As a system of distribution it is commonly used by automobile manufacturers, farm equipment manufacturers, clothing companies, and small and large appliance manufacturers, to name but a few of the many industries employing the system.

There are numerous trading stamp companies operating in the United States. In a report issued in December 1958, the Department of Agriculture stated that there were at that time about 200 trading stamp companies operating throughout the country, and that 10 of these companies were doing business in more than 10 States.

With so many trading stamp companies in the market, a retailer in the District of Columbia who desires a trading stamp plan, should be able to obtain one. The fact that the exclusive franchise system of a company might prevent a retailer from obtaining a particular stamp plan, is no reason to single out this sales promotion activity for special legislative treatment.

I ask that the amendment be rejected.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Iowa.

The amendment was rejected.

Mr. PASTORE. Mr. President, I rise in support of H.R. 7622. I feel that restrictions written into the law almost a century ago to protect the consumer of the District of Columbia against the evil practices of those days should be retired in the light of the safeguards we have placed about the consumer today.

It is high time that the consumers of the District of Columbia be granted the same advantages enjoyed by Rhode Island and all the other States but one.

For instance, in the matter of trading stamps, 170,000 families in Rhode Island save them. Rhode Island industry supplies its share of trading stamp merchandise. Community groups in my State pool their trading stamps to make a group presentation for their church, their school, their pet charity.

I find that the cooperative movements are a praiseworthy activity in every State with trading stamps as the motif. I have made inquiries along this line.

Here are just a few of the successful projects which have been completed:

The Jaycees of Wappinger Falls, N.Y., with 300 families involved, saved trading stamps together. They used them to finance a large Christmas party for underprivileged children.

The Cerebral Palsy Auxiliary of Miami, Fla., enlisted certain savers to acquire needed purchases from fund raising.

One thousand five hundred families took part in charitable trading stamp collecting for the New York Lighthouse for the Blind, redeeming stamps for a station wagon.

Very briefly, here are some others: Three school buses to St. Francis Parish School in Provo, Utah; an organ to St. Luke's Catholic Church in Hohokus, N.J.; an oxygen tent to the Good Samaritan Hospital in Suffern, N.Y.; a pump to the Volunteer Fire Department of North Lawrence, Ohio; and a complete library of books to a school in Millburn, N.Y. And this is just a sample.

More and more of these programs are started every day. PTA groups, women's clubs, and church auxiliaries are now using stamps to finance everything from sidewalks to swimming pools to concert pianos to airplanes.

Right here in Washington we have a number of these projects. For example, the Washington Chapter of the National Association for Retarded Children has used stamps. The Anacostia Little League now has a stamp drive. It hopes to equip a new baseball stadium through the collection and redemption of stamps. Even the Government participates. Federal agencies have been advised by the General Services Administration to turn over the stamps acquired through purchases to the nearest Federal hospital or similar institution. Since the VA has the largest hospital system, it receives many of these stamps.

The point I am trying to make is this: Right now, there are untold thousands of groups in the country saving stamps to acquire major items which will be of benefit to their community.

We all know saving trading stamps is a painless way for the housewife to acquire a table lamp or whatever. We should also know that trading stamps offer a painless way to give, and that many people throughout the country and in Washington, D.C., are doing just that this very minute.

Behind each of these group saving efforts, there is a story about people. Here are two little stories that involve more than 600 children.

Probably the most dramatic group savings project took place in Provo, Utah. The project got started after a busload of children were marooned during the winter months when a front wheel of one of the school's ancient vehicles collapsed. Children come to this Catholic school from as far away as 60 miles, and without buses there just wouldn't be any school for them. During the stamp-collecting drive, the mothers of the schoolchildren mailed more than 90,000 letters, but they were soon to learn that their stamp-licking had just begun. Before the stamp drive was over, the mothers had collected 7,708,800. Right now, three shiny school buses are busily transporting some 350 grateful kids to school and back each day.

In Fairville, Tenn., we have another story. The Church of God's home for 260 orphan children appealed in its denominational publications for S. & H. green stamps to help obtain a station wagon. The wagon was presented to the orphanage just before Christmas. I think we can all agree that this is a fine thing.

But I think the significant, the interesting thing about this orphanage's stamp saving habits is that this was not the first time the orphanage has acquired merchandise with stamps. Other items have included bedspreads, dishes, desk lamps, major appliances, and sporting goods.

I, for one, should not like to take away this right from either the people who donate the stamps or the groups who get these stamps and redeem them for such worthwhile projects.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 7622) was read the third time, and passed.

Mr. BEALL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

U.S. DISARMAMENT AGENCY FOR WORLD PEACE AND SECURITY

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 864, Senate bill 2180, and that it be made the pending business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2180) to establish a U.S. Disarmament Agency for World Peace and Security.

The PRESIDING OFFICER. The question is on the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Foreign Relations with amendments.

EISENHOWER'S BERLIN STAND

Mr. DIRKSEN. Mr. President, a very interesting article appeared in the Washington Star today under the caption "Eisenhower's Berlin Stand." The article is under the byline of Henry R. Luce, and is so current and is of such interest that I think it merits insertion in the CONGRESSIONAL RECORD. Therefore, I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Evening Star, Sept. 7, 1961]

EISENHOWER'S BERLIN STAND

(By Henry R. Luce)

(The one American who, for 16 years, was most intimately concerned with Berlin is Dwight D. Eisenhower. Last week Henry R. Luce, editor in chief of Life magazine, met with him in the modest office where Mr. Eisenhower works as a private resident of Gettysburg, Pa. Sometimes with a kind of half-rueful humor, sometimes with righteous anger, always with profound earnestness, Dwight Eisenhower talked. Here Mr. Luce passes on the substance of what he heard. It is reprinted by the Star by courtesy of Life magazine from its current issue.)

To the man who engineered the defeat of Nazi Germany and then dealt with the grinding problems of its occupation for 8 years as President of the United States, the issue now in crisis in Berlin goes far beyond cold legalisms.

On the surface, the clash may be simply a juridical question of who has a right to be there upon what terms. But to Eisenhower the question is first moral and spiritual, and only secondarily legalistic. The real issue, epitomized by Berlin, is man's definition of what man is.

Dwight Eisenhower sees in Berlin, on the two sides of the barbed wire and masonry

wall raised by the Communists, two powerful philosophies which hold precise but opposite conceptions of man. On the East stands a complete philosophy of materialism which defines man as a mere machine, soulless, and therefore fit only to be used as a slave for the glorification of the state. On the West stands the belief that man is a creature of the spirit, possessing an individual soul, born free and in the image of his Creator.

To Eisenhower it is natural that the East, which denies liberty, should proclaim its intention to dominate the entire world. Sharply to the contrary, the idea of world domination by any power is totally repugnant to the West. For the West, believing in freedom, holds that men are and ought to be free to develop in their own different ways, individually and socially.

Thus the struggle which centers in Berlin is seen by Eisenhower as a struggle between the spiritual and the materialistic interpretations of man and his destiny.

When the war in Europe was coming to an end in total victory over Hitler, no man could foresee the depth and breadth of the struggle which today dominates the life of the world. Eisenhower, meeting the Red army in German territory, began to have some premonitions, but failed to discern the full extent of Russian hostility to the West. Last week, still vigorous in the peaceful surroundings of the present, blue eyes alert in his sun-ruddy face, Eisenhower let his memory roam. He thought back over his 20 years in a hard school that taught him the nature of the enemy.

The course began in the hectic first weeks after the United States was plunged into the war in 1941, and Eisenhower was assigned to the Services of Supply. It was one of his jobs to deal with the requisitions of lend-lease to the Allies. Even then, he recalled, though Hitler had Russia almost on her knees and thought Soviet survival depended on United States aid, the Russian officers he dealt with were not only suspicious but truculent and bullying Later, as Supreme Commander in Europe, he found the Communists no easier to deal with. As the war drew toward its end, and the Western and Soviet armies rushed toward one another across crumbling Germany, the task of constant liaison to prevent clashes between Allies became vital. But, Ike recalled with remembered irritation, no cooperation could be got from the Russians. Instead he got active belligerence and angry suspicion while the German armies, anxious to stay out of Russian hands, tried to surrender only to the West. Still later, in Berlin after it was all over, he grew accustomed to the Soviets' demonstrating fits of pique by suddenly refusing to show up at inter-Allied social functions.

Even before the war ended, he recalled, he had become pretty thoroughly disillusioned about Soviet good faith. And, though it could not come entirely clear under the day-by-day pressures of fighting a war, he began to get a glimpse of what the future held.

In 1944, the European Advisory Commission was working out a plan for Allied occupation zones in Germany. Although Eisenhower's responsibilities were military instead of political, the scheme shaping up disturbed him. In the light of Soviet intransigence he saw the potentiality of trouble.

Eisenhower flew to Washington where he found President Roosevelt in bed with influenza.

"This is my pet," he told the President. "Let's not have separate occupation zones in Germany. Instead, let's have joint Allied administration of the whole country."

"Impossible," Roosevelt replied. "I'm already committed."

Eisenhower then urged that, if it was politically necessary to allow the Soviets a separate zone, it would at least be advisable to establish joint Western control of the remainder of Germany. Roosevelt again refused.

Again in 1945, when Churchill and Roosevelt were en route to the Yalta Conference, Eisenhower sent his Chief of Staff, Gen. Walter Bedell Smith, to intercept them at Malta and urge that the Soviet zone be restricted and that Soviet promises should not be fully trusted. As he later wrote in his book, "Crusade in Europe," Eisenhower "felt that the Western Allies could probably have secured an agreement to occupy more of Germany than we actually did. I believe that if our political heads had been as convinced as we were at SHAEF of the certainty of early victory in the West they would have insisted, at Yalta, upon the line of the Elbe, as the natural geographic line dividing the eastern and western occupation areas."

Berlin itself was in ruins and, not considering it a primary military target, he did not foresee the paramount political importance it would later have. Seven years after the war, when he came to the Presidency, he found that the question of occupied Germany, with isolated Berlin as its prickly danger point, had become one of his most persistent and troublesome concerns.

A realist could well say that Berlin, 110 miles inside Red territory, was not militarily tenable. But much more than military expediency was now involved. Berlin had become a symbol of freedom and the West was determined to keep it so.

Many contests had been lost to communism in the years since the war, China the greatest. Others were still to be lost or nibbled away by Soviet "salami" slicing. But on Berlin there would be no Western retreat from principle or moral right.

In Eisenhower's second term, the Soviets made their big attempt to "bull through" their own final solution of the issue. It began with Khrushchev's ultimatum of November 27, 1958, declaring that he would sign a separate treaty with East Germany and that the West had 6 months to leave Berlin.

It culminated at Camp David on September 25–27, 1959, when Eisenhower and the Soviet boss sat face to face.

Khrushchev began by fencing. He suggested that the President might want to talk about Red China. Eisenhower quickly disposed of that gambit, saying that if they talked about all the issues involving Red China they would never get around to more immediately useful matters. Briefly, Eisenhower told Khrushchev that the United States could take care of itself in the area of Red China. And that was that.

The two heads of state then went at the subject of Germany. Khrushchev reiterated the Soviet intention to sign a separate treaty with East Germany. Eisenhower replied that he could not prevent Khrushchev from making any treaty he wished with the East Germans even though, personally, he supposed any treaty between Russia and a satellite was likely to be a one-sided affair.

"Only this," he said to Khrushchev. "Don't try to interfere with our rights in Berlin."

Khrushchev, affecting surprise, protested that there would be no Western rights after the proposed treaty.

"We won't accept that," Eisenhower told him flatly. He added that if Khrushchev persisted in his ultimatum the then-proposed summit meeting would never take place. But, more importantly, both Eisenhower and Khrushchev understood that the line had been drawn. Invasion of Western rights in Berlin then meant war. Khrushchev then withdrew what had been an ultimatum and touted "peaceful coexistence" in the "spirit of Camp David."

The so-called spirit of Camp David, Eisenhower recalled, was an optimistic illusion which he, personally, never shared.

Today, as Khrushchev brandishes his bombs and his ultimatums more savagely than ever, Berlin continues to be the focal point of a worldwide struggle.

Eisenhower believes the basic American attitude toward Berlin continues clear and firm. The American determination to defend Berlin was first made manifest in 1948, when the airlift maintained Berlin's access to the free world, and it grew stronger during the eight Eisenhower years.

The reasons for the Eisenhower and the American stand on Berlin go deep. They are obviously deeper than a quarrel over legalistic terms. Legal rights are on our side, and these legal rights are menaced. But essentially Berlin embodies a moral issue and this is what President Eisenhower emphasizes and spells out. It is morally wrong for the Communists, in dividing Berlin, to separate families. It is morally wrong to attempt to choke the life out of more than 2 million West Berliners. And what is most of all morally wrong is to imprison the people of East Germany. These are moral issues and these should be emphasized.

In the same way, we for our part have a moral obligation to the people of Berlin. History, Eisenhower points out, is not static, and so Berlin today has become quite a different matter than it was at war's end. Years have passed; there has been no general peace treaty covering all of Germany and meanwhile West Berlin has grown, by its efforts and spirit, into a great commercial and industrial city. Berliners have a right to the life which they have built and, as we have affirmed on many occasions, we intend that their rights to a free and prosperous life shall be maintained.

In these very concrete terms Eisenhower sums up the West's obligation: We must oppose what is morally wrong in Communist actions and we must be faithful to our own moral obligations.

In the former President's judgment, President Kennedy has handled well the recent phases of the Berlin crisis. He did well to send Vice President JOHNSON and 1,500 troops into Berlin as assurance to all the inhabitants of that harassed city.

Eisenhower, the soldier, knows of course that in a showdown these 1,500 additional troops would make no practical difference in defending West Berlin. Actually, if the Allies had an army of 500,000 men in Berlin, they would first have to fight their way out of Berlin and back to their base of supply before they could turn and fight their way back in.

Eisenhower does not think the United States should seek negotiations with Khrushchev. After all we, are not doing anything to disturb the situation there; Khrushchev is. Therefore, it is Khrushchev who should seek negotiations if he has anything constructive to propose.

However, with his ingrained sense of propriety, Eisenhower has no desire to interfere with President Kennedy's handling of the crisis. The burden of responsibility rests with Kennedy; the American people must be energetically united in facing this crisis; they can find unity only in loyal support of the President.

Now, as never before, Ike says with mounting emphasis, we must learn to put first things first. That means we must do everything which the President asks to meet the crisis, including, if he finds it necessary, bigger military expenditures. But, for exactly that reason, Eisenhower would like every American to understand that he is utterly opposed to increased Government expenditures on unessentials. First things first.

And so at home, viewing the Kennedy domestic program, Eisenhower feels no compulsion to treat his successor gently.

Eisenhower took from his desk a long list of new Government expenditures, actual and proposed, covering four or five pages. He ran his eye down the list. One item he came

to was water pollution. His administration had been spending $50 million a year to attack this problem. The Kennedy administration proposed to double the outlay. Water pollution, said the ex-President, is a bad thing. But with the essentials of our freedom at stake, we must guard against increasing too much those expenditures which do not directly protect that freedom.

For another example, it is clearly not essential that we should hurry to the moon. To embark just now on a moon program which might ultimately cost $40 billion seems to Eisenhower wholly inappropriate. What worries Eisenhower is that massive Government spending in all directions will undermine the American economy and thereby serve the purpose and hope of our enemy. The American people are surely serious in their determination on Berlin. The way to show that they really mean it is by practicing self-restraint and self-discipline in their domestic economy. Among the visitors who come calling on him in Gettysburg are many driven by compelling anxieties. The questions most often asked him, he said, are: "Are we going to war?" and "Are we going to go broke?"

One thing is certain: Dwight D. Eisenhower will never give a defeatist answer. The kind of faith animating him refuses any thought of inevitable doom in any quarter. Freeman exists to cope with circumstances, not to be overwhelmed by them.

So, as to the American economy, while he feels the Kennedy administration advocates insupportable spending programs, he would never despair. An aroused public opinion and vigorous political opposition in and out of Congress can halt excessive spending. And a responsible people, aware of how they are challenged on the world scene, will manage their own affairs with prudence and good sense. They will realize that the health of the American economy must be maintained, not only for our own enjoyment, but as the main physical base of the struggle for freedom and justice throughout the world.

And as to war? No President ever devoted himself more passionately to the cause of peace than did Dwight Eisenhower. He believes that peace can be maintained. The present struggle—the struggle which he sees as turning on "man's definition of man"—is likely to go on for many years. In that long struggle we must honor our commitments, we must be willing to take risks, we must show ourselves both prudent and unafraid. This is the prescription, not merely for avoiding war, but for achieving ultimate victory for our cause in the years ahead.

REPORTS ON AVIATION ACCIDENTS

Mr. MONRONEY. Mr. President, a number of Senators who are interested in aviation accidents have been considerably disturbed about the extremely long delay in receiving findings from the Civil Aeronautics Board, the legal governmental entity charged with the investigation of accidents and finding their probable cause.

An interesting editorial entitled "Give Facts Quickly on Air Accidents" was published in the Denver Post of recent date. I think the article is of great importance. While I cannot quite agree that it would be possible to ascertain and give findings within 30 days of an accident, certainly something could be done to speed up the process. Sometimes a year or 2 years elapse before we have some word from the Civil Aeronautics Board as to its findings of fact.

I ask unanimous consent that the editorial may be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GIVE FACTS QUICKLY ON AIR ACCIDENTS

The airline passenger business in this country is in trouble, due, in part, we believe, to loss of confidence in the system for keeping the public informed regarding accidents and safety problems.

Jets that are replacing conventional aircraft in the fleets of the commercial air carriers are providing more passenger capacity. But in too many instances the newly available seats are remaining empty.

Symptomatic of the trouble airlines are experiencing is the fact that, during a year in which there has been only one accident fatal to passengers, people are talking and worrying about air safety more than at any other time during our experience.

There is a widespread feeling that the Government and airlines have not been frank to tell, promptly, what they know about such things as hydraulic failures, dangerous air congestion around major cities and the inadequacies of airports.

Laws passed by Congress give lipservice to the idea that the public is entitled to be informed regarding accidents and air safety but they also contain provisions giving bureaucrats broad discretion to withhold information or delay its release.

The delays, as exposed in a series of special articles by Leverett Chapin in this newspaper last week, have reached scandalous proportions.

The Civil Aeronautics Board, the agency responsible for reporting the probable cause of accidents, has built up such cumbersome investigative and hearing procedures that it normally takes a year to issue formal findings after an accident has occurred.

The CAB is sitting on a backlog of unreported cases, two of which relate to crashes now more than 18 months old.

The law merely requires CAB to give its opinion on the "probable cause" of each accident. To emphasize that it did not want CAB findings to be regarded as infallible, Congress provided that the findings could not be used as evidence in damage suits.

However, CAB acts with a deliberation which would be suitable only if its decisions were to be considered as final and unalterable as the law of the Medes and the Persians.

CAB says it must move carefully so as not to hurt anyone by placing blame in the wrong place. That sounds fine, considerate, and responsible, but it is completely fallacious.

In this fast-moving age, a report on an accident that occurred a year or more ago can have nothing more than historic interest. It is worthless as a means of keeping the public informed on the current status of air safety.

When an "information" system moves slowly it becomes a system for concealment. It encourages public suspicion that potential hazards are being covered up. The entire air industry is hurt as a result.

The damage from delays far outweighs any possible damage from quick judgments. The airwise public of today is not so gullible as to believe that skilled experts could not fix the cause of most accidents within a few days if they wanted to do so.

Unfortunately, airlines, air transport pilots, and other groups encourage the CAB in its snailpace procedures. They have not yet outgrown their traditional attitude of "Let's be as secretive as we can about accidents."

We are sure public opinion eventually will force the Government to adopt quick but accurate accident-reporting methods.

However, bureaucracy has a way of responding to public opinion only reluctantly.

The best solution, we believe, would be the enactment of legislation to require CAB to report, within 30 days after an accident, the probable cause as it appears to be at that time, with provisions that probable cause reports could be amended later on the basis of any new evidence that might come to light.

There are a great many things that are "right" about air safety in this country.

A principal "wrong"—the policy of keeping the public in the dark about air crashes for months on end—should be corrected before it does more damage.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESSS

By unanimous consent, the following additional routine business was transacted:

ADDITIONAL BILLS INTRODUCED

The following additional bills were introduced, read the first time, and, by unanimous consent, the second time, and referred, as indicated:

By Mr. ERVIN (for himself and Mr. JORDAN):

S. 2513. A bill to authorize the Secretary of the Interior to participate in financing the construction of a bridge at Cape Hatteras National Seashore, in the State of North Carolina, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MANSFIELD (for Mr. CHAVEZ):

S. 2514. A bill for the relief of Wai Cheong Yan; and

S. 2515. A bill for the relief of Natha Singh, his wife, Harnam Kour, and their three daughters, Dalbire Kour, Nishatar Kour, and Raghbir Kour; to the Committee on the Judiciary.

By Mr. MOSS (for himself and Mr. MORSE):

S. 2516. A bill to authorize and direct that the national land reserve and certain other lands exclusively administered by the Secretary of the Interior be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. Moss when he introduced the above bill, which appear under a separate heading.)

By Mr. CLARK (for himself, Mr. PROXMIRE, Mr. RANDOLPH, Mr. PELL, and Mrs. NEUBERGER):

S. 2517. A bill to amend the Employment Act of 1946 to provide more effective means for bringing to bear an informed public opinion upon price and wage increases which threaten economic stability; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. CLARK when he introduced the above bill, which appear under a separate heading.)

ADDITIONAL CONCURRENT RESOLUTION

PRINTING OF CERTAIN HEARINGS BEFORE INTERNAL SECURITY SUBCOMMITTEE OF THE JUDICIARY COMMITTEE IN SPANISH, FRENCH, AND ITALIAN LANGUAGES

Mr. KEATING, from the Committee on the Judiciary, reported an original concurrent resolution (S. Con. Res. 44);

which was referred to the Committee on Rules and Administration, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate Committee on the Judiciary two thousand copies each of translations into the Spanish, French, and Italian languages of a hearing of the Internal Security Subcommittee on June 2, 1961, containing the testimony of Richard Helms, Assistant Director, Central Intelligence Agency, on the subject of Communist forgeries.

MULTIPLE USE AND SUSTAINED YIELD OF CERTAIN LANDS

Mr. MOSS. Mr. President, I today am introducing on behalf of myself and the Senator from Oregon [Mr. MORSE], so that it may receive careful study and evaluation, a bill to set forth the policy of multiple use and sustained yield on the lands in the Department of the Interior which are under the exclusive jurisdiction of the Bureau of Land Management.

I understand a bill, comparable in purpose is being introduced today in the House.

This proposed legislation, if enacted, would affect about 500 million acres of Federal land.

The bill is almost identical in scope and purpose with the Multiple-Use Act of 1960, Public Law 86–517, which applies solely to the national forests.

It differs in two respects. First, it lists minerals as one of the specific purposes for which the lands may be administered. Second, it does not specifically state that "the establishment and maintenance of areas of wilderness are consistent with the purposes of this act" as does the Multiple-Use Act applicable to the national forests. This is not necessary inasmuch as the wilderness bill S. 174, if enacted, will require an affirmative act of Congress to create new wilderness areas, and as far as I know there are no specific wilderness areas in the usual sense on the Bureau of Land Management holdings.

I ask unanimous consent that there be printed in the RECORD at the close of my remarks a series of statements by various trade associations and conservation groups favoring the policy of multiple use.

I wish to emphasize that my purpose in introducing the bill is to place it before our committee for study, consideration and modification to the extent necessary to help achieve the best possible conservation management on the best holdings of the Bureau of Land Management.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the statements will be printed in the RECORD.

The bill (S. 2516) to authorize and direct that the national land reserve and certain other lands exclusively administered by the Secretary of the Interior be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes, introduced by Mr. Moss (for himself and Mr. MORSE), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

The statements presented by Mr. Moss are as follows:

WESTERN INTERSTATE COMMITTEE ON PUBLIC LANDS, JULY 18, 1961, HOTEL SIR FRANCIS DRAKE, SAN FRANCISCO, CALIF.

Whereas national legislation and regulation which establish wilderness preservation areas are contrary to the multiple-use principle in the management of Federal lands; and

Whereas enactment of special interest legislation and regulation would seriously handicap multiple-use management of Federal lands; and

Whereas wholesale withdrawals of public land would be detrimental to the general tax structure and would limit and reduce the normal operation and development of the following industries: mining, timbering, reclamation, recreation, grazing, oil and gas and dependent service industries in the Western States: Now, therefore, be it

Resolved by the Western Interstate Committee on Public Lands, That the Congress of the United States is hereby memorialized to oppose the wilderness preservation system as proposed in the Wilderness Act as an infringement on the administrative flexibility of the present system and because the announcement of such a proposal would subordinate policy decisions to a small council of nonrepresentative users; and be it further

Resolved, That the Congress of the United States is hereby memorialized to oppose all of the legislation and regulation not in accord with the multiple-use principle in the management of public lands; and be it further

Resolved, That a certified copy of this resolution be prepared and transmitted forthwith by the western office of the Council of State Governments to the Vice President of the United States, the Speaker of the House of Representatives, and each Member of the congressional delegations from the Western States.

STATEMENT OF THE AMERICAN NATIONAL CATTLEMEN'S ASSOCIATION

We want to express our approval of such bills as H.R. 10572. These measures would direct that the national forests to be managed under the principle of multiple use, and their further purpose is to promote a sustained yield of products and services in the national forests.

Multiple use, as we who use the forests for grazing have always thought of it, also provides for other uses—usually right on the same land—such as recreation, wildlife, mining, water development, wilderness, and timbering.

We feel that multiple use has furthered true conservation which we believe means getting the greatest value from the various areas of the public lands without impairing, but in many instances improving, their ability to keep on giving these values.

Multiple use of the national forests, which belong to the public, gives all manner of users an equal right—as equal as circumstances can make it. This is entirely in keeping with our way of life. Because of the fairness of this kind of management and the practicality of it, the people should be assured that it will continue. Otherwise, it is possible that some untried or novel means of management of the public land might be proposed and adopted that would make a mockery of the term "public" land.

STATEMENT OF THE AMERICAN PETROLEUM INSTITUTE

The institute promulgates a policy of multiple use of all public lands under which two or more functions may be carried on compatibly.

The institute believes that multiple use of public lands, where such uses are compatible, produces the highest conservation and economic value. Without multiple use, large reserves of economic resources necessary to support the Nation's future growth may not be developed. Therefore, the industry feels it should be permitted to explore for oil and gas on public lands where natural resources values will not be damaged.

The institute recognizes that some few species of wildlife require specific environmental conditions to exist. Habitats set aside for such creatures must be protected.

Wherever administrative withdrawals providing for multiple use are made, the institute supports and recommends the procedure used by the Secretary of the Interior for the Caliente National Cooperative Land and Wildlife Management Area.

STATEMENT OF THE AMERICAN SOCIETY OF RANGE MANAGEMENT

Our society has not yet adopted any policy nor passed any resolutions concerning multiple use. Our membership is interested in the proper use of grazing lands everywhere regardless of whether they are grazed by domestic livestock or game animals. Undoubtedly a poll of the membership would favor the multiple-land-use principle.

STATEMENT OF THE CHAMBER OF COMMERCE OF THE UNITED STATES

Certain lands owned by the Federal Government are now devoted to, or available for, watershed protection, forestry and forest products, agriculture and grazing, mining, wildlife, and recreation. These lands should be so administered as to further their highest total use. Where agricultural and grazing or timber production uses are the predominant value of such lands, the ultimate objective, as has been the case with agricultural and mineral lands in the past, should be to make them available for private ownership or use unless it is clear that such ownership or use is not in the public interest.

STATEMENT OF THE IZAAK WALTON LEAGUE OF AMERICA

To us, and I believe to most conservationists, multiple use is not irrationally to superimpose one on the other a whole series of different, and perhaps quite incompatible uses. Rather, multiple use is a result of a sound management plan developed from and based on precise knowledge of the capacity of an area, large or small, to produce an optimum sustained and balanced yield of resource values to meet the multiple needs of the public. Multiple use recognizes that these capacities vary from area to area, just as do the needs of people from time to time. Multiple use recognizes that several uses to be carried on in conjunction with each other must have compatibility. It recognizes that compatibility is a matter of what, where, when, how, and degree to which any area may serve a variety of uses in conjunction with the area's highest use value. It recognizes as well, that in a multiple-use pattern no one use can be maximized, no matter how large the area.

It seems ironic that legislation, which seeks to strengthen long-range planning and administration of comprehensive resource programs for the public good, must concede that mineral resources, needed or not, shall continue to take precedence over all else.

STATEMENT OF THE AMERICAN FOREST PRODUCTS INDUSTRIES

Growing continuous crops of trees is the primary objective of tree farm management. Other benefits, including the maintenance

of desirable wildlife populations, the protection of watersheds and recreational opportunities are the natural results of well-managed industrial forest lands. Multiple use, including public recreation, is encouraged on industrial forest lands consistent with the primary objectives of forest management.

STATEMENT OF THE NATIONAL WILDLIFE FEDERATION

Now that multiple use is an official policy of the Government of the United States as relating to national forests, it is essential that the same principle be applied to public domain lands administered by the Department of the Interior and to public waters. Public domain lands should be managed equitably for outdoor recreation (including public access), range, timber, watershed protection and fish and wildlife, as well as the development of mineral resources, without domination by any or several user interests. Public waters should be managed for fish and wildlife and recreation as well as for domestic, municipal, stock water, irrigation, mining or industrial purposes. It is recognized that all lands and waters are not suitable for all purposes; therefore, application of the multiple-use principle in a broad sense entails determination of optimum, or best, use in the public interest of specific areas.

STATEMENT OF THE WESTERN FORESTRY AND CONSERVATION ASSOCIATION

Forest lands will contribute the most benefits to the economy and to society if administered under the multiple-use concept of land management. The association feels that the assignment of some areas to special or exclusive use is justifiable within the framework of the multiple-use concept. The association is concerned with the large aggregate acreage of forest land in Western North America already reserved for special uses. The association urges that no further dedication of lands for such uses be approved unless careful study has determined that the social and economic benefits derived therefrom clearly exceed those possible in an unreserved multiple-use status.

AMENDMENT OF EMPLOYMENT ACT OF 1946

Mr. CLARK. Mr. President, on behalf of the Senator from Wisconsin [Mr. PROXMIRE], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Rhode Island [Mr. PELL], the Senator from Oregon [Mrs. NEUBERGER], and myself, I introduce, for appropriate reference, a bill to amend the Employment Act of 1946, a bill which has a bearing on the subject which the distinguished minority leader and other Senators have been discussing today; namely, price increases which threaten the stability of the economy.

I ask unanimous consent that the bill may remain at the desk for the remainder of the week for additional cosponsors.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk as requested by the Senator from Pennsylvania.

The bill (S. 2517) to amend the Employment Act of 1946 to provide more effective means for bringing to bear an informed public opinion upon price and wage increases which threaten economic stability, introduced by Mr. CLARK (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. CLARK. Mr. President, the bill is a very simple one. It consists of one paragraph, which I shall read:

The President, directly or through any Federal agency he designates, shall hold public hearings concerning (a) price increases, prospective or actual, which in his judgment appear to threaten national economic stability, and (b) increases in labor costs, prospective or actual, and the relationship of the price increases thereto, which the firm involved declares to be a cause of the price increases specified in clause (a) of this section. He shall issue factual summaries of such hearings, and, where he deems it advisable, issue advisory statements.

This paragraph was contained in a somewhat longer bill which Representative HENRY REUSS of Wisconsin and I introduced in the last Congress. Congressman REUSS is introducing this bill again today in the House of Representatives.

We all have been reading reports that an increase in the price of steel is just around the corner. It will probably be put into effect, we hear, right after Congress goes home.

There will be great argument as to who is responsible for this increase, if it takes place. The industry and its sympathizers will say that labor is responsible, and that the price increase is necessary because of wage increases. The steel union and its sympathizers will reply that nothing of the sort is true—that the wage increases can be absorbed by increased productivity—and that the price increase is not necessary.

All of us have heard these arguments before, year after year. Many of them have been reiterated on the floor of the Senate today.

Both sides of the argument support their position with elaborate statistics. It is impossible for the general public to winnow its way through the complex figures and arguments and reach a sound conclusion as to where the responsibility lies.

But one thing the public does know, and that is that they are the losers. Repeated and substantial price increases, whether they are necessitated by wage increases or whether they are not, come out of the consumer. They are injurious to the public, and they are damaging to the entire structure of our economy.

What our bill proposes is to give the Government the opportunity to represent the public, so to speak, in these price-wage matters. This bill does not clothe the Government with any power, other than the power of publicity. It attempts to do what Senators have been attempting to do, 2 weeks ago and today, and that is to shed light on this question. It proposes that the facts about price increases be laid on the table, either before or after they have taken place, and that some expert and neutral body to be designated or created by the President be given authority to prepare factual summaries so that the public may draw intelligent conclusions. If he deems it advisable, the President could issue advisory statements.

Mr. President, during hearings held on the Clark-Reuss bill last year, some witnesses objected that even this gentle form of governmental intervention was an improper interference with the free functioning of the economy. I admit that it might interfere with the way the economy now functions. Indeed, I hope so. If anything is clear from our experience since the war in many industries—not exclusively but perhaps most conspicuously the steel industry—it is that the free functioning of the economy must be interfered with in this respect.

Continuous rounds of price increases, with their inflationary consequences throughout the economy, simply cannot be tolerated. The relation between price increases and increases in labor costs must be explored, as dispassionately as possible. Methods of restraining unjustified increases must be found and enacted.

I agree there are problems involved. That is the reason this bill has been drafted in such a way as to give the President the maximum latitude to designate the agency involved, to select the cases, to design the hearings, and to determine the nature of the advisory report to be issued.

The stakes in controlling inflation are too high to permit the strong and powerful industries involved to say that all this is none of the public's business. The public is entitled to know whether administered price increases which threaten the stability of the economy are justified or not.

Mr. President, this bill will not of itself authorize the Government to revoke or prevent any price or wage increase. Public hearings would undoubtedly be held only in exceptional cases. But, if it were on the statute books, the mere possibility that companies which exert enormous influence on the economy might be called upon to publicly explain and justify their price increases—and the corresponding possibility that labor unions might be called upon to justify their wage increases if the price increases were attributed to increased labor costs—would exercise a restraining influence upon collective bargaining and upon the private decisions of management and labor—all in the public interest.

I would hope that the power of public opinion would be sufficient, and that no further types of restraints would ever have to be considered. But I believe that we have an obligation to at least experiment with the possibilities of restraint through public opinion. I cannot believe that the proper answer is for Congress to stand by and do nothing if another round of administered price inflation is about to begin.

In this connection I ask unanimous consent that a news article published in this morning's issue of the Wall Street Journal, bearing on the profits made by the steel industry, be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STEEL MEN CRITICIZE FEDERAL PRICE PRESSURE

Steel industry executives yesterday were wishing the administration in Washington hadn't brought its weight to bear against a

boost in steel prices this fall. But they were not disposed to quarrel with the industry's profit figures issued by the Government.

The figures were issued by the President's Council of Economic Advisers in an effort to show the industry could make substantial earnings without increasing prices. The council said the industry in the fourth quarter this year could hold the price line and still earn at the rate of 7 to 15 percent a year after taxes on the net asset value of its outstanding stock. A spokesman for the council defined such asset value as book value, or original investment plus retained earnings, less depreciation.

The projected variation between 7 and 15 percent for the fourth quarter, the council said, would depend on whether the industry produced and sold steel in the quarter at rates ranging from 70 to 90 percent of capacity. Such annual profit rates would compare with an average of just under 11 percent in the 1947–60 postwar period. In the second quarter of this year the annual profit rate was 7.2 percent. In the five previous quarters, during which steel production varied between almost 100 percent of capacity and about 50 percent of capacity, the annual profit rates varied from 13.9 percent in the best quarter to 3.1 percent in the worst.

Questioned whether some other standard than book value should have been used in calculating profit rates, steel officials agreed that book assets were an acceptable and commonly used standard. However, one executive said the profit percentages would not be as high if they had been calculated on the basis of sales or on replacement values at today's increased costs. But he added that trying to compute on the basis of replacement value would be impractical because no one can agree on what replacement values total.

Another executive said the industry's basic problem, which he felt the council's figures failed to bring out is "the tremendous modernization we must continuously undertake to replace existing assets with new and high-cost equipment that will enable us to remain competitive."

In Washington, officials of the council denied that the administration has prepared any inflexible yardstick for gaging "proper" profit levels for the steel industry or for American industry in general.

"All we have done," one official said, "is to compare the steel companies' profit expectations with what they have actually been earning since the war and to suggest that those profits will compare pretty favorably with their past experience even without any price increase. We certainly have not formulated and do not intend to formulate any hard and fast criteria for what a proper rate of profits might be or what might be excessive profits."

REPEAL OF SECTIONS 1176 AND 1177 OF REVISED STATUTES, RELATING TO DISTRICT OF COLUMBIA—AMENDMENT

Mr. MILLER submitted an amendment, intended to be proposed by him, to the bill (H.R. 7622) to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia, which was ordered to lie on the table and to be printed.

AMENDMENT OF ACT RELATING TO ELECTIONS IN DISTRICT OF COLUMBIA—AMENDMENT

Mr. MILLER submitted an amendment, intended to be proposed by him, to the bill (H.R. 8444) to amend the act of August 12, 1955, relating to elections in the District of Columbia, which was ordered to lie on the table and to be printed.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. GORE. Mr. President, I move that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and (at 8 o'clock and 45 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Friday, September 8, 1961, at 10 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 7, 1961:

U.S. ATTORNEY

Alton A. Lessard, of Maine, to be U.S. attorney for the district of Maine for the term of 4 years, vice Peter Mills.

DIPLOMATIC AND FOREIGN SERVICE

Charles W. Cole, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Chile, vice Robert F. Woodward.

DISTRICT OF COLUMBIA PUBLIC UTILITIES COMMISSION

James A. Washington, Jr., of the District of Columbia, to be a member of the Public Utilities Commission of the District of Columbia for a term of 3 years expiring June 30, 1964.

DEPARTMENT OF COMMERCE

William Ruder, of New York, to be an Assistant Secretary of Commerce, vice George T. Moore, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 7, 1961:

POSTMASTERS

ALABAMA

James T. Yerby, Berry.
Julia G. Oliver, Panola.

ALASKA

Lillian E. Ingram, Dillingham.

CALIFORNIA

Michael J. FitzGerald, Benicia.
Merle G. Andrew, Calimesa.
Dudley B. Dismuke, Encinitas.
Alfonso S. Mendichi, Feather Falls.
Rudolph J. Banuelos, Greenfield.
Lulu Ellen Spradlin, Homeland.
Virginia M. Benedict, La Honda.
Janet L. Oliar, McArthur.
Marie C. Mize, Mountain Center.
James D. A. Vance, Pacific Palisades.
Dallas P. Murphy, Shingle Springs.
Barney L. Bryan, Suisun City.
Barry D. Duncan, Summerland.
Gaddis D. Maddox, West Covina.

COLORADO

Otto A. Walter, Allenspark.
Frances A. Walters, Sugar City.

FLORIDA

Ralph B. Miller, Edgewater.
Sweet B. Powell, Eglin Air Force Base.
David L. Hilldale, Oak Hill.
Edna R. Myers, Odessa.
Richard F. Weinmann, Sorrento.

GEORGIA

Ulysses E. Sampson, Young Harris.

IOWA

Gilbert G. Cory, Ankeny.

MICHIGAN

Kenneth G. Jones, Charlotte.
Kenneth Van Heukelum, Hudsonville.
Ervigal A. Peacock, Onaway.

MINNESOTA

William G. Murry, Delavan.
Harold O. Turbenson, Silver Bay.

MISSISSIPPI

Ray H. Courtney, Bassfield.
James P. Allen, Fayette.
Fracus G. Wiygul, Fulton.
William C. Sharbrough, Jr., Holly Bluff.
Floy P. Humphreys, Lorman.
William A. Smith, Saucier.

MISSOURI

William F. E. Strothmann, Berger.
Robert E. Audsley, Chilhowee.
J. Wayne Atterbury, Madison.
John W. Hunt, Monett.
Clarence G. Brown, Spickard.
Kenneth E. Fry, Wyaconda.

NEBRASKA

Donald K. Rowe, Ralston.
James L. Chiles, Sterling.

NORTH CAROLINA

Harveleigh M. White, Method.

OHIO

Charles H. Davis, Bethesda.
Alfred H. Fankhauser, Clarington.
Joseph M. Brumby, Kipton.

OKLAHOMA

Leo A. Koetter, Elgin.
Willie O. Dodson, Hammon.
Julian R. Conn, Poteau.
Emory J. Davidson, Vinson.

OREGON

Norman W. Whitlatch, Veneta.

PENNSYLVANIA

Frank J. Dougherty, Bala-Cynwyd.
George M. Brunner, Cranesville.
Leonard W. Gray, Dayton.
Harold Dickison, Dingmans Ferry.
Jay C. Miller, Manheim.
Anthony I. Lambert, Philadelphia.
Edward G. Coll, Pittsburgh.
Robert H. Becker, Rheems.
Elwood T. Conrad, Sassamansville.

PUERTO RICO

Herminio L. Cabello, Cidra.
Benjamin Acosta Ponce, Fajardo.
Jose Manso Pizarro, Loiza.

RHODE ISLAND

Walter I. Burroughs, North Kingstown.

SOUTH CAROLINA

Geraldine J. Spiers, Bonneau.
Mary K. Robertson, Enoree.
Jack C. Lee, Hamer.

TENNESSEE

Earl W. Ogle, Gatlinburg.
John W. Jones, Prospect.

UTAH

Kenneth J. Hoyt, Levan.

VERMONT

Theodore R. Kimball, North Ferrisburg.
Lyndell C. Wood, South Royalton.

WASHINGTON

John P. McMonagle, Tacoma.
Robert N. Prante, Satsop.
Robert E. Clemans, Tieton.

WEST VIRGINIA

Mary H. Puskar, Gary.
Glenn W. Evans, Moorefield.
Macie L. Hardy, Squire.
Dillard R. Walker, Stanaford.

HOUSE OF REPRESENTATIVES

THURSDAY, SEPTEMBER 7, 1961

The House met at 12 o'clock noon, and was called to order by the Speaker pro tempore, Mr. MCCORMACK.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Deuteronomy 33: 27: *The eternal God is thy refuge, and underneath are the everlasting arms.*

Almighty God, grant that at this noon hour we may lay hold upon Thee with greater confidence, yielding ourselves unreservedly to Thy mind which is infinitely wiser than our own and beseeching Thee to evoke within us that peace which the world cannot give or ever take away.

Deliver us from all cold and cynical moods of heart lest we become too despondent to hope and too depressed to believe that a better day is dawning when men and nations everywhere shall pursue the ways of brotherhood.

May we be comrades and crusaders in the great enterprise of building in our tangled civilization a social order wherein righteousness and justice shall reign and love shall be gloriously triumphant over hatred and enmity.

Hear us in the name of the Christ, our blessed Lord. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 2877. An act to authorize the Director, Office of Civil and Defense Mobilization, to approve a financial contribution for civil defense purposes to the State of Oklahoma;

H.R. 6969. An act to amend title 38, United States Code, to increase dependency and indemnity compensation in certain cases;

H.R. 7043. An act to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing, and for other purposes;

H.R. 8406. An act to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan, and for other purposes;

H.R. 8414. An act to amend section 5011 of title 38, United States Code, to clarify the authority of the Veterans' Administration to use its revolving supply fund for the repair and reclamation of personal property; and

H.R. 8466. An act to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 174. An act to establish a National Wilderness Preservation System for the permanent good of the whole people, and for other purposes.

ROLLCALL VOTES

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that any rollcall votes on final passage, motions to recommit or amendments in order on Monday and Tuesday of next week may be put over until Wednesday next.

Mr. GROSS. Mr. Speaker, reserving the right to object, has the gentleman from New York removed his objection?

Mr. ALBERT. I was not aware of that. This is an entirely different motion, I would advise the gentleman from Iowa. The motion yesterday was that rollcall votes today might be put over until Wednesday next. This unanimous-consent request goes to the matter of putting over votes in order on Monday and Tuesday next.

Mr. GROSS. Further reserving the right to object, Mr. Speaker, is there to be a session tomorrow, can the gentleman from Oklahoma say?

Mr. ALBERT. Well, I would prefer, if the gentleman will bear with me, to look at the legislative situation at the end of the day before we make a decision on that matter.

Mr. GROSS. Of course, any votes on business today would go over until tomorrow because of the New York City election, and that would automatically mean if there was no session tomorrow that any vote carried over from today would go over until Wednesday next. This would mean in effect the same request as was made last night.

Mr. ALBERT. The gentleman is correct, except that is not the issue in this request. A separate request will have to be made, I say to the gentleman, if votes in order tomorrow are to go over until next week.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Indiana.

Mr. HALLECK. Mr. Speaker, I just wanted to say that the acting majority leader spoke to me about this arrangement. In view of the situation that we know exists on Monday and Tuesday of next week I see no reason why the unanimous consent requested should not be agreed to. In my opinion it will mean nothing as against an early sine die adjournment of the Congress.

Mr. GROSS. Mr. Speaker, in view of the fact that the gentleman from New York [Mr. TABER], who objected last night, is not on the floor I would hope the gentleman from Oklahoma would withdraw his request. If he does not withdraw his request, I will be constrained to object until the gentleman who made the objection last night is present on the floor or is contacted as to his present position. I intend to protect the gentleman from New York [Mr. TABER] in his objection.

Mr. ALBERT. Mr. Speaker, in view of the gentleman's position, I withdraw my request.

COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. MURRAY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service have until midnight to file a report on the bill H.R. 7927, to adjust postal rates and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. MURRAY. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service have until midnight to file a report on the bill H.R. 7377.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

REPORT OF THE BOARD OF VISITORS TO THE U.S. COAST GUARD ACADEMY

Mr. BONNER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BONNER. Mr. Speaker, I was elected chairman of the Board of Visitors to the U.S. Coast Guard Academy this year, and I ask unanimous consent to extend the report of that Board's visit at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

(The matter referred to follows:)

The President of the Senate,
The Speaker of the House of Representatives.

GENTLEMEN: Pursuant to section 194 of title 14 of the United States Code, the following Senators and Members of the House of Representatives were designated to constitute the 1961 Board of Visitors to the U.S. Coast Guard Academy.

By the President of the Senate: Senator Benjamin A. Smith II, Democrat, of Massachusetts.

By the chairman of the Senate Committee on Commerce: Senator E. L. (BOB) BARTLETT, Democrat, of Alaska; Senator ANDREW F. SCHOEPPEL, Republican, of Kansas.

By the Speaker of the House of Representatives: Representative EMILIO Q. DADDARIO, Democrat, of Connecticut; Representative CHARLES E. CHAMBERLAIN, Republican, of Michigan.

By the chairman, House Committee on Merchant Marine and Fisheries: Representative GEORGE P. MILLER, Democrat, of California; Representative ALTON LENNON, Democrat, of North Carolina; Representative WILLIAM S. MAILLIARD, Republican, of California.

Exofficio members: Senator WARREN G. MAGNUSON, Democrat, of Washington (chairman, Senate Committee on Commerce); Representative HERBERT C. BONNER,

Democrat, of North Carolina (chairman, House Committee on Merchant Marine and Fisheries).

MEETING

A meeting of the Board of Visitors was held at the Academy on May 5, 1961. The following members of the Board were present: Senator SMITH of Massachusetts; Representative BONNER, of North Carolina; Representative DADDARIO, of Connecticut; Representative CHAMBERLAIN, of Michigan; Representative MILLER, of California; Representative LENNON, of North Carolina; Representative MAILLIARD, of California.

The following officials of the U.S. Coast Guard were also present. From headquarters: Vice Adm. James A. Hirshfield, Acting Commandant; Rear Adm. Henry J. Wuensch, Chief, Office of Personnel; Capt. George R. Boyce, Jr., Chief, Personnel Training and Procurement Division; Capt. Mark A. Whalen, Liaison Officer. From the Academy: Rear Adm. Stephen H. Evans, Superintendent; Capt. James A. Alger, Jr., Assistant Superintendent; Capt. Albert A. Lawrence, Dean of Academic Instruction; Capt. William B. Ellis, Commandant of Cadets; Capt. Thorburn S. McGowan, USPHS, Chief, Medical Division; Capt. Henry S. Kniskern, Chief, Comptroller Division; Comdr. James W. Moreau, Chief, Plant and Personnel Division; and other members of the Academy staff.

INSPECTION OF BUILDINGS AND GROUNDS

Upon arrival at the Academy, the Board, accompanied by the Coast Guard officers, inspected the buildings and grounds, particularly the completed addition to Chase Hall, the cadet barracks, and the new construction in the academic buildings, Satterlee and McAllister Halls. The Board also toured the land in Riverside Park which the Academy is acquiring from the city of New London. The Board then had lunch with the corps of cadets in the new cadet wardroom.

BOARD SESSION

After lunch the Board members were joined by the Coast Guard officers in formal session. Representative HERBERT C. BONNER was unanimously elected chairman of the 1961 Board of Visitors.

SYNOPSIS OF THE MINUTES OF THE BOARD SESSION

1. The Chairman expressed his deep feeling of pride and honor at the successful flight of the first U.S. astronaut that morning.

At his suggestion all in the Board room rose in a moment of silent prayer.

2. The superintendent made a brief summary, outlined herein, of his formal report submitted to the Board primarily by reading the Superintendent's statement from the report and answering questions of Board members.

3. The Superintendent stated that in the past year the Academy had continued to upgrade its curriculum to keep abreast of modern currents and to insure that its graduates are able immediately to assume their professional duties as ensigns in field units of the service, and to go on to postgraduate training as the needs of the service may require. The Board was informed of the purchase and installation, by the beginning of the next academic year, of a subcritical nuclear reactor and simulator to provide for continued development of the Academy's engineering instruction.

4. The Superintendent spoke of the coordinating committee which he had established for the departments of mathematics, science, and engineering and of the salutary effects produced by several joint meetings of the three departments. He told the Board that when a curriculum review is finished by the academic council about September 15, 1961, a copy of such report will be furnished each member.

5. A general discussion on the enrichment program and the elective courses ensued. The Board was informed in some detail by the department heads concerned of the enrichment programs in mathematics, humanities, and engineering. Questions by Board members elicited information that the enrichment and elective programs were voluntary on the part of the cadets. It was brought out that about 40 percent of each second class participated in the elective programs in French, advanced mathematics, and nuclear physics. One of the Board members indicated his opinion that serious consideration should be given to the reintroduction of required foreign language instruction in the curriculum.

6. The Superintendent then spoke of the plans for improvement of the Academy faculty. After the enactment of Public Law 86–474, the Academy recommended to the Commandant that the faculty in 1960–61 of 67, including 52 officers on 4-year assignments, be increased by annual increments so that by 1963 it would include 44 officers on 4-year assignments and 31 military and civilian instructors on permanent assignments, for a total of 75. This increase in civilian instructors in certain disciplines will give more continuity in those courses. The Superintendent indicated that the Academy was in the process of screening applicants for the first five or six of these new civilian instructors.

7. A short discussion ensued of the method by which the officers assigned as instructors for 4-year tours were selected. It was developed that good cooperation exists between the Academy, which nominates these officers, and headquarters, which makes the actual assignments.

8. A Board member suggested that a new bill going through Congress would put the Coast Guard in the oceanography business. He suggested that the Academy's development along these phases would be watched with great interest.

9. After some discussion of the building program at the Academy, the chairman indicated his feeling that the long-range program should be the subject of an authorization law. This idea was strongly backed by other members of the Board with specific reference to the authorization bills for construction at West Point and Annapolis. Other discussion brought out the desirability of getting the temporary wooden buildings razed as soon as possible.

10. In discussing cadet matters, the Superintendent reported that:

(a) As of April 26 there were 532 cadets in residence (class of 1961—124; class of 1962—125; class of 1963—114; class of 1964—169). Ninty-five of the cadets were on the honors list as a result of the fall term's work.

(b) The first and third classes will embark on the *Eagle*, *Castle Rock*, and *Rockaway* for a cruise to Europe, encompassing 53 days at sea and 15 days ashore in France, Portugal, Spain, and the Canary Islands. The second class will participate in a summer program at Quantico, Elizabeth City, and the Academy. After a 5-week indoctrination course at the Academy, the new fourth class will embark on the above ships with the second class for a short coastwise cruise.

11. A general discussion followed on the attrition at the Coast Guard Academy and the other Federal academies. There was general agreement that the attrition rate had dropped at the Academy over the past several years but that it could be further improved. The Superintendent indicated his conviction that it was largely a matter of motivation and that he and the entire Academy staff were struggling with the problem of better motivation. It was felt that a more meaningful answer to the whole problem could be developed if comparable statistics could be made available from all the services as to rate of retention after graduation and commissioning.

12. In reply to a specific question about the taxability of cadet income, the Superintendent replied that prior to the Armed Forces Compensation Act of 1949 cadets did not pay an income tax. Their pay was looked on as being not a pay for services rendered, but as an emolument to be used to buy their books and uniforms, pay their mess bills while they were cadets, and provide a small sum at their graduation to outfit them with uniforms to launch them on their service career. Since the above-mentioned act of 1949, their pay has been called pay and about $10 a month has been withheld.

13. General discussion on this problem of the cadets' income tax payments developed the fact that some District Directors of Internal Revenue had ruled that cadet pay was not actually pay and had allowed complete refunds of the withheld funds; other Directors had ruled that the pay was in fact pay and had disallowed refunds on this basis. It was the consensus of the Board that this disagreement among Directors was having a disquieting effect on the morale of the cadets. It was recommended that the Chairman get in touch with the Chairmen of the Boards of Visitors of the other Academies and that a joint letter from these Chairmen be addressed to the Treasury to urge the exemption of the pay of cadets from the income tax. A motion was unanimously passed that the Board go on record, as the Naval Academy Board of Visitors has done, that the Board consider the pay given cadets not a pay for services rendered, but as an allowance made to them in their support—in their preparation in the services to be rendered to their country—and that the Board ask that the Treasury make such a ruling.

14. Members of the Board then commented most favorably on the improvements in the Academy hospital over the year, on the 10 additional hospital corpsmen provided for nursing duties, on the overall efficiency of the operation of the hospital, and the senior medical officer was commended.

15. The Chairman inquired about entertainment and recreation for the cadets. The Superintendent discussed the availability of movies in the auditorium, the work of the social director in helping cadets with their formal and informal dances and in imparting to them some of the necessary social graces of an officer, the Academy-wide lecture series, and the widespread entertainment of cadets in the homes of officers and other residents of New London and vicinity. The Superintendent also spoke of his concern for the recreation of enlisted men and of his encouragement of the establishment of a White Hat Club and a Chief's Club both in the present and to-be-constructed enlisted men's barracks.

16. The head of the physical education department, in response to a question, explained the physical education courses, the intramural sports program, and the varsity sports program. In connection with the latter he indicated that about one-third of the Cadet Corps participated in each of the three seasons—fall, winter, and spring. He stressed the smallness of the Academy gymnasium for the 600 cadets and indicated the real need for more playing fields.

17. A general discussion ensued on the continuing improvements in the library, both with respect to personnel and book acquisition. The increased use of the library by cadets in the evening, the improved cataloging for research purposes, and the assignment of more research papers by the various departments demonstrate the cooperation and dedication of the present library staff. The Superintendent commented that the Board and headquarters had helped greatly through the establishment of two new civilian positions in the library.

18. The Board then recessed until after the review of the corps of cadets.

REVIEW OF CORPS OF CADETS AND MEETING WITH CLASS REPRESENTATIVES

The corps of cadets honored the Board of Visitors with a formal review. Immediately following the review, the Board met with representatives of each cadet class and the regimental staff.

RECOMMENDATIONS

The Board of Visitors to the U.S. Coast Guard Academy unanimously approved the following recommendations:

1. The Board heartily approves the construction program carried out at the Academy between fiscal years 1959 and 1961. The Board is in accord with the construction program planned for fiscal year 1962 through fiscal year 1968.

However, the Board considers it mandatory that the remaining wooden structures be replaced and that physical education facilities be expanded and improved with least practicable delay. Accordingly, the Board is recommending to the Secretary of the Treasury and hereby earnestly recommends to all Members of the Senate and the House of Representatives that this program be speeded up so as to provide for its complete accomplishment (except for extension of the cadet messhall and construction of one additional cadet barracks) by the end of fiscal year 1965; the excepted items (cadet messhall and barracks) are to be completed, as soon after fiscal year 1965 as necessary.

2. The Board strongly supports the program of increasing and improving the faculty as outlined by the Superintendent.

3. The Board considers that the pay and perquisites given to a cadet are not pay for service rendered, but are an allowance made to him for his support in his preparation for service to be rendered after graduation; accordingly the Board is recommending to the Secretary of the Treasury that such pay and perquisites be exempted from income tax.

CONCLUSION

The Board of Visitors wishes officially to take note of the outstanding record of accomplishment achieved by the Superintendent, Rear Adm. Stephen H. Evans, in little more than a year in his present position. It is obvious to the Board that his leadership has produced improvements in the curriculum, staff, facilities, and the morale of the cadets. The Board also wishes to commend the dedicated staff for their efforts in maintaining the high standards of this institution and the excellent caliber of the cadet corps. The Board wishes to extend its thanks to Vice Adm. J. A. Hirshfield, Acting Commandant; Rear Adm. H. J. Wuensch, Chief, Office of Personnel; Capt. G. R. Boyce, Jr., Chief of the Training and Procurement Division; and Capt. Mark A. Whalen, liaison officer, for the assistance rendered to them. The Chairman and members of the Board wish to express their appreciation to the regimental officers and other members of the cadet corps for their very helpful assistance to the Board in expressing their view on the functioning of the Academy. The Board earnestly recommends to all Members of the Senate and the House of Representatives that they assist in every way possible in bringing the Coast Guard Academy to the attention of eligible candidates, and urging their constituents to participate in the nationwide examination to be held on 19 and 20 February 1962.

DANGEROUS TRENDS OF OUR TIMES

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, I am deeply indebted to the people of my district and my State, who have been mighty good to me through the years. First elected to public office when I was 21 years old, I am now completing my 20th year in the Congress. I have served longer in Congress than any Mississippi Member, including our Senators, other than my colleague, Hon. BILL COLMER.

Mr. Speaker, most of my service here has been on the Appropriations Committee, where each year, as a part of our duty on the overall Appropriations Committee, we review in detail defense and military construction operations. Each year we have heard the testimony of the Secretary of Defense and other top military witnesses, including the Director of Central Intelligence.

In this position I have tried to be constructive. I have sponsored investigations of procurement practices and policies, bringing about changes which have saved many billions of dollars. We have forced the use of many existing bases instead of building new ones, and so forth.

Despite our best efforts the needless waste is appalling. All too frequently expenditures are made which are not really for defense; in fact, they weaken real defense. See CONGRESSIONAL RECORD, volume 106, part 7, pages 9266–9273, and 9637.

FOREIGN AID

We are underwriting the incumbent government in countries all over this world, willy-nilly. Human nature is the same the world over. As soon as the incumbent government fails and they stop receiving our aid, they are against us.

As to the South American countries. We know their history. Just as soon as American business grows up there, fully guaranteed against loss, under this bill, it is an open invitation for revolution and for some unfriendly dictator to take over—and like Cuba; I suppose we will sit and take it.

The only question is how soon will it happen.

Oh, I have heard my friends here make speeches that we ought to do something about Cuba. I am not going to give away any of the secrets I hear as a member of the Committee on Defense Appropriations and in other sensitive places.

Remember this, if you think about it, you will be bound to conclude that the reason we have not protected ourselves against Cuba, right off our own coast, is that our commitments are spread out all over the world to the extent there would be retaliation somewhere else. We have made commitments in Asia, Africa, Europe, and every other place, and in the process we have left ourselves vulnerable on our very doorstep. Russia is in Cuba, military construction is going on today in Cuba. Ships from Russia are coming into Cuban ports. Russian planes are in Cuba. Are they building missile pads? Every indication is that they are, and we sit by, afraid that if we protest the threat against us on our own doorstep, we will be hit on a hundred farflung fronts.

CENTRAL AND SOUTH AMERICA

If there is any group of nations which looks to some strong man at home and respects strength abroad, it is the Central and South American countries. To them, with our rush offer of $600 million after Castro's actions in Cuba, now skyrocketed in one speech to $20 billion, we must appear scared to death. Certainly, they cannot believe this is the same nation which announced the Monroe Doctrine and made it stick.

WE PAY PROFITS, PAY TRIBUTE, AND MAKE ENEMIES

We have insisted on granting funds to other countries for buying new material, when many times those nations had usable supplies on hand. By granting such governments dollars for new purchases the ruling powers in some of these countries get a cut, a rakeoff, a handout, and American interests make a profit. In the process we are inflaming many people against us and defeating the very purpose we seek.

Look at what happened in Korea, in Laos, in Vietnam. We see what happened in Japan, and in Cuba. We have granted more than $2 billion to Yugoslavia. For what?

Today we aid Poland, let U.S. industry trade with Cuba and Russia, assist Egypt. However good our intentions, in the eyes of the world we are, in effect, paying tribute. Paying blackmail has never worked, throughout history. It will never work.

It is difficult to get Americans to look at this program objectively. Too many Americans are reaping profits. American and foreign companies have been organized and have gotten rich doing this business for us, frequently without any real investment on their part. We have made competitors out of customers, competitors whose output is now doing real damage to American agriculture and industry and to American workers, thus weakening our overall economy on which our safety depends.

WE MUST REVERSE OUR COURSE

Mr. Speaker, I repeat, through foreign aid we have gotten ourselves deeply and dangerously involved in the internal affairs of every nation which accepts our aid—and we have spent $100 billion doing it. Because of it we have been afraid to protect ourselves against Cuba, just off our shores. We must change our course, show our courage and determination, and demonstrate to the world that we will not continue to pay tribute or attempt to buy friendship. We must regain our ability to defend ourselves from the dangers close by—as it is through foreign aid we show our weakness, and invite disaster.

WE MUST DEVELOP OUR OWN COUNTRY

Recognizing that the greater our debt, the more our problems, and the more imperative it is that we protect our

country, I have used my position as chairman of the Appropriations Subcommittee for Agriculture to provide for the protection of our watersheds, our streams, our land, and the natural resources of our Nation, on the basis that we must at least protect our natural resources, on which everything else depends.

In the field of domestic public works, I made the motion which resulted in overriding President Eisenhower's veto of the domestic public works appropriation, thereby protecting the program for the development of our rivers and harbors for flood control. See CONGRESSIONAL RECORD, volume 105, part 14, pages 18597 and 18603–18604.

Today, Mr. Speaker, I mention the length of my service and the experience I have had that you may know my belief that we are losing too many beliefs upon which our Government was founded, both as individuals and as a nation, beliefs which have carried our Nation through the many trials that have beset us in the past, is based on long service and experience with many subjects.

We appear to be on the road where to spend more dollars, with everyone trying to get his share, seems to be the order of the day. These are matters which I have discussed in great detail before the Congress, in dealing with specific programs. If the Nation is to stand—if we believe history—we must reverse our course.

In this connection, Mr. Speaker, under leave to extend my remarks, I would like to quote from a speech which I made on the occasion of Jefferson Davis' birthday, in which I pointed out—in what I trust was a temperate, moderate, and judicious manner—what the use of armed power to force conformity in 1861 has led us to in 1961. Truly, there is such a dangerous similarity between conditions existing in the United States in 1861 and today as to be appalling.

I hope these thoughts and views may have the prayerful study of my colleagues from all sections.

I quote:

Jefferson Davis was born June 3, 1808, a man destined to lead a lost cause with courage and honor. Long before the outbreak of the Civil War, however, Jeff Davis had served his country well as a U.S. Representative, as Senator, and as Secretary of War. With all his ties to the Union, when the States of the South called him to support their cause, to protect the right of local self-government, he did not hesitate. His service as President of the Confederacy during the tragic war was such as to make us all proud.

Jefferson Davis possessed the highest principles of integrity, honor and duty. He faced his problems with determination and energy.

THE CIVIL WAR OR THE WAR BETWEEN THE STATES

One hundred years ago, in 1861, the Civil War, or War Between the States began. This centennial year is being marked by ceremonies, memorials, holidays, and reenactments throughout the South, which, except for commemorating the valor of our forefathers, I personally believe could well be used to point out how very similar our situation today is to that tragic situation of 100 years ago. Present conditions are so similar we should pause to remember that heartbreaking conflict, which pitted brother against brother and father against son.

As we look back upon those troubled times we can see that sound leaders of both sides deplored any effort to settle the issue by armed conflict. Unfortunately, the radicals of that day prevented a peaceful solution. Then, as now, they were not satisfied to run their own local affairs, but insisted that all other sections conform to their pattern.

In the period leading up to the Civil War, any objective study of history would clearly show that slavery in the South was on its way out. A further study, however, will show that the North, which had contributed greatly to importing the institution of slavery into the United States for economic reasons, had gotten rid of its slaves by 1850, so those who wished could look at the matter in the abstract, without any fear of economic effect in their own area.

However bad the institution of slavery was, it did provide supervision and care which were essential to the welfare of the Negroes of that day and time. With the end of the war these untrained and uneducated people were turned loose without any type of control, aid, or assistance. The terrible days of reconstruction were very similar to those we see in the Congo now, where all experienced leadership has been forced out, just as happened in the South.

SEGREGATION NOT LIMITED TO THE SOUTH

Thus, today, it is very easy for people in other sections of the country to agitate and feel that they are morally right in insisting on forcing integration in the Southern States and the destruction of local laws. Many people adopt a holier than thou attitude, taking the view that they do not have segregation in their own area. However, living here in Washington and having visited most of the major cities of the United States, it is apparent that minority groups live almost entirely among themselves in all areas of the country. Integration is a token matter. Through the practice of economic segregation those who wish to force integration on the South can live in sections where they do not meet the problem. Thus, again, it is easy for them to strike at the matter in the abstract.

I am sure most of the people of the United States would agree with us who live in the South if they had the same situation and knew all the facts. Unfortunately, the radio and press often write what their readers wish to believe, and the full facts are not presented to the public.

It is impossible however for those who support integration to fully ignore what is happening in their own areas. Appearing this week in the Christian Science Monitor was the following article:

NEGRO AND THE TEEN CRIME

The hidden Negro problem of the North is seen as packing an explosive force more hostile to the stability and welfare of the Nation than the recent race eruptions in the South.

SOCIAL DYNAMITE

In practically every instance, it is the teenage Negro who is involved. Police forces have been increased and supplied with trained dogs, but the crime wave continues.

And this report appeared in a Los Angeles paper:

"LOS ANGELES MOB QUELLED

"LOS ANGELES, May 31.—An angry throng hurled rocks, bottles, cans, sticks, and baseball bats at police when a riot broke out * * * started when officers tried to arrest two youths—part of a group of youthful Negroes * * * soon a mob of 200 was advancing on the officers. Of the 75 police called out 5 were injured."

Instead of forcing integration upon the Southern States, truly it would be well for the rest of the country to learn from the States of the South that the way for peace and harmony is to provide for separate but equal facilities and protect each race in the enjoyment of its own way of life.

THE SUPREME COURT

We have a Supreme Court from whose decisions there is no appeal, which has taken unto itself the right to change the Constitution without constitutional amendment. In effect, the Court has said that even though, for the moment, certain other statutes are constitutional, it reserves the right to declare them unconstitutional at a later time, unless they are carried out as the Court desires.

In the history of the world, those governments have stood which had something solid around which the tides of public opinion could ebb and flow. In our country it was the Constitution, the interpretations of which had become a part of it, had made it fixed and stable, a steadfast rock, around which statutes could be passed and decisions rendered. But when the Court sets aside all prior decisions as to what the Constitution meant, decisions on which the States of the South had relied, it means that from week to week you don't know what the law is. A short time ago, we saw France call General de Gaulle back into power, to a position approaching dictatorship. Why? Because the French constitution was being subjected to the day-to-day whims of the legislative body, which meant that the nation had no stability in law.

What does the Supreme Court's recent line of decisions mean? My friends, by way of homely illustration, the accuracy and soundness of the description of the land on which this Capitol is placed depends on the permanency of the marker from which the first survey started. The Supreme Court has moved the constitutional marker from its place. As a result everything which was tied to such post or marker has lost its meaning; and, further, the Court has reserved the right to keep wiggling such marker around to serve the whims of a majority of its members.

OUR GOVERNMENT'S TACTICS

You may well ask why the Supreme Court took such action. My friends, I have many reasons and much evidence to support the belief that the threat of a Russian victory was used to bring about the unanimous decision by the Supreme Court in the Brown integration case. It was probably argued that if we don't bring about integration with the colored people in the United States, we will lose the contest with Russia throughout the world; and if we don't do this, Russia will eventually conquer the world. It was said by the press, "If Russia takes over here, the first thing they will do is set up a dictatorship. If Russia takes over," they charged, "they will do away with the right to trial by jury." "Yes," they said, "if we do not integrate, Russia will force on us a system similar to Hitler's in Germany or Stalin's in Russia."

What did they do in Germany and Russia? What was the source of their absolute control of those nations? Why, they had the courts issue decrees, then they used troops and government officers to enforce the decrees.

Haven't we done that here? We have seen the Supreme Court, unwilling to wait for constitutional amendment in the regular process, change the Constitution by decree. We have seen the President send troops and Federal officials to enforce such decrees. We have seen the President recommend, and the Congress pass, legislation doing away with the right to trial by jury. Our Government, itself, has done much of what we feared Russia might do.

We are told we have to integrate all the races of the United States or we can't hold

the friendship of the people of India, China, Japan, Africa, and all the rest. If that be true, why have China and Japan been at daggers point throughout history? Talk about India—in spite of what you read, we know in many areas people of the same color cannot even touch each other.

No, the agitation is right here at home, promoted perhaps by the Communist Party, whose purposes it serves. People are using the threat of Russia here in the United States to accomplish their personal desires and actually to impose the Russian system of required conformity upon us. My friends, if this were the real "McCoy," if the proponents of this destruction of our American way of life and the pride in our race were sincere, they would look at certain nations around us and wonder why those countries with the same great natural resources as we have, nevertheless, have such a low economic level. They would wonder why elections in those countries are often determined by violent revolutions. If John Marshall had held the same views as the present Chief Justice, and if Thomas Jefferson had been of the same opinion as our recent President, and had brought about integration in their day, perhaps by this time we would be on the same low economic level as some of our neighbors for whom Congress has provided hundreds of millions of dollars—without even a plan—all in the hope it might help our cause.

My friends, history clearly shows an individual must have pride or he makes no real progress. A family must have pride or it goes down the scale. So it is with countries. So it is with race. Any race, whatever it may be, which feels it must be intermixed with another acknowledges its own lack. Such a race will not serve itself well, nor that with which it wishes to intermix.

Don't believe my statement simply because I say it. Read history. It is replete with proof. In all history there is no exception.

Integration, where it has taken place, has only led to great turmoil. We all know that if you go into some sections of almost any northern city where there is a sizable Negro population, you take your life in your hands.

Rape, murder and robbery are commonplace in some areas of Washington.

THE FREEDOM "BUSTERS"

In recent weeks we have seen agitators deliberately go into areas of the South for the admitted purpose of violating laws of the States, which have never been held to be beyond the power of such States, but rather have been held to be within the power; and then we have seen the Federal Government move its force in to protect such individuals in their avowed purpose of "testing" existing laws.

What if it were the law against murder they wished to test, or rape or robbery? Is there one rule in the Federal Government for laws the executive or the judiciary likes and another for the laws they don't like?

These so-called "freedom riders," who might better be called "freedom busters" could do what they wish in their own areas. They are out really to "bust" the laws which others have found best for themselves. Here we find them, with the support of Federal officers, attempting to force their views on people, black and white, who have different views and, therefore, different rules and laws for getting along peaceably and with mutual respect—and they do it on the basis of fighting intolerance. Could anything be more intolerant than to push their views on others?

Ladies and gentlemen, there are those who say if integration were forced into public places, the present controversy would end. Of course, it would not. Each step leads to the next one. Don't the people know that if every family were integrated, if every family were amalgamated, then there would be still a distinction based upon shades of color, upon purity of race? If you want proof, merely look at those countries where the white and black races have amalgamated.

My friends, power breeds desire for power. No dictator ever stopped short of taking it all. This concentration of supreme power in our Supreme Court, backed up by the Executive, will not stop with school and public facility integration, nor with race. Once seized this power will be used to control industry, to control agriculture, yes, and eventually even labor.

In Russia everyone is supposed to own everything. However, for all practical purposes everything may as well belong to the Communist leaders, who control according to their own desires. In our country, if the present trend continues, it won't simply be the Chief Justice, the President, or even the Attorney General who issues orders, it will be every little Tom, Dick, and Harry who speaks in the big chief's name. So it has been in history and so it will continue to be, for the basic traits of human nature do not change.

OUR FOREIGN POLICY SHOWS THE SAME WEAKNESS

I was at the opening session of the United Nations last fall. I saw Khrushchev as he virtually ran the length of the floor to embrace Castro, though they had been together all morning. Yes, and I saw the representatives of African nations, such as the African Congo, each with a vote, though many of them represented virtually only a small tribe, recognized and seated there at our instance, another group for whose vote we must bid, not once and for all but on every issue as it arises.

Today, a hundred years after the Civil War, the United States moved into the local affairs of almost every country which would let us. We have granted funds and goods to foreign governments, which in turn sold such goods to their own people for what the traffic would bear. We extend this foreign aid primarily on the promise, but many times merely in the hope, that incumbent governments would support our wishes. Through this means we have made a few persons rich here and abroad. In many of these nations we have forced them to take on our ways, to the point many countries are virtually defenseless, both from revolution within or from enemy attack from without.

In many of these nations we have lined ourselves up with the 3 or 4 percent which have almost all the wealth, and left ripe for the picking by Russia the other 96 or 97 percent. Not only does our Government seem unwilling to permit the people of any State of the United States to run their local affairs as suits them, but it has spent more than $60 billion in foreign countries, largely in an effort to keep "our crowd" in, whether the people of the area want that particular "crowd" or not. We have made competitors of customers and now wonder why our gold reserves are depleted and our cash markets reduced.

In view of our foreign entanglements, I flinch each year when Washington's farewell address, warning of the dangers of foreign entanglements, is read in the House of Representatives. I feel it is almost sacrilege.

My friends, my speech here today is not meant to be an attack upon any individual nor upon any political party. Both parties and many leaders have contributed to our situation, including some in our own Southland.

We wish for our President the greatest success, not only on his present trip but throughout his tenure of office, for as he goes so goes the country. We are all in this boat. We had hoped, however, for a reassessment of all these matters which I have mentioned to you and, therefore, have been disappointed to see the request for more forced integration, not less, for more foreign aid, not less.

COURAGE IS REQUIRED TODAY

We do well to honor that great American, Jefferson Davis; we do well to remember the character and courage shown by him and the hundreds of thousands who stood by him 100 years ago today. I pray we may have the same courage today, not merely to save the South, but the Nation.

In this centennial year of the beginning of the Civil War, the American people would do well to review and recognize the great similarity between conditions which prevailed on June 3, 1861, and those which prevail today, June 3, 1961. They are so similar as to be frightening. Sometimes we, too, wish we could resolve the issue in some simple, clear-cut way. Such a course is not possible. Any solution will require helpful understanding on the part of many people. We must do our part.

Not since the Civil War have our people faced a more trying time. Our problems today call for the best within us. The attack on the Constitution and on our way of life is insidious. It comes under the guise of government. It is offered with an appeal to the natural tendency of Americans to be law abiding. It appeals to religion, is presented in the name of world peace, but creates strife, dissension, and disturbance. It is said to be necessary to protect the rights of individuals, but is itself based on usurpation of power. We are told it is necessary in order to maintain our form of government; yet its starting point is the destruction by judicial decree of the rights of the States, of the Congress, and of the people. Yes, it begins with destruction of the Constitution itself. It can only lead to complete ruin.

History books are written one way for use in the Southern States, another way for the other States. However, one fact is inescapable. Might, for all practical purposes, has the same effect as if it were right.

It has taken us a hundred years to see just how far such a situation can go—today it is the Supreme Court and the executive department which apply the force. Once again we see what might can do.

WE MUST CHANGE OUR COURSE

I sincerely hope that our Supreme Court, our President, and those who would control our newspapers, our radio and our television, will recognize, before it is too late, what the present course leads to. It was not merely the South which lost the Civil War, it was the Nation. It has taken a hundred years for us to fully see that might, when taken to be right, can destroy a nation.

We must review our domestic and foreign policy and reverse our course. We must realize that any nation such as ours must permit local difference, reflected in local self-government.

We must realize that the people of other nations are not going to give up their right to change their government as they see fit. We must realize that friendship purchased with cash will fail when the cash is gone—not only that, but we must realize that in most countries those now out of control will, in the course of events, get into control; and then, the United States will be the subject of the greatest hatred. Thus it is that we are in such a precarious situation throughout much of the world.

In conclusion, may I say, we must permit local self-government in our own Nation to reflect local views and meet local needs. We must return to a foreign policy which permits the peoples of other nations to run their own affairs. If we don't approve such a course in foreign fields, the peoples of foreign countries are going to do it anyway, and we will continue to be the loser.

If we do not return to such a commonsense course in our own Nation, dictatorship will be followed by dictatorship, and all we hold dear will be gone, for no dictator can force the American people into a common denominator, Russian style, each of an exact shade of brown, each conforming to the dictates of an allpowerful Federal Government. Our people are too independent for that. We must allow for differences. If not, differences will destroy us.

INVESTIGATION OF CHARITABLE FOUNDATIONS

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I have asked for this time to explain what my special order will be today. Other Members of the House have expressed interest in this. I called the gentleman from Texas [Mr. PATMAN] about it. It is in regard to a letter that the gentleman from Texas [Mr. PATMAN] has sent to many of the charitable foundations in regard to what is, I suppose, an investigation he is conducting. There are certain House procedures and committee procedures involved. I have taken 30 minutes special order, in order to discuss these matters. I talked with the gentleman from Texas this morning so that he would know that was the subject for discussion under my special order.

FREE DELIVERY BY POST OFFICE DEPARTMENT OF COMMUNIST PROPAGANDA

Mr. CUNNINGHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CUNNINGHAM. Mr. Speaker, this morning the House Committee on Post Office and Civil Service reported out a bill to increase postage rates. As a member of the committee I am not happy with the bill as finally passed. More than three-fourths of the increase will fall on the users of first-class mail.

However, Mr. Speaker, I am happy to state that the committee adopted my amendment to the bill which has the effect of prohibiting the delivery of Communist political propaganda by the U.S. postal system.

Mr. Speaker, my amendment reads as follows: In furtherance of this authority to counteract adverse usage of the mails and to reduce the domestic postal deficit, no international mail handling arrangement under which any postal rate, whether or not reciprocal, is established, shall permit the receipt, handling, transport, or delivery by the U.S. Post Office Department of mail matter determined by the Attorney General to be Communist political propaganda. Section 2 of the amendment states that no U.S. postal rate established in the bill shall be available for the receipt, handling, transportation, or delivery of mail matter determined by the Attorney General of the United States to be Communist political propaganda financed or sponsored directly or indirectly by any Communist controlled government.

I hope that Members of the House, Members of the other body, and the administration will give their full support to this amendment because the present free delivery by the Post Office of Communist propaganda which seeks to destroy us is scandalous.

ELECTION TO COMMITTEES

Mr. HALLECK. Mr. Speaker, I offer a privileged resolution (H. Res. 452) and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That the following-named Members be, and they are hereby, elected members of the following standing committees of the House of Representatives:

Committee on Post Office and Civil Service: ROBERT F. ELLSWORTH, Kansas.

Committee on Science and Astronautics: THOMAS M. PELLY, Washington.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONSERVATION OF MIGRATORY WATERFOWL

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7391) to promote the conservation of migratory waterfowl by the acquisition of wetlands and other essential waterfowl habitat, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference with the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina? The Chair hears none, and appoints the following conferees: Messrs. BONNER, GEORGE P. MILLER, DINGELL, PELLY, and ELLSWORTH.

IDENTIFYING NUMBERS

Mr. MILLS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8876) to amend the Internal Revenue Code of 1954 to permit the use of identifying numbers, unanimously reported by the Committee on Ways and Means.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) IDENTIFYING NUMBERS.—Subchapter B of chapter 61 of the Internal Revenue Code of 1954 (miscellaneous provisions relating to information and returns) is amended by renumbering section 6109 as section 6110 and inserting after section 6108 the following new section:

"SEC. 6109. IDENTIFYING NUMBERS.

"(a) SUPPLYING OF IDENTIFYING NUMBERS.—When required by regulations prescribed by the Secretary or his delegate:

"(1) INCLUSION IN RETURNS.—Any person required under the authority of this title to make a return, statement, or other document shall include in such return, statement, or other document such identifying number as may be prescribed for securing proper identification of such person.

"(2) FURNISHING NUMBER TO OTHER PERSONS.—Any person with respect to whom a return, statement, or other document is required under the authority of this title to be made by another person shall furnish to such other person such identifying number as may be prescribed for securing his proper identification.

"(3) FURNISHING NUMBER OF ANOTHER PERSON.—Any person required under the authority of this title to make a return, statement, or other document with respect to another person shall request from such other person, and shall include in any such return, statement, or other document, such identifying number as may be prescribed for securing proper identification of such other person.

"(b) LIMITATION.—

"(1) Except as provided in paragraph (2), a return of any person with respect to his liability for tax, or any statement or other document in support thereof, shall not be considered for purposes of paragraphs (2) and (3) of subsection (a) as a return, statement, or other document with respect to another person.

"(2) For purposes of paragraphs (2) and (3) of subsection (a), a return of an estate or trust with respect to its liability for tax, and any statement or other documents in support thereof, shall be considered as a return, statement, or other document with respect to each beneficiary of such estate or trust.

"(c) REQUIREMENT OF INFORMATION.—For purposes of this section, the Secretary or his delegate is authorized to require such information as may be necessary to assign an identifying number to any person."

(b) PENALTY FOR FAILURE TO SUPPLY IDENTIFYING NUMBER.—Subchapter B of chapter 68 of such Code (relating to assessable penalties) is amended by adding at the end thereof the following new section:

"SEC. 6676. FAILURE TO SUPPLY IDENTIFYING NUMBERS.

"(a) CIVIL PENALTY.—If any person who is required by regulations prescribed under section 6109—

"(1) to include his identifying number in any return, statement, or other document,

"(2) to furnish his identifying number to another person, or

"(3) to include in any return, statement, or other document made with respect to another person the identifying number of such other person,

fails to comply with such requirement at the time prescribed by such regulations, such person shall pay a penalty of $5 for each such failure, unless it is shown that such failure is due to reasonable cause.

"(d) DEFICIENCY PROCEDURES NOT TO APPLY.—Subchapter B of chapter 63 (relating to deficiency procedures for income, estate, and gift taxes) shall not apply in respect of the assessment or collection of any penalty imposed by subsection (a)."

(c) TECHNICAL AMENDMENTS.—

(1) The table of sections for subchapter B of chapter 61 of such Code is amended by striking out the last line and inserting in lieu thereof the following:

"Sec. 6109. Identifying numbers.

"Sec. 6110. Cross references."

(2) The table of sections for subchapter B of chapter 68 of such Code is amended by adding at the end thereof the following:

"Sec. 6676. Failure to supply identifying numbers."

(d) EFFECTIVE DATE.—Paragraph (1) of section 6109(a) of the Internal Revenue Code of 1954, as added by subsection (a) of this section, shall apply only in respect of returns, statements, and other documents relating to periods commencing after December 31, 1961. Paragraphs (2) and (3) of such section 6109(a) shall apply only in respect of returns, statements, or other documents relating to periods commencing after December 31, 1962.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. MASON] and I be permitted to extend our remarks immediately following the passage of this bill and another bill to be considered in order to explain the bills.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, the bill, H.R. 8876, is designed to improve enforcement and collection of internal revenue taxes by facilitating the expanded use of automatic data processing equipment by the Internal Revenue Service and by enabling the Service to match information returns now filed with tax returns. It provides specific statutory authority for the Secretary of the Treasury or his delegate to require taxpayers to obtain and use identifying account numbers in their transactions with the Internal Revenue Service. Where other persons are required to file various tax documents, such as information returns, and include therein the account numbers of taxpayers, the bill provides that such other persons shall request these numbers from the taxpayers concerned and that the taxpayers shall furnish their numbers to them.

Mr. Speaker, the Members of the House will recall that legislation to authorize the use of taxpayer account numbers was recommended by the President in his tax message to the Congress earlier this year. Under present law, the use of such numbers is already required with respect to taxpayers who are subject to social security taxes and to income tax withholding on wages. This means that the vast majority of taxpayers already have account numbers since between 85 and 90 percent of all individual tax returns presently filed show a social security number. However, this new authorization extends to all returns made for the purpose of disclosing the amount of tax for which a taxpayer is liable—regardless of the type of tax involved—and also to all information returns, statements, and other documents.

Mr. Speaker, in testifying in support of this legislation, the Secretary of the Treasury stated as follows:

The assignment of an account number to each taxpayer is indispensable to the effective operation of the system of automatic data processing which the Internal Revenue Service is now establishing. It is generally recognized that such a system utilizing modern mechanical methods of collecting and processing tax data is essential to a continued effective collection and enforcement program. A pilot processing installation located in Atlanta, Ga., encompassing the seven Southeastern States, is scheduled to begin operation in January of 1962. The need for identifying numbers is therefore apparent.

The Internal Revenue Service has indicated that it intends to use social security numbers as the account numbers in order to minimize the number of persons having to be assigned new numbers. Also, to the maximum extent possible, applications for account numbers will be mailed to those who do not presently have such numbers in order to minimize the burden imposed on taxpayers.

Mr. Speaker, the bill, H.R. 8876, would require taxpayers to furnish their own account numbers on any returns or other tax documents that relate to periods after December 31, 1961. In the case of individual taxpayers, therefore, the first time the use of such numbers would generally be required would be on their declarations of estimated tax for the first quarter of 1962 which must be filed on April 15 of that year. These individual taxpayers would not be required to obtain and use such numbers with respect to their 1961 Federal income tax returns but they would be required to use these numbers on their 1962 returns when they are filed in 1963.

The effective date of the provisions relating to the requesting of taxpayers' numbers by other persons and the requirement imposed on taxpayers to furnish their numbers to other persons would apply to periods commencing after December 31, 1962. Your committee considered that the establishment of these future effective dates will provide ample time for taxpayers and other persons to become apprised of the requirements imposed by this bill.

In order to insure effective compliance with the provisions of this bill, it imposes a civil penalty of $5 for each failure of a person to comply with any requirement of furnishing or including a taxpayer's identifying number on a tax document unless it can be shown that such failure to furnish or include is due to a reasonable cause. However, the penalty provisions do not apply for the failure of a person to request an account number from a taxpayer but only apply to such a person for his failure to include it on a required tax document without reasonable cause.

The Treasury Department has recommended this bill and it has been reported unanimously by your committee.

Mr. MASON. Mr. Speaker, the legislation which has just been approved by the House, H.R. 8876, would amend the Internal Revenue Code to provide that persons in filing their tax returns may be required to record an identifying number on such returns. This requirement would also apply to individuals required to file information returns so that account numbers would be furnished with respect to the individuals referred to in the information return.

This proposal is expected to have a current benefit of facilitating the manual sorting and matching of information returns with taxpayer returns. In the long range the proposed taxpayer account number system is expected to be an integral part of the automatic data processing procedures being instituted by the Internal Revenue Service.

The basic objective of this legislation is very simple and needs no long explanation. The Committee on Ways and Means has been informed by officials of the Treasury Department that the adoption of the account number system will improve and strengthen the processing procedures involved in the handling of the millions of tax forms received by the internal revenue system every year. It is asserted that this procedure, once instituted, will lead to greater efficiency in the handling of tax returns. It is likely that this proposed system will require less activity by Internal Revenue personnel in the performance of clerical functions and will thereby permit greater emphasis on the collection of payable taxes that are inadvertently or otherwise not reported.

Mr. Speaker, I think that the adoption of a system of identifying numbers for tax administration purposes is a proper aid to efficient enforcement of our tax laws and the collection of tax liabilities. I support the action of the House in approving H.R. 8876.

MARKING OF NEW PACKAGES FOR IMPORTED ARTICLES

Mr. MILLS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7692) to amend the Tariff Act of 1930 to require certain new packages of imported articles to be marked to indicate the country of origin, and for other purposes, which was reported unanimously by the Committee on Ways and Means.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. GROSS. Mr. Speaker, reserving the right to object, may we have a brief explanation of this bill?

Mr. MILLS. Mr. Speaker, this bill passed the House, as I recall, in practically this form by unanimous consent last year. The bill was introduced by our colleague, the gentleman from Florida [Mr. HERLONG]. It amends section 304 of the Tariff Act to provide that, when articles which are imported in containers that are now required to be marked to show in English the name of the country of origin of such articles, are repackaged in the United States and offered for sale, the new packages shall be marked to show the country from which the materials originally came.

Mr. GROSS. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

Mr. BAILEY. Mr. Speaker, reserving the right to object and, of course, I shall not object. I commend the Committee on Ways and Means for bringing this

legislation before the Congress. I regret very much that this matter was not taken care of last year. I think it is worthwhile legislation and will help to clarify and remedy some of the difficulties in the administration of our present trade agreements.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of subsection (a) of section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), is amended by striking out "subsection (b)" and inserting in lieu thereof "subsection (b) or (e)".

(b) Subsection (b) of such section 304 is amended by striking out the first sentence and inserting in lieu thereof the following: "Whenever an article is excepted under subdivision (3) of subsection (a) of this section from the requirements of marking, the immediate container (if any) of such article, or such other container or containers of such article as may be prescribed by the Secretary of the Treasury, shall be marked in such manner as to indicate—

"(1) to an ultimate purchaser in the United States the English name of the country of origin of such article, and

"(2) to any person who repackages such article, that subject to penalties of law the new package must be marked as described in subdivision (1).

subject to all provisions of this section, including the same exceptions as are applicable to articles under subdivision (3) of subsection (a) of this section. The Secretary of the Treasury may by regulations authorize the exception of any article from the requirements of subdivision (2) of the preceding sentence if such article is not usually repackaged before delivery to an ultimate purchaser."

(c) Such section 304 is further amended by relettering subsection (e) as subsection (f), and by inserting after subsection (d) the following new subsection:

"(e) MARKING OF NEW PACKAGES.—When any imported article the container of which is required to be marked under the provisions of subsection (b) is removed from such container by the importer, or by a jobber, distributor, dealer, retailer, or other persons, repackaged, and offered for sale in the new package, such new package shall be marked by the person repackaging such article in such manner as to indicate to the ultimate purchaser in the United States the English name of the country of origin of such article. This subsection shall not apply in cases where the Secretary of the Treasury finds that compliance with the marking requirements of this subsection would necessitate such substantial changes in customary trade practices as to cause undue hardship and that repackaging of the article in question is otherwise than for the purpose of concealing the origin of such article. Subsection (d) of this section shall not apply in respect of the marking requirements of this subsection unless the articles are repackaged before release from customs custody."

(d) Subsection (f) (as relettered by subsection (c) of this section) of such section 304 is amended by adding at the end thereof the following new sentences: "Any person who violates subsection (e) shall, upon conviction, be fined not more than $5,000 or imprisoned not more than one year, or both. Any article offered for sale [by the person repackaging such article] in violation of subsection (e) shall be subject to seizure and forfeiture under the customs laws except that the duties with respect to seizures and forfeitures under this subsection shall be performed by such officers, agents, or other persons as may be authorized or designated for that purpose by the Secretary of the Treasury."

SEC. 2. The amendments made by the first section of this Act shall apply only with respect to articles entered for consumption or withdrawn from warehouse for consumption on or after the sixtieth day following the date of the enactment of this Act.

With the following committee amendments:

Page 2, line 1, strike out "immedate" and insert: "immediate".

Page 3, line 1, strike out "persons," and insert: "person,".

Page 3, line 21, strike out "[by" and insert: "by".

Page 3, line 22, strike out "article]" and insert: "article".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsier was laid on the table.

Mr. MILLS. Mr. Speaker, the purpose of H.R. 7692, which was introduced by our colleague on the Committee on Ways and Means, the Honorable A. S. HERLONG, JR., is to amend section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), first to provide that when articles, imported in containers required to be marked to show the English name of the country of origin of such articles, are repackaged in the United States and offered for sale, the new packages shall be marked to show the country of origin of their contents, and second, to require that such containers shall be marked, in addition to the country-of-origin marking, to indicate to any person who repackages such articles, that subject to penalties of law the new packages must be marked to indicate to an ultimate purchaser the English name of the country of origin of their contents. The bill prescribes a specific penalty for violation of one of its provisions—that requiring marking on the new packages—and also authorizes the Secretary to make exceptions from the marking requirements under certain circumstances and upon certain conditions.

Section 304 of the Tariff Act of 1930, as amended, requires that articles of foreign origin imported into the United States be marked in such a way as to indicate to an ultimate purchaser in the United States the English name of the country of origin of the articles. Section 304(a)(3) authorizes the Secretary of the Treasury to except from this general marking requirement articles which for any one or more of various reasons cannot, or need not, be marked. Eleven categories of exceptions are identified in section 304(a)(3). However, section 304(b) requires that, with respect to such excepted articles, the containers in which such articles are packaged shall be marked to show the country of origin of their contents.

The Committee on Ways and Means has been increasingly concerned about the practice of repackaging imported articles and failing to note on the new packages the country of origin of the contents or the fact that the same are of foreign origin. Understandably, this practice has created confusion in the minds of certain purchasers as to the origin of the articles inside the new package. In some cases, the absence on the package of any indication of foreign origin has caused purchasers to assume that the contents were of American origin. Thus, one of the purposes of our marking laws, namely, to give a purchaser all of the information which he may desire before deciding on a purchase, is thwarted in the case of the repackaged imported article, which does not show on the new package the origin of the contents.

H.R. 7692 would make three substantive amendments to section 304 of the Tariff Act, which, in the opinion of the Committee on Ways and Means, will serve to complement existing marking requirements and more nearly insure the accomplishment of the purposes of our marking laws than does the present statute. A new subsection (e) would be added providing that, if an imported article whose container must be marked to show the country of origin of such article is removed from that container, repackaged, and offered for sale in the new package by an importer, jobber, distributor, dealer, retailer, or other person, such new package shall be marked to show the country of origin of its contents. This subsection would not apply in cases where the Secretary of the Treasury finds that first, compliance with the marking requirements of this subsection would necessitate such substantial changes in customary trade practices as to cause undue hardship, and second, repackaging of the article in question is otherwise than for the purpose of concealing the origin of such article.

Subsection (b) of section 304, as amended by the bill, would continue without change the existing requirement that the immediate container, if any, or such other container or containers as may be prescribed by the Secretary of the Treasury, of any article excepted from the marking requirements by subsection (3) of section 304(a), be marked in such a manner as to indicate to an ultimate purchaser in the United States the English name of the country of origin of such article. The bill would add a requirement that any such container or containers shall also be marked in such manner as to indicate to any person who repackages such article, that subject to penalties of law, the new package must be marked to indicate to an ultimate purchaser the English name of the country of origin of its contents. The marking requirements of subsection (b) as amended by the bill, are subject to all of the provisions of section 304, including the same exceptions as are applicable to articles under section 304(a)(3). With respect to the requirement that the containers of certain imported articles must be marked to indicate to any person who repackages such articles that the new package must be marked to show the English name of the country of origin of its contents, the bill authorizes the Secretary of the Treasury to except any article from this requirement if such article is not usually repackaged before delivery to an ultimate purchaser.

Under subdivisions (1) and (2) of section 304(a) of the Tariff Act of 1930, which will apply to the new marking requirements under the amendments made by subsections (b) and (c) of the bill, the Secretary of the Treasury may by regulations, first, determine the character of words and phrases or abbreviations thereof which shall be acceptable as indicating the country of origin, second, prescribe any reasonable method of marking, third, prescribe a conspicuous place on the package where the marking shall appear, and fourth, require the addition of any other words or symbols which may be appropriate to prevent deception or mistake as to the origin of the imported article or as to any other article with which such imported article is usually combined subsequent to importation but before delivery to an ultimate purchaser.

Failure to mark new packages as required by the bill is punishable by a fine of not more than $5,000 or imprisonment for not more than 1 year, or both. In addition, any article offered for sale by the person repackaging the same, in violation of subsection (e) of section 304, as amended by the bill, is subject to seizure and forfeiture under the customs laws. Since the marking requirements provided for by the bill are part of the customs laws of the United States, and since they relate to imported merchandise the customs laws—including those provisions of the Tariff Act of 1930 which relate to enforcement—apply in respect of violations—or alleged violations—of such marking requirements. Thus, for example, the provisions of title IV of the Tariff Act of 1930 relating to reporting of seizures—section 602—prosecution—section 604—judicial condemnation—section 608—summary forfeiture and sale—sections 609 and 612—disposition of proceeds—section 613—remission or mitigation of penalties—section 618—and compensation to informers—section 619—apply in respect of seizures and forfeitures under the bill.

The Committee on Ways and Means feels that the amendments to the existing marking statute contained in H.R. 7692 will serve to assist greatly in fulfilling the intent behind requiring imported articles or their containers to be marked to show the country of origin of the articles. Section 304, as amended by the bill, will provide a comprehensive plan for insuring, in appropriate cases, that purchasers are notified of the origin of imported merchandise.

In the course of considering this bill, the committee had occasion to review correspondence between the author of H.R. 7692 the Honorable A. S. HERLONG, JR., and the Federal Trade Commission concerning the scope of the Federal Trade Commission's jurisdiction in this field. The Federal Trade Commission was asked whether it has accepted jurisdiction in all cases where imported products, required to be marked with the country of origin, are repackaged and the new package is not so marked.

The Federal Trade Commission replied in pertinent part:

> The Commission's approach to such cases has not been on a per se basis. It has issued orders only where it has been affirmatively established that American consumers have a preference for domestic articles of the type involved.

It was apparent to the committee, therefore, that this approach to the problem would be short of accomplishing the purposes of H.R. 7692.

Your committee is unanimous in recommending the enactment of H.R. 7692.

Mr. MASON. Mr. Speaker, the legislation which has just been approved by the House, H.R. 7692, would amend the customs provision of the Tariff Act of 1930 so as to protect the American public by requiring more adequate marking of repackaged imported articles.

Information has been presented to the membership of the Committee on Ways and Means that articles imported into the United States and repackaged often are not designated as "imported" on the new package. The repackaging process results in the deletion of the designation of the country of origin. The failure to include the country of origin on a package often results in the conclusion that the contents therein are of American origin. The failure to reveal the source of an article brings about the failure of a potential American purchaser to be fully informed prior to the time he makes a purchase.

H.R. 7692 would make three substantive changes in existing law to correct this problem. First, it would be required that articles removed from a container be marked to show the country of origin on the repackaging. Second, containers for articles for export to the United States must be marked to indicate that in the event of repackaging, such repackaging must contain the designation of the country of origin. Third, there is a penalty provision for failure to comply with these marking requirements applicable in the case of repackaging.

It was the view of the committee in unanimously approving this legislation that the amendments contained in H.R. 7692 would serve to protect the American public by informing the public as to the source of articles they may purchase. This bill would aid in the fulfillment of the basic purpose of existing marking requirements as presently contained in the law.

AMENDING INTERNAL REVENUE CODE OF 1954 FOR PAYMENT OF ANNUITIES TO WIDOWS AND CERTAIN DEPENDENTS OF JUDGES OF TAX COURT OF THE UNITED STATES

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4317) to amend the Internal Revenue Code of 1954 and incorporate therein provisions for the payment of annuities to widows and certain dependents of the judges of the Tax Court of the United States, together with amendments of the Senate thereto, disagree to the Senate amendments and request a conference with the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

The Chair hears none and appoints the following conferees: Messrs. MILLS, KING of California, O'BRIEN of Illinois, MASON, and BYRNES of Wisconsin.

FILING CONFERENCE REPORT ON APPROPRIATIONS FOR DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES, 1962

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill, H.R. 7035.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

CANNON'S PROCEDURE IN THE HOUSE OF REPRESENTATIVES

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up the joint resolution (H.J. Res. 558) providing for printing copies of "Cannon's Procedure in the House of Representatives" and ask unanimous consent for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be printed and bound for the use of the House one thousand five hundred copies of "Cannon's Procedure in the House of Representatives", by Clarence Cannon, to be printed under the supervision of the author and to be distributed to the Members by the Speaker.

SEC. 2. That, notwithstanding any provision of the copyright laws and regulations with respect to publications in the public domain, "Cannon's Procedure in the House of Representatives" shall be subject to copyright by the author thereof.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PRINTING ADDITIONAL COPIES OF HOUSE DOCUMENT 412, 85TH CONGRESS

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up the concurrent resolution (H. Con. Res. 12) authorizing the printing of additional copies of House Document 412, 85th Congress, and ask for its immediate consideration.

The Clerk read the concurrent resolution as follows:

Resolved by the House of Representatives (the Senate concurring), That there shall be printed for the use of the House of Representatives five hundred thousand additional

copies of House Document Numbered 412, Eighty-fifth Congress, second session, with emendations.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

"WORLD COMMUNIST MOVEMENT—SELECTIVE CHRONOLOGY 1818–1957, VOLUME 1"

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up the concurrent resolution (H. Con. Res. 364) to print as a House document the publication "World Communist Movement—Selective Chronology 1818–1957, Volume 1," and to provide for the printing of additional copies, and ask for its immediate consideration.

The Clerk read the concurrent resolution as follows:

Resolved by the House of Representatives (the Senate concurring), That the publication entitled "World Communist Movement—Selective Chronology 1818–1957, Volume 1," released by the Committee on Un-American Activities, House of Representatives, Eighty-sixth Congress, second session, be printed as a House document; and that there be printed for the use of said committee fifteen thousand additional copies of said document.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF ADDITIONAL COPIES OF HOUSE REPORT NO. 2228

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 397 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That there be printed for the use of the Committee on Un-American Activities, thirty-six thousand additional copies of a report numbered 2228, Eighty-sixth Congress, second session, prepared and released by said committee entitled "The Communist-Led Riots Against the House Committee on Un-American Activities in San Francisco, California, May 12–14, 1960".

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF ADDITIONAL COPIES OF HOUSE REPORT NO. 2237

Mr. HAYS. Mr. Speaker, by direction by the Committee on House Administration, I call up House Resolution 398 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That there be printed for the use of the Committee on Un-American Activities six thousand additional copies of the report numbered 2237, Eighty-sixth Congress, second session, prepared by said committee and entitled "Annual Report for the Year 1960".

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF ADDITIONAL COPIES OF HOUSE REPORT NO. 851

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 408 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That there be printed for the use of the Committee on Foreign Affairs four thousand additional copies of House Report Numbered 851, on H.R. 8400, a bill to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world in their efforts toward economic and social development and internal and external security, and for other purposes.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRINTING OF MANUSCRIPT ENTITLED "HISTORY OF THE HOUSE OF REPRESENTATIVES"

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Concurrent Resolution 385 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved by the House of Representatives (the Senate concurring), That the manuscript entitled "History of the House of Representatives," by George B. Galloway, be printed under the supervision of the Committee on House Administration as a House document, and that there be printed two thousand additional copies for the use of the House of Representatives.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SUBCOMMITTEE ON NATIONAL POLICY MACHINERY

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up Senate Concurrent Resolution 39 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate Committee on Government Operations three thousand copies each of volumes 1, 2, and 3 of a compilation of the hearings, reports, and committee prints of its Subcommittee on National Policy Machinery issued during the Eighty-sixth and Eighty-seventh Congresses.

The resolution was concurred in.

A motion to reconsider was laid on the table.

PRINTING OF ADDITIONAL COPIES OF "COMMUNIST TARGET—YOUTH—COMMUNIST INFILTRATION AND AGITATION TACTICS"

Mr. HAYS. Mr. Speaker, by direction of the Committee on House Administration, I call up House Concurrent Resolution 384 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Committee on Un-American Activities one hundred thousand addition copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics," Eighty-sixth Congress, second session.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING EXPENSES OF INVESTIGATION BY THE COMMITTEE ON PUBLIC WORKS

Mr. FRIEDEL. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 433 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That the further expenses of the investigation and study authorized by H. Res. 23 of the Eighty-seventh Congress incurred by the Committee on Public Works acting as a whole or by subcommittee, not to exceed $150,000, including expenditures for the employment of experts, and clerical, stenographic, and other assistance, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman thereof and approved by the Committee on House Administration.

SEC. 2. The official stenographers to committees may be used at all meetings held in the District of Columbia unless otherwise officially engaged.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING EXPENSES OF INVESTIGATION BY THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. FRIEDEL. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 439 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That the expenses of the investigation and study to be conducted pursuant to H. Res. 420, by the Committee on Interstate and Foreign Commerce, acting as a whole or by subcommittee, not to exceed $150,000, including expenditures for the employment of investigators, attorneys, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. FRIEDEL. I yield to the gentleman from Iowa.

Mr. GROSS. What committee is this?

Mr. FRIEDEL. The Committee on Interstate and Foreign Commerce.

Mr. GROSS. I thank the gentleman.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SELECT COMMITTEE TO INVESTIGATE AND STUDY ADMINISTRATION OF EXPORT CONTROL ACT OF 1949

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 403, creating a select committee to conduct an investigation and study of the administration, operation, and enforcement of the Export Control Act of 1949, and related acts, and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That there is hereby created a select committee to be composed of five Members of the House of Representatives to be appointed by the Speaker, one of whom he shall designate as chairman. Any vacancy occurring in the membership of the committee shall be filled in the same manner in which the original appointment was made.

The committee is authorized and directed to conduct a full and complete investigation and study of the administration, operation, and enforcement of the Export Control Act of 1949 (63 Stat. 7), as amended, with a view to assessing the accomplishments under that Act, determining whether improvements can be made in the administration, operation, or enforcement thereof, and improving congressional oversight and guidance over the formation of United States policies involved in such Act. In carrying out such investigation and study, the committee shall give particular attention to the following matters:

(1) The problems involved in the control of trade between the United States and foreign countries, particularly the foreign countries comprising the Sino-Soviet bloc.

(2) Present methods and procedures in the formulation of policy with respect to the determination of which articles, materials, supplies, and technical data shall be controlled under such Act, and the extent of such control.

(3) Procedures followed under such Act in obtaining information, advice, and opinions with respect to determinations of which articles, materials, supplies, and technical data shall be controlled under such Act, from departments and agencies of the United States which are concerned with aspects of our domestic or foreign policies and operations which have a bearing on exports.

(4) The extent to which decisions heretofore made under such Act concerning the control of exports have adversely affected the security of the United States.

(5) Whether or not such Act is being administered by the appropriate department of the Federal Government.

(6) The interrelationship between such Act and related Acts (such as the Mutual Defense Assistance Control Act of 1951, and the Trading With the Enemy Act) and other discussions or agreements entered into by the United States (such as the coordinating committee (COCOM) discussions and agreements) which affect or relate to the control of trade between the United States and foreign countries.

For the purpose of carrying out this resolution the committee or subcommittee is authorized to sit and act during the present Congress at such times and places within the United States, including any territory, Commonwealth, or possession thereof, or elsewhere, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents, as it deems necessary; except that neither the committee nor any subcommittee thereof may sit while the House is meeting unless special leave to sit shall have been obtained from the House. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

Mr. COLMER. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Ohio [Mr. BROWN] on the resolution, and pending that, Mr. Speaker, I yield myself such time as I may consume.

The SPEAKER pro tempore. The gentleman from Mississippi will proceed.

Mr. COLMER. Mr. Speaker, if I may have the attention of the House for a few moments, I would like to point out what this resolution is about.

Mr. Speaker, we are engaged in a cold war with Russia and its satellites, a cold war that has been going on now for more than 15 years. We are told that it may become a hot war at any moment. Whether it does or not so far as this resolution is concerned is not really important, because the question involved and which this resolution would attempt to solve is whether we are going to aid our common and potential enemy, Russia and its satellites, either in a cold or a hot war.

The resolution provides for the setting up of a select committee of five Members of the House to make a study of the propriety of trading with the enemy. The resolution is sponsored by the gentleman from North Carolina [Mr. KITCHIN], one of the ablest Members of the Congress, and who enjoys the respect of all of his colleagues. There are many others who have been interested in this matter, some of whom testified before the Committee on Rules, which has original jurisdiction in this matter. Prominent among those members was the gentleman from California, [Mr. LIPSCOMB], on the minority side, who has been very diligent in this matter for a number of years.

Mr. Speaker, the question is—and it is just that simple—are we going to make a study of the situation of dealing with the enemy and come up with some possible recommendations as to how to stop it or are we just going to ignore the whole matter, and proceed on a basis "of business as usual"?

This resolution, if adopted, is not going to stop the policy of permitting the shipment of strategic materials to the enemy, but it is going to let the Congress and the country know what is going on. And then an aroused public opinion can force the administration to stop it.

I spoke of those who are interested in this, and I hope you will pardon me if I point to the fact that for 15 years, or 16 years to be exact, I have been interested in this matter.

In 1947 I introduced a resolution to screen, and possibly stop, the shipment of strategic materials to Russia and its satellites. One of the things that was spelled out in that resolution was to stop the shipment of the technical know-how to the U.S.S.R. While that resolution did not prevail—it really never was reported out of the committee—later on the Battle Act was passed which did in part what that resolution would have done.

I digress to point out that the resolution also called for a firm policy, among other things, in dealing with Russia.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from Pennsylvania.

Mr. WALTER. I certainly endorse the resolution the gentleman is presenting today so ably. It seems to me that there is something else of greater import than the ascertainment of trading with the enemy and how it should be curtailed; namely, the attitude of certain of our leaders with respect to this whole war.

It is perfectly appalling to me to see on all sides the attitude of educators and clergymen toward communism. I sincerely hope that when these studies are made there will be brought to the American people a greater appreciation of the fact that we are indeed engaged in a war.

Mr. COLMER. I thank the able gentleman from Pennsylvania, one of the outstanding and best-known foes of communism in this country; a man who has done and is doing a great job. I think the gentleman's contribution is very worthwhile here.

Mr. Speaker, if I may go back for a moment, what are we doing? We are dealing with the enemy just as if there were no cold war, just as if there was no potentiality of a hot war. Let me illustrate that. I do not have time to go into all of the details here, but we are shipping not only materials but the know-how itself to our enemy. Here we are shipping—and I hope you will hear this—machine tools, not to a Russian satellite, but to Russia itself. We have recently licensed V–8 engines for shipments to the Soviet Republic. When did we do that? We did that a few months ago. The gentleman to whom I referred a moment ago, the gentleman from Michigan [Mr. LIPSCOMB], who has been diligent in this matter and who has done a good job on this matter——

Mr. LAIRD. The gentleman from California.

Mr. COLMER. Yes, the gentleman from California.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. We are willing to take the gentleman from California [Mr. LIPSCOMB].

Mr. COLMER. The gentleman from California [Mr. LIPSCOMB] has had some correspondence with the Department of

Commerce on this question of shipping these machines. I wish I had the time to read that correspondence, which he has very kindly let me have, and has given me permission to use. But on February 12, 1960, a request was made for these V–8 engines to be shipped to Russia. On June 1, 1960, a license was granted in the amount of $3.4 million for the V–8 engines; $1.9 million on multistation machines for machining V–8 cylinder engines, and a number of other items that I might mention.

But, protest was made. The license was revoked. And, again, subsequently—and I do not seem to find the date here—but subsequent to July 22, 1961, the license was reinstated. Can anyone think of anything—well, I do not want to use the word "stupid," but can anyone think of anything that could possibly be worse in building up your enemy than in shipping that type of machinery? This was all brought out in the hearings before the Rules Committee.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, the gentleman referred to the gentleman from California as being from Michigan. Truly he is from Michigan. He was born in Michigan. He left when he was 5 years old. When he left Michigan it was Michigan's loss and California's gain.

Mr. COLMER. I shall not argue with the gentleman about that. Regardless of his geographic past or present location I commend him for his industry in this matter.

Mr. DORN. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from South Carolina.

Mr. DORN. Mr. Speaker, of course, this resolution is most worthy of the attention of the House and should be passed. I compliment and commend the author of the resolution, my distinguished and patriotic colleague, the gentleman from North Carolina [Mr. KITCHIN]. This has been going on for too long a time. I remember, in the 80th Congress, when I was a member of the Committee on Government Operations, a man came before my committee and testified that he was paying $250 for brandnew Cyclone engines in the United States, the kind used in C–47's, and he was selling them to Russia for $5,000 each. He had paid $250 for them brand new, as surplus U.S. property. So this has been going on a long time, and should be investigated now without further delay.

Mr. COLMER. The gentleman is absolutely correct. It has been going on ever since the cold war has been going on. I do not know of anything that will stop it except some congressional action, or else a dropping of the bombs and the declared of a hot war.

Mr. Speaker, what are we doing? Are we carrying on business as usual? Is that what we are interested in? Are we interested in preserving this country or are we interested in engaging in business? I daresay that when the truth is known, a lot of so-called big business people are behind this, pushing for business as usual, and it ought to be stopped. The argument is always made, and will be made here today, that this ought to be stopped but the timing is not right. The timing is never right so far as the departments downtown are concerned.

Mr. Speaker, I was a member of the Committee on Rules of the House just prior to the beginning of war against us by Japan and Germany. Then we had a resolution before that committee somewhat similar to this that would have stopped the shipment of petroleum products and scrap iron to Japan. But the State Department came up here on the Hill, and we heard them before the committee. As usual, they were so persuasive that the committee took no action upon that resolution. You know what happened. As we pointed out to them then, that scrap iron and petroleum were used against our boys in the Pacific Ocean.

I think it is time that we became a bit realistic about this. Certainly the least we can do, regardless of the attitude of the State Department or anybody else, is to make a study of this matter and let the people of the country know what is going on; we ought to see if we cannot put a stop to it or at least curb some of this dealing with the enemy. Congress has its responsibility in this matter.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from West Virginia.

Mr. BAILEY. The resolution itself, paragraph 2 on page 1, appears to be clear in its objectives, in that they are an investigation and study of the Export Control Act of 1949. If the gentleman will refer to the bottom of page 2 of the resolution he will find somewhat of a conflict there.

> The interrelationship between such act and related acts (such as the Mutual Defense Assistance Control Act of 1951, and the Trading With the Enemy Act) and other discussions or agreements entered into by the United States.

You could just as well have written in there the Reciprocal Trade Agreements Act. Will the gentleman be able to tell me whether this investigation would go into that angle of it?

Mr. COLMER. I am very much interested, as the gentleman knows, in the subject to which he is referring. I will not be a member of the committee. I assume the sponsor of the resolution, the gentleman from North Carolina [Mr. KITCHIN], will be the chairman of that committee. I hope he will direct his inquiry to the gentleman from North Carolina.

Mr. BAILEY. May I suggest the hope that the gentleman from North Carolina will go into that matter very carefully.

Mr. BROWN. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, my colleague on the Committee on Rules, the gentleman from Mississippi [Mr. COLMER] has explained this resolution and its purpose very ably and well, because, as I recall very vividly, he was one of the leaders, many years ago, in an early attempt, at that time, to bring an end to the practice, which has been growing and which has lasted entirely too long, of the U.S. Government's permitting the shipment of various strategic materials, goods and supplies to the very nations, governments and peoples who would destroy us if they get the opportunity to do so, and who now threaten our security and the peace of the world.

I feel very strongly that this resolution to establish this special committee should have the unanimous support of the House of Representatives.

I wish to pay tribute to the gentleman from North Carolina [Mr. KITCHIN], the author of the resolution, to the gentleman from California [Mr. LIPSCOMB], who has worked for a long period of time, years in fact, on this very problem, the gentleman from Ohio [Mr. LATTA] who has sponsored corrective legislation, as you know, to attempt to restrict the shipment and subsidizing of wheat and other foodstuffs to Russia and other Communist countries, and also the gentleman from Washington [Mr. PELLY], and all the others who have attempted for so long, to get this legislation before you.

The fact of the matter is, and I am speaking very frankly, for different reasons, very obvious reasons, it was difficult to get this matter out of the Rules Committee, so I am very happy it is on the floor.

That which has been going on in regard to the shipment of these strategic materials, the licensing of these exports by our own Government, by its departments and agencies, of these strategic materials and goods and supplies which would help the Communist world make war against the free world, is a damnable outrage, and the Congress of the United States should, if it can, immediately put a stop to it.

If this committee is created, as I hope it will be by the adoption of this resolution, then certainly the investigation this committee will hold, will turn the spotlight of pitiless publicity on what has been going on, not only now but over the years and what is still going on, as you know, so an outraged public opinion in America will do that which we in Congress have been almost helpless to do, compel the agencies and departments of the Government to correct this situation, and to stop this thing, which is actually damaging and injuring this country and its people, and may even lead to our complete destruction in case of war, because our Government has been by these actions strengthening our enemies, foolishly, and unwisely, of course.

It is impossible to understand why any responsible official of the Government in the executive department would think of doing such a thing. It is time the Congress exerts its will and lets the country know what we are trying and attempting to do, according, in my opinion, to the Constitution which provides the Congress shall legislate and act in behalf of the people. Remember, the Congress itself is really the governing body of this

country, and not some bureaucratic agency downtown.

Mr. HARSHA. Mr. Speaker, will the gentleman yield.

Mr. BROWN. I yield to the gentleman from Ohio.

Mr. HARSHA. I commend the gentleman on his remarks and wish to associate myself with him. As the gentleman knows, I have introduced legislation to prevent the sale of our surplus subsidized farm commodities to Russia and to other Communist countries. I have also repeatedly called upon the Secretary of Commerce to refrain from issuing export licenses to such countries. I certainly do not think the American taxpayers want to subsidize the Communist economy in any way, shape, or form.

Mr. BROWN. I appreciate the comments of my colleague.

Mr. KNOX. Mr. Speaker, will the gentleman yield?

Mr. BROWN. I yield to the gentleman from Michigan.

Mr. KNOX. Mr. Speaker, I want to associate myself with the gentleman from Ohio [Mr. BROWN]. It has come to my attention in the past 2 weeks that the Department of Commerce has issued licenses for the exportation of strategic materials such as synthetic rubber, ball bearings, automobile parts, and so on to countries behind the Iron Curtain. I think this legislation is long overdue and should be enacted.

Mr. BROWN. I thank the gentleman very much.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. BROWN. I yield to the gentleman from West Virginia.

Mr. BAILEY. Does not the distinguished gentleman from Ohio agree that we have some exporters in this country who work on the assumption that any kind of business is good business for them?

Mr. BROWN. We have a great many people in America who are more interested in profits than anything else.

Mr. Speaker, I yield 8 minutes to the gentleman from California [Mr. LIPSCOMB].

Mr. LIPSCOMB. Mr. Speaker, the purpose of House Resolution 403 is to authorize the creation of a select committee to conduct a complete study of our export trade control program with particular reference to controls on trade with the Soviet bloc.

There are many complex, far-reaching factors and considerations involved in the subject of trade and trade control.

I believe at this time we should discuss in detail our trade control program as to what it is, how it operates, and what some of its effects have been. I shall point out what in my opinion are serious shortcomings in our present export control operations and why it is urgent that this resolution be adopted by the House at this time. In my view the problem to which this resolution is directed is a matter of great importance and concern to the security and welfare of our Nation.

The announcement August 30 that the U.S.S.R. would conduct nuclear testing has displayed to the world once again the ruthless and reckless nature of the Soviet quest for world domination. This latest episode in the continuing Communist campaign to extend its influence over the free world only serves to emphasize more strongly the great importance of the trade study to be conducted by the select committee.

Can there be any doubt that we must avoid in every way possible helping the Soviets and the Soviet bloc to strengthen itself economically and militarily through trade with the West?

Knowing full well what Communist goals are, knowing full well their method of operations which calls for brutal, out-and-out manipulation of every resource at their command to glorify and advance communism, should the free world through trade cooperate in helping the Soviets achieve such goals? I believe the answer is an emphatic "No."

Yet this can be a result of allowing the Soviet bloc to purchase strategic goods and materials from the United States and of their purchase of strategic items from other free world countries.

To the Soviets and their puppets, trading is a primary means through which they are attempting to obtain the machines and know-how to round out their industries which in numerous areas are far behind Western industries and industrial know-how.

A major reason they continue to lag behind in many areas of course is because they have devoted a large amount of their resources to such areas as the space field and missilery in a brazen effort to score a propaganda victory over the West. They seek to correct many of their industrial shortcomings through trading for selected strategic items.

The following is from an item in the May 18, 1961, Wall Street Journal in regard to the nature of the trade campaign of the Soviets. That report, in commenting on the fact that trade by Western countries with the Soviets is increasing sizably, had this to say:

> Russia, in its purchases from the West, is focusing attention on technology and industrial know-how, seeking to pick the best Western industrial brains in its economic struggle with the West, according to American and European trade sources. Sometimes complete plants down to the last nut and bolt are purchased for assembly in Russia. Only advanced equipment and technology are wanted; the Reds scorn offers of anything less.

The article also states:

> "Communists are encouraging some Western nations to help Russia forge ahead in fields where it has been lagging. In effect, these Western nations are helping Russia to catch up with the West," complains one American Government official in Paris. Some Americans make the additional point that the Russians often will buy one shipment of advanced equipment and then produce copies without regard for the foreign company's patent rights. This eliminates any chance for repeat business and may bring Russia into world markets as a direct competitor of the firm that originally supplied the equipment.

In commenting on the Soviet trade drive Victor Riesel, a recent visitor to Europe, has reported:

> Khrushchev is playing the moon out of strength to cover his industrial weakness. Want facts to bolster this charge? Our Central Intelligence Agency has them. The French SDEC, counterpart of the CIA, has them. Documents I've seen have not been made public. Why?
>
> Picking from these diverse reports at random, it is absolutely accurate to report that Soviet railroads, surgery, anaesthesia, hospitals, airports, commercial aviation, precision tools, spare parts plants and the automobile industry, for example, belong back in the early thirties and mid-forties at the most—once you get out of the four or five showplace cities.

Along a somewhat similar view, Dr. L. A. Du Bridge, famed president of the California Institute of Technology, spoke earlier this year on Science in the U.S.S.R. in a commencement address he delivered at Union College, Schenectady, N.Y. He said, in part:

> The Russians have admittedly assigned their best scientists and engineers to work on rocket and space technology. Their achievements in this field have been brilliant. But they have paid a heavy price in the neglecting of research in many key areas of basic science. Not all basic research has been stopped, of course, but the scale, breadth, and depth of their scientific work is grossly inferior to ours—or to that of the British. Count the awards of Nobel Prizes in physics, chemistry, and medicine: 61 American scientists have received Nobel Awards, and only 5 Russians.
>
> Witness also the fanfare with which the Russians hurriedly built a 10-billion-electron-volt nuclear accelerator, at very great cost, in order to advertise, for a time, that they had the most powerful nuclear machine in the world. The machine was indeed built—but it has never worked properly and is now almost inactive.

To overcome their weaknesses, the Soviets are shopping for such items as chemical industry equipment, power plants, complete factories in various types of industries, scientific, and optical equipment, equipment to manufacture synthetic fibers, and so forth. Major attention and effort is being devoted to acquiring technology, industrial know-how, and advanced equipment.

The Quarterly Export Control Reports issued by the Department of Commerce continue to indicate Soviet attempts to buy from the United States technical data and scientific know-how concerning industrial equipment, process plant technology in such fields as petrochemicals, chemicals, textiles, and rolling mills.

It will be obvious to anyone who stops to reflect that the Soviets have great ambitions to engage in trading to acquire certain items vital to the U.S.S.R. In practically every major contact with the West, a pitch for increased trade emerges as the Soviet's real purpose. Such a pitch was made by Khrushchev when he was here in 1959. Trade was the purpose of Mikoyan's trip to the United States earlier in that same year. Mikoyan's recent trip to Japan was to sell them on the advantages of trading with the U.S.S.R.

In view of the Berlin situation which has laid bare to the world the ruthless nature of the Kremlin, would not one expect a lessening of exports from the United States to the Soviet bloc at this time?

As a matter of fact, according to a recent AP report, export licenses granted

by the Department of Commerce for shipment of goods to the Soviet bloc increased sharply during the 3 weeks after the President's Berlin speech over the previous 3 weeks. Included have been licenses to sell railway equipment, synthetic rubber, industrial instruments, pipe valves, and chemical products.

This indicates the urgency of the situation and why it is so vital for the House to look into the matter as provided by House Resolution 403. It is necessary to wage a full-fledged study of all aspects of the trade problem to enable the Congress to be fully advised of what is going on and to determine what trade control legislation revision or modification is necessary for our security.

There is need, I believe, to determine what actions are necessary immediately to counteract the brutal Communist campaign in Berlin. Even more important is the need for a comprehensive, long-range study of our export trade program as to how it has been administered and how our trade policies have been formulated. Crises may come and go, but the menace of international communism continues. Our trade control efforts must be properly geared and directed to help meet the challenge this international conspiracy poses to the cause of freedom.

I have been concerned for a number of years, as I know many other Members of Congress and others have been, over the operation of our export control program and with regard to the closely related trade control program of the free world which is designed to control the flow of strategic goods to the U.S.S.R. and its satellites.

My concern stems not only from policies adopted, but, in instances, from the lack of policies, and the vacillation and indecision that has been all too evident in the administration of the program.

I would like to relate to the membership of the House in more detail some of the things that have been happening in the export control laws which point to the need for the comprehensive congressional review as provided for by House Resolution 403.

As one example, the Department of Commerce in 1960 granted a license authorizing sale to the Soviet Union of a $3.4 million transfer machine to manufacture V–8 cylinder blocks and a $1.9 million transfer machine to manufacture the V–8 engine heads.

These machines are of a type essential to mass production of automobiles and trucks. They can also be used in the mass production of all metal manufacturing such as refrigerators, tractors, electrical motors, and so forth.

The Soviets are placing heavy emphasis on the production of transfer machines at the current time for they are vital in solving production problems of complex and highly specialized equipment.

On February 23, 1961, the Department of Defense advised me that the technology contained in these transfer machines is the most advanced in the world and that the products of these transfer type machine tools are clearly of military value. The Department of Defense said that receipt of this equipment by the U.S.S.R. would contribute to Soviet military and economic potential.

I contacted both the President and the Secretary of Commerce requesting that the licenses be canceled. This was done on March 9 when the licenses were permanently revoked.

In May, less than 3 months after the Department of Defense took the position against the export of transfer machine tools, I received a letter from Deputy Secretary of Defense, Roswell L. Gilpatric, advising that the prior objections of the Department of the export of this type machine tools had been withdrawn. The letter was completely unsolicited. It came as a surprise. In view of its message, it also came as a shock.

I immediately questioned the Department of Defense as to what additional information it had secured on which its reversal of policy was based and as to what consideration was given to such matters as the fact that faster deliveries of such machines are possible from U.S. sources. The reply presented absolutely nothing to indicate that this was anything but a policy decision. Certainly it was not based on any new or additional facts.

Significantly, though the reply indicated that opinion generally is that earlier delivery would be possible from U.S. sources for such machines, no weight was given this fact. In a race for time against the Soviets, is not any time advantage important, whether it is a matter of a few weeks or months, a year, or whatever length of time it may be?

What actually caused the change in the position of the Department of Defense I do not know. Its significance, however, is that it could mean giving the green light to a type of export which only a few months ago the Defense Department itself stated would be contrary to our national security.

To my knowledge no export licenses have subsequently been issued as a result of this withdrawal of objections by the Department of Defense but I am also given to understand that various license applications to ship such machine tools are at present pending before the Department of Commerce. A machine tool trade journal recently predicted that a license for such export would be granted. Other speculations have been that renewed efforts would be made to secure approval of this license, and others, after the adjournment of Congress.

In 1958, after an initial rejection, the Department of Commerce granted an export license authorizing the sale of tiremaking know-how which was to be used by a British combine to build a large tire-producing factory in the U.S.S.R. At that time the largest tire factory in the U.S.S.R. was a former U.S. plant that had been shipped lock, stock, and barrel to the U.S.S.R. under the lend-lease program. I discussed this matter in a statement to the House which appeared in the CONGRESSIONAL RECORD June 16, 1958, in connection with legislation to extend the Export Control Act.

As it turned out, the American technical data were not used. Because of the delays encountered, the British combine engaged a British firm for this purpose. Interestingly enough, however, the export license to the American firm was granted well after the contract for the technical know-how had been let to the British firm. About the only conclusion that could be drawn from this license approval under those circumstances was that the firm wishing to sell the information, knowing full well that the contract had already been let, nevertheless pressed for a decision in the hope of setting a precedent for future sales. Of course it is important to remember that the actual decision was made by the Department of Commerce.

Efforts of this nature—toward opening the door, establishing precedents—for increased trade in technical items with the Soviets seems to have been the pattern over the years.

Another example of a recent licensing action of concern was the license issued by the Department of Commerce for the shipment to the U.S.S.R. of 45 precision ball bearing manufacturing grinding machines. The license for these machines had been granted in 1960, suspended early in January and was revalidated in February of this year.

The precision grinding machines, the most advanced in the world, are used in the manufacture of missile guidance systems, aircraft gyros, and so forth. The license was validated over the objection of the Department of Defense which objected on the grounds that the equipment could have only military use. Only after urgent congressional and public demands were these licenses canceled early in March.

Recently, in June, the Department of Commerce announced the easing of its ban concerning the Department's export licensing policy with respect to exports to the U.S.S.R. and European Soviet bloc countries of subsidized surplus agricultural commodities.

Under this policy revision such commodities as feed grains, wheat and wheat flour, cotton and cotton textiles, rice, and nonfat dry milk are to be allowed to be exported to Soviet bloc countries subsidized in part by the U.S. taxpayers.

This action came at a time when there were widespread reports of food shortages in the Soviet Union and its satellite countries. A day before Premier Khrushchev indicated that because of food shortages horsemeat had become a near-staple food. The House recently included an expression against such surplus sales in the omnibus farm bill.

Export licenses have been granted in recent weeks authorizing shipment of large amounts of scrap metal to Yugoslavia. On one recent date, July 12, licenses were granted for the shipment of $639,000 in iron and steel scrap, $417,620 in steel scrap, and $77,019 in electrolytic copper to Yugoslavia.

Ironically, on the very next day a joint communique was issued in Moscow, following discussions between spokesmen for the U.S.S.R. and Yugoslavia express-

ing satisfaction that relations between the two countries "are developing normally and that positions are similar or coincide on the major international questions."

On August 4, another $639,000 shipment of scrap metal to Yugoslavia was authorized by a license granted by the Department of Commerce.

On August 16, a license was approved authorizing the shipment of $254,412 in copper scrap to Yugoslavia.

On August 28, a license was approved authorizing shipment of $732,000 in iron and steel scrap to Yugoslavia.

On August 7, an export license was granted authorizing shipment of $2.5 million in railroad equipment to Bulgaria. In response to my request for the comment of the Department of Defense concerning whether such shipment would contribute to the economic and military potential of Bulgaria as a Soviet bloc country, the Department said, in part:

> Undoubtedly in the long range this modernization would improve the movement of men and material and to this extent would add to military mobility. However, it cannot be said at this time that such would present a significant security risk to the United States.

I do not see how such an export could help but contribute to the Soviet bloc military and economic potential. The decision in my view is another example of fuzzy-minded indecisiveness which has characterized so much of the trade control program.

In order to evaluate the nature of the problem involved in trade control, and to emphasize the pressing need for a special committee to investigate the many complex problems that must be taken into account concerning trade, it is necessary to look at our export control laws and consider how the trade control program operates.

Our present domestic export control program was established by the Export Control Act of 1949 which is administered by the Department of Commerce. There are basically two types of control. One is for short supply items and the other for security control items.

Our security controls contain an embargo on exports to Red China, North Vietnam, North Korea, and broad controls to the U.S.S.R. and Soviet bloc countries. Controls to free world countries involve controls over selected items, and are aimed mainly at preventing transshipment to Soviet bloc countries and to prevent frustration of our controls on shipments to the bloc.

Under the act, all commercial exports from the United States, its territories and possessions, except for Canada, are prohibited unless the Department has issued a validated license or has established a general license permitting shipments.

A general license is a broad authorization permitting exports of certain commodities without requiring the filing of an application by the exporter.

A validated license is a document issued by the Department to an exporter authorizing the export of commodities within the limitations of the document. It is issued pursuant to application submitted by the exporter.

The positive list of controlled commodities is a list of those items controlled for security or short supply reasons. All positive list commodities and most nonpositive list goods require a validated license for shipment to the U.S.S.R. and other Sino-Soviet bloc destinations.

Our export control program is in turn closely related to the international effort to control trade with the Soviet-Sino bloc.

Over the course of 1948, 1949, and 1950 negotiations were held for the purpose of formulating a multilateral approach to the problem of controlling, for security reasons, the flow of goods to the Sino-Soviet bloc. These negotiations resulted in the forming of what is known as the consultative group, which includes all NATO nations except Iceland. Its membership includes Belgium, Canada, Denmark, West Germany, France, Greece, Italy, Japan, Luxembourg, the Netherlands, Norway, Portugal, Turkey, United Kingdom, and the United States. The major working committee under the Consultative Group is known as the Coordinating Committee, or COCOM, which began functioning in January 1950.

The basic purpose for creating the Consultative Group was to coordinate the strategic trade control of its 15 members and provide a forum for discussions and negotiations relating to this matter.

International lists of strategic commodities have been drawn up on the basis of the COCOM discussions and contain items to be controlled in trade with the bloc.

The international lists were created to establish minimum controls which each participating nation agreed to impose. The actual trade controls are imposed by the individual nations themselves. Basically the controls on exports from the United States are embodied in our Export Control Act.

Significantly, the international lists have undergone several extensive revisions, in 1954 and in 1958–59, which have had the effect of easing considerably the earlier more stringent controls on trade with the Communists in strategic goods.

There is another important factor to consider in regard to international control of trade. Shortly after the formulation of COCOM, Congress enacted the Mutual Defense Assistance Control Act of 1951, the so-called Battle Act, under which it is declared to be the policy of the United States to place an embargo on the shipment to any nation threatening the security of the United States, including the U.S.S.R. and all countries under its domination, of arms, ammunition, implements of war, atomic energy materials, petroleum, transportation materials of strategic value and items of primary strategic significance used in the production of arms, ammunition, and implements of war. It was further declared to be the policy that no military, economic, or financial assistance would be supplied by the United States to any nation unless it applies such an embargo.

The Battle Act provides that upon the recommendation of the administrator of the act, all military, economic and financial assistance to any nation shall be terminated if it knowingly permits shipment to any nation or combination of nations threatening the security of the United States of arms, ammunition, implements of war, atomic energy materials, petroleum, transportation materials of strategic value and items of primary strategic significance used in the production of arms, ammunition and implements of war.

The act, however, provides that in the case of a country which permits shipments of items of primary strategic significance other than arms, ammunition, implements of war, and atomic energy materials, the President may direct the continuance of assistance to such a country when, as provided by the Battle Act, unusual circumstances indicate ceasing aid would be detrimental to our security. Presidential determinations waiving the requirement that aid be ceased have been made on numerous occasions.

The Battle Act also declares it to be the policy of the United States to regulate the export of other strategic materials not specifically referred to in the act to countries threatening the security of the United States and provides that the United States undertake to negotiate with countries receiving U.S. military, economic, or financial assistance. The act stipulates that such assistance shall be terminated if the recipient country is not cooperating with the United States in controlling such other exports.

Pursuant to the Battle Act, the United States has drawn up and has maintained the so-called Battle Act lists.

The foregoing are the laws and programs which provide the basic framework for the formulation of our trade policies.

In actual practice, U.S. trade policies appear to be arrived at approximately as follows: Basic discussions on trade control take place in COCOM, the working committee of the consultative group. U.S. participation in the COCOM discussions is under the general direction of the Department of State. After the decisions are made there, the international trade control lists are drawn up to establish the minimum restrictions member nations are to impose on trade with the Soviet bloc. Then our own Battle Act lists are revised to conform basically with the COCOM international lists. Then the export control policies under our Export Control Act are formulated, or revised, to conform generally with the Battle Act lists.

To a considerable degree, therefore, as our laws bearing on export control are administered, our domestic export control policies are based not on what we ourselves may consider to be advisable or inadvisable trade, but hinge to a large degree on what sort of general agreements can be reached in conjunction with the various nations in the COCOM discussions.

The information I have presented gives only the briefest of facts concerning the complex trade control machinery that exists and the methods employed in formulating trade policies. However, even such a brief discussion of

the matter immediately brings to mind many things that require looking into by the select committee.

Many of you have heard arguments presented that it would not result in a net loss to the Soviets if a U.S. firm is denied a license to ship, for example, precision machinery to the Soviets since the Soviets would only acquire similar equipment from European sources.

With regard to that type of claim, initially one of the items the select committee would take a sharp look into would be the methods employed by our Government in obtaining information as to the availability of strategic materials and goods from other Western nations. Certainly we cannot proceed under hazy, fragmented information and facts as to what goods may be available for export from other countries and how such goods compare with U.S. products, not only as to the quality and design of the products, but also such factors as delivery schedules, and so on. Decisions along these lines must be based on complete, accurate facts and I am not convinced this has always been the case.

There is another important matter to consider in regard to any claim that items may be available from Europe and therefore it would do no good to deny export licenses to American firms. Even assuming that some particular items are available from Europe, in many cases the fact that they are not prohibited from shipment to the Soviet bloc—in other words, why certain goods may not be under embargo to the Soviet bloc—stems directly from the fact that a general relaxation of restrictions has been agreed to in the COCOM discussions in which the United States has participated.

In my view it is imperative that we at the highest levels possible in our trade discussions with other Western nations strive to achieve meaningful recognition of the nature of the Communist menace and the dangers inherent in, through trade, helping to build up its military and economic potential.

The situation confronting us today with regard to the Soviet trade drive is, I believe, aptly described in Mr. George F. Kennan's recent book, "Russia and the West."

In discussing the things the Soviets sought from the West, he said:

> If we were to attempt to combine in one formula the various elements of this demand, putting them, that is, together into a single imaginary statement of the Soviet leaders to the Western governments, it would run something like this. The Soviet leaders would say:
>
> "We despise you. We consider that you should be swept from the earth as governments and physically destroyed as individuals. We reserve the right, in our private if not in our official capacities, to do what we can to bring this about: to revile you publicly, to do everything within our power to detach your own people from their loyalty to you and their confidence in you, to subvert your Armed Forces, and to work for your downfall in favor of a Communist dictatorship. But since we are not strong enough to destroy you today—since an interval must unfortunately elapse before we can give you the coup de grace—we want you during this interval to trade with us; we want you to finance us; we want you to give us the advantages of full-fledged diplomatic recognition, just as you accord these advantages to one another.
>
> "An outrageous demand? Perhaps. But you will accept it nevertheless. You will accept it because you are not free agents, because you are slaves to your own capitalistic appetites, because when profit is involved, you have no pride, no principles, no honor. In the blindness that characterizes declining and perishing classes, you will wink at our efforts to destroy you, you will compete with one another for our favor. Driven by this competition, which you cannot escape, you will do what we want you to do until such time as we are ready to make an end of you. It is, in fact, you who will, through your own cupidity, give us the means wherewith to destroy you."

Do you know what time of history Mr. Kennan was referring to in presenting his views as to the essence of Soviet requests and their significance? The year was 1921, and it was a description of Lenin's approach to the Western countries.

How little things have changed. Take out a topical reference or so, such as the reference to diplomatic recognition, and the statement would, I believe, completely fit the situation today.

How do we go about convincing other Western nations concerning the dangers of such trade? There obviously should be various avenues. Significantly enough, one means at our disposal at the present time appears not to have been used to the fullest extent possible.

It will be recalled that the Battle Act establishes a policy of embargo on armament and strategic goods going to the U.S.S.R. and its satellites and requires the United States to cease giving aid to other countries who do not abide by such a policy. It seems likely, however, that this act is not being administered in such a manner as to realize for the United States its full potential toward controlling strategic trade with the U.S.S.R. and satellite nations.

Actually, the Battle Act lists are not drawn up on the basis of an ability to establish firm trade control policies which one would believe the provisions of the Battle Act should allow us to do. They are drawn up instead really on the basis of the results reached in the COCOM discussions.

The significance of all this is that the international trade control policies are established pursuant to what is said to be the efforts of a voluntary group—COCOM. And the argument is that since, after all, COCOM is just a voluntary group, we can expect no more than can be achieved on the basis of mutual agreement. But at the same time, we have unused in our hip pocket, so to speak, the Battle Act which contains teeth and which could be employed to formulate firmer international trade control policies.

Besides this, it appears that our ability to achieve meaningful COCOM trade controls has on occasion been weakened on the basis of questionable administrative decisions and policies. As an example, the 1956 report on East-West trade by the Senate Permanent Subcommittee on Investigations, Senate Report 2621, 84th Congress, 2d session, states that prior to the time we entered into active COCOM negotiations in 1954, downgrading and decontrol of approximately 150 items were recommended by personnel in our own Government agencies. This action was taken contrary to the advice of the experts and technicians of the Defense Department and in cases against the advice of experts in their own agencies. And, of course, after that the COCOM discussions themselves resulted in additional significant liberalizations of the COCOM lists.

The select committee must also assess in the best way possible the status and capabilities of all segments of Soviet and Soviet bloc industry and in so doing look into the means presently employed to make such assessments. There appears to be much conflicting information and scare talk about their industrial potential. Many, apparently basing their conclusions on questionable data as to Soviet production or on the basis of a quick visit to several Soviet showplace factories, seem to feel that they are producing in abundance and there is no reason to withhold exports from them.

This comment, and my previous remarks on this subject, are not to downgrade Soviet potential or to minimize the danger that can be brought about to the free world by the military-economic-political entity represented by the U.S.S.R. and its satellite puppets. But it seems clear that we must base our trade policies on accurate assessments of Soviet weaknesses and strength. To overestimate their abilities and accomplishments could be as potentially dangerous as to underestimate their potential.

As a related matter, the select committee must take a serious look at the implications of Soviet economic warfare for this also poses a serious threat. Trade to the Soviets is a far different thing than an exchange of goods as we know it. The end goal of their trade is its benefits to the Communist state.

Obviously if prices can be rigged at any level, such as is possible in a Government-regulated economy in Communist nations, much economic chaos in markets can be created. Soviet dumping of oil at present is creating a serious problem. Reports are that Soviet satellites are being forced to pay more for oil to enable the U.S.S.R. to dump oil at low prices elsewhere.

In recent years the Soviets have dumped such items as aluminum, tin, zinc, platinum, and other metals at below cost to depress prices and disrupt markets. Two years ago, in 1959, we witnessed a brazen propaganda attempt by the Soviets by dumping school laboratory equipment on our market at one-fifth of the prevailing prices for comparable U.S.-made items. The Soviet Union has attempted on occasion to buy up, for example, Iceland's fish and Sudan cotton at uneconomical prices for political objectives.

Transshipment is another matter that needs to be looked into thoroughly by the select committee, to determine whether we have adequate transshipment controls, and whether they are being properly administered. Various expressions of concern have come to my attention that large amounts of strategic

goods and materials are being transshipped to the Soviet bloc contrary to the interest of our laws and policies with only token effort on our part to enforce transshipment prohibitions.

Are our export control programs and activities adequately and properly staffed? This is highly significant, for obviously staff work is very important in matters such as trade control which involves technical and policy considerations.

Major attention must be centered on our export trade control laws. We must determine whether these laws establish a workable trade control policy, which is adequate for the protection of our security. We must determine what revisions or modifications of our trade control laws are necessary.

The foregoing are some of the many pressing problems presented in connection with our export control efforts. In my view it is imperative that these and related matters be looked into by Congress as proposed by House Resolution 403, and I urge the House to approve this resolution.

Mr. BROWN. Mr. Speaker, I yield 4 minutes to the gentleman from Ohio [Mr. LATTA].

Mr. LATTA. Mr. Speaker, this resolution, in my opinion, should be adopted unanimously by the House today. Certainly we should not let this matter go over until next Wednesday. I think that this problem is so urgent that it should be taken up forthwith.

It seems perfectly ridiculous in this cold war period that we should be trading with Communist nations whose announced purpose is to bury us. To point up what I mean and to show how ridiculous we must seem to the people of the free world, I have before me a copy of the Evening Star of June 24 last, which carries these headlines: "Khrushchev Promises Red Boom." Let me point out a paragraph found in this article quoting Mr. Khrushchev:

> The massive developments, he said, would be outlined in drafts of a new program and new rules of the Soviet Communist Party to be published soon wherein horsemeat and American corn might figure in new food production plans.

In the very next sentence Khrushchev emphasized Russia's rapid economic development which was to his thinking Russia's most formidable weapon for winning capitalist countries over to communism. The question in everyone's mind is, Shall we help him obtain his objective?

Certainly we should not be trading with the Soviet Union or East Germany, Bulgaria, Czechoslovakia, or these other Communist countries under present conditions.

After this House adopted my amendment to the farm bill and it was signed into law, we find the Commerce Department granting licenses to export farm products to East Germany, Hungary, and Czechoslovakia in the amount of $1,193,427. As soon as I heard that such licenses had been issued I called the Secretary of Commerce and asked for an explanation. The explanation I received after he had checked into the matter was that these commodities were not subsidized. This clearly indicates that the bureaucrat downtown charged with the responsibility of granting these export licenses did not read all of the amendment that was written into the bill by this Congress.

Had he taken the time to have read this amendment he would have found that it is our policy to expand our agricultural trade with "friendly nations." Certainly East Germany, Hungary, and Czechoslovakia are not friendly nations.

On August 18, if you please, we sent to Cuba $205,000 worth of small red beans, which is a lot of beans. I checked into the reason they wanted so many red beans, and I found out that red beans is a main dish in the Cuban diet. Seven days later, on August 25, $184,000 worth of red beans were sent to Cuba. Certainly, we cannot consider Cuba a friendly nation.

Mr. Speaker, I realize that the Secretary of Commerce cannot keep his finger on what goes on day after day in his Department, but this Congress must find out what is going on with respect to the issuance of these licenses. We cannot permit this trading with the enemy to continue. I urge the adoption of this resolution.

Mr. BROWN. Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. PELLY].

Mr. PELLY. Mr. Speaker, I am in strong support of House Resolution 403 which as has been explained would establish a select committee of the House to investigate the Export Control Act of 1949.

I have felt for quite some time that the Members of Congress and the American people should have full information as to the U.S. policy covering exports to countries under the Communist form of government. In the interests of national security, I personally have favored cutting off all trade with enemy nations and to that end introduced H.R. 8547. However, as a first step, I believe it desirable and indeed necessary to determine the facts as provided in this resolution.

I cannot understand why, for example, on June 22, 1961, the Department of Commerce authorized American firms to apply for and receive export licenses to sell and ship surplus Government subsidized farm products to Soviet Russia and the Communist satellite nations of Eastern Europe.

It is all right to say Congress can trust the President, and leave export policy to him as he is responsible for foreign policy. Of course the answer to that is that a President must delegate, and it appears the policy covering exports to Communist nations is not a matter of top-level decision. Somewhere in the State Department and other departments there are those who support active trading with the very nations whose leaders are bent on our destruction. This cannot be left to the President. Congress has a responsibility.

Every day export licenses are being issued for items which seem to be of military significance. I think Congress should investigate. It seems that if a machine or commodity is available and could be purchased by the Communists in any other free world country, then under our policy permission is given for its export.

I have protested that this policy is wrong. Mr. Khrushchev says he will bury us. From looking over the list of items on which export licenses are granted, I would say the United States is proceeding to help him bury us. For example, we cannot defeat the international Communist conspiracy by sending scrap iron to Czechoslovakia. And I am curious also as to the details concerning the technical data which I notice is frequently allowed to be shipped behind the Iron Curtain. Congress must look into this. Passage of House Resolution 403 would open the way for obtaining the facts.

Mr. Speaker, on a number of occasions, I have spoken in the well of this House with regard to shipments of strategic materials to the Communists. As a result, mail from all over the country has come to me, and I can say the American people overwhelmingly oppose trade and aid to the Communists. I can tell you the American people are indignant. They are against business as usual and want to know about our policy. I think they are entitled to full information, and I urge passage of this resolution to provide the answers. Moreover, I hope we can have a record vote, for our constituents are entitled to know how their Representatives stand on this matter so vital to the preservation and security of our country.

Mr. BROWN. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa [Mr. KYL].

Mr. KYL. Mr. Speaker, I ask unanimous consent to proceed out of order, to revise and extend my remarks and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. KYL. Mr. Speaker, I take this time to read excerpts from a speech made by the President of the United States to the graduating class of the U.S. Naval Academy on June 7 of this year. This was a fine speech, and I concur with the sentiments expressed. I say this sincerely, and absolutely without irony.

The excerpts are read with reference to statements made before a committee of the other body yesterday on the subject of political activity of military personnel. The entire speech will be a matter of record.

These are the President's words to the midshipmen:

TEXT OF THE PRESIDENT'S REMARKS TO THE GRADUATING CLASS AT THE U.S. NAVAL ACADEMY, ANNAPOLIS, MD., JUNE 7, 1961

Admiral, Mr. Secretary, members of the Joint Chiefs of Staff, members of the faculty, members of the graduating classes and their families: I am proud as a citizen of the United States to come to this institution and this room where there is concentrated so many men who have committed themselves to the defense of the United States. I am honored to be here.

In the past I have had some slight contact with this service, although I never did reach the state of professional and physical perfection where I could hope that anyone would ever mistake me for an Annapolis graduate. I know that you are constantly warned during your days here not to mix, in your naval career, in politics. I should point out, however, on the other side, that my rather rapid rise from a Reserve lieutenant, of uncertain standing, to Commander in Chief, has been because I did not follow that very good advice.

I trust, however, that those of you who are Regulars will, for a moment, grant a retired civilian officer some measure of fellowship.

Nearly a half century ago, President Woodrow Wilson came here to Annapolis on a similar mission, and addressed the class of 1914. On that day, the graduating class numbered 154 men. There has been, since that time, a revolution in the size of our Military Establishment, and that revolution has been reflected in the revolution in the world around us.

When Wilson addressed the class in 1914, the Victorian structure of power was still intact, the world was dominated by Europe, and Europe itself was the scene of an uneasy balance of power between dominating figures and America was a spectator on a remote sideline.

The autumn after Wilson came to Annapolis, the Victorian world began to fall to pieces, and our world one-half a century later is vastly different. Today we are witnesses to the most extraordinary revolution, nearly, in the history of the world, as the emerging nations of Latin America, Africa, and Asia awaken from long centuries of paupery and impatience.

Today the Victorian certitudes which were taken to be so much a part of man's natural existence are under siege by a faith committed to the destruction of liberal civilization, and today the United States is no longer the spectator, but the leader.

That half-century, therefore, has not only revolutionized the size of our military establishment, it has brought about also a more striking revolution in the things that the Nation expects from the men in our service.

Fifty years ago the graduates of the Naval Academy were expected to be seamen and leaders of men. They were reminded of the saying of John Paul Jones, "Give me a fair ship that I might go into harm's way."

When Captain Mahan began to write in the 1890's on the general issues of war and peace and naval strategy, the Navy quickly shipped him to sea duty. Today we expect all of you—in fact, you must, of necessity—to be prepared not only to handle a ship in a storm or a landing party on a beach, but to make great determinations which affect the survival of this country.

The revolution in the technology of war makes it necessary in order that you, when you hold positions of command, may make an educated judgment between various techniques, that you also be a scientist and an engineer and a physicist, and your responsibilities go far beyond the classic problems of tactics and strategy.

In years to come, some of you will serve as your commandant did last year, as an adviser to foreign governments; some will negotiate as Admiral Burke did, in Korea, with other governments on behalf of the United States; some will go to the far reaches of space and some will go to the bottom of the ocean. Many of you from one time or another, in the positions of command, or as members of staff, will participate in great decisions which go far beyond the narrow reaches of professional competence.

You gentlemen, therefore, have a most important responsibility, to recognize that your education is just beginning, and to be prepared, in the most difficult period in the life of our country, to play the role that the country hopes and needs and expects from you. You must understand not only this country but other countries. You must know something about strategy and tactics and logistics, but also economics and politics and diplomacy and history. You must know everything you can know about military power, and you must also understand the limits of military power. You must understand that few of the important problems of our time have, in the final analysis, been finally solved by military power alone. When I say that officers today must go far beyond the official curriculum, I say it not because I do not believe in the traditional relationship between the civilian and the military, but you must be more than the servants of national policy. You must be prepared to play a constructive role in the development of national policy, a policy which protects our interests and our security and the peace of the world. Woodrow Wilson reminded your predecessors that you were not serving a government or an administration, but a people. In serving the American people, you represent the American people and the best of the ideals of this free society. Your posture and your performance will provide many people far beyond our shores, who know very little of our country, the only evidence they will ever see as to whether America is truly dedicated to the cause of justice and freedom.

In my inaugural address, I said that each citizen should be concerned not with what his country can do for him, but what he can do for his country. What you have chosen to do for your country, by devoting your life to the service of our country, is the greatest contribution that any man could make. It is easy for you, in a moment of exhilaration today, to say that you freely and gladly dedicate your life to the United States. But the life of service is a contest of your will.

It will be hard at times to face the personal sacrifice and the family inconvenience, to maintain this high resolve, to place the needs of your country above all else. When there is a visible enemy to fight, the tide of patriotism in this country runs strong. But when there is a long, slow struggle, with no immediate visible foe, when you watch your contemporaries indulging the urge for material gain and comfort and personal advancement, your choice will seem hard, and you will recall, I am sure, the lines found in an old sentry box at Gibraltar, "God and the soldier all men adore in time of trouble and no more, for when war is over, and all things righted, God is neglected and the old soldier slighted."

Never forget, however, that the battle for freedom takes many forms. To those who through vigilance and firmness and devotion are the great servants of this country, and let us have no doubt that the United States needs your devoted assistance today.

The answer to those who challenge us so severely in so many parts of the globe lies in our willingness to freely commit ourselves to the maintenance of our country and the things for which it stands.

This ceremony today represents the kind of commitment which you are willing to make. For that reason, I am proud to be here. This Nation salutes you as you commence your service to our country in the hazardous days ahead. And on behalf of all of them, I congratulate you and thank you.

Mr. BROWN. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Speaker, I ask unanimous consent to proceed out of order and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, I wholeheartedly support this resolution pending before the House.

Mr. Speaker, how often are we told by foreign governments not to meddle in their affairs?

"Just give us your money," we are told, "but don't tell us how to spend it."

However, these same foreign nations never hesitate to tell us how to conduct our own affairs. A case in point is the declaration of 25 or 30 so-called nonalined nations, issued in Communist-controlled Belgrade, Yugoslavia, about the same time this House was approving more billions of dollars for the foreign giveaway extravaganza.

Among other things, the declaration stated that the U.S. Navy base at Guantanamo Bay, Cuba, "affects the sovereignty and integrity of Cuba." In other words, what these supposedly neutral nations are telling us is to get out.

I have no doubt that many of these same nations, Communist, neutral or what have you, will be standing in line at the foreign handout window once Congress gives final approval to this year's foreign giveaway appropriation bill.

And with our cash in hand, I have no doubt that they will rush out to issue more declarations denouncing the United States while carefully avoiding any criticism of the Soviet Union.

Are these the uncommitted nations we are counting on to be on the "side of the free," as the gentleman from Massachusetts [Mr. CONTE] claims they will be when the chips are down?

Mr. BROWN. Mr. Speaker, I yield the balance of my time to the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Speaker, I ask unanimous consent to speak out of order, to revise and extend my remarks and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. LAIRD. Mr. Speaker, I rise in support of the Kitchin-Lipscomb resolution, and hope that it will be enacted today.

Mr. Speaker, within the past week the State Department has circulated a pamphlet, entitled "Background Berlin—1961," throughout the United States. This pamphlet contains deliberate misrepresentation of the background on the Berlin situation.

The most glaring example of complete fabrication of the facts is contained on page 5 of the pamphlet and I quote:

> The Western armies could have captured Berlin or at least joined in capturing it. But the supreme allied commander, General Eisenhower, believed that they could be more usefully employed against the major German forces elsewhere. As a result the Soviets captured Berlin, but when Germany surrendered, the Western armies held much more, and the Soviets much less, than the areas assigned to them by the four-power occupation agreement of September 1944.

Mr. Speaker, the records existing in the State Department and in the Department of Defense completely disprove this statement. The decision on not sending American forces into Berlin was made at the highest level and not by the commander in the field. All the State Department has to do is to consult its own records and the records in the Department of Defense. I deplore the attempt of the State Department to play politics over the Berlin situation. I realize that it is most difficult for the State Department to explain how we ever got into the present kind of arrangement with the British, French, and Russians on Berlin immediately after World War II. If it is the desire of the State Department to open up this question to public debate, I am sure that Secretary Rusk and his political party will come out second best. I hope that the Secretary of State does not wish to open up such a public debate at this time. This debate, although it would help my political party, would not be helpful to the country. In order to avoid a public debate on this issue, I have requested the Secretary of State to withdraw this pamphlet from circulation immediately so that the fabrication concerning former President Eisenhower can be immediately corrected.

Mr. Speaker, I have sent the following wire to Dean Rusk today:

Hon. DEAN RUSK,
Secretary of State,
Department of State,
Washington, D.C.

In your recently issued brochure, entitled "Background Berlin—1961," I direct your attention to the first three sentences on page 5 under the heading, "Early Communist Maneuvers." This statement, placing the responsibility on General Eisenhower for not employing U.S. forces in capturing Berlin, is a complete and deliberate misrepresentation of the facts. Material presently available to you and the State Department and also in the Department of Defense completely disproves this statement. A public debate over this issue at this time will not serve the best interests of our country. I respectfully request that your pamphlet, "Background Berlin—1961," be immediately withdrawn from circulation until this flagrant fabrication has been corrected.

Sincerely,

MELVIN R. LAIRD,
Member of Congress.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I am glad to yield to the gentleman from Ohio, the ranking member of the State Department Appropriation Subcommittee.

Mr. BOW. Mr. Speaker, I am amazed at what the gentleman has brought to the attention of the House today. I might say to him that we are going to conference on the State, Justice, and judiciary appropriation bill on Monday. Prior to that time it is my intention to find out how much money has been spent by the Department of State in the printing and circulation of the material to which the gentleman has referred.

Mr. LAIRD. I thank the gentleman from Ohio.

Mr. DEROUNIAN. Mr. Speaker, will the gentleman yield?

Mr. LAIRD. I yield to the gentleman from New York.

Mr. DEROUNIAN. Mr. Speaker, I want to compliment the gentleman on his astuteness and alertness in bringing these facts to the American people. We have heard a lot of derision of Madison Avenue in the previous administration. Here they are out-Madison Avenueing Madison Avenue. It is about time the truth were told. Would not the gentleman agree that in our history, whenever we have had a military debacle it is because the field commanders have been told what to do by people higher up? That is what happened in Korea and that is what happened in Berlin.

Mr. LAIRD. Mr. Speaker, I do feel that it is in the best interest of our Nation for the Department of State not to open up this matter at this time for public debate. I hope they will immediately admit their error and withdraw this pamphlet so the misstatement of fact appearing on page 5 can be immediately corrected.

Mr. DEROUNIAN. Mr. Speaker, I commend the gentleman for his great contribution to the American people.

Mr. BROWN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. DEVINE].

Mr. DEVINE. Mr. Speaker, I should like to speak for a few moments in support of this resolution pending before the House. There has not been much explanation of the resolution; however, I understand the gentleman from North Carolina will explain it more in detail.

I was one of five or six Members from Ohio that introduced similar resolutions, and my bill, H.R. 8262, has the same thing in mind. The people of Ohio are concerned with what they call trading with the enemy. Why should we be sending food or anything else to Communist countries when we know they are sworn enemies dedicated to the overthrow of this country by force and violence?

About 20 Members from both sides of the aisle had a bipartisan meeting with the Secretary of Commerce and the Secretary of State just outside the House Chamber, about 2 weeks ago. We questioned them in detail on why these export licenses were granted. I must say the explanations offered were wholly unsatisfactory.

I would urge the House to adopt unanimously the resolution before the House.

Mr. COLMER. Mr. Speaker, I yield the remainder of the time to the distinguished gentleman from North Carolina [Mr. KITCHIN], one of the able Members of the House and the author of this resolution.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from Florida.

Mr. HALEY. I want to thank the gentleman for bringing this resolution to the attention of the House. I think he has done a fine job. I believe this is a resolution that is long overdue. I support it wholeheartedly, and hope it passes the House by a unanimous vote.

Mr. KITCHIN. I thank the gentleman.

Mr. Speaker, the resolution we have before us has been explained in detail, except that there were certain inquiries by the gentleman from West Virginia in regard to the content of the resolution. I should like to clarify, if the gentleman from West Virginia would restate his question. I might say to the gentleman that if I have anything to do with the committee to be appointed under the resolution, there will be no inquiries with reference to the Trade Agreements Act.

Mr. BAILEY. I want the gentleman to clarify, and I am sure he will be able to do so, whether there is going to be any conflict with a subcommittee set up in the Committee on Education and Labor which is presently studying the effect on employment in this country of exports and imports under our international trade agreements. In other words, can the gentleman tell us whether this is aimed at something altogether different from what that subcommittee is doing?

Mr. KITCHIN. I can answer the gentleman categorically "No, it will not conflict with that subcommittee." The purpose of this committee, if I have anything to do with it, will be to deal only with the security of the United States of America. We do not intend to get into the economic and social aspects of the trade agreements or trade between nation and nation, either with this country or nations we are dealing with in their trade with other countries, except as it pertains to the security of the United States of America. That is what this investigation is pointed directly at and will be confined to.

Mr. BAILEY. That would in a way affect the question of strategic exports and imports.

Mr. KITCHIN. If it got to the strategic imports into the United States I do not know how that would affect it, but if it did affect the security of the United States it would be studied and embraced in the report filed after the study is made.

Mr. BAILEY. I thank the gentleman.

Mr. KITCHIN. I might also add that there is a reference on page 3 of the resolution, and I quote: "and other discussions or agreements entered into by the United States—such as the coordinating committee (COCOM) discussions and agreements—which affect or relate to the control of trade between the United States and foreign countries."

There again the inquiry will be confined to administrative matters affecting security, the interpretation as to what is a strategic material, how closely related with war materials that particular element might be. It will have nothing to do with going into economics or stepping on the toes of any other committee inquiring into trade agreements or the extension of tariff agreements or anything of that nature.

Mr. BAILEY. Again I thank the gentleman from North Carolina.

Mr. KITCHIN. Much has been said with reference to the necessity for the passage of House Resolution 403. I take no sole ownership in the authorship of this resolution. I have been in collaboration with my good friends on both

sides of the aisle in an effort to get together a committee study for the purpose of having someway to clarify a misinterpretation or possibly an inaccurate representation as to what is going on about allowing licenses to exporters in this country to deal with Communist countries in the so-called unfree world. Illustrations have been cited here and very ably so as to what has been transpiring in the past with reference to some of the things we certainly do not understand.

I want to make reference to the so-called Battle Act, if I may be allowed a moment to do so to point out the provisions of the Battle Act for those who are not too familiar with it.

The first paragraph of the Battle Act, after going into the sense of the Congress, says it declares it to be "the purpose of the United States to apply an embargo on shipment of arms, ammunition and implements of war, atomic energy materials, petroleum, transportation materials of strategic value * * *" and that goes right straight to the point the gentleman made who preceded me with reference to the shipping of locomotives to Bulgaria and the subsequent answer from the Department of Defense that in the long run that would certainly enhance the war effort of Bulgaria. But to continue, the Battle Act says, "and items of primary strategic significant use in the production of arms, ammunition, and implements of war to any nation or combination of nations threatening the security of the United States including the Union of Soviet Socialist Republics and all countries under its domination." Nothing could be clearer than the statement contained in the Battle Act with reference to what constitutes that type of material.

Yet, we have heard pointed out on the floor today that we are shipping ball bearings and ball bearing machinery to the Soviet Union and shipping synthetic rubber to the extent of millions of dollars worth to the Soviet Union. No one can be so naive as to think that ball bearings and machine tools that bore automatically many cylinders to put in V–8 engines to be used in automotive equipment and synthetic rubber are not going to enhance the war effort of the Soviet Union. We are allowing to be shipped aircraft ground and maintenance equipment and electronic equipment to Czechoslovakia. We had two boatloads of scrap iron departing from New Orleans and Houston last week carrying several hundred thousand dollars worth of scrap iron to Yugoslavia.

If I had the time, I would make references to the fact that some exporters in this country have been denied licenses because it was found that shipments of materials that had been licensed had been transshipped after receipt by the countries such as Yugoslavia and Czechoslovakia into other countries definitely in the bowels of the Sino-Soviet bloc. These things happen frequently. The trading with the enemy on items that had been mentioned here today does not make sense to those of us who want to make a study of this and come up with recommendations to this Congress. Such recommendations may be a complete embargo or legislation to implement the enforcement of the Export Control Act and specifically the technical aspects of the Battle Act. We will also inquire into the interpretation of what constitutes strategic material and who, and at what departmental level policy and decisions are made.

Mr. WHITENER. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from North Carolina.

Mr. WHITENER. I would like at the outset to thank the gentleman, my colleague from North Carolina, for his outstanding work in bringing this resolution to the front for the consideration of the House of Representatives. I think that is characteristic of the diligence of the gentleman in preserving our Nation and in preserving those things we know to be worthy of preservation.

I am wondering, however, on reading the resolution, getting into the practical operation of the committee, where we find language on page 3 to the effect that the select committee proposed to be formed would have the right to subpena and to require the production of books, correspondence, memorandums, and so forth. What would be the source or resting place of such items that would be subpenaed? Would they be from private business organizations, the Government or what?

Mr. KITCHIN. I can only answer the gentleman by saying that this language from line 7 down through the end of the resolution is the regular form of select committee resolutions. And, if there are necessary documents, papers, books, and records to come before the committee from even private exporters under these licensing provisions, I think we would want that authority if it should become necessary.

Mr. WHITENER. I raise this question in order to express my own hope that if and when the select committee commences its deliberations, it would not be found that the executive department would use the executive privilege to prevent the committee having full access to any records on these important matters which may be now resting in the various executive departments.

Mr. KITCHIN. I will answer that by saying that the Secretary of Commerce told me personally that the records of the Department of Commerce and the Export Division of the Department of Commerce are open and available. I do not anticipate any difficulty there.

Mr. WHITENER. I am sure that those of us who know our distinguished Secretary of Commerce know that that would be typical of his reaction where the security of our Nation or any other worthwhile purpose was involved.

Mr. KITCHIN. Before I yield any more, I would like to clarify an impression that probably has been gained by some who have been thinking about this particular resolution as we have been proceeding here today.

The purpose of this resolution has been explained. I anticipate that if I have anything to do with the committee, the determination of policy in the future will be the sole concern, much more so than elaborating upon the mistakes that have been made in the past. The mistakes that have been made in the past have brought into focus this particular necessity. It cannot be overlooked. The people of this country have been told many stories, editorially and otherwise, throughout the entire breadth and width of the United States. The correction of those impressions, whether they have been erroneous or not, should be another function of this committee, to bring to the attention of the American people what is being done now, how it is anticipated that they will be corrected, and try to assist in every way we possibly can this administration and those having the awesome duty of trying to make these international decisions; in trying to come up with something that is at least rational and understandable to the people of this country of ours, and which may serve the best interest of our Nation and the security of the United States.

Mr. LIPSCOMB. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from California.

Mr. LIPSCOMB. I want to commend the gentleman for introducing this legislation. I feel confident, as he has stated during this debate, that if he has anything to do with the procedures which are to be followed, we are going to have a meaningful investigation of this act and that there will be recommendations to the Congress that will allow us to get legislation on the books that will be of great value for the welfare and the security of our Nation and the free world. I commend the gentleman for following through with this resolution.

Mr. KITCHIN. I thank the gentleman very much.

Mr. FLYNT. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from Georgia.

Mr. FLYNT. I would like to commend the gentleman from North Carolina for his diligence in bringing this resolution to the floor of the House. I would like to associate myself with the remarks that he has just made. I feel that the investigation which this resolution envisions is one which is long overdue.

The result of this investigation which will be carried on by the committee, authorized by its adoption and passage, is one that could very well determine the security of the United States of America. Again I commend the gentleman for his action in bringing this resolution to the floor of the House.

Mr. KITCHIN. I thank the gentleman very much.

Mr. DORN. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from South Carolina.

Mr. DORN. Mr. Speaker, I, too, would like to commend the distinguished and able gentleman from North Carolina for bringing this timely resolution to the floor of the House. I hope there will not be a single vote against it. It should be adopted.

Mr. KITCHIN. I thank the gentleman very much.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I would like to join my colleagues in commending the able gentleman from North Carolina [Mr. KITCHIN] for the authorship of H. Res. 403. I think that this is a most worthwhile undertaking, and certainly I hope that the committee will go into the entire subject matter covered by this resolution thoroughly. I think that you have some points in here on which congressional attention has long been neglected, and I think the gentleman has performed a real public service in making possible the consideration of this resolution.

Mr. KITCHIN. I thank the gentleman.

Mr. MATHIAS. Mr. Speaker, on August 30, 1961, I said in a letter to the Acting Secretary of Commerce—CONGRESSIONAL RECORD August 30, 1961, page 17633—that there seemed to be no foreign policy on the subject of the exports to Communist countries. To date I have received no reply contradicting that conclusion.

An extensive correspondence with the Department of Commerce relative to the sale of subsidized agricultural products to Russia has revealed no consistent export policy, no basic principles nor any evidence of thinking in depth which might lead to such policy or principles. Under the circumstances, I think that the study proposed by this resolution is necessary and I support it as essential in this phase of our struggle with the international Communist conspiracy.

Mr. BYRNES of Wisconsin. Mr. Speaker, it is imperative that this House pass House Resolution 403 and authorize an investigation by a committee of this House of the trade currently being carried on with Communist countries. The investigation of this matter is long overdue. As far as I am concerned, a change in policy is also long overdue, and it is my hope that an investigation of this nature will produce a change in policy. It is preposterous that our Government should continue to permit the shipment of goods and information into Communist countries which cannot help but strengthen the Communist economy and be of material aid to their military might.

I would like to compliment my colleague from California [Mr. LIPSCOMB] for the great amount of work that he has done on this subject and for his persistence in pursuing the objectives of this resolution. He deserves great credit for the fact that this resolution is before us today.

When I say that action to investigate this matter is long overdue, I call your attention to the fact that on July 18 in a formal statement of policy the House Republican policy committee called for enactment of House Resolution 170 introduced by the gentleman from California [Mr. LIPSCOMB] which resolution is similar to the resolution now before us. As part of my remarks, I include the statement of policy adopted by the House Republican policy committee on July 18.

STATEMENT OF POLICY

The House Republican Policy Committee views with extreme concern the lowering of bars on trade with Soviet Russia and other Iron Curtain countries, and urge enactment of House Resolution 170, now pending before the House Rules Committee, which would direct and authorize a full and complete study of the administration and enforcement of the Export Control Act of 1949 and its relationship to the Battle Act, and the Trading with the Enemy Act.

1. The Commerce Department earlier this year reissued an export license authorizing shipment of precision ball bearing manufacturing grinding machines to the Soviet Union. This action was reversed only after the exertion of the strongest congressional and public protest.

2. In late June the Commerce Department lowered the bars on agricultural trade with Russia and its satellite nations by authorizing sales of U.S. Government-owned farm surpluses and commodities subsidized for export. The next day, Soviet Premier Khrushchev admitted that food shortages were sweeping Russia to an extent that horse meat had become a near-staple food.

3. The Department of Defense recently reversed its firm position on sales of strategic American precision tools and automatic machinery to the Soviet Union only 90 days after the Pentagon went on record with a statement to the effect that this over $6 million worth of equipment might help the Soviets wage war.

4. Recent shipments of scrap metal from Michigan alone to Yugoslavia reached a volume of 6,250 tons in 1 week, thus helping Tito's military and economic warfare capabilities.

5. A need exists for determining which articles, supplies and technical data shall be controlled, particularly to the foreign countries comprising the Sino-Soviet bloc. It is a disturbing prospect when our administration weakens rather than strengthens the will of Congress and the security of the American people and the free world by such rash actions.

6. In this time of tension and reappraisal of our defense posture, accompanied by enormous expense to meet the Soviet threat, we must exercise extreme care to avoid helping to contribute to Soviet war capabilities. Economic gain such as might accrue from the sale of machines and agricultural commodities is of little significance when weighed against our national security. Congress must look into this matter thoroughly so that we will not aid the Soviets to achieve their goal of world domination.

Mr. RIEHLMAN. Mr. Speaker, in view of the transactions which have come to light in recent weeks revealing some startling aspects of our trade relationships with the Communist countries, I think the very least we can do is subject these relationships to a hard and serious evaluation by the Congress. I therefore urge passage of House Resolution 403.

A number of interesting transactions have been brought to light today. All bear repeating. Here are but a few:

During April, May, and June of this year American exporters obtained licenses to ship ball bearings, synthetic rubber, vehicles, and vehicle parts to Czechoslovakia; cold-rolled carbon steel sheets to East Germany; ball bearings, electric motors, vehicles and parts, tires, and power transmission devices to Rumania; and carbon black, synthetic rubber, radiation equipment, ball and roller bearings, compressors, construction equipment, electric motors, vehicle parts, piston engines, tires, trucks, electronics equipment, and carbon steel condenser tubing to the Soviet Union.

On August 3 and 4 we licensed for export to the Soviet Union machine cutting tools and parts, pipe valves, power transmission systems, ball bearings, automotive replacement parts, and electrical machinery parts; on August 7, railway transportation equipment to Bulgaria; August 8, iron and steel products to the Soviet Union; August 9, synthetic rubber to Hungary, Czechoslovakia, Rumania, Poland, and the Soviet Union. The list goes on and on.

Although exports to Communist countries have tapered off in recent days, cause for concern is still present. I feel that too much is at stake to continue to allow the present degree of flexibility in the administration of this sensitive area in our export laws. There is certainly ample room to take strong issue with the administrators of our export laws over the strategic value of most of the items that I have mentioned. The Congress needs to establish more stringent and effective guidelines for the application of security export controls. I think this resolution will do much by way of providing the necessary guidance.

Of particular importance in this resolution is the directive that the committee shall study the interrelationship between the Export Control Act, the Battle Act and the Trading With the Enemy Act. A definitive study of this interrelationship is long overdue.

As I have stated, I think it is our duty to establish this committee and go into the subject of our trade relationships with the Communist countries thoroughly. Events of recent weeks have given rise to much concern over our trade policies. The committee established by this resolution will do a great deal to alleviate that concern.

Mr. BROOMFIELD. Mr. Speaker, I rise in support of House Resolution 403 to authorize an investigation into the administration, operation, and enforcement of the Export Control Act of 1949 with special emphasis on our trade policies with the Communist bloc.

I am happy to have sponsored a similar resolution, as I am convinced that a close, careful, thorough look at the exports we have been sending behind the Iron Curtain is of great importance to us at this time.

The crux of communism might very well be termed economics. We in Congress have economic weapons short of war we can use against Khrushchev if we will but use them.

We have import and export controls, for instance. We have trade sanctions. We can persuade our friends around the world to invoke economic sanctions through our own example.

We can demonstrate firmly, decisively, and convincingly that our brave words are not just words; that our words have substance, scope, and resolution behind them. We can translate these words into policies which will hurt Russia and her satellites, just as Russia is attempting to hurt us through its barbed wire and brick blockades, its sealing off of East Berlin behind the deadly curtain

of monotony and futility, and its suicidal policy of nuclear blackmail.

So far, our Federal Government has shown a marked reluctance to employ economic sanctions, the weapons of deeds as well as words, against the threats of Khrushchev. We have moved extra troops into West Berlin, to be sure. We have sent strongly worded diplomatic notes to the Kremlin.

But if we are to convince Khrushchev of our resolution, we must speak louder than with words. We must speak with actions which will leave no doubt in the minds of anyone that the people of the United States are fed up with being pushed around, disgusted with the lies, the threats, the complete disregard for human beings which has been demonstrated to the world by the leaders of the Kremlin.

How can we demonstrate our determination and our resolution, short of an armed conflict? We can do it with economic sanctions, with boycotts and with actions on the economic front which will touch a tender spot in every Communist heart.

We have had far too many indications from the various departments in this administration that quite often the right hand does not know what the left hand is doing as far as this economic warfare is concerned.

At the height of our crisis over Berlin, at a time when our President was asking the citizens of our Nation to stand firm, to be ready to sacrifice during the dangerous days ahead, at a time when Khrushchev was indulging in his great blustering campaign, we find the Commerce Department issuing an order to permit the sale of subsidized farm goods to the Soviet Union, to Czechoslovakia, to Rumania, to Hungary. The American taxpayer was asked to pay some 65 cents for every bushel of wheat sent to Russia.

The reason for this Commerce Department directive was because someone, somewhere, in one of the various departments of our Federal Government, decided that food is not of strategic importance to the Russians, that Napoleon's sage advice that an army travels on its stomach was somehow outdated by a new supersoldier who never gets hungry.

If the officials of our State Department, our Commerce Department, and our Agriculture Department had only thought for 1 minute of the implications of this order, they would never have issued it.

Let us suppose that the ultimate had happened. Let us suppose that the Russians decided to attack us with nuclear weapons. Do you suppose for 1 minute that they would launch an attack without at least a year's supply of food on hand for their survivors from our own retaliatory forces?

We know that fallout and radiation would affect almost every kernel of standing grain in the Soviet Union, just as it would our own. We know that fallout would kill cattle, sheep and fowl, or make them inedible.

So what does Russia need to launch a war? She needs missiles. She needs atomic and hydrogen bombs. And she needs food, preferably grains and other foods which can be stored for long periods underground or in covered silos where they will not be affected seriously by fallout.

As far as we have been able to determine, Russia is not wanting in missiles or hydrogen warheads. But Russia is lacking in adequate stores of food because the great failure of the Communist system has been the failure to produce enough to feed its people. In a touch of generosity which perhaps knows no precedent since the sale of our scrap iron to the Japanese so that bullets and bombs could be made to blast us at Pearl Harbor, our Federal Government wants the American taxpayer to foot part of the bill for sending food behind the Iron Curtain.

Congress, in its wisdom, amended the farm bill to express its displeasure over this turn of events. But so far, the Commerce Department has not rescinded its directive, although our Secretary of Commerce has taken what has been called a "somewhat harder" line in the approval of export licenses.

Further, our Secretary of Commerce took issue with what he labeled a "misleading statement" which said that export licensing for Iron Curtain countries jumped 800 percent in the 3 weeks following President Kennedy's nationwide speech warning of the dangers we face from Soviet aggression in Berlin. He said that 800 percent was not the correct figure. The increase was only 400 percent, which I am sure most Members of Congress will agree is about 400 percent too high.

It seems to me that we have completely turned around the words of our former great President, Theodore Roosevelt. Instead of speaking softly and carrying a big stick, we are now speaking loudly and handing out palliatives to our enemies from the pockets of our taxpayers. We need complete diplomacy, backed up by action. This is no parlor game. It is for keeps.

Adoption of this resolution can well give us this action. It can lead to the economic weapons we need to keep the Kremlin off balance, to regain some of the offensive we have lost in recent months. If communism preaches the doctrine that the all-powerful forces of economics are on their side, let us meet this challenge and defeat it. Let us drown the Communists in their own economic pattern which is strangling the freedom and growth of its own people. Let us show Khrushchev that Congress, at least, is aware of the extent of his challenge and knows how to meet it.

Let us modernize and streamline our economic weapons so that they can better help our friends and punish our enemies who are dedicated to our destruction.

Congress has the power under this resolution to plan this offensive, to make the recommendations necessary to our survival, and then to act on them.

So far, the war being waged against us has been one of few bullets and bombs, and many words, coupled with economic actions designed to embarrass us and knock us off balance.

Let us stop sending ball bearings, machinery, cutting tools, and aircraft equipment behind the Iron Curtain. Let us realize that food is a weapon as important as guns or bombs. Let us face up to the battle before us and win it.

Mr. COLMER. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken, and on a division (demanded by Mr. GROSS) there were—ayes 90, noes 1.

So the resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. COLMER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on this resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On September 1, 1961:

H.R. 7809. An act to improve the active duty promotion opportunity of Air Force officers from the grade of major to the grade of lieutenant colonel.

On September 5, 1961:

H.R. 8922. An act to amend the Small Business Act to increase by $20 million the amount available for regular business loans thereunder; and

H.J. Res. 438. Joint resolution to amend the Securities Exchange Act of 1934 so as to authorize and direct the Securities and Exchange Commission to conduct a study and investigation of the adequacy, for the protection of investors, of the rules of national securities exchanges and national securities associations.

On September 6, 1961:

H.R. 29. An act to amend section 216(b) of the Merchant Marine Act, 1936, as amended, to permit the appointment of U.S. nationals to the Merchant Marine Academy;

H.R. 44. An act to authorize the appropriation of $150,000 for use toward the construction of a U.S. Pacific War Memorial;

H.R. 1022. An act to amend the Agricultural Adjustment Act of 1938 to provide for lease and transfer of tobacco acreage allotments;

H.R. 1794. An act to provide for the conveyance of certain real property of the United States situated in Hawaii to the State of Hawaii;

H.R. 2898. An act to authorize the Secretary of the Interior to sell reserved phosphate interests of the United States in lands located in the State of Florida to the record owners of the surface thereof;

H.R. 3526. An act to authorize the Secretary of the Interior to sell reserved phosphate interests of the United States in lands located in the State of Florida to the record owners of the surface thereof;

H.R. 3596. An act to direct the Secretary of the Interior to convey certain lands to Purvis C. Vickers, Robert I. Vickers, and Joseph M. Vickers, a copartnership doing business as Vickers Bros.;

H.R. 5179. An act for the relief of the U.S. Display Corp.;

H.R. 5235. An act to authorize the Confederated Tribes of the Warm Springs Reservation of Oregon to acquire land within the boundaries of their reservation;

H.R. 5964. An act to authorize the use of funds arising from a judgment in favor of the Potawatomi Nation of Indians, and for other purposes;

H.R. 6102. An act to authorize the Secretary of the Interior to sell reserved phosphate interests of the United States in lands located in Highlands County in the State of Florida to the record owners of the surface thereof;

H.R. 6244. An act for the relief of certain members and former members of the uniformed services erroneously in receipt of family separation allowances;

H.R. 6453. An act for the relief of Earl Gupton; and

H.R. 8599. An act to amend various sections of the Atomic Energy Act of 1954, as amended, and the Euratom Cooperation Act of 1958, and for other purposes.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. McGown, one of its clerks, announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 8762. An act to amend the Small Business Act to increase the amount available for regular business loans thereunder.

The message also announced that the Senate insists upon its amendment to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. ROBERTSON, Mr. SPARKMAN, Mr. DOUGLAS, Mr. PROXMIRE, Mr. LONG of Missouri, Mrs. NEUBERGER, Mr. BEALL, Mr. BENNETT, Mr. JAVITS, and Mr. TOWER to be the conferees on the part of the Senate.

RESIGNATION OF THE HONORABLE THADDEUS M. MACHROWICZ AS A MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication which was read by the Clerk:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., September 6, 1961.

Hon. SAM RAYBURN,
Speaker of the House,
House of Representatives,
Washington, D.C.

MY DEAR MR. SPEAKER: I beg leave to inform you that I have this day transmitted to the Governor of the State of Michigan my resignation as a Representative in the Congress of the United States from the First District of Michigan, effective September 18, 1961.

Yours respectfully,
THADDEUS M. MACHROWICZ,
Member of Congress.

AMENDING COAST AND GEODETIC SURVEY COMMISSIONED OFFICERS ACT OF 1948

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 685) to amend the Coast and Geodetic Survey Commissioned Officers Act of 1948, as amended, and for other purposes, with House amendments thereto, and that the House recede from its amendments.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

A motion to reconsider was laid on the table.

AMENDMENTS TO MERCHANT MARINE ACT OF 1936

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6309) to amend title VI of the Merchant Marine Act, 1936, as amended, in order to increase certain limitations in payments on account of operating-differential subsidy under such title, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert "That the third sentence in the first paragraph of section 603(c) of such Act, as amended (46 U.S.C. 1173), is amended to read as follows: 'Effective on and after July 1, 1962, such payments on account shall in no case exceed 90 per centum of the amount estimated to have accrued on account of such subsidy, except that, with respect to that part of the subsidy relating to any particular voyage, an additional 5 per centum may be paid to the contractor after such contractor's audit of the voyage account for such voyage has been completed and the Secretary of Commerce has verified the correctness of the same.'"

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

AMENDMENTS TO SECTION 607(b) OF THE MERCHANT MARINE ACT, 1936

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6974) to amend section 607(b) of the Merchant Marine Act, 1936, as amended, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert: "That the last sentence of section 607(b) of the Merchant Marine Act, 1936 (46 U.S.C. 1177(b)) is amended by inserting before the period at the end thereof a comma and the following: 'and may also pay from such fund, with such consent and upon terms and conditions which the Secretary of Commerce shall by regulation prescribe to give priority to the foregoing purposes of the fund (and with respect to any transfer of funds from the special reserve fund, to give priority to the purposes of that fund) and to carry out the purposes of this Act, (A) amounts contributed toward research, development, and design expenses incident to new and advanced ship design machinery and equipment', and

"'(B) Amounts (1) for the purchase of cargo containers, delivered after June 30, 1959, of a type approved by the Administrator for use in connection with any of the contractor's subsidized vessels, (2) for the payment of the principal of any indebtedness incurred for such containers, or (3) to reimburse the contractor's general funds for expenditures for such purchases or payments. Such cargo containers to the extent paid for out of the capital reserve fund shall be treated as vessels for the purpose of deposits and withdrawals from the capital reserve fund under this section 607, and the regulations and closing agreements relating thereto, except that the depreciation on such cargo containers shall be based upon the life expectancy used for such containers in the determination of "net earnings" under paragraph (d)(1) of this section 607.'"

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

CONSTRUCTION AND MAINTENANCE OF AMERICAN-FLAG VESSELS BUILT IN AMERICAN SHIPYARDS

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 6732) an act to amend the Merchant Marine Act, 1936, as amended, to encourage the construction and maintenance of American-flag vessels built in American shipyards, with Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert: "That section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241), is hereby amended by inserting at the end thereof the following: 'For purposes of this section, the term "privately owned United States-flag commercial vessels" shall not be deemed to include any vessel which, subsequent to the date of enactment of this amendment, shall have been either (a) built outside the United States, (b) rebuilt outside the United States, or (c) documented under any foreign registry, until such vessel shall have been documented under the laws of the United States for a period of three years: *Provided, however,* That the provisions of this amendment shall not apply where, (1) prior to the enactment of this amendment, the owner of a vessel, or contractor for the purchase of a vessel, originally constructed in the United States and rebuilt abroad or contracted to be rebuilt abroad, has notified the Maritime Administration in writing of its intent to document such vessel under United States registration, and such vessel is so documented on its first arrival at a United States port not later than one year subsequent to the date of the enactment of this amendment, or (2) where, prior to the enactment of this amendment, the owner of a vessel under United States registry has made a contract for the rebuilding abroad of such vessel and has notified the Maritime Administration of such contract, and such rebuilding is completed and such vessel is thereafter documented under United States registry on its first arrival at a United States port not later than one year subsequent to the date of the enactment of this amendment.'"

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

ROLLCALL VOTES

Mr. ALBERT. Mr. Speaker, I renew my request that any rollcall votes on final passage, motions to recommit or amendments in order on Monday and Tuesday next may be put over until Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SUBPENA AND INVESTIGATIVE AUTHORITY FOR THE COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. SMITH of Virginia. Mr. Speaker, I call up House Resolution 399, by direction of the Committee on Rules, and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the Committee on the District of Columbia, acting as a whole or by subcommittee, is authorized and directed to conduct a full and complete investigation and study of the following:

(1) The organization, management, operation, and administration of any department or agency of the government of the District of Columbia; and

(2) The organization, management, operation, and administration of any independent agency or instrumentality of government operating solely in the District of Columbia.

For the purpose of carrying out this resolution the committee or subcommittee is authorized to sit and act during the present Congress at such times and places within the United States, including any Commonwealth or possession thereof, whether the House is in session, has recessed, or has adjourned, to hold such hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents, as it deems necessary; except that neither the committee nor any subcommittee thereof may sit while the House is meeting unless special leave to sit shall have been obtained from the House. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is made when the House is not in session shall be filed with the Clerk of the House.

Mr. SMITH of Virginia. Mr. Speaker, this is the usual resolution authorizing the Committee on the District of Columbia to conduct investigations and to subpena witnesses.

Mr. SMITH of California. Mr. Speaker, we on this side agree with the resolution.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

MILITARY CONSTRUCTION APPROPRIATION BILL, 1962

Mr. SHEPPARD. Mr. Speaker, I ask unanimous consent that the conferees on the bill, H.R. 8302, the Military Construction Appropriation Act of 1962, may have until midnight tonight to file a conference report.

The SPEAKER pro tempore (Mr. ABERNETHY). Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL ANNOUNCEMENT

Mr. SHEPPARD. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SHEPPARD. Mr. Speaker, on rollcall No. 188 having to do with H.R. 9000 under date of September 6, I was engaged on official business in a conference. Had I been present I would have voted "yea."

PEACE CORPS

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, in my 13 years in the Congress, no proposal coming before this body is wrought with more potential danger to the prestige of the United States and freedom around the world than the establishment of a Peace Corps as provided for in H.R. 7500. The same applies to the Peace Corps as presently being established by Executive order. This proposal would send novices and amateurs to perform the most delicate human relationship known to man. A Peace Corps man sent to perform any task in a so-called undeveloped country must be thoroughly familiar with the traditions, superstitions, religion, history, language, culture, philosophy, politics, and psychology of the people.

Likewise, the Peace Corps man should be a thorough student of the history; Constitution; culture; politics; government, local, State, and National; economics; and so forth, of the United States. He not only should be familiar with U.S. history and representative government, but must be able to explain effectively our system as compared to others. In this age of salesmanship and public relations, he should be an expert in this field and must have a thorough understanding of human nature. This is a job for professionals with a minimum, at least, of 5 years of preparation and study, then a period of apprenticeship under the watchful guidance of an experienced professional.

Before our extension service representatives go out into the field in a highly developed country like our own, they have years of thorough training and then work years under experienced extension leaders. Likewise, our missionaries have years of thorough training and indoctrination.

Mr. Speaker, we have too many organizations now operating in foreign nations. To make our present program effective, we need to consolidate and coordinate our efforts rather than create new organizations.

Mr. Speaker, our people going into the Peace Corps are to be commended for their patriotism, enthusiasm, and idealism. However, the cold war is a ruthless death struggle with a highly skilled professional enemy. We cannot jeopardize the prestige of the United States with inadequately trained and inadequately indoctrinated personnel. The times require professionals rather than idealistic novices. The stakes are too high.

Mr. Speaker, we must reject this legislation entirely as duplication of existing effort and a feeble, ill-conceived attempt of novices to halt the onward march of professional Communist agitators.

Mr. Speaker, if this bill passes, the Peace Corps will expand into a gigantic, international bureaucracy bleeding the U.S. taxpayers of hundreds of millions of dollars annually. It will destroy our remaining prestige abroad and accelerate the onward march of socialism throughout the world.

EXTENSION OF MULTIPLE USE PRINCIPLES ON PUBLIC LANDS

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. ASPINALL. Mr. Speaker, along with three of my colleagues today I have introduced proposed legislation that will extend to the public lands under the jurisdiction of the Secretary of the Interior, through the Bureau of Land Management, the principles of multiple use and sustained yield management established by Congress as the policy for the administration of national forest lands under the act of June 12, 1960 (74 Stat. 215).

Members will recall that last year I expressed some apprehension that the adoption of a multiple use principle concerning national forest lands might infer that other Federal lands should be managed under a policy of "single use." Shortly after the present administration took office the President in his February

23, 1961, message on natural resources, made it clear that it was the Executive's program to manage the vacant, unappropriated or unreserved public domain lands under a system referred to as "balanced usage."

Those of us who seek to resolve conflicting interests have been advocating a balanced or a multiple-use policy. I think that Congress should adopt such a policy and assure that new administrators will not introduce new restrictions without congressional sanction.

The proposed legislation that we have introduced would express the congressional policy of applying the multiple-use and sustained-yield management principles adopted in connection with the national forests to be extended to public lands under the jurisdiction of the Bureau of Land Management. The bill for the first time also gives recognition to these lands as a "national land reserve." This terminology has come into use since the President's message on natural resources wherein he referred to the 477 million acres of vacant, unappropriated and unreserved public domain lands as "a vital national reserve that should be devoted to productive use now and maintained for future generations."

I hope, Mr. Speaker, that we will obtain views and comments of interested agencies and parties on this proposed legislation before Congress reconvenes in January and that we will be able to act on this legislation early in the 2d session of the 87th Congress.

A VIEW OF U.S. POLICY IN AFRICA

Mr. REUSS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Speaker, Dr. Arnold Rivkin, of the Centre for International Studies, Massachusetts Institute of Technology, recently gave an address at the University of London on "U.S. Policy in Africa."

Dr. Rivkin is research associate in political economy and director of the African economic and political development project at the Centre for International Studies. He has acted as consultant to the International Cooperation Administration, the National Academy of Sciences, the Ford Foundation, and the President's Committee To Study the U.S. Military Assistance Program. Before joining the Massachusetts Institute of Technology, Dr. Rivkin was associated with ICA, and as assistant general counsel of the European headquarters of the Marshall plan in Paris was responsible for the legal aspects of U.S. aid flowing to Africa. Over the past 10 years, Dr. Rivkin has visited most African countries.

Because Dr. Rivkin's address is one of the clearest delineations of our African policy, I wish to include it:

In order to put into proper perspective the developing policies of the United States toward Africa, it is necessary to consider the nature of the national interest underlying all U.S. policy toward new states and the underdeveloped world generally. Once this is done the nature, the interrelationship, and the likely direction of evolving U.S. policies in Africa becomes discernible.

However, before proceeding to a statement of what I conceive to be the U.S. national interest, I think it might be useful to offer one general observation by way of introduction. The U.S. interest in facilitating the orderly achievement by dependent territories of political independence and self-sustaining economic growth derives from two strands which are and have long been intertwined in American thinking. The first strand, the concept of the U.S. national interest with respect to the large galaxy of new states and the underdeveloped world generally, coincides in broad outline with the national interests of these new states and the underdeveloped countries of the world. It is discussed at length below. The second strand is philosophical, deriving from American ethical values of the rights of man and the comity of nations which first found expression in the Declaration of Independence in 1776 and time and again thereafter in American state papers. In this century they have found expression in Woodrow Wilson's 14 points, in Franklin Roosevelt's four freedoms, in Harry Truman's Marshall plan and point 4 program, and again in President Kennedy's inaugural address: "To those people in the huts and villages of half the globe struggling to break the bonds of mass misery, we pledge our best efforts to help them help themselves for whatever period is required—not because the Communists may be doing it, not because we seek their votes, but because it is right."

Even more recently, in supporting the resolution before the Security Council calling for a U.N. investigation of conditions in Angola, the American representative, Adlai Stevenson, quoted with quiet eloquence the memorable words of Thomas Jefferson:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain inalienable rights."

The Liberian delegate to the Security Council said Ambassador Stevenson's words would reverberate throughout Africa and through the world. In fact, the words and the ideas they convey have been reverberating throughout the world since their birth in the American Revolution of 1776. Ambassador Stevenson speaking for the new American administration has given notice to the world in the debate on the Angola resolution that the United States intends to adhere to its philosophical heritage with renewed vigor in international affairs as well as at home.

I

The U.S. national interest in the underdeveloped areas of the world is viewed as tripartite and triangular.

First, it is clearly in the U.S. national interest to facilitate the peaceful evolution of independent states with the capacity for orderly political, economic, and social growth without recourse to violence and with a potential for developing viable economics and free institutions. Every independent state that emerges in this image or tends to approximate this image strengthens the kind of world environment in which open and democratic societies can flourish. This concept of the U.S. national interest naturally centers attention on Africa and on the policies which the United States has been evolving with regard to the development of new states in Africa.

Second, it is clearly in the U.S. national interest to facilitate orderly, peaceful and rational accommodation of the developing interests and aspirations of the underdeveloped areas of the world with the changing interests and aspirations of the relevant European metropolitan countries (e.g., the transformation of the British and French Empires respectively into the Commonwealth and Community) and with the developing interests and aspirations of the free world generally. Such orderly and rational accommodation would serve several purposes. It would prevent strife and violence in areas still evolving toward self-government and independence (e.g., the Federation of Rhodesia and Nyasaland) where conflict could endanger the peace and stability of other large areas. It would minimize the aftermath of colonialism and its attendant bitterness and recrimination in areas which achieve or have achieved independence in the postwar period (e.g., Indonesia, Morocco, and Guinea). In situations where change, too long frustrated, threatens to break all barriers in an uncontrolled rush (e.g., the situation building up in Angola and Mozambique), it would prevent the recurrence of Congo-type crises. It would preserve and stimulate existing economic relationships which are beneficial to the underdeveloped areas as well as to the former metropoles and which could be increasingly so in conjunction with the development of new complementary relationships with other world states.

Third, there is a long established U.S. national interest in a politically independent and economically expanding Western Europe (as the third side to the United States, Western Europe, and underdeveloped world triangle). This interest requires that every effort be made to prevent Algeria-type situations which not only impose a great economic drain on the metropole but also deflect its energies and resources from important internal political and economic tasks and other free world responsibilities, e.g., the provision of increasing economic and technical assistance to the underdeveloped areas. It embraces the need not only to preserve such existing economic relations as are mutually beneficial to Western Europe and the underdeveloped world but also to create and expand trade and investment opportunities of mutual value. The United States, Western Europe, and the underdeveloped world all stand to benefit from mutually satisfactory economic relations between Europe and the new countries. As the three sides of a series of trade, aid, investment, and other triangular relationships, all three will benefit directly from the peaceful political and economic development of large parts of the globe.

II

What then does this view of the U.S. national interest underlying U.S. policy toward underdeveloped areas mean in specific terms of U.S. policy toward Africa?

(1) The emergence of independent states: The United States has welcomed the increasing accession of African territories to political independence; but until quite recently it has viewed the political and economic development of the African territories as primarily a matter for the European metropoles and the territories, or in trust areas for the United Nations and the territories. I believe that now and in the future the United States will attach greater priority and sense of urgency to the achievement of rational accommodation between metropoles and territories in order to insure orderly accession of colonial areas to independence. In practice this may mean for the first time intercession by the United States with the metropoles in an attempt to resolve outstanding colonial relationships in a harmonious and peaceful way within a broad multilateral context of free world interest in Africa instead of relying on solutions achieved largely on a bilateral basis between the metropole and the territory. In fact, the United States has already taken a major step in this direction in supporting the resolution

in the Security Council, already alluded to, calling for an inquiry into conditions prevailing in Portuguese Angola. By way of explanation of the vote an official State Department statement declared:

"It was now imperative for Portugal to plan for the political, economic, and social advancement of the people of Angola. The United States was convinced it was the duty of a close and long friend of Portugal honestly to express the belief that such action was necessary."

If the practice envisaged develops, it will imply a coordinated free world approach to the economic and social development of the nascent African States, to the political stability and military defense of Africa, and to triangular economic relationships among Africa, Western Europe, and the United States.

(2) Preparation of dependent territories for independence: The United States has provided a limited amount of technical and economic assistance to dependent territories within the limits set by the colonial context and the accompanying U.S. view that the political and economic development of the territories were primarily the responsibility of the metropoles and the territories. Such aid has been thought of as a contribution to economic growth which would cushion some of the shocks of the passage to self-government and independence. Given a heightened sense of the priority and urgency of change in Africa, we can look, I believe, to an accompanying expansion of U.S. assistance in the preindependence transition period.

(3) Economic and social development of the new states: There has been a steady expansion in the volume, diversity, and techniques of U.S. development assistance flowing to independent African states. President Kennedy's concept that the 1960's are the "decade of development," expounded in his recent special message to Congress on U.S. foreign aid, suggests that his administration will continue this trend. I think that American assistance will not only be enlarged but also will be increasingly coordinated with other free world assistance flowing to Africa. There is likely to be a search for new multilateral aid channels and techniques for development assistance for Africa—both in the free world and within the existing framework of the United Nations and its affiliated agencies. The United States has already taken two initiatives with respect to free world assistance to underdeveloped countries. It has placed aid to the underdeveloped countries as a priority item on the agenda of the new Organization for Economic Cooperation and Development even before it has officially come into being, and it has initiated a series of bilateral talks with principal Western European countries, particularly with the West German Republic, with a view to inducing a considerable expansion of Western European aid flowing to the new states, particularly those in Africa. The recent support given to the U.N. operation in the Congo by both the Eisenhower and Kennedy administrations has carried the suggestion of the overall expansion of U.S. assistance to underdeveloped areas, particularly those in Africa, channeled through the United Nations and affiliated agencies. This suggestion became explicit in the American proposal, "Africa: U.N. Program for Independence and Development," introduced a few weeks ago by Ambassador Stevenson in the political committee of the U.N. General Assembly.

(4) Neutralism: Irrespective of what U.S. policy may have been elsewhere in the world at an earlier date down through the near present, from the onset of the African independence revolution the United States has not sought the membership in or adhesion to Western military alliances of independent African states. The United States has been loath to provide military assistance to any African state and has as a consequence been criticized by President Bourguiba for not wanting to provide arms to Tunisia and by President Sékou Touré for not providing arms to Guinea. Bourguiba has threatened to go "elsewhere" if the United States refused, and Sékou Touré has gone "elsewhere." The United States has sought persistently to keep the cold war out of the crisis in the Congo Republic. It turned aside the request of Prime Minister Lumumba's government in July 1960 for U.S. military intervention and referred it to the United Nations. The United States has agreed to evacuate by the end of 1963 the air bases it obtained in Morocco during the French protectorate and prior to Moroccan independence. The only other American bases in Africa are an air base in Libya and a communication base in Ethiopia, both freely negotiated with governments of independent states. It is quite likely that in any serious negotiation with the Communist bloc to achieve a truly neutral status for Africa, the United States would be willing to agree to withdraw from these bases as part of a larger agreement to neutralize Africa, guarantee its political independence and territorial integrity from external attack or externally supported subversion, and embargo all arms shipments to Africa outside of the minimum required for maintenance of internal law and order.

There can be no question of American respect for the right of every African state to its own foreign policy. The United States has no intention to urge newly independent African states into military alliances or blocs. It is content to take its chances that politically independent African states, acting in their own best self-interest on critical issues, will more often than not come down on the same side as the United States—for both have common interests in the community of free states. On tactics, specific issues, and even in particular cases on fundamental policies, the oldest of friends may differ at times, and so too may individual African states differ among themselves, and with the United States. But the national interest of the newly independent African states—political independence, economic growth and improved standards of living for their people, nation building, and the accession to independence of the remaining colonial territories on the continent by peaceful and orderly processes—coincides in basic terms with that of the United States.

If the application made by independent African States of their national interest to their foreign policy leads some to closer relations with the United States and the West generally than with the Communist bloc, certainly relations with those states will be welcomed. The opposite development will of course be accepted; but it is obvious that U.S. relationships with the various African States will reflect the orientation of these states to the same degree as it might be reflected in relationships elsewhere in the world.

As for the protestations of some African States that they are neutral, neutralist, positive neutrals, nonalined neutrals, uncommitted neutrals, et cetera, the United States is likely to test the protestations in each case in the real world of behavior and action. It seems appropriate to inquire of self-proclaimed neutrals, "Neutral for whom?" and "Neutral against whom?" If the answer to both questions is "Nobody" then neutralism would seem to be an appropriate description of the foreign policy of those states.

The recent foreign-policy posture, however, of all the self-declared African neutrals in the Congo crisis cannot be meaningfully covered by any acceptable definition of neutrality. They are certainly not neutral toward one another nor toward the various factions in the Congo; and they are not neutral toward the West and the Communist bloc. Given the calculated Soviet introduction of the cold war into the Congo crisis, recognition of and assistance to the Stanleyville regime by African states constitutes at a minimum de facto, if not deliberate, alinement with the Communist bloc on the Congo crisis and, sadly, on the Soviet intrusion of the cold war and its anti-United Nations campaign into the Congo crisis. Recognition of and assistance to the Leopoldville regime also constitutes at a minimum de facto, if not deliberate, alinement with the West on the Congo crisis and, happily, on the West's resistance to the intrusion of the cold war and the Soviet's anti-United Nations campaign into the Congo crisis. Either way, pro-Stanleyville or pro-Leopoldville, neutrality or nonalinement for most, if not all, of the self-proclaimed neutralist states is fiction insofar as the major foreign policy issue in Africa of 1960 and 1961 is concerned. And it is apparently the more transparent fiction for those who have been in the neutralist vanguard than for other self-declared neutralist African states. The Casablanca bloc—the United Arab Republic, Morocco, Mali, Guinea, and Ghana—which has been most vocal in its neutralist protestations, has also been most interventionist in the Congo on the side of the Stanleyville regime.

For practical purposes, then, states which erect a facade of neutrality instead of a structure of neutrality cannot expect to carry the weight they seek to carry in world affairs by reason of being neutrals. United States relations with such states will be based not on their neutralist posture but, as with any other independent African State, on their actions.

As a Senator, President Kennedy said:

"The desire to be independent and free carries with it the desire not to become engaged as a satellite of the Soviet Union or too closely allied to the United States. We have to live with that, and if neutrality is the result of a concentration on internal problems, raising the standard of living of the people and so on, particularly in the underdeveloped countries, I would accept that. It's part of our own history for over a hundred years."

Mr. Kennedy pointed out the true criterion of neutralism—the motivation of a state in adopting a neutralist position in world affairs. When it is to achieve economic development and improved standards of living and national cohesion then such neutralism is fully understandable. When, however, the purpose is to make use of the privileged sanctuary of neutralism to manipulate or interfere in the affairs of other states, or to masquerade a partisan position, it is another matter.

(5) Associations or groupings of states: The United States has an historic interest and longstanding sympathy with attempts of independent states to form associations of states. Our own history is one of the federation of 13 newly independent colonies into one country and over a 175-year period the accession of 37 more dependent territories to voluntary membership in the Federal system of the United States of America. The United States has since the end of World War II encouraged all Western European initiatives toward integration, starting with the Schuman plan. More recently, the United States has welcomed the formation of the Central American Common Market.

The United States also stands ready to welcome and cooperate with new associations of African states whether they be economic unions of the type established by the former French West African territories—the Conseil de l'Entente—or loose political associations of the type advocated by Liberia, or tighter political unions of the type tried by the ill-fated Federation of Mali. One proviso

and one caution should be added. First, the proviso refers to the method of achieving integration. Voluntary associations, well conceived, are likely to endure. Imposed associations, no matter how well conceived, are not likely to endure for long. This would seem to be so irrespective of whether the political integration is imposed by a colonial power or by one African state on another. Second, the caution, which derives in part from the Mali experience, relates to ill-conceived political unions. They are detrimental to all concerned, they absorb the time and energy of the leadership of the constituent parts, they deflect attention and interest from fundamental internal problems of nation building and development of the constituent parts, and they create a whole range of new problems at the center with respect to the conflicting national interests and aspirations of the constituent parts.

In many instances nation building and economic growth within individual states would seem to be a sound precondition to political integration. Then the integration of two or more such states would show a net increment of strength for the whole and for the parts. Alternatively, premature integration or union could mean more problems of building a cohesive society and state from disparate elements, and more problems of growth resulting from spreading limited skilled human and material resources too far afield.

In other instances early integration or union would seem to be the wisest course. A case in point is the voluntary adhesion of the northern Cameroons to the Federation of Nigeria in the recent U.N.-conducted plebiscite. The historic development of the northern Cameroons and its obvious lack of viability—political and economic—suggested the desirability of its affiliation with one of its neighbors. The populations voluntarily opted for union with the Federation of Nigeria. Another possibility of early union might be the affiliation of Gambia with Senegal, but as President Senghor of Senegal has said, only if Gambia voluntarily votes for such a union.

(6) Democratic political practices and institutions: Obviously the United States would prefer that the new African States develop democratic political systems and institutions. This would make for an identity of interests in world affairs and for easier and probably closer relationships than would otherwise be the case. This does not mean, as so often has been contended, that the West expects to transfer its political institutions, and framework en bloc to the new states. This contention is a straw man.

The United States recognizes that there are many variants of democratic institutions and frameworks in the West; that there is no reason why, for instance, the Westminster model should be the rule in former British territories, or the French and Belgian parliamentary models in their former territories, or the American model in others because some of the new African States have found elements of the American presidential system to their liking. (For example, the new constitution of the Republic of Togo is reported to be modeled on the American Constitution.) The important point is not the structure or mechanism per se, but rather the underlying concepts of majority rule subject to the rule of law, recognition of the role of the opposition, the toleration of minorities and minority opinion, and the broad-based sharing of the decisionmaking power throughout society. In the American view, states with political systems incorporating these fundamental concepts are most likely to achieve the type of open and democratic societies which will benefit their citizens in spiritual as well as material terms and at the same time contribute to a peaceful and prosperous world environment which will benefit all people.

The United States takes account of the trend in some African States toward authoritarian and even totalitarian political regimes and economic growth models. This is a matter of concern. The danger is that so-called transitory authoritarian or totalitarian practices and institutions will become permanent. Once permanent, authoritarianism and totalitarianism, including so-called popular democratic versions of them, mean that another corner of the world is closed off from normal contact with the rest and is earmarked for political violence sooner or later.

To dignify authoritarian regimes or practices by denying the reality of their existence, or by rationalizing them as inevitable, necessary, or even desirable, is a disservice to the free world. It is a tragic concession in the critical struggle between the free world and the Communist bloc now being waged throughout the underdeveloped world. In this context, it is worth reflecting on the fact that the two states in Africa with Preventive Detention Acts are Southern Rhodesia and Ghana. Is the best prospect for an independent Southern Rhodesia with an African majority, or for that matter for any other newly independent African State, to be a Preventive Detention Act administered by a ruling African group which has replaced a former European ruling oligarchy? This may occur but it is hardly to be welcomed or rationalized. It surely is enough to recognize one-party systems when they appear and to treat effectively with them without sacrificing the hope and the belief that there is something better in the world, and without snuffing out the potential for the evolution of democratic and free institutions. This would certainly seem to me to be the message of the Law of Lagos which issued from the Rule of Law Conference held in Lagos in January of this year. The Conference sponsored by the International Commission of Jurists was attended, inter alia, by delegations from 25 African States. It is therefore significant that the Conference censured the use of Preventive Detention Acts in time of peace and approved the principle that fundamental human rights should not be abridged by law or the state except in a time of grave emergency. The chairman of the Conference, Sir Adetokunbo Ademola, Chief Justice of Nigeria, captured the spirit of the Conference when he declared, in rejecting out of hand the view that African conditions might require a departure from these general principles, that:

"The rule of law is not a Western idea, nor is it linked with any economic or social system."

The rule of law belongs to freemen, in Africa and elsewhere.

It should be emphasized that political unity imposed by coercion and force and at the expense of cultural and social diversity and democratic rights, and economic development achieved at the expense of individual initiative, do not fit the picture of independence envisaged and painted by the African nationalist leaders for the people of their countries. There are new African States earnestly engaged in trying to make democratic systems work for them. There are African leaders sincerely determined to try to create democratic systems in their countries. It would indeed be ironic if with independence, liberty and freedom must go.

It is in the free world interest and it is in the U.S. national interest to encourage in such states every potential for the development of democratic practices and institutions. Sometimes a period of economic growth and political stability relieves some of the pressures underlying authoritarian trends; sometimes the growth of friendly relations with free nations minimizes xenophobic and authoritarian tendencies; sometimes the total world environment removes some of the anxieties which lead to authoritarian solutions; sometimes trade and aid as well as the interest they exemplify cushion and counteract fears, suspicions, and compulsions which favor authoritarian practices. In short, the trend is not necessarily irreversible. There is nothing inevitable about the growth of authoritarianism in Africa.

In conclusion, it seems only right in this address to the Nigeria Union of Great Britain and Ireland, that I depart briefly from this abstract discussion of U.S. policy in Africa to say a word directly about the U.S. attitude toward Nigeria. You will have already inferred from the general statements of U.S. policy toward Africa, that we in the United States hold the Federation of Nigeria in considerable esteem. We have admiration for a new state which at one and the same time seeks to build its country and develop its economy, on the one hand, and respects and protects the cultural and social diversity of its people, and entrenches the civil rights of its citizens, on the other. To our mind, the Federation of Nigeria is such a state. We wish you well, we extend the hand of friendship, and we hope to be able to help you to help yourselves.

GOVERNMENT TRIES TO AVOID COMPLIANCE WITH ITS OWN LAWS

Mr. TOLLEFSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. TOLLEFSON. Mr. Speaker, I am concerned when people try to circumvent the laws of government by devious and questionable methods. I am thoroughly shocked when the Government itself tries to avoid or circumvent its own laws by such means. And that is exactly what our own Government through one of its departments is trying to do.

Last week I informed the House that the Department of Defense had indicated that it would obtain 440,000 tons of coal in this country for use at its military installations in Europe. The Department further indicated that the coal would be shipped exclusively on foreign ships.

Such shipment would be in direct violation of two Federal laws. One is the Cargo Preference Act—83–664—which provides that at least 50 percent of Government-sponsored cargoes shall be shipped on U.S.-flag vessels. The other law, title 10, section 2631, United States Code, provides that all supplies for our military situated abroad shall be shipped exclusively by U.S.-flag vessels.

I have called these laws to the attention of the Department of Defense. Yet one of its spokesmen yesterday told the press that these laws were inapplicable because the coal would be purchased in this country by a German supplier who would control the shipping.

This is a deliberate device on the part of the Department of Defense to circumvent the laws of our Nation. The coal is a military supply within the meaning of title 10. It is also Government sponsored and Government financed within the meaning of the Cargo Preference Act.

Why does the Department of Defense use a German supplier? Simply to try to get around the law. The Department is attempting to do indirectly what it cannot do directly. If the Department purchased the coal in this country, it would clearly come under the law, in its own opinion. Therefore it uses a foreign supplier to avoid compliance with the law. I deplore this questionable device and urge the General Accounting Office to advise Defense officials that their proposal is illegal.

Mr. BONNER. Mr. Speaker, will the gentleman yield?

Mr. TOLLEFSON. I yield to the gentleman from North Carolina.

Mr. BONNER. I agree with what the gentleman from Washington says, and I agree with his asking the Comptroller General to look into this matter of dealing unfairly with American-flag ships.

Mr. TOLLEFSON. I thank the gentleman.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. ASHBROOK] is recognized for 60 minutes.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent that the special order entered into on behalf of the gentleman from Pennsylvania [Mr. SAYLOR], take precedence over the special orders heretofore entered into on behalf of the gentleman from Ohio, and the gentleman from Indiana [Mr. BRUCE].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

UPPER COLORADO RIVER STORAGE PROJECT

The SPEAKER pro tempore. Under previous order of the House the gentleman from Pennsylvania [Mr. SAYLOR] is recognized for 60 minutes.

Mr. SAYLOR. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to insert extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SAYLOR. Mr. Speaker, we will soon be faced with a decision of whether to support construction of an all-Federal transmission system for the upper Colorado River storage project, or deny the Government the right to build such lines and let the Bureau of Reclamation enter into contracts with electric companies serving that area to wheel the Government power to the Government's customers.

I was a member of the Interior Committee when this project was before it. I have a long record of supporting conservation and worthwhile reclamation projects. I was against this project in committee and on the floor of the House. In floor debate on March 1, 1956, I said this was not a reclamation project. It was a public power project with some incidental benefits. There has been nothing since that time to change my opinion. In fact, this transmission line controversy verifies what I said back in 1956.

The electric companies of the area appeared before our committee in support of the project and at that time expressed a desire to be as helpful as possible in distributing the electric power generated by the facilities of the project. Our committee report expressed a desire on the part of the committee that the Bureau of Reclamation work with the electric companies in an effort to market the power to best advantage. I am sure that it was the desire of the committee in reporting the bill and of the House in authorizing the project that every effort be exerted on the part of the Bureau of Reclamation to work out an arrangement for marketing the power with minimum expenditure on the part of the Government. It is my recollection that at the time, and I am sure that recollection is supported by legislative history, that the Bureau of Reclamation led us to believe it would make an honest effort to work with electric companies and other distributors to market the power at least cost to the Government. But, as on most other occasions, the Bureau of Reclamation, after promising anything to get an authorization, completely disregards such promises once it gets a project authorized.

The electric companies who serve the area covered by the project started work even before the project was authorized to see how transmission of Federal power generated by the Government could be worked into their systems for delivery to the Government's customers. Their study has been intense and of long duration. They made a network analyzer study covering the entire Western States—the largest calculating board study that has ever made in this country. The companies used data furnished to them by the Bureau of Reclamation as to amounts of power and delivery points. As a result of this extensive and thorough study the companies made offers to the Government for the transmission of Government power to the Government's customers.

The Bureau set up a phantom government system which they called the yardstick system with which to compare government construction against the company offers. By their own admission the final Bureau plan has not as yet been decided upon. Besides that, requirements for deliveries by the companies are not the same as deliveries planned by the Bureau. How can any just or fair comparison be made with that kind of engineering shenanigans? It is like trying to compare apples with oranges. After making this phony comparison, the Bureau came up with an answer. The answer, of course, was the one they planned to come up with all along; that is, the Government should build the transmission system.

I am satisfied that irrespective of what offer the companies made, the Bureau would still have tried to find an answer supporting government construction. The Bureau wants to construct these Colorado River lines as an integral part of its plan toward a national power grid. For this reason economics is not a primary consideration.

When the electric companies questioned the Bureau's findings, the Bureau called in two consulting engineers to make an independent analysis of the Bureau's findings. The Bureau then said they had obtained an independent engineer's analysis and the engineers agreed with the Bureau findings. That did not sound exactly right to me, so I contacted these engineers. I wrote them a letter on April 18, 1961 in which I asked several questions. I have the engineers' answers and they are very enlightening. I will just highlight the answers at this time, but under unanimous consent I include letters from Mr. Ben C. Russell and Mr. Jack D. Stevens, the consulting engineers in the RECORD at this point:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., April 18, 1961.

Mr. B. C. RUSSELL,
Boise, Idaho.
Mr. JACK D. STEVENS,
Seattle, Wash.

DEAR SIRS: I have had the report of the Bureau of Reclamation of October 1960, entitled "Analysis of Proposal of Private Utilities To Wheel Power to Preference Customers—Colorado River Storage Project," criteria to the so-called yardstick system of such report, dated November 12, 1960.

It is quite apparent that there has been a failure by the Bureau to apply the same criteria to the so-called yardstick system of Federal transmission as was applied to the private utilities "wheeling" proposal. Your review report gives some indication of the fact that the Bureau's "yardstick" system will not provide the same measure of service as required of the private "wheeling" proposal. Your report does not, however, indicate what the effect would be on the economic comparison of the Federal "yardstick" system with the "wheeling" system if the necessary revisions were made on the "yardstick" system so as to provide for the same service requirement.

There have been indications in the press and by the Interior Department spokesmen that your review report fully supported and recommended the construction of an all Federal transmission system for the Colorado River storage project. I fail to find such a firm conclusion in your review report.

Your review report also indicates that you were not allowed sufficient time to make a complete and proper analysis of the various facets of the Bureau's report and in some instances were told to accept certain Bureau figures and methods at face value.

I am sure that you would like to have the record made clear on this matter, so that there will be no question of your professional ability and integrity. In order that I may be able to have the real facts, will you at your earliest convenience send me your answers to the following questions:

1. Were you given sufficient time to make a proper and complete review of the Bureau's October 1960 report on the Colorado River storage project transmission line analysis? How much time was finally given?

2. Were you required to accept certain Bureau figures methods of analysis, without question?

3. Would the Bureau's proposed "yardstick" system, without interconnection and coordination with the private utilities systems, be able to deliver the same amount of power to the same preference customers as is required to be delivered under the "wheeling" system proposal?

4. Would the Bureau's proposed "yardstick" system, without interconnection and

support from the private utility systems, provide the same degree of reliability of service to such preference customers?

5. Is it not true that the cost of the necessary additions to the Bureau's proposed "yardstick" system, in order to make it comparable to the "wheeling" system, would greatly increase the total cost of the Federal "yardstick" system?

6. Were the operation, maintenance, and replacement charges made by the Bureau against the "wheeling" system in line with those they made for the Federal "yardstick" system, so that both systems would be on a proper and comparable cost basis?

7. Is it not true that the cost figures in the Bureau's report could not be used to make a proper economic comparison between the Federal "yardstick" system and the "wheeling" systems because the Federal system as proposed would not provide for comparable power delivery and reliability and service, and different and more favorable criteria were used on some of the "fixed charges" items of the "yardstick" system?

8. Are the Bureau of Reclamation's estimates of the cost of constructing transmission lines, as used in their report, realistic and reasonable? (Press notices indicated recently opened bids to the Bureau on Glen Canyon transmission lines are 55 percent above Bureau estimates.)

I hope you can furnish me with complete and concise answers as soon as possible.

Sincerely,

JOHN P. SAYLOR,
Member of Congress.

STEVENS & CONKLING,
Seattle, Wash., April 26, 1961.

Hon. JOHN P. SAYLOR,
Member of Congress,
House Office Building,
Washington, D.C.

DEAR SIR: I have your letter of April 18, 1961, in which you ask a number of questions regarding the analysis Mr. B. C. Russell and I made of the Bureau of Reclamation report "Analysis of Proposal of Private Utilities to Wheel Power to Preference Customers—Colorado River Storage Project."

I am grateful to you for this opportunity to put the record straight on a number of misinterpretations that have apparently been applied to our review. It will require some time to prepare the answers to your questions but this will be done as promptly as possible.

I shall be glad to appear before your committee if an appearance would be helpful, and if an appearance can be fitted into my rather tight work schedule.

Very truly yours,

JACK D. STEVENS,
Consulting Engineer.

STEVENS & CONKLING,
Seattle, Wash., May 10, 1961.

Hon. JOHN P. SAYLOR,
Member of Congress,
House Office Building,
Washington, D.C.

DEAR SIR: By your letter of April 18, 1961, you ask certain questions regarding the report prepared by B. C. Russell and Jack D. Stevens as consultants to the Bureau of Reclamation, such report being a review of the Bureau of Reclamation analysis of "Proposal by Private Utilities To Wheel Power to Preference Customers, Colorado River Storage Project, October 1960."

The consultants were retained to review the above report and 5 days were allowed for the review. After considering the consultants report, dated October 17, 1960, the Bureau decided to revise its analysis and the consultants were retained to review the revised document. Again a 5-day period was allowed and the second review was handed to the Bureau on November 12, 1960.

I am quoting below the numbered questions in your letter along with my answers.

1. Question: "Were you given sufficient time to make a proper and complete review of the Bureau's October 1960 report on the Colorado River storage project transmission line analysis? How much time was finally given?"

Answer: The consultants had very limited time to review a report that took a large staff many months to prepare. We were allowed 5 days for each of the two reviews.

2. Question: "Were you required to accept certain Bureau figures methods of analysis, without question?"

Answer: The consultants were instructed to accept the Bureau's generation and load data and also to accept the Bureau's method of determining the average power rate to accomplish repayment. Loadings on the Bureau's transmission network were provided by the Bureau. There was, of course, no opportunity to check the validity of these data.

3. Question: "Would the Bureau's proposed 'yardstick' system, without interconnection and coordination with the private utilities systems, be able to deliver the same amount of power to the same preference customers as is required to be delivered under the 'wheeling' system proposal?"

Answer: The Bureau system is inadequate in some instances and it is lacking in reserve capacity. Deliveries to preference customers could not be made on a dependable basis without support from the non-Federal systems. The utility systems would have ample reserve capacity to assure dependable service.

4. Question: "Would the Bureau's proposed 'yardstick' system, without interconnection and support from the private utility system, provide the same degree of reliability of service to such preference customers?"

Answer: The Bureau's yardstick system would not have the same degree of reliability as the private utility systems.

5. Question: "Is it not true that the cost of the necessary additions to the Bureau's proposed 'yardstick' system, in order to make it comparable to the 'wheeling' system, would greatly increase the total cost of the Federal 'yardstick' system."

Answer: The Bureau's system is not dependable as an independent network. Dependability on this basis would call for increased facilities and correspondingly higher costs.

6. Question: "Were the operation, maintenance, and replacement charges made by the Bureau against the 'wheeling' system in line with those they made for the Federal 'yardstick' system, so that both systems would be on a proper and comparable cost basis?"

Answer: The consultants took exception to all of the O.M. & R. costs used by the Bureau. This applies both to the Federal lines in the yardstick system and the Federal lines in the utility proposal. The application of these costs was not the same for both systems.

7. Question: "Is it not true that the cost figures in the Bureau's report could not be used to make a proper economic comparison between the Federal 'yardstick' system and the 'wheeling' systems because the Federal system as proposed would not provide for comparable power delivery and reliability and service, and different and more favorable criteria were used on some of the fixed charges items of the 'yardstick' system?"

Answer: It was not possible in the time allowed to make a thorough assessment of the cost criteria used by the Bureau in determining the relative merits of the yardstick and private utility proposals. Certainly the low Federal interest rate and nonpayment of taxes made a difference in basic costs. The Bureau interest rate of 2⅞ percent is probably lower than the actual cost of money. An important offsetting feature is the Federal and local taxes forgone under the Federal program. If the Government chose in this instance to reduce its capital investment by a very large amount, this could be accomplished by adopting the utility wheeling proposal.

8. Question: "Are the Bureau of Reclamation's estimates of the cost of constructing transmission lines, as used in their report, realistic and reasonable? (Press notices indicated recently opened bids to the Bureau on Glen Canyon transmission lines are 55 percent above Bureau estimates.)"

Answer: The consultants considered the Bureau's estimates on transmission line costs to be too low. The consultants did not have an opportunity to examine the territory over which the lines would be constructed nor did they have an opportunity to thoroughly investigate the Bureau's cost estimates. A complete study including all details of investigation normally associated with determining transmission costs might prove the Bureau's figures to be reasonably correct but on the other hand, such an investigation also might prove the Bureau's costs to be much too high. The consultants, of course, had no opportunity to go into these matters except in a superficial way.

I believe the foregoing answers the questions asked in your letter of April 18. I regret that I have been unable to reply at an earlier date.

Very truly yours,

JACK D. STEVENS,
Consulting Engineer.

Boise, Idaho, April 22, 1961.

Subject: Your letter of April 18; Colorado River storage project power transmission—Engineering study of J. D. Stevens and B. C. Russell of U.S.B.R. report.

Hon. JOHN P. SAYLOR,
Congress of the United States,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: This acknowledges receipt of your letter of April 18 with reference to the above subject in which you request answers to a number of questions you have presented.

Before attempting to reply to your questions I should review this matter to refresh my mind on the Bureau's report and our engineering study. I have given this subject no thought since last November.

I am, at the moment, preparing to leave early tomorrow morning to meet an appointment over on the Oregon coast and I do not expect to be back to Boise before May 1 or 2. On returning I shall formulate my answers to your questions as quickly as possible and get them off to you by airmail.

I hope this delay will not inconvenience you.

Sincerely,

B. C. RUSSELL.

BOISE, IDAHO, *May 12, 1961.*

Subject: Your letter of April 18, Colorado River storage project; Bureau's analysis of private utilities wheeling proposal study by J. D. Stevens and B. C. Russell

Hon. JOHN P. SAYLOR,
Member of Congress, House Office Building, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN: In your letter of April 18, relative to the above subject, you asked several specific questions. I shall give my answers to these in the order asked, as follows:

1. "Were you given sufficient time to make a proper and complete review of the Bureau's October 1960 report on the Colorado River storage project transmission line analysis? How much time was finally given?"

When we were first asked to review and report on the Bureau's study we were allotted a maximum of 5 days for our report. As it turned out, one of these 5 days was

devoted to a study of the benefits that could be assigned to, and the feasibility of, a proposed private utility interconnection between Utah Power & Light Co. and Arizona Public Service Co. This was an additional assignment by the Bureau, and required approximately 1 day. It, of course, cut the time allowed for our original assignment to 4 days. We were to review the Bureau's report which had taken a sizable crew many months to prepare.

Starting from scratch to familiarize ourselves with the subject matter, we did feel that the time allotted us was rather short, perhaps too short for the job at hand. We proceeded as diligently as we could, both day and late into the evening, to familiarize ourselves with the problem and with the report of the Bureau, and we managed to get our study out in the time allotted.

After the Bureau had studied our report, it decided to make certain revisions and clarifications in its report and asked the consultants to review its revised report. We were allowed 5 days time for the further review. We again reviewed the Bureau's study, in the light of the changes, and made our revised report, dated November 12, 1960.

As stated in the next to the last paragraph of our report, we both, Mr. Stevens and I, felt that the entire time we had been allotted was insufficient for a complete assessment of all the facets of the problem. We had devoted approximately 9 days total time to the subject at hand.

2. "Were you required to accept certain Bureau figures methods of analysis, without question?"

In the Bureau's original letter of assignment to us of the date September 30, 1960, the following instructions were given:

"In the performance of this work the consultants shall use data made available by the Bureau in considering the above matters. The consultants shall accept the generation and load data tabulated in the Bureau report as basic data not needing review or comment. The consultants shall also accept the method of determining the average rate to accomplish repayment because it follows basic Bureau policy and is consistent with the authorizing act. The consultants shall not concern themselves with determinations of policy or matters other than those directly related to the utilities' wheeling proposal."

(The above matters referred to were those items listed as a, b, c, d, e, and f in our report.)

3. "Would the Bureau's proposed yardstick system, without interconnection and coordination with the private utilities systems, be able to deliver the same amount of power to the same preference customers as is required to be delivered under the wheeling system proposal?"

The Bureau's yardstick system was not designed to carry the same magnitude of loads south into Arizona as was required of the private utilities over the wheeling system. Table 6, page 26 of the Bureau's report shows 591,800 kilowatts to be delivered into Arizona by the wheeling system but the yardstick system has a top limit of capacity of only about 435,000 kilowatts to this area.

4. "Would the Bureau's proposed yardstick system, without interconnection and support from the private utility systems, provide the same degree of reliability of service to such preference customers?"

The interconnection of systems almost invariably improves the reliability of service as well as the economics of operation.

In the case in question, it is a reasonable assumption that an interconnection of the Bureau's power production plants and trunk transmission lines with the systems of the five private utilities would provide much more reliable service to the entire area, including the preference customers.

5. "Is it not true that the cost of the necessary additions to the Bureau's proposed yardstick system, in order to make it comparable to the wheeling system, would greatly increase the total cost of the Federal yardstick system?"

Inherent in the wheeling system are service values in standby service and increased capacities not to be found in the yardstick system.

To attempt to build up the service values and capacities of the yardsick system to equal those of the wheeling system, will require additional sums of money. The Bureau infers that the service values of the isolated yardstick system are adequtae for its preference customers but I am not in a position to pass judgment on this matter.

6. "Were the operation, maintenance, and replacement charges made by the Bureau against the wheeling system in line with those made for the Federal yardstick system, so that both systems would be on a proper and comparable cost basis?"

As stated on page 4 of our report, we found the operation and maintenance costs unreasonably high for the transmission facilities that would be constructed by the Federal Government with the wheeling system, and suggested that it be reexamined, but we as consultants did not attempt to place a value on the discrepancy for economic comparisons.

7. "Is it not true that the cost figures in the Bureau's report could not be used to make a proper economic comparison between the Federal yardstick system and the wheeling systems because the Federal system as proposed would not provide for comparable power delivery and reliability and service, and different and more favorable criteria were used on some of the fixed charges items of the yardstick system?"

Since, as outlined above, the so-called yardstick system cannot provide the same class of service that the interconnected system (wheeling system) can provide, a true comparison from a service value cannot be shown. I would not feel I should attempt to be critical of the class of service the Bureau feels its preference customers merit. From my own experience in the utility business, I know that the demands for improved service are an ever increasing problem of all power systems.

8. "Are the Bureau of Reclamation's estimates of the cost of constructing transmission lines, as used in their report, realistic and reasonable?" (Press notices indicated recently opened bids to the Bureau on Glen Canyon transmission lines are 55 percent above Bureau estimates.)

As stated above under question No. 1, our time for study was limited. We did not see the terrain on which the proposed Federal transmission lines would be constructed, so our estimates of line and substation costs were our best guess based on a knowledge of the cost of lines and substations we thought might be comparable. Our opinion of the Bureau's estimates of such costs is stated in paragraph 2 of item (c) of our report. It is my opinion that the remoteness of the general area and the terrain over which all of the lines must be constructed, as I understand it to be, are such that the costs would probably be equal to or greater than any similar lines yet constructed in this country. Certainly, the country has few roads, is very rough, and is mainly unsettled.

In conclusion, I do not want you or anyone to consider that our report to the Bureau gave our recommendation for an all-Federal transmission system. In the very short time at our disposal, we examined the Bureau's report and we expressed ourselves frankly relative to the procedure of the Bureau in working out its details. Nowhere in our report have we made a recommendation favoring the construction of the all-Federal system.

I hope the answers given above to your questions will be of assistance to you.

Sincerely,

BEN C. RUSSELL.

Mr. Speaker, I asked if the engineers were given sufficient time to make a proper and complete review of the Bureau's analysis.

The answer was "No."

I asked if they were required to accept certain Bureau figures and methods of analysis.

The answer was "Yes." There was no opportunity to check the validity of these data.

I asked if the Bureau's proposed "yardstick" system, without interconnection and coordination with the private utilities systems, would be able to deliver the same amount of power to the same preference customers as is required to be delivered under the "wheeling" system proposal.

The answer was "No." Deliveries to preference customers could not be made on a dependable basis without support from the non-Federal systems.

I asked if the Bureau's yardstick system, without interconnection and support from the private utility systems, would provide the same degree of reliability of service to such preference customers.

The answer was "No."

I asked if it was not true that the cost of the necessary additions to the Bureau's proposed yardstick system, in order to make it comparable to the wheeling, would greatly increase the total cost of the Federal yardstick system.

The answer was that the Bureau's system is not dependable as an independent network. To make it so would require increased spending.

I asked if the operation, maintenance, and replacement charges made by the Bureau against the wheeling system were in line with those they made for the Federal yardstick system so that both systems would be on a proper and comparable cost basis.

The answer was "No." The application of these costs was not the same for both systems. Furthermore, the engineers took exception to the Bureau's estimate of O.M. & R. costs. They thought they were too low.

I asked if it was not true that the cost figures in the Bureau's report could not be used to make a proper economic comparison between the Federal "yardstick" system and the "wheeling" system because the Federal system as proposed would not provide for comparable power delivery and reliability of service and if different and more favorable criteria were used on some of the "fixed charges" items of the "yardstick" system.

The engineers had not had time to make this analysis.

I asked if the Bureau's estimates of cost of constructing transmission lines, as used in their report, were realistic and reasonable.

The engineers did not have time or sufficient information to make this determination. But they considered the Bureau's estimates on transmission line costs to be too low.

Now, Mr. Speaker, what I have just cited clearly refutes the idea that these independent engineers approved the Bureau's analysis. From the answers to my questions I would say that these engineers disapproved the Bureau's analysis or at least critically questioned it.

From what I have been able to find out I am satisfied that the Bureau's analysis of the two propositions did not represent a fair and honest comparison. The electric companies' engineers completely disagree with the Bureau's findings. The electric companies' engineers are at least as good as any the Bureau has. From what I have been running into for the last few years I would be inclined to take their findings over those of the Bureau. The fact that an engineer works for the Government does not give him a corner on either ability or integrity. As a matter of fact, from my contacts with and observations of the Bureau's engineers, I am inclined to believe that their engineering analysis of projects is based on ideology and political expediency rather than on the true science of engineering and economics.

In a few days we are going to vote on whether or not to appropriate millions and millions of tax dollars to permit the Bureau to construct an extensive transmission line network in the Rocky Mountain States. When the upper Colorado storage project was authorized it was estimated to cost $760 million. Now the estimates of cost are well over a billion dollars. It would seem to me that fiscal responsibility would dictate that every effort should be made to hold down the cost of this project by eliminating unnecessary expenditures. At the rate we are going, before we get through with the project, it may cost over $1½ billion. Do those people think the Federal Treasury is an endless fountain. Are people no longer willing to do anything for themselves? Do they expect the Federal Government to do everything for them?

Of course, the nontaxpaying public power groups are supporting all-Federal construction of the transmission line system and I am going to have more to say about their activities later. Their efforts are just a repetition of what they do in other areas. The Government makes some electric power available on a preferential basis to these nontaxpaying public power distributors, but they are never satisfied. They want the Government to supply more and more of it and transmit it to them even though it could be transmitted to them better by other means.

The five electric companies serving the area have made an offer to the Bureau to wheel the power from the project to the Government's customers. I am not going into the details on the companies' offer because I am sure it will be thoroughly discussed in committee and later on the floor, but I do want to emphasize a few things at this point.

The companies have made the Government a firm offer to wheel the power at a fixed price.

The companies' offer would save the taxpayers from spending at least $136 million at this time.

According to the companies' calculations, power could be sold to the preference customers at the same price under either system.

The companies calculate the payout period of the total project would be 7 years less under the companies' proposal.

Under the company proposal 48,000 kilowatts would be saved in line losses which would have a value of over $80 million during the payout period.

Under the companies' proposal the preference customers would have more power available to them and the supply would be a great deal more dependable.

As a result of the companies' proposal they figure that they would pay $100 million in Federal income taxes during the payout period.

The companies would pay about $184 million in State and local taxes.

The above are the companies' findings as a result of years of study by competent people—people competent enough to successfully finance and operate $1.5 billion of utility properties serving 1,148,000 electric customers in five States.

I do not feel that these facts can be disregarded.

Now, Mr. Speaker, I want to discuss some of the activities of Bureau employees and the preference customers. I know that many of us are being deluged with mail and propaganda in connection with these lines.

Let us take the Bureau and Interior Department employees first. On May 8, 1961, the Bureau put out what they called a fact sheet. It was unsigned, but I understand that Mr. Dominy, Commissioner of Reclamation, took all the credit or discredit for this document. I also understand that this so-called fact sheet was sent out to all representatives in the House and Senate from the Western States with a note from Mr. Dominy that there were plenty of copies for distribution. I also understand that Mr. Dominy said he was willing to make copies available to anyone who wanted them. Now I am not going to take the time of Members of the House to dissect this so-called fact sheet, but I think you should read it. It is not a Government report—it is a propaganda sheet for promotion of Federal construction.

This same Mr. Dominy made a speech at the dedication of the Fremont Canyon Powerplant near Casper, Wyo., on April 28, 1961. In that speech Mr. Dominy discussed the Burns Creek project and the Colorado River storage project transmission lines. He referred to Burns Creek as a badly needed reregulating reservoir when it is nothing in the world but a Federal power dam. I know that from 4 years of the project being before the Interior and Insular Affairs Committee on which I have the honor to serve.

Now, Mr. Speaker, Mr. Dominy referred to those who oppose these two projects as obstructionists, misguided obstructionists, and so forth, and also said something about a fraudulent bill of particulars being put together against these Bureau projects. I resent such statements by the Commissioner of Reclamation. As stated before I have supported reclamation when it was reclamation, even though it has no direct advantage to my State. Just because, after listening to all of the arguments on the subject, many of us happen to disagree with what the Commissioner chooses to tell us, gives him no license to refer to those who disagree as "obstructionists." Mr. Dominy used the words "obstructionism," or "obstructionists" seven times in his speech referring to those who disagree with his Bureau objectives. He also referred to them as purveyors of gloom and doom.

We have reached a rather startling situation in this country if its citizens cannot disagree with the plans and schemes of some entrenched empire building bureaucrats without having one of the chief bureaucrats refer to them as obstructionists or purveyors of gloom and doom. To me this smacks entirely too much of totalitarian thinking. Our Government agencies should present fairly and squarely the facts—facts based on sound engineering and economics—and let the people decide what they want to spend their money for. Furthermore, I have seen many instances of Federal employees actually lobbying on the Hill, both personally and through others, for Federal appropriations in which they were interested. If Federal agency employees are being permitted to lobby, then they should be required to register and a record should be kept of their lobbying activities.

I want to go back just a minute to another statement in Mr. Dominy's speech. In referring to the findings of the Bureau in connection with the upper Colorado River project transmission lines, the Commissioner says:

> In face of this affirmation of our findings by an independent engineering board—

I think that statement would lead anyone to believe that the Bureau findings had been adequately reviewed by an independent board of engineers and that this engineering board was in complete agreement with the Bureau's findings.

At the beginning of this speech I told you what I had found out by direct correspondence with these independent engineers to whom Mr. Dominy referred. I am not going to repeat what I said, except that these engineers' review was entirely inadequate because of the time limitation and the fact they were required to accept, without investigation, certain Bureau data and that their cursory review raised many questions as to the adequacy of the Bureau findings.

Now, Mr. Speaker, we find the Commissioner of Reclamation making a public speech in which he engages in name calling, in berating citizens who disagree with him, and making statements which he should have known are untrue in his effort to deceive the public. A man who would do such things, in my opinion, is not fit to hold public office of high trust. I hope he is not indoctrinating the Bureau with this scurrilous type of thinking.

A few years back, under outstanding leadership, the Bureau of Reclamation made great contributions in the field of engineering and in development of our

Western States. There was a time when the Bureau's engineering and economic findings were accepted without question because they were honest—they were based on engineering and economics and not on ideology. But now, I regret to say, as a member of the House Committee on Interior and Insular Affairs, I cannot accept without question anything the Bureau representatives tell us. When passing on authorizations for the Bureau it is disturbing to know that we have to look behind each log and, by almost prosecuting attorney methods, try to ferret out the true facts. I think it has become to the disadvantage of our Western States that the Bureau of Reclamation now seems to weigh projects on the scales of ideology rather than on engineering and economics. We of the East, the South, and Midwest have always been very sympathetic toward reclamation and I think very generous in furnishing the tax funds to finance reclamation projects, but when we are no longer sure whether these projects are for reclamation or an attempt on the part of the Bureau to extend their Federal electric power operations, we intend to take a much closer look at them.

Mr. Speaker, I am sure most Members of Congress have been receiving a great deal of mail on the subject of the Colorado River transmission lines. I noticed in one article that the Government power proponents were complaining about the electric companies contacting the Congress on the subject. I have never seen the time that mail from the companies could compare with what is evidently an organized deluge of mail we receive from the proponents of government power on practically every power issue that comes before the Congress. The Colorado River lines is no exception.

I want to call your attention to some things the Government power proponents are putting out, and to the man who is evidently back of most of this.

I have here an advertisement which appeared in the Salt Lake Tribune on May 16, 1961, which was paid for by the Colorado River Basin Consumers Power, Inc. It is a cartoon headed in big letters "You Will Pay More for Electricity." That was made as a categorical statement although there is excellent engineering findings to the contrary.

Just below the headline but still in large print is the statement, "If private power utilities erect toll lines between you and your source of Colorado River storage project power." Now that leaves the impression that the electric companies are going to exact a toll for letting the people have their power, when in reality the companies would only be making their facilities available, at a reasonable service charge, at no more cost and on a more reliable basis than if the Government built the lines.

Then the cartoon shows a man labeled "private utilities" running toward the Bureau lines saying "Stop—let me build that last little part of the project so I can collect a toll charge."

That last little part of the project would only save the taxpayers $136 million and probably a lot more. That may sound like a little bit to those preference customers who have become accustomed to receiving huge Government handouts, but it is still a lot of money to the taxpayers. My constituents in Pennsylvania do not look at it as a little bit.

What the ad does not say is that the electric companies would be making available 13,397 miles of their transmission lines for wheeling this Federal power to preference customers, while at the same time backing it up with their own steam powerplants. The electric company plans would take power to preference customers that the Federal lines would not touch.

Here is another release by the Colorado River Basin Consumers Power, Inc.: It starts off with a cartoon showing a man labeled "big private utilities" using a rope labeled "$100 million private utility investment" being used to tie up a bag labeled "$900 million taxpayer investment."

Mr. Speaker, I want to discuss some of the statements made in this release. It is the boldest, most flagrant use of fraudulent information I have ever seen and shows the extent to which some people will go in an effort to deceive the public in their attempts to raid the Treasury.

There is a paragraph headed "Taxpayer Made Original Investment." It says:

> In almost all cases, it has been necessary throughout history for the Government to construct major hydro and storage dams since their original cost is so great that private utilities and private capital cannot, or will not, finance them. Since the duly elected representatives of the people have already appropriated the funds for a major part of this tremendous investment, it is important that everything possible be done to insure that all of the returns from this investment go to the taxpayer and the users of the power from Glen Canyon Dam, not to a group of private utilities.

I could make a speech on that paragraph alone. It has been demonstrated that electric companies will build, with private capital, economically feasible hydroelectric projects irrespective of cost. But it has also been demonstrated that they have to fight the Federal power proponents every inch of the way to get the required Federal license that permits them to build such developments. It took a long, hard fight before the Idaho Power Co. was permitted to build Hells Canyon. The New York companies lost a long hard fight in their effort to build the Niagara development. The Pacific Northwest companies for several years have been attempting to get a license to build High Mountain Sheep Dam on the Snake River. These are all major hydrodevelopments costing hundreds of millions of dollars. I could name many more, but I think this is enough to discredit the assertion that the companies cannot or will not build such developments. Of course, if they are not sound economical developments, the companies are not going to rush in and build them. It seems that only the Government wants to do that.

Now the statement that everything possible be done to see that the returns from this investment go to the taxpayers would astound anyone who knows anything about the investment, if it can be dignified by such a term. This investment in the upper Colorado River storage project is going to cost the taxpayers hundreds of millions of dollars out of pocket, regardless of who transmits the power. They are going to carry the interest on the investment that goes into irrigation irrespective of how the power is sold. If the electric companies can save the taxpayers some investment in the overall expenditures on the project, that is all to the interest of the taxpayers.

The next caption of this release is headed "Federal Transmission System Only Answer." Under this heading is the following statement:

> With a Government investment from taxpayers' money of over $900 million in dams, powerplants, and related facilities, it should be obvious that it would be wrong to allow a combination of private organizations to invest only about $100 million to build the final link which carries the power from these facilities to the ultimate consumer, and by this means gain a stranglehold over the whole billion-dollar investment.

Mr. Speaker, how ridiculous can we get? The electric companies have offered to wheel Government power to the Government's customers at a fixed cost. The companies will not run the dams. They will only take the power into their systems and deliver it to the Government's customers in the amounts and at the times that the Government instructs them to do so, and they will perform this service under contract and at a fixed price. How does that give them any stranglehold over this Government project? Such a contention is ridiculous.

Another heading is: "Electricity Will Cost More Money if Utilities Build Lines." Under this heading the following statements are made:

> Regardless of which calculation is accepted, the combination system would result in the cost of electricity being 10 to 15 percent higher. * * * These added costs would have to be passed on the homeowners, shopkeepers, and ultimate consumers using electricity.
>
> Wheeling charges, if the utilities were allowed to build these lines, would add $492 million to the cost of electricity over a 100-year period of amortization. This added cost would have to be collected from the people who use the power in the five States where it is to be sold.
>
> If these toll charges are not passed on to the people who use the electricity, then the Government Treasury cannot be paid back its loans on the 50-year basis required by the law which authorized the project.

All I want to say about such statements is that the people who get the electricity should be required to pay the cost of getting it to them, regardless of whether they are homeowner, shopkeepers, or industrial establishments—that is something which these preference customers hate to accept—they want the Government to give them something for nothing.

The electric companies, after exhaustive study, say that power would cost preference customers the same whether delivered over the combination system or an all-Federal system. I doubt that conclusion; not that I question the elec-

tric companies' engineers, but they assumed that the Bureau of Reclamation can or will build this or any other project within its original cost estimate. The companies have offered a firm contract for wheeling the power, so under their proposal the cost of transmitting power would be fixed. But the Bureau does not know what it is going to cost to build their system, so their costs might be higher. Besides that, the Bureau plan does not take power to all of the delivery points of preference customers that the company plan does. So, either the Bureau would have to build additional lines not now contemplated, the preference customers would have to get additional Federal funds to build to the Bureau delivery points, or the electric companies would still have to transmit power from the Bureau system to the preference customers, any one of which methods would cost the preference customers more money than it would under the company proposal.

Whether the Government is paid back its loan on the 50-year basis required by law depends on whether the Bureau lives within its cost estimates, which would be unusual, and not upon the companies wheeling power on a fixed contract price.

Another heading in this release is "No Ceiling on Utilities Wheeling Charges." It says:

> No only will the proposal, as it stands, cost these power consumers more money than the proposed Federal system, but there is no guarantee that the cost of transmitting this power over the privately owned lines will remain at this level.
>
> A study made by the Bureau of Reclamation, and a study made by two private consultants indicate that the private utilities could not make a normal profit on their present proposal to carry this power over their lines at the same cost to the customer as would be charged under the Federal system.
>
> Once these lines are built, it would only be necessary for the utilities to prove they were not making a normal profit in order to gain a rate increase. There is no way of determining at the present time how much this increase would cost the power users in the five-State area.

Now to answer a part of these assertions let me say once again that the electric companies have offered the Government a firm, fixed price contract.

You do not make a firm contract and run in later and say, "I am not making any money so I have to increase the price." Furthermore, there is no place on record that I know of where any State utility commission has told an electric company it had to abrogate its contract with the Federal Government. So I would say there is much less likelihood of rates being raised to consumers because the companies had put too low a cost on wheeling, than raised by the Government because the Bureau had underestimated its costs.

I see this release drags the consultants into the picture again. They were supposed to have found along with the Bureau that the electric company proposal would not permit them to earn a normal return. Well, from my correspondence with the consultants I seriously doubt that they even considered this phase of the problem. If they did, they certainly did not consult with the companies.

Admittedly someone who was not fully conversant with the problem could, with a degree of justification, assume that the companies could not build a system solely for the purpose of wheeling Federal power to Government customers and make a normal profit at the rate which the companies have offered the Government. But the thing that seems to have been forgotten is that the companies are now serving the area over which the Government power is to be distributed. They have lines now and are going to have to build additional lines to take care of the future requirements of their own customers. There is a lot of difference in cost between advancing construction by a few years and using normal excess capacity in transmission lines to carry some power for others, and in having to build a complete new system to do the job. That is the position the companies are in. By 1980 they calculate that 94 percent of the power consumed in the area will be served by them and only 6 percent by the Government.

Another caption reads "No Savings to Taxpayers Either." Under this heading the following statement is made:

> Any money spent by an agency of the Federal Government is a budget expense and must be derived from the Federal budget. In this case money for the payment of the utility wheeling charges must therefore be appropriated from the funds.

Mr. Speaker, what do you think of that? Do these people think they are talking to a bunch of imbeciles? These people should read the act. No appropriation has to be made to pay wheeling charges; these costs are paid from the basin fund and if the Bureau does what it is supposed to do, the cost of wheeling will be included in the selling price of the power and returned to the fund. It is a bookkeeping transaction only and no cost to the taxpayer.

By the above statement these people would have us believe that the taxpayer was footing the bill for wheeling. You seldom encounter such a deliberate attempt to deceive.

The taxpayers certainly do save something. They save having to spend $136 million or more which would further unbalance an already heavily unbalanced budget.

The last caption on this release reads: "Delay Gives Utilities Control." Then it says:

> The private utilities are interested because by building a part of the transmission system, they will be able to control the sale of the electricity to be generated by the CRSP with a relatively small investment.

Mr. Speaker, by what sort of added thinking could anyone make such a statement as that? The Government would generate the electricity, it would price it, it would say to whom it was distributed, how much and at what time and it would collect for it. The companies would act merely as a transmission agent of the Government. How would that give them any control over the sale of the electricity?

The final caption of this release says: "Your Congressional Representatives Would Appreciate Your Views." "Write Now." At the bottom of the page is this statement:

> For more information, write Harvey F. McPhail, executive director, Colorado River Basin Consumers Power, Inc., 343 South State Street, Salt Lake City, Utah.

I have another release here, Mr. Speaker, printed in the Lamar Daily News of Lamar, Colo., on May 23, 1961. It is headed "Are Holding Company Monopolies Being Revived?"

I am not going to dissect this release as I did the one just previously, but I do want to make two or three observations.

It drags out the skeletons of Insull and Electric Bond and Share of the holding company days and starts rattling those bones again and insinuates that is what we may be building up to if we do not spend the taxpayers' money to build these Colorado River lines. I thought that body had been buried long ago. Does the Bureau's and this Colorado River Basin Consumers Power, Inc. contentions smell so bad they have to go back to the grave and dig out skeletons to try to frighten us?

This release was prepared by the Colorado River Basin Consumers Power, Inc., the organization for which Mr. McPhail is executive director, so I assume it was prepared under his direction.

The release has a notice in the lower righthand corner which reads:

> This Lamar Daily News editorial raises a question of concern to every homeowner and power customer. If you are concerned about this trend back to the evils of Insull and the holding companies, write your opinion below and mail this entire reprint to a congressional representative. (If more space is needed, use the reverse side.)

Then there is space for people to write to Members of Congress. I am sure many of us have received this reprint with some organized write-in on it.

I have more of these releases which I am not going to take the time to discuss in this speech, but what I have just brought to your attention will give you a good idea of the type of campaign the Bureau of Reclamation and preference customers are carrying on in their efforts to pressure to Congress to appropriate tax funds for this all-Federal transmission system.

Mr. Speaker, these releases are the most disgraceful attempts at propaganda I have ever seen put out. They are an insult to the people and a reflection on the intelligence of Members of Congress to whom they are sent. This Mr. McPhail who seems to be heading up these activities is an ex-Assistant Commissioner of Reclamation for Power. I wonder if he got his training in writing false and deceitful propaganda during his many years of service as an employee of the Bureau of Reclamation? I also wonder how many more of his stripe are still employed by the Bureau? If his is the philosophy prevailing in the Bureau, it is no wonder that we on the Interior Committee have such a difficult time getting honest answers when examining Bureau proposals for authorizations.

Another thing, Mr. Speaker, Mr. McPhail, who I assume is a paid employee of this Colorado River Basin Consumers' Power, Inc., has been running through the Halls of Congress buttonholing Congressmen in behalf of these Federal lines. That is lobbying in my book. I am going to have to check up and see if Mr. McPhail is registered. The fact that he is an ex-Federal employee representing some preference customer gives him no right to violate the lobby laws.

Mr. Speaker, this whole mess makes me sick at heart when I realize what our executive agencies and our legislative processes are degenerating into. If there was ever a Federal agency that should be exerting a forthright and honest attempt to develop our water resources for the benefit of our arid western lands, it is the Bureau of Reclamation. But, instead of that, we find it is a Federal agency crusading for the development of subsidized, tax-exempt Federal power for the benefit of a small minority of electric consumers. A crusading agency which seems to join with other Federal power proponents in the philosophy that the end justifies the means—a philosophy that disregards engineering and economic facts—a philosophy that resorts to misleading and actually false statements in order to gain an objective. This, Mr. Speaker, this is not the American way. I think the philosophy and methods being employed by these Federal power proponents, including the Bureau, are going to do irreparable damage to the development of our Western States, and as a matter of fact to the very moral fiber of our Nation.

A great many of us from the South, East, and Midwest have stood squarely behind reclamation for many years. We have continually supported the reclamation of arid lands throughout the 17 Western reclamation States. We have voted to spend hundreds of millions of our constituents' tax dollars to build these reclamation projects. We have freely and willingly authorized these projects for the development of arid lands. But, Mr. Speaker, we are not going to continue to authorize projects and appropriate funds for the Bureau of Reclamation to construct a Federal electric power empire in the reclamation States. The Burns Creek development and these upper Colorado River project transmission lines are not reclamation at all. They are simply a part of the Bureau plan for a Federal power system covering the reclamation States. I would advise you gentlemen interested in irrigation in the reclamation States to look over the vote on authorization of the upper Colorado River storage project. Yu will see many names in the "yea" column that would never have voted for the project if they had thought it was a power development. I voted against it because, after close examination in committee, I thought electric power was the predominating feature. Now that the Bureau insists upon spending over $136 million unnecessarily for transmission lines that local capital is ready, willing, and able to provide, I am more convinced than ever that my analysis was right.

You reclamation State people are asking quite a lot when you ask the rest of the country to invest tax dollars in developing land to grow crops when we already have an oversupply of food and fiber in this country. You are asking a lot when you ask the rest of the country to finance reclamation of arid land at a cost of several hundred or up to thousands of dollars per acre when the land is not worth more than $200 or $300 per acre after it has water on it. You are asking a lot when you ask the rest of the country to finance reclamation of any land in the arid West when just as productive land is laying out of cultivation in other areas—in fact, when landowners are being paid by the Government to take land out of cultivation.

Yes, you have been asking quite a lot from other sections of the country, and you have been getting it. Although you have only 23 percent of the votes and pay only 24 percent of the Federal taxes, you have been getting your reclamation projects financed out of tax funds. You have had appropriated over $4½ billion for reclamation. The rest of the country has been going along, because we know that you must develop your water and irrigate your lands if your States are going to prosper, and we want you to prosper.

You tell us that the money will all be paid back, but let us not be deluded by that statement. No interest is paid on money invested in the irrigation features, and interest paid on the money invested in power facilities is below the rate paid by the Treasury. So, even though the borrowers pay back the money loaned them by the Government, the taxpayers will lose in interest far more than the original investment cost.

As I said before, we have been helping you willingly, but if this Bureau of Reclamation is going to turn into a Bureau of Power you are going to lose our help. We know you need some help on your irrigation, but power is something else. Your people are perfectly capable of taking care of their own power supply, and I for one expect them to do it. These Colorado River project lines are just another example of people coming to Washington for help that they do not need. My Pennsylvania constituents are getting sick and tired of seeing their tax dollars doled for unnecessary Federal expenditures, and I am sure people in other sections of the country are also.

I have been a member of the Interior and Insular Affairs Committee for a good many years. I have traveled over the West and personally inspected many of your water developments. I know what these developments mean to you and I know that development and prosperity in our Western States is good for the country. For that reason, I have gone along and supported many of your water developments when I knew in my heart they were marginal at best from a financial standpoint. I will continue to support true reclamation projects without using the jaundiced eye of a banker when examining their economic feasibility. But I will tell my friends from the reclamation States right now, and I am sure that I speak the sentiments of a great many of my colleagues from other sections of the country on both sides of the aisle, that I am not going to agree to spending tax funds to assist the Bureau of Reclamation in its scheme of building a Federal power empire in the reclamation States. And I will tell you another thing, if you want to get future reclamation projects approved you had better use your influence to break up this unholy alliance between the fanatical public power zealots and the Bureau of Reclamation who are using the reclamation program for the promotion of subsidized Government power.

OPERATION SURVIVAL

The SPEAKER pro tempore. Under previous order of the House the gentleman from Ohio [Mr. ASHBROOK] is recognized for 60 minutes.

Mr. ASHBROOK. Mr. Speaker, I yield to the gentleman from Indiana [Mr. BRUCE].

Mr. BRUCE. Mr. Speaker, before a group of us begin with a piece of work that has taken a great deal of time, I certainly would like to acknowledge the cooperation and the helpfulness of the minority leader, the gentleman from Indiana [Mr. HALLECK], who has certainly won the gratitude of the freshmen Members of Congress, in particular. We do know, every one of us, that without his counsel and his aid we would not be serving on the wonderful committee assignments that we have.

Mr. Speaker, there has been a gathering together, as always takes place in any session of Congress, as I understand it, of different groups which get together and exchange ideas and study issues. This is true of this session as well. A group of freshmen has been meeting regularly since the beginning of the session, not as what, in political terms, would be called a "Young Turk" movement, in any sense of the word. We do not intend by insinuation or action to create a separate unit within the Congress but, rather, a means of discussion. This has been done with the knowledge and the support of the minority leader, the gentleman from Indiana [Mr. HALLECK]. To him, in behalf of the gentlemen who will participate in our subject of the afternoon, may I express our gratitude.

This is Operation Survival.

Several first-term Congressmen are joining in this effort to paint, in what we believe are realistic terms, the issues that are vital regarding the survival of our constitutional form of government.

There is no presentation based on hatred, personalities, or political expediency. It is rather an attempt by us to pinpoint, in a limited time, the areas of vital concern and prime importance in our struggle for survival in a world of chaos.

We believe, that though conditions change and circumstances vary, there are valid truths that remain unchangeable. We believe that these truths are as applicable today as they have been throughout history.

We believe in progress. We believe that the only true hope for progress lies in the strengthening of our free society

of constitutional government with its preservation of the delicate balance between the legislative, judicial, and executive branches of government.

We believe that liberty is founded upon the principle enunciated in our basic documents, proclaiming the first real revolution in the history of mankind.

We believe, as stated in the Declaration of Independence, "that all men are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness."

We reject the failure of the past, again illustrated throughout history, which holds that government can be the grantor of rights or the guarantor of individual happiness.

We believe that it is the function of government to protect the inherent natural rights of individual men, that it is the function of government to say "Stop" to those who would infringe upon the natural rights of any man—be the aggressor individual, corporate, or a group of individuals merely associated in a common action.

In short, we believe in liberty. We believe in the right of free choice, in the right of individual man to succeed, to fail, to change direction, to travel freely, to freely express himself as an individual, to associate himself with other persons for group action within the framework of the U.S. Constitution.

We reject the Marxist theory of the class struggle. We reject the Socialist dogma which has its roots in the "Communist Manifesto," as written by Karl Marx and Friedrich Engels.

We reject the philosophy of government as the provider of all good things.

We thrill to the words of Thomas Jefferson who warned:

> Put not your faith in man; this is a government of laws, not of men. Bind them down with the chains of law.

We agree with Lincoln in his statement:

> If there is anything which it is the duty of the whole people to never entrust to any hands but their own, that thing is the preservation and perpetuity of their own liberties and institutions.

We are apprehensive at the bloated growth of Federal control over the lives of our citizens. We find abhorrent the fantastic expansion of the Federal bureaus. We observe that Federal Government is rapidly ceasing to be the servant of the people and is rapidly becoming its master.

We witness the perversion of words where liberty becomes license, where collectivism is disguised as progress, where subsidies are substituted for initiative, where dependency replaces responsibility.

The tentacles of the social planners, who possibly out of the finest motives, but lacking in the understanding of liberty and the lessons of history, attempt to impose their ideas of what is good for their fellow man upon their brethren, thereby falsely assuming that they are helping us to move ahead into a glorious new tomorrow.

The pages of history cry out the warnings that this brave new tomorrow may well be one of common misery, slavery, and ultimate death for those who believe in individual liberty.

We offer no material benefits as a largesse of government; we know that we can give nothing in a material way that we do not first take from the people.

We have dedicated ourselves in an attempt to restore a balance in government, a withdrawal of Federal control from the multiple intrusions into the lives of the people, a pledge to fiscal integrity, moral responsibility, and sound progress based upon constitutional liberty.

There may be those who say we issue a siren's call, that liberty is not in danger, that we make "much ado about nothing."

To all such, I say, "Listen."

Mr. ASHBROOK. Mr. Speaker, I yield now to the gentleman from Wisconsin [Mr. SCHADEBERG].

Mr. SCHADEBERG. Mr. Speaker, It is my desire to discuss the spiritual basis upon which freedom, as we have known it in America, was born and nurtured. It is only as we understand the foundation upon which our freedom is built that we can hope that freedom can survive and be extended.

While I am a clergyman by profession and "calling," I am a bricklayer by trade. My father, now in his 90th year, was a building contractor who spent over 40 years in constructing homes and small business structures. I know by experience that no man who is knowledgeable in the field of construction would attempt to build a structure on other than a footing and foundation laid on solid ground and firmly anchored. Yet, it seems this is precisely what many sincere but obviously unknowledgeable proponents of freedom seek to do. They desire the beauty and utility and strength of the structure itself but are not willing to either take the time or make the effort to align it with the foundation on which it was destined to be built.

A brief insight into our national history indicates that the desire for religious freedom gave the initial impetus to the colonization of this vast expanse of wilderness of the New World. So precious was held this right to worship as a person pleased that our forefathers abandoned their possessions; severed themselves completely from the material security that was theirs in Europe and set sail—months later to disembark upon the shores of what is now Massachusetts.

It is of interest to note that our Pilgrim Fathers tried a form of economic collectivism for the first year in the New World based on the false premise that each and every member of the community had rights to an equal share of the produce raised and material benefits created. The record is both interesting and abundantly clear in its appraisal that this practice resulted in dismal failure. Learning from bitter experience that human nature is such that many will not produce according to ability, as long as their needs are satisfied without effort on their part, the following year, each man was entrusted with the personal responsibility of providing for the wants of his own family. Out of this developed the free enterprise system—or capitalism as we know it, which has produced the utterly fantastic standard of living, enjoyed by our people through the years. No other nation of people on this earth have provided so much for themselves and their children in so short a period of time. Along with this economic growth, there developed in equal measure as a natural outgrowth, the enjoyment of personal liberty and freedom, which is unmatched in the world.

However, the development would not have been made possible had it not been for the basic convictions that motivated our forefathers to leave their familiar surroundings and give up their precious possessions for this wilderness, in which they saw both a challenge and an opportunity.

What were these convictions? Where do we get the basis for assuming that we should be free to pursue our own course in life and determine our own destiny? It is found in the soul-searching and honest evaluation of the meaning of life, evolving from a deep-seated faith in God. It was first translated into the words of the Mayflower compact. Forty-one male adults signed that official historic document as their ship lay at anchor in what is now Provincetown Harbor. And what did the Mayflower compact have to say about their intentions in the New World?

It begins: "In the name of God, Amen." Then it continued by stating that they had undertaken to plant a colony for the glory of God, the advancement of the Christian faith, and the honor of their king and country; in the process of which they would frame just and equal laws for the general good of the colony.

They made no apologies for their faith in God. They testified that their actions and efforts were directed among other things to the glory of God and the advancement of the Christian faith. It would be well for those who make apologies today for daring to allow their Christian convictions to enter into their political decisions to take note of these words of faith penned by their political forebears. To be sure, we firmly believe and rightly so, that there must be separation of church and state—but let me bring to your attention that this by no means should be interpreted to mean the divorcing of one's faith from his responsibilities as a citizen or a representative of the people. I submit that any action taken at any level in government that would result in forcing our citizens to departmentalize faith and duty and make it appear that to serve one's God and one's country are diametrically opposed responsibilities, which cannot be made compatible, is an action that breaks faith with the very foundation of our national structure.

It is no secret that we, as a people, are engaged in what is loosely called a cold war in which we are struggling to win the mind and loyalty of people from

all parts of our world to accept our concept of individual rights and human dignity. This concept is not just something we cooked up in opposition to the Communist threat to our way of life. It has its roots down deep in our national traditions and finds its source in our belief about the character of God.

We who are Members of the House, along with the people we represent, become so busy with the day-to-day political decisions we must make that we fail, at times, to understand or to appreciate the real nature of the conflict in which we are engaged. We commonly accept the cold war to mean a political war between the Soviet colonial empire and the United States of America. We vaguely assume that the struggle is centered around the desire of one to gain political power over the other. To be sure this is true in terms of the Communist effort since in a totalitarian system, complete control over the individual is a prerequisite for control in fact. Tragically true is the fact that those who would seek to socialize our Nation also know they must gain control over the individual if there is to be socialization in fact. At times, it seems apparent that those who tend toward socialism in opposing communism find their opposition not to the fundamental principles of the Communist order with which they share a common source in Marx and Engels but oppose only the means by which communism seeks to gain its goal. Men of faith in God who accept the philosophy of socialism believe that a capitalist society can be reformed and the transition to a Socialist society can be a peaceful one.

Godless men, however, prefer more direct methods. They believe reform of capitalism is an impossibility—therefore, there must come violent revolution with all that accompanies this physical upheaval. They believe that it is only out of the complete ruins of capitalism that the Socialist state can be built. There are two common denominators—however, in both socialism and communism the individual loses most of his freedom and dignity and the state determines his destiny. Attractive and appealing as a Socialist state may appear to those who want to rule and those who want equal benefits without equal effort—the end result will be a return to a form of feudalism for in a Socialist state, the framework of law is set up under which unscrupulous leaders and selfish politicians cannot only come into power but perpetuate themselves in office. What is first considered humanitarianism degenerates into beastiality of unbelieveable proportions. Contemporary history provides us with the facts for it was a Socialist Germany under which Hitler came to power and it was under what is called the Union of Socialist States of Russia that Stalin and Khrushchev came to power. All share deeds of inhumanity to man that defy description and make even the dark ages appear as sunlit in comparison.

Let me return you to the century and a half that followed the landing of our Pilgrim Fathers at Plymouth Rock. These were years of hard labor, sacrifice, suffering, expansion, and stabilization. The Colonies accustomed to self-government reacted violently against taxation and exploitation which erupted into the Revolutionary War.

Clarifying their beliefs and purposes, the Declaration of Independence was authored and signed. It spelled out in clear unmistakable language their firm belief in the concept of human dignity and individual rights:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.

Here is no anemic reference to man as being a mere accident of nature whose sole purpose is to serve the master—state—or to be pawns moved by the skilled hands of politicians on the chessboard of personal daily life. No—man is created by God to be free, with dignity and honor. It is the Creator who has endowed the individual with unalienable rights, not government or the political party in power who doles out special privilege or the right even to make a living. Because the Creator and not the state is supreme, the individual has rights which the state cannot and dare not abridge. These rights are self-evident. They are many but among them are numbered first, the right to life—not merely the right to make a living but the right to make a life; second, the right of liberty—to express oneself in keeping with his talent and personality, not be restricted by measures of every kind that prevent him from deciding his own destiny; and, third, and the right to the pursuit of happiness—and here, may I point out that it is the right to pursue happiness which is guaranteed—not happiness itself. Happiness is not an end in itself, therefore, it cannot be guaranteed by any amount of governmentally administered material welfare and security. Happiness, like peace, is a by-product which can come only to those who are free to enjoy the fruits of their successes; to learn by their failures and to progress according to their ability, ambition and determination.

Mr. MARTIN of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Nebraska.

Mr. MARTIN of Nebraska. Mr. Speaker, historically in the United States, we have always conducted our educational system at the local level. This has been true from the days of the Pilgrims. Through this system, which has existed in this country for over three centuries, we have developed the finest educational system of any nation on the face of the earth.

The responsibility for the education of our youth was rightly considered a responsibility of the local government, and this philosophy and belief has been in existence throughout our history.

Now we have a greatly expanded Federal Government, whose departments long for an expansion of their duties, and more control over the very lives of our citizens. This is particularly true in the Department of Health, Education, and Welfare, as exemplified by the numerous bills proposed and written by that agency in the field of education.

To prove this point, I would like to refer you to "A Federal Education Agency for the Future," published in April of 1961 by the Department of Health, Education, and Welfare, in which booklet under appendix B, on page 49, they list their future programs under 11 points, and I quote:

> 1. Grants to States for elementary and secondary education.
> 2. Grants for higher education physical facilities.
> 3. Grants to States for vocational education.
> 4. Increased aid to graduate education.
> 5. Expanded educational research in all areas, including graduate education.
> 6. Strengthening of educational statistics programs.
> 7. Increased financial assistance to students for higher education.
> 8. Increased financial assistance for teacher education.
> 9. Broadening of Federal interest in curriculum and improvement of instruction.
> 10. Marked increase in international educational assistance.
> 11. Broadening of Federal interest to include educational activities and services outside the structure of organized education.

I note further these three sentences in the pamphlet, and I quote:

> The committee will recommend in this report that the Office of Education assume new and important responsibilities.
> The committee foresees an extension of the active Federal role in education.
> Policy role in the national community: In addition to the Federal level of public policy determination, the Office has much concern with policy matters at the State and local levels, and in higher education institutions.

You will note, Mr. Speaker, that this sets forth in extremely plain words that the Department of Health, Education, and Welfare plans on taking over complete control of our educational system in this great country of ours.

Let me go into further detail as to the structure of the future planning of HEW, as taken from their own leaflet. They plan to establish:

First. The Bureau of Higher Education assistance programs.

Second. The Bureau of State assistance programs.

Third. The Bureau of International Education: (a) Technical assistance programs to foreign countries, (b) a division of educational exchange, and (c) a division of international studies.

Fourth. The Bureau of Educational Research and Development: (a) The center for higher education, (b) the center for secondary and elementary education, and (c) the center for continuing education and cultural advance. First, a library service branch; second, adult education; third, cultural affairs branch—arts, museums, galleries, theaters, music, and so forth; and, fourth, a special educational services branch—juvenile delinquency.

And I note from the summary of the pamphlet:

> The Committee on Mission and Organization recommends a new and significant role for the Federal education agency in the

1960's. This agency must, over the next decade, not only perform its traditional functions of data gathering, analysis, and dissemination; research; and services to organized education. It must also prepare itself to assume larger responsibilities in carrying out Federal policy through the administration of operating programs. It must assume a new role, speaking within the Federal Government for the long-term interest of education and it must render assistance in the development of public educational policy.

There are those of us, Mr. Speaker, who have maintained that involvement of the Federal Government in our local schools would eventually mean Federal control, and from this summary, written by the people in HEW, it is specifically set forth that they must render assistance in the development of public educational policy.

It has been stated that it is necessary for the Federal Government to assist with the building of classrooms because of the dire need. Let me give you some statistics in this regard:

Classroom construction in the United States over the past 5 years has averaged 69,860 per year.

Classroom construction over the past 10 years has averaged 62,600.

The number of classrooms needed annually for net enrollment increases during the past 5 years is estimated at 40,000 per year. For the 1960–64 period, 36,700 per year; and for the 1965–69 period, 20,000 per year.

The average estimated annual increase in students during the past 5 years has been 1,200,000 per year. During the next 5 years, it is estimated to be 1,100,000; and during 1965–69, 600,000 per year.

Now let us look at this problem in another manner. In 1900 there was a total enrollment in our public schools of 15,503,000 with 436,000 teachers to handle this enrollment, or an average of 35.6 pupils per teacher.

In 1930 the enrollment had risen to approximately 25.5 million students and the number of teachers to 880,000, with the average number of pupils per teacher at 29.2.

Now let us look at the figures for 1960. There was an estimated total enrollment last year of slightly over 37 million. The number of teachers totaled slightly over 1.5 million, or an average number of pupils per teacher of 24.4 Thus we can see that from 1900 to 1960 the average number of pupils per teacher has decreased from 35.6 to 24.4, and even during the last 7 years this decrease has amounted to 2.4 percent.

Communities throughout the Nation are doing the job and are constructing classrooms, and it is a poor myth that it is necessary for the Federal Government to step in to alleviate a shortage of classrooms in our public schools in this country. The facts do not justify these conclusions.

In conclusion, let me reiterate, where you have Federal programs, you have Federal control. When governmental problems are handled at the local level, greater efficiency results and the needs of the community are more nearly reflected in the actions taken. This philosophy of having the Federal Government take over our educational system is wrong and is false. The people throughout the country are not calling for this change, but the demand is coming from a few bureaucrats and socialistic planners, whose philosophy is that the Federal Government can tell its citizens how they should educate their children.

The Office of Education had a total appropriation in 1950 of $32 million, in 1960 the office in the Department of Health, Education, and Welfare had an appropriation of $464 million, an increase of approximately fifteenfold; and if all of the programs were enacted which they recommended in this session of the Congress, this 1960 appropriation would be trebled.

If we are not most careful, Mr. Speaker, this octopus of a Federal Government will devour its citizens within a very short period of time. In order to survive, we must be ever alert to these grave dangers.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Nebraska. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Mr. Speaker, it has been my pleasure as a member of the House Committee on Education and Labor to serve with the gentleman now in the well of the House, the gentleman from Nebraska [Mr. MARTIN], during this session of the Congress and during the past 8 months. As a result of our association on the committee, I have learned to respect the gentleman for his profound fairness. I am glad the gentleman referred to the booklet "A Federal Education Agency for the Future" and I wish to assure the gentleman that I share his concern about the grandiose plans laid out in this booklet, if in fact they were ever permitted to be carried out. However, because I know the gentleman is very fair, may I ask him would it not be in keeping with his position of fairness to incorporate in this record the fact that this booklet, while published in April 1961, actually had been prepared pursuant to the instructions and guidance and directive of the former Secretary of Health, Education, and Welfare in the previous administration, and so far as I know there is nothing in the record which would indicate that the present Secretary of Health, Education, and Welfare, Mr. Ribicoff, fully supports or shares or agrees with the views set forth in this booklet; is that a fair question?

Mr. MARTIN of Nebraska. Except in this regard, that the beginning of the plans for the preparation of this book were begun about a year ago, approximately, and the final draft, the final approval of the words that were written into this pamphlet were concluded and written after the 20th of January.

Mr. PUCINSKI. One can then conclude that certainly it becomes the responsibility of the Members of the Congress, such as the gentleman in the well and myself and the rest of us here, to constantly maintain a vigil over these various departments of Government that would try to usurp prerogatives and powers that belong to the legislative branch. But, I am happy to have the gentleman admit that this was a program that was started under a Republican administration. I will join the gentleman in making sure that this broad program of bureaucracy is never put into effect so long as we keep it on a basis of recognition that these abuses can occur just as easily and just as eloquently and just as conclusively under a Republican administration as they can under a Democratic administration.

Mr. BRUCE. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Indiana.

Mr. BRUCE. In concert with what the gentleman from Illinois has said, I can assure the gentleman, who is also a member of the same committee as is the gentleman from Nebraska and myself, that our concern as a group of freshmen Congressmen is not in fixing political blame either on Democrats or upon Republicans but rather on what the gentleman has pointed out, the tendency of bureaucracies to creep out and get more power. And, you can be assured that as far as this group is concerned, regardless of which administration or who is in power in the White House, as long as we are in the Congress, we shall fight this extension no matter which party happens to be on the receiving end of it.

Mr. PUCINSKI. Mr. Speaker, if the gentleman will yield further, the gentleman from Indiana will agree, therefore, after sitting in the committee and listening to the testimony of the department, that certainly if anybody has shown an awareness of this problem and tried to reduce this complete control by bureaucracy, the present Secretary of Health, Education, and Welfare, Mr. Ribicoff, has appeared before our committee and repeatedly shown us examples of where he is trying to do exactly what the gentleman is speaking of. Is that a fair statement?

Mr. BRUCE. I would say, not wishing to trespass further on the time that other Members are waiting for, that I do not agree with the gentleman on this point. I believe that both in the Department of Health, Education, and Welfare and the Labor Department and elsewhere there is an unprecedented grab of power.

Mr. PUCINSKI. Mr. Speaker, if the gentleman will yield further, the gentleman spoke of Federal controls following the Federal aid to education, and lamented the fact that there were efforts made to try to bring Federal aid to these local communities. I wonder if the gentleman would be good enough to explain to me how it was that the gentleman joined an overwhelming number of his own party in approving legislation providing $400 million to local school districts all over America for the payment of teachers' salaries, for the payment of current operating expenses, for the payment of construction. What distinguishes these impacted districts from districts like I have in Chicago which are not impacted, which also need assistance, because the local taxpayer is

unable to meet the problem of educating the masses of youngsters? I often wonder, if the gentleman would be good enough to explain to me, how can we say in one area there is no Federal control and in another area, ipso facto, Federal control will follow if we provide Federal funds?

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield at that point?

Mr. ASHBROOK. I yield.

Mr. CURTIS of Missouri. First let me commend the group here for this presentation. I think it is excellent. I emphasize what has been said here, that this is not necessarily a Republican or a Democratic partisan approach. I have listened carefully; I have seen none of it, but rather a factual approach. I think we do have to recognize in this game there is a third political party, the bureaucracy, over which both parties have lost a great deal of control.

I think we do have to direct our attention to that. It becomes a partisan issue depending on which of the two recognized political parties it is that front with the schemes and plans of this third group, the bureaucracy and, therefore, possibly would merit further discussion.

One final comment, I may say, just to answer the gentleman from Illinois, that the theory at any rate on which the impacted school area bill was started was that this was in lieu of taxes. This I think is a legitimate tax theory, but I must concede it has gone way beyond that point.

Mr. BROMWELL. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Iowa.

Mr. BROMWELL. Mr. Speaker, when, on yesterday, we read in the CONGRESSIONAL RECORD that an able and most distinguished Member of the other body had publicly questioned the adequacy of the Constitution in these times—daily CONGRESSIONAL RECORD, page A6967—we should have been alerted but not shocked.

The storm began to gather some 30 years and more ago when an accommodation was sought between then existing institutions and stated economic and social needs, and was found in wholesale delegations of authority to the executive branch of the Government. Born of experimental doctrine, misconceived expediency, and political inertia, aided by broadened constitutional interpretation, forced by two great wars and heightened international responsibilities, the powers of change have gathered strength. It has remained for 1961 to see the doctrine of checks and balances challenged by a high official of the Government of the United States, in an open questioning of the wisdom of the legislative process.

The President is hobbled in his task of leading the American people to concerted action—

He is quoted as saying—

by the restrictions of power imposed on him by a constitutional system designed for an 18th century agrarian society far removed from the centers of world power.

Mr. Speaker, it has been well said that constitutional government is the greatest contribution of America to civilization. The greatest of all constitutions, though it may need defense, needs no justification by those whose offices are its creatures. No political document has ever served the human race as well. But the great principles which it represents need constant restatement by the expressed will of our people.

The executive, legislative, and judicial functions were institutionally separated not as a political whim of the times but as an engine whereby freedom would be forever preserved to the people. Each branch was to check and balance the other two, lest any become despotic. In the Convention of 1787, this separation of powers was regarded as an obvious axiom. It is in 1961, in fact and law, an obvious axiom.

What is now an important possibility is that the executive branch shall assume control of the Government by becoming increasingly free of legislative restraint. The people need fear no sudden amendment which would eliminate the effectiveness of the Congress to control it. What is to be feared is that the trend of the last 30 years should continue with increasing acceleration to the point where Congress authority becomes a hollow form and the Congress as a practical instrument shall become vestigial.

Mr. Speaker, the executive branch of the Government of the United States has two elected members, a sample subject to confirmation by the other body, and just under 2½ million employees who are not subject to election, who are not subject to recall and who are not subject even to confirmation, however perfunctory. Many of these employees rise in their duties above the merely administrative as policymakers. Power delegated is redelegated. They control, quite literally, the lives and fortunes of millions of the citizens whom we have been elected to represent. Insulated by faceless anonymity from public opinion they are denied the benefit of constant direct contact with the people, which is certain knowledge not only of the opinions but of the faith and will of America. Oblivious, they are guided by polls and statistical indexes in air-conditioned comfort over the coffee cups.

We who came recently from the people have found ourselves surrounded by a strange cult of superiority within the executive arm of the Government, a cult which is not content only to lead, advise, and execute laws expertly—a function, by the way, in which sincere and humble men have often been able to find fulfillment—but which insists upon governing, which is presumptuous. This cult has been reported by the press to be impatient, not to say petulant with the Congress, slow to respond to inquiry, disdainful of the restraint of law, careless not only with the form but with the substance of carefully established institutions. It insists not only on its own draftsmanship of laws, but accepts the language of the legislature with animosity.

Acceptance of one's own superiority, Mr. Speaker, is a highly dangerous thing in a nation dedicated to the proposition that all men are created equal. From this acceptance all sorts of unreal rights flow, including ultimately the right to rule by a sort of deterministic divine right which, it need not be added, is the direct contradition of the first principles of this Republic.

Some 4 months ago, I caused to be inserted in the CONGRESSIONAL RECORD an editorial article which asserted that one of the aims of certain leaders of the present administration was the revision of the basic structure of the Republic. As the pattern of official acts formed to prove the assertion, the attention of the Congress was called to the tendency. Now, as we near the end of the first session of the 87th Congress, the direction has been so swift and apparent as to shock the observer, let alone the lover, of representative government. No single area of legislation has been as important as the obvious philosophy which unifies all acts in general public policy. Beyond reasonable doubt, it is the policy of the present administration to advance the power of the executive branch of the Government at the expense of the power of the people and their elected legislators. Again and again the price of doing political business with this administration has been surrender of the power of the people to the Government, of the power of the elective to appointive officers. It is one thing for a strong executive branch to seek to prescribe the legislative program; it is quite another for it to prescribe a program which permanently weakens the legislature. At this point a reasonable legislature and a reasonable executive leave common ground.

Mr. Speaker, as we entered this week, this Congress has enacted 190 public laws. Not one has directly extended political freedom to the people. Quite to the contrary, 57 times the power of the people has been surrendered to mere employees. Fifty-seven times this Congress has, in the name of the people, abdicated to a querulous and importunate bureaucracy. Fifty-seven times it has listened to the fundamental falsehood that those who govern know more than those who are governed—that power in the hands of an elite few will guarantee the rights of the many. In each instance of major legislation, in mutual aid, in housing, in area redevelopment, in agriculture, in minimum wage legislation, the price of action has been to expand the power of the executive.

An obedient majority has created new departments and agencies; it has extended power over the States and individuals by the torturing of the interstate commerce clause. It has extended blanket authority. It has granted fantastic appropriations. It has approved Treasury borrowing. It has granted authority for a period beyond the constitutional term of this Congress, or of this administration. It has added tens of thousands of persons to the bureaus. It has raised the debt ceiling for our children and grandchildren. It has provided the means to pay political lobbyists to harass us. It has raised salaries beyond the provisions of civil service. It has succumbed to government by press

agent, minority pressure groups and the creation of phony images of executive beneficence.

We have been hounded by the naive notion that because power rightly resides in the people it can be concentrated without fear. The problem of peoples under tyranny is not that they lack the natural right of self-government; it is that they are prevented by concentrated executive power from exercising that right. Every strengthening of the Federal executive is a weakening of the legislatures, of the States, or of the people. Where is there security in the notion that power granted piecemeal by legislators is a less serious loss than power torn from the people by revolution or a coup d'etat?

One of the most disquieting activities of the executive branch has been the anxious tampering with dissent. In dissent is to be found the seed of progress. The possibility of advance at any time is the exclusive property of a sensitive minority. If the truth is illuminated and published in due course it will be accepted by the people and when it is accepted by the people, Mr. Speaker, this House will know of it. And when this House knows the truth it will place it among the laws provided, and only with this provision, that the Congress retains its power.

We have been distracted by our external enemies from giving what I believe to be necessary attention to this swiftly striking policy, this most important of public affairs. Underlying all our external defenses is the repeated question of how we shall meet our enemies and with what, whether we shall meet them for the record of history as free men, armed with free institutions and a fighting faith, or as the mercenary troops of professors on horseback.

Now there is no question, Mr. Speaker, of the eventual victory of freedom in the world. The question is how long and how dark the intervening days shall be; how quickly and how efficiently we shall act; how clearly our message shall reach those who wait; how certain their faith shall become by our example. We know this—that freedom will prevail because of what we as a people do in the voluntary expression of our united energies; not because of what one group among us purports to do with some condescension for another. To follow the latter course is to postpone the jubilee. Freedom operates through institutions—one of which is the Congress of the United States through which the people speak. Might is of value only when it is on the side of right; right is on the side of the people and this, Mr. Speaker, unless it destroys itself, will always be the people's House.

ELECTRIC POWER: WEDGE FOR SOCIALISTIC ADVANCEMENT

Mr. BRUCE. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. ASHBROOK] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. ASHBROOK. Mr. Speaker, in no field do we see more of an effort to discredit the free enterprise system and establish Socialist-bureaucratic control than that of electric power. Socialists have always wanted to exclude private participation in this significant segment of our economy. The New Frontier has already shown that renewed impetus will be given to further socialization in this field. They have frankly embraced the welfare state as a so-called defense to communism.

If there is any question about the validity of the charge that antifree enterprise thinking is leading the Government to further encroachment into the field of business enterprise, consider this statement by James M. Landis before the American Bar Association on August 7, 1961, bearing in mind that Mr. Landis is the special adviser to President Kennedy on regulatory agencies. Mr. Landis points out:

> In other nations where socialization has taken the place of private development, governmental operation has become the substitute for regulation. With us a certain degree of socialization has already taken place. We see it in the fields of public power, of nuclear development, of international finance, of space exploration. Whether we fear it or approve it, its growth is patent.

On one thing I will agree with Mr. Landis. Socialism's growth is patent along the New Frontier, Mr. Speaker, unless a serious effort is made to curb this collectivist trend in the public power field and all areas along the broad attack line against free enterprise. Those who would give bureaucratic agencies an increased stranglehold on the private sector of our economy could well adopt the theme of a majority member of the other body who stated on August 11, 1961:

> Utility companies, because of the nature of their business are agents of the Government. They operate under franchise granted by Government.

Note well that statement "agents of the Government." Think for a moment of the consequences of such an attitude or expression. If electric companies—or any companies—are regulated, receive licenses or franchises from the Government, they then become "agents of Government," according to this philosophy. There is hardly an industry in the United States which would not come under this classification of "agents of Government," because of their relationship with the Federal Government. This would apply across the board—transportation, communication, or for that matter any industry covered by SEC, FPC, FTC, ICC, FAA, and so forth.

If these companies are, in fact, instrumentalities of the Government, then this could be construed as meaning that their employees are employees or at least in some subservient position of the Government. Such an attitude could seriously affect trade unions, stockholders, and everybody else. These statements are but a slight indication of the degree to which collectivists' ideas have crept into the thinking of many of the New Frontier's leaders. This attitude, if carried to its logical extreme, would mean that each and every individual in the United States is an agent of an all-powerful Central Government, just as surely as they are in Soviet Russia or Red China. It must be remembered that according to the American philosophy—a philosophy, I might add, which is not out of date or incapable of meeting the challenge of the space age—the government is the servant of the people, not the master of the people. Those who press socialism under the guise of welfare statism are seeking unwarranted control over our individual and economic freedom.

Ever present is the overall tendency to overlook the basic truth which we should repeat and repeat and repeat: Congress, not the Executive, has the constitutional responsibility for establishing the policies which shall guide the Federal Government activities in developing and regulating the production of electric power in this Nation. Throughout past history, governmental activities have seemed to develop like Uncle Tom's Topsy, "They weren't born, they just growed." The executive department has also tried to take the policymaking prerogatives away from the legislative branch by usurping this power by unilateral action.

For example, earlier this year, February 14, 1961, Secretary of the Interior Stewart Udall announced what he called a broad new power policy which superseded the statement of Secretary of the Interior Douglas McKay, issued on August 18, 1953, which superseded the memorandum on power policy issued by Secretary of the Interior Harold Ickes on January 3, 1946. In other words, it seems that there has been a restatement of power policy on the part of the Department of the Interior and the Bureau of Reclamation with each major change in national administrations. The announcement of Secretary Udall prompted Representative WAYNE ASPINALL, of Colorado, chairman of the House Interior and Insular Affairs Committee, to remind the Secretary that the policy decisions in the Government are supposed to be exercised by the legislative branch.

Before examining what the Congress power policy should be, it would be helpful to trace briefly some of the background of the so-called power problem.

The commercial generation and distribution of electric energy in the United States began with Thomas Alva Edison's Pearl Street Station in New York City in the late 1800's. From that meager beginning, the industry has grown into the largest and most efficient supplier of electricity in the world today. By and large, this has been accomplished within the framework of the American system of free enterprise. However, a primary goal of Socialist planners almost from the beginning has been to have the Federal Government nationalize this vital industry.

The platform of the Socialist Party through the entire decade of the 1920's called for the complete nationalization of the power industry as the first step

toward the socialization of all key industries in this country. Repeated failure to get popular support for such a program prompted some of the brighter young men in the movement to begin suggesting a program of gradual socialization of industry rather than cataclysmic revolution. What might be called the "Mein Kampf" of this program of gradual socialization was an article which appeared in the Socialist newspaper, the New Leader, on March 12, 1927. The article said in part:

> We have made three attempts at control. We have set up municipal plants. Their status is changing and we should face that fact. Outside of the large cities they can rarely compete in rates and efficiency with the new plants being established by private companies having the benefit of the connected load of wide interconnections.
>
> We have tried regulation by State commissions. It has gotten out of hand.
>
> A third attempt to control the waterpower was in the Federal Water Power Act of 1920. Here we set down the principle that rates shall not exceed a return on the net cost of the money actually invested, that excess earnings shall be recaptured, and that the project may be bought at the end of 50 years by the Government at net cost.
>
> The fourth attempt is that of having Government corporations like the Port Authority of New York operating the power at Muscle Shoals, Boulder Dam, and on the St. Lawrence. With these developments furnishing cheap power, these great sections of the country will realize the advantages of public as opposed to private ownership.

When the plan for socialization by encroachment was published in 1927, an organization had already been working along this same line for 13 years; it was known as the Public Ownership League of America, which was founded in 1914. In 1923, the Public Ownership League published its program of action. The program, in part, called for the Government to—

> 1. Interconnect the 2,318 municipally owned electric light-and-power plants.
>
> 2. Tie into the system the 11 hydroelectric powerplants owned and operated by the U.S. Government in connection with the reclamation projects.
>
> 3. Enlarge and expand all of these units.
>
> 4. Develop as rapidly as practicable the hydroelectric power of all the rivers, rapids, and waterfalls of the Nation.
>
> 5. Coordinate the work of flood control, irrigation, navigation and hydroelectric development.
>
> 6. Coordinate steam-driven plants with the hydroelectric plants.
>
> 7. * * * buy out existing private plants to be built into the public superpower system.
>
> 8. Secure the necessary capital at low interest rates by use of public credit.

A careful examination of the succeeding years and the degree of Federal control of this industry clearly indicates the effect which the persistent chipping away of the Socialists has had on the generation and transmission of electric energy in this country. Many of the proposals which we hear today for the Federal Government getting deeper into the business of generating and transmitting electricity sound very much like a page out of the Socialist platform of yesteryear. This is a serious and dangerous trend which can and must be reversed. A long- and well-established principle of our Government has been that it should do for the people only those things which the people cannot do for themselves. Since it should be admitted that America's electric companies have proven themselves ready, willing, and able to meet the power demands for a growing and dynamic economy, the Government should not indulge in further encroachment in the electric power business.

In the mid-1930's there was a need in some areas for Federal assistance in getting electricity to the Nation's farmers through a program of low-interest loans for rural cooperatives to distribute electricity. Now we have 98 percent of the farms electrified and five out of six of the new customers added by the rural cooperatives are nonfarm residential and industrial customers. Serious questions should be raised as to the scope of the Rural Electrification Administration as a competitor due to the limited purpose for which it was organized and its tax-preferred status and ability to obtain Federal money at 2-percent interest for expansion. Obviously, those who favor all-out public power endeavor to use this generally popular rural force as a factor in selling their nationwide transmission grid. The new REA Administrator, Norman Clapp, recently announced establishment of a new policy to be followed by REA in the granting of generation and transmission loans to rural cooperatives that goes far beyond the traditional criteria.

The development of the so-called preference clauses in various Federal power acts has also been accomplished somewhat piecemeal without any clear overall guiding policy statement. For example, the original concept of preference, as contained in the Reclamation Act of 1906, related to preferred uses of power rather than preferred users of power. However, the preference clause has been changed in such a way as to create a preferred group of individuals in this country who receive subsidized electric power from Federal facilities. This group includes approximately 20 percent of the Nation's electric users and the remaining 80 percent must pay increased taxes to help support this small minority of power users. This preference concept has been turned into something quite different from its original intent to where it is now a device to foster the growth of public power.

There are many legislative proposals now pending before the Congress which relate directly on this question of Federal encroachment into the area of electric generation and transmission. While some of them may seem to be unrelated, there is most assuredly a pattern developing which will eventually accomplish the goals set forth by the Socialist Public Ownership League several decades ago unless this trend is countered. This pattern of Federal encroachment may seem to be a puzzle to many of our colleagues here in this body. But if one looks carefully into the development over the past few years, the pieces of this puzzle fall into place very clearly, forming a design so contrary to the concepts of our American system as to be almost unbelievable. The pieces of legislation so carefully drafted to give the impression of being unrelated to each other are merely additional facets of this master plan for Federal control.

For example, the Chicago Daily Tribune, August 9, 1961, reported that a secret meeting took place recently in the office of Secretary of the Interior Stewart Udall to discuss plans for the Federal Government to crisscross the Nation with lines carrying electricity from Government plants. The lines would stretch from Washington State to Vermont in one giant all-Federal transmission grid that would put the Nation's electric companies in a subservient position. The newspaper identifies those attending the secret session with Udall as "Clyde Ellis, former Arkansas Congressman who heads the powerful rural electrification public power lobby; Alex Radin, regional director of the American Public Power Association; and Andrew Biemiller, AFL–CIO lobbyist." The article goes on to say:

> They were so confident of victory * * * they made plans for 12 giant atomic nuclear reactor generators to be in the national grid, with Hanford to be the first.

The reference to Hanford was, of course, the proposal to add over 800,000 kilowatts of electric generating facilities to the new plutonium production reactor being constructed at Hanford, Wash. It will not be necessary to discuss the shortcomings of the proposal at this time because it was recently debated in depth here on the floor. The House of Representatives emphatically expressed its strong rejection of this public power proposal on two different occasions.

Hanford, however, is but one piece of this pattern. Another major step toward the eventual nationalization of the electric industry concerns the proposal to have the Government construct an all-Federal transmission system in the upper Colorado River storage project to deliver power from the hydroelectric dams to the major load centers. The Bureau of Reclamation, in accord with the established congressional power marketing policy, was instructed specifically to consider the private companies' proposal before proceeding with construction of the all-Federal grid. The five electric companies in the project area presented a comprehensive transmission plan to move the power for the Bureau and its preference customers. The five-company proposal would appear to be far superior to the all-Federal grid when considered from the point of view of economics or engineering and an overall emphasis on the free enterprise system. The only basis on which the All-Federal system would appear to be preferable is from a doctrinaire public power attitude of wanting to build an all-Federal transmission system for its own sake regardless of cost or effect on the Nation's taxpayers. If these western public power grids are authorized, in due time an all-embracing national system will be proposed.

There is still another piece in this puzzle which should be mentioned. This has to do with the proposal by the Bureau of Reclamation to construct the $50 million, 90,000-kilowatt power dam at Burns Creek in southeastern Idaho. This proposal has been made to Congress

masquerading as an irrigation project, but the facts clearly show that it is a public power proposal pure and simple. It is being made to meet the future power demands of a relatively small handful of preference customers, because some of them feel the Federal Government should assume a utility responsibility to meet all their future power needs, regardless of cost to the Nation's taxpayers.

The Burns Creek proposal is another example of the desire of the public power proponents to build Federal power facilities for their own sake. The suggestion that Burns Creek be authorized under the guise of reclamation has serious implications for the future of the entire reclamation program in the West. Administration thought is crystallized in their announcement that the time is past when the Bureau will refuse to construct a project simply because it is an all-power project. This attiude will cause people from other parts of the country—the North, the South, the East, and even the West—and people who have usually supported the aims and objectives of sincere reclamation to question the wisdom of using the pretext of reclamation in this fashion to promote Federal power development.

This is by no means a complete rundown of the proposals before the Congress which are in effect additional pieces in this overall puzzle. But they are sufficient to indicate clearly the direction which this trend is taking us. There are strong forces at work trying to push this Nation further toward greater centralization of power here in Washington. At the same time the American people are being asked to make great sacrifices in our long-term struggle against the forces of international communism which have threatened to bury us. Khrushchev has bragged that our grandchildren will live under communism in the United States. For this reason it seems grossly incongruous to be girding our national defense on the one hand; while, on the other hand, to be moving with increasing rapidity in the direction of that very thing which we are committed to oppose, namely complete centralization of power in the Government.

In each of these successive steps toward such centralization another small part of our individual freedom has been sacrificed.

We are not as free today as individuals as we were a generation ago and we are losing a certain degree of our freedom every time the Government injects itself further into the Nation's business. We have seen bureau after bureau set up which has been endowed with, or has assumed through its own interpretation of laws, a powerful combination of legislative, executive, and judicial powers. We are fast becoming governed by bureaus rather than by the elected representatives responsive to the will of the people, and unless we here in this Chamber do our part in reversing this trend, we will become nothing more than a rubberstamp showplace similar to the so-called Supreme Soviet which is supposedly the highest legislative authority in Russia.

If government can gradually take over the private power field there is no reason why the same thing cannot be accomplished with other segments of our economy which are closley affected with the public interest—the airlines, the railroads, the communication media—and then why not the grain elevator and the corner hardware store? A vast bureaucratic empire would be the result with the piece-by-piece achievement of economic and political dictation of our lives. Individual freedom as we know it today would fall before the collectivist onslaught. Electric power is the cornerstone and the wedge in the design for Socialist advancement. We can and must reverse this trend by putting each of these legislative proposals in their proper overall perspective and by rejecting each and every one of them which does not meet the test of serving our free enterprise system.

OPERATION SURVIVAL

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Indiana [Mr. BRUCE] is recognized for 2 hours.

Mr. BRUCE. Mr. Speaker, I yield to the gentleman from Kansas [Mr. SHRIVER].

OPERATION SURVIVAL: DEFENSE

Mr. SHRIVER. Mr. Speaker, about 178 years ago George Washington enunciated a defense policy for the United States which is most appropriate for continued consideration in the 1960's. He said:

> There is a rank due to the United States among nations, which will be withheld, if not absolutely lost, by the reputation of weakness. If we desire to avoid insult, we must be able to repel it; if we desire to secure peace, one of the most powerful instruments of our rising prosperity, it must be known that we are at all times ready for war.

History tells us that we can learn much by studying the past. We learn from the military philosophy of George Washington, and other great American soldiers including Dwight Eisenhower, that the safety and security of America rest upon strength.

The grave situation in Berlin, and the cold war itself, are cases in point. We cannot hope to resolve crises sparked by the Communist conspiracy with appeasement. History teaches us appeasement can be fatal. Recent history tells us that Soviet leaders understand the language of strength best. Two years ago President Eisenhower met Mr. Khrushchev's threat to Berlin by declaring:

> We certainly are not going to fight a ground war in Europe.

This clearly intimated to the Russian dictator that the United States would use its massive retaliatory force if the Soviet Union should start a war in Europe.

The threat of massive retaliation proved itself in the crisis of 1958. One of our colleagues has wisely stated:

> It is quite evident that to threaten the U.S.S.R. with conventional forces is like attacking a tiger with a water pistol.

The defense programs of our Nation have drawn strong support from Congress in recent years. The clearest evidence of this is the action of both congressional bodies on the 1962 fiscal year defense appropriations last month. The House voted 380 to 0 on a rollcall vote, and the other body 85 to 0, on an appropriations measure providing $46,662,556,000 for the Nation's Military Establishment.

It is abundantly clear that the continuing crises in the world promulgated by the Communist conspiracy will require this Nation to commit the larger portion of its annual Federal budget to national security programs including military functions. Whether it is Quemoy, Laos, Cuba, or Berlin, we must adjust to living in times of crisis. This generation of Americans is becoming adjusted to living in a time of continuing emergency.

A Republican policy committee task force last year wisely pointed out that we are living at a time when our enemy is waging an economic, military, and psychological war against our way of life, our Nation, and our people. If we are to maintain adequate military defenses over a long period of time, we must consider the effects of the defense budgets on economic growth and efficiency, since growth and efficiency will make possible better defense later. The task force report also advanced the pertinent theory that "if the challenge during this period extends to far more than military strength, economic strength becomes an end in itself as well as a support for military policy."

The threat of communism is not confined to military action alone. Indeed most of the gains made by the world Communist movement in enslaving people and nations have been without the use of military force. Therefore, I believe it is essential to encourage—rather than stifle—educational forums designed to inform and alert American citizens to the techniques and aims of communism. Our military experts on the subject, as well as civilian authorities, should be encouraged to participate in such nonpolitical programs.

It is the knowledge of Communist methods and aims which should impress upon us the importance of a healthy and strong economy which will contribute to the overall defense posture of the United States.

It is most distressing to those of us in the Congress who are concerned with fiscal responsibility to see unanimous action on appropriations to build up our Military Establishment, but on the other hand to note little interest in reducing deficit spending and a balanced budget.

We acknowledge the necessity for increased defense spending at a time when we prepare for any eventuality in Berlin. However, we find that for the 1962 fiscal year, President Kennedy is asking for authority to spend over $10 billion more than was requested by the Eisenhower administration. Of this additional spending, 44 percent of the requests are for nonmilitary items.

I believe the American people are willing to spend whatever is necessary

to insure the defense and security of this Nation. However, they are concerned with the methods used in financing our defense program. A recent poll which I took in my district revealed that a great majority of my constituents favor postponement of new domestic programs to finance greater defense spending, and increased taxes, if necessary, to meet the cost of such spending.

In addition to holding the line on new domestic spending, every effort must be made to insure the American people that their defense dollars are being used wisely and efficiently.

The years of cold and hot war have required this Nation to invest the greater portion of its annual Federal budgets in national security programs including military functions. With the exception of a few post-World War II years, the United States has devoted a major slice of total Government expenditures specifically to military functions. This has been necessary in providing our Nation with a strong striking force which has acted as a deterrent to war by the Communist nations.

Attached is a table indicating the record of Department of Defense expenditures and the percentage of total Government expenditures represented by such spending.

This year the United States will spend over $51 billion to gain some measure of security. Of this the military services will spend about $47 billion and related security programs the remaining $4 billion. More than 9 percent of the Nation's output of goods and services—the gross national product—will go into these programs. These absorb over 57 percent of the huge Federal budget. In more understandable terms, national security expenditures will average $275 per man, woman, and child, or nearly $1,100 per family of four persons in the 1962 fiscal year.

These figures reveal unmistakably that every citizen has a stake in the achievement of maximum efficiency and economy in our multibillion-dollar defense program. Defense is Government's biggest and most costly business. Public confidence cannot be won on the basis of the many examples of waste and mismanagement which are practically legend in the history of our military services.

The Members of this House have not closed their eyes to the hundreds of examples of waste which have been brought to the attention of our Appropriations and Armed Services Committees. While it may be considered a minimal action, the House last month voted a 2-percent across-the-board cut of all procurement funds to make the Pentagon more aware of procurement waste.

As a freshman Member of the Congress I do not present myself as a civilian expert on military affairs or defense expenditures. But as a taxpayer and as an elected representative of the citizens of my district, I want to be able to report to them that their tax moneys and mine are being used wisely and efficiently. Indeed, it is my responsibility as a Member of Congress to help set the stage for good management in every branch of our National Government. I believe that good management is the key to efficient operation of our Department of Defense. We must ask those administering our defense programs to do everything possible to assure Americans that their defense dollars are being well spent. To put it briefly, we expect the most efficient utilization of available resources.

There are many areas where our defense dollars are spent which have been thoroughly reviewed and studied by the Subcommittee on Defense Procurement of the Joint Economic Committee and the Subcommittee on Defense of the House Appropriations Committee in cooperation with defense and military leaders. I want to commend the distinguished members of these committees for the exhaustive efforts which they have made over the years to evaluate the strengths and weaknesses of our Defense Establishment along with recommendations for needed legislation.

I want to speak to a few areas where it is most obvious that considerable dollar savings could be made and where congressional authority already is vested in the Secretary of Defense to make necessary changes. There is some indication several of these changes will actually be made, but time is of the essence and action is past due.

The Secretary of Defense should take steps to utilize the authority given him in the McCormack-Curtis amendment to the 1958 Defense Reorganization Act, to eliminate the unnecessary duplication and triplication of such support-type activities as procurement and supply, and of such common-type services as training, recruiting, medical care, intelligence, legal, and financial management.

We are aware of the sizable operation represented in the area of procurement and supply alone. For example, last year the Department of Defense purchased about $24 billion in weapons and supplies which involved nearly 7 million procurement actions. The personal property inventory of the Department was valued at $118 billion, made up of 3.4 million items, and stored in nearly 600 million square feet of space throughout this country and in foreign depots. In 1960, nearly $27 billion of this inventory was listed as surplus. Under present plans some $10 billion of surplus is to be disposed of yearly, at a yield of about 2 percent of acquisition cost.

It has been estimated many times and by many people that we are needlessly spending through inefficiency and duplication as much as $3 billion a year. While there may be some who would challenge the accuracy of this estimate, I contend that any excess could be better used to strengthen our military posture.

The McCormack-Curtis amendment empowered the Secretary of Defense to "provide for the carrying out of any supply of service activity common to more than one military department by a single agency or such other organizational entities as he deems appropriate."

It would be appropriate for the Air Force to continue to purchase its heavy bombers, and the Navy to contract for ships, and the Army to purchase its heavy armor.

But the thousands of items which are common to all services should be placed under a unified procurement and supply agency. We should not have to pay for separate procurement for such items as clothing, medical supplies, furniture, and paper clips.

I understand that some progress has been made toward more efficient supply management operations for items common to two or more of the services, such as single department procurement, cross-servicing of assets, single manager plans, uniform cataloging and standardization. Nevertheless, we must insist upon acceleration of these programs for in these times of tension it is essential that we free more dollars for effective defense spending and actual governmental needs.

Another area covered by the McCormack-Curtis amendment to the 1958 Defense Reorganization Act would enable the Secretary to unify common-type services.

There would likewise be savings in integrating such programs as language schools. After all, Russian is Russian whether you are in the Army, the Navy, Air Force, or Marines. Medical services and financial management are two other areas which could be unified.

Of course, there are many other areas in which effective changes could be instituted which would result in more efficient utilization of defense funds.

Defense is such a vast enterprise that even the smallest decision seems large to the average American citizen. I was impressed when I learned that by eliminating the watchpocket in uniform trousers, $650,000 was saved by the Defense Department.

The high cost of modern weapons increases the need to make savings wherever possible in the defense system. The taxpayer recognizes and appreciates this fact when he compares the bill for the first Polaris submarine costing $110 million compared with $5 million for the average World War II submarine.

A few moments ago I stated my belief that good management is the key to efficient operation of our Department of Defense. The House Committee on Appropriations stated most succinctly in its report on the 1962 fiscal year appropriations for the Department of Defense the responsibility and the expectation of the Congress in matters of defense. The report stated:

> By whatever technique accomplished, proper management, with insistence upon assignment of full responsibility and with expectation of full accountability, is the real key to essential economy and efficiency in our defense efforts.

If freedom is to survive, the free nations of the world must remain strong economically and spiritually; defense against the Communist conspiracy requires that all freemen have knowledge of the aggressor; and all economies practiced with the avoidance of unneeded spending of tax funds. A determined and dedicated free government will survive.

Federal Government expenditures and gross national product comparison with major national security programs and military functions expenditures, fiscal years 1946–62

[Dollars in billions]

Fiscal year	Gross national product	Total Government expenditures	Major national security programs [1]			DOD military functions [2]		
			Expends	Percent GNP	Percent total Government	Expends	Percent GNP	Percent total Government
1946	$202.8	$60.4	$43.2	21.3	71.4	$42.0	20.7	69.5
1947	223.3	39.0	14.4	6.4	36.8	13.8	6.2	35.4
1948	246.6	33.1	11.8	4.8	35.6	10.9	4.4	33.1
1949	261.6	39.5	12.9	4.9	32.7	11.6	4.4	29.3
1950	263.8	39.6	13.0	4.9	32.8	11.9	4.5	30.0
1951	310.8	44.1	22.4	7.2	50.9	19.8	6.4	44.9
1952	338.8	65.4	44.0	13.0	67.2	38.9	11.5	59.5
1953	359.7	74.3	50.4	14.0	67.8	43.6	12.1	58.7
1954	362.0	67.8	46.9	13.0	69.2	40.3	11.1	59.5
1955	377.0	64.6	40.6	10.8	62.9	35.5	9.4	55.0
1956	408.5	66.5	40.6	9.9	61.1	35.8	8.8	53.8
1957	433.0	69.4	43.3	10.0	62.3	38.4	8.9	55.4
1958	439.8	71.9	44.1	10.0	61.4	39.1	8.9	54.3

Mr. BRUCE. Mr. Speaker, I request at this point that the gentleman from North Dakota [Mr. NYGAARD] may insert his comments.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. NYGAARD. Mr. Speaker, there is extensive concern in our Nation about low wage foreign competition. I would quickly suggest, however, that this concern might as appropriately be directed to the counterpart of low wage foreign competition—namely, high wage domestic policies. Concerning the wage differential in international commerce, a number of proposals have been suggested including: First, American manufacturers should lower prices by taking smaller profits; second, if foreign nations refuse to raise wage levels to ours, we should impose a tariff penalty on each item imported; third, we must conduct extensive and voluntary buy-American-made campaigns; or, fourth, we should bring about a reduction of our costs in American firms by extension of mechanization and rapid engineering programs.

Each of these suggestions has some merit but each solution does raise other problems. For example, we note that margins of profit in many industries are narrowing, but more profits are necessary to replace old, depreciating plants and equipment. Therefore, should or can profits be reduced?

The probable results of a penalty tariff on each foreign import would be to exclude a good many imports to the United States and invite retaliation by foreign nations.

Buy-American campaigns have the same risk which can cause losses of jobs in those industries which ship overseas. Mechanization and rapid automation must be intelligently applied so as to minimize a loss of jobs and assist the labor market in absorbing workers.

Here in the Congress, it is most vital to recognize the effects of Government proposals intended to help because action to aid one industry can hurt another. For example, our Government subsidizes the sale of domestic raw cotton in world markets to make it competitive. Because of the cotton price support program and restrictions on the importation of raw cotton, the domestic textile mills must pay the higher domestic price. The consumer is therefore paying two bills he probably should not be paying—taxes for the subsidy on exports and higher prices for the retail shirt on his back.

To bring this episode to date, the textile manufacturers and their 2 million workers then wanted more protection against increased foreign competition. On May 3, 1961, President Kennedy announced a program designed to aid textile industry people by first persuading foreign countries to agree to reduce shipments to the United States; second, considering higher tariffs or quota protection under the reciprocal trade law; third, recommending subsidies—by U.S. Department of Agriculture—to offset higher raw cotton prices U.S. textile mills pay compared with foreign mills; fourth, aiding through Federal funds those industries seriously injured or threatened with serious injury from imports; fifth, reviewing existing depreciation deductions on textile machinery; sixth, permitting loans through the U.S. Small Business Administration; and, seventh, researching for new products, practices, and markets through the U.S. Commerce Department.

I recite this example, not to agree or disagree, but rather to indicate the compounding of the problems which actually occurred in just one industry and can occur in others. This entire area represents a fantastic challenge to all of us.

But the matter of foreign competition is predicted to become more intense. The economic forces that are shaping up for the future have prompted Columbia University Prof. Emile Benoit to predict that "we will be seeing competition from Europe after awhile that will make our back teeth rattle." Secretary of Commerce Luther Hodges told a national magazine in April of this year that he is frightened to death by the political nature of the economic nature of the economic competition we face from Russia in the years ahead. He said that as a former businessman, "if I could sell goods without regard to my costs, I would have no trouble taking pretty much of the market of the world—and they—Russians—do not pay any attention to costs because they control and run everything and own everything."

The two main features of Soviet economy that are particularly striking to Americans are: first, the complete absence of private capitalist enterprise; and, second, comprehensive state planning of the Nation's economic development. Since the state controls all the country's resources, there is no room for private capitalism as we have in the United States.

Our system permits the opportunity for private individuals to accumulate money, or capital, and to invest this capital, in an enterprise controlled either by an individual or by a group formed into a corporation at a private risk and for private gain. Capitalism also means the opportunity to create an individual's own business and sell his products on a competitive basis inside or outside the country. These kinds of opportunity do not exist in Russia.

Russia now challenges us and say they will catch up to our abundance of production and our high standard of living. Other nations who watch on the sidelines will no doubt be persuaded by the success of one or the other.

The importance of this competitive battle with foreign producers has been illustrated by the imbalance of our international transactions causing an outflow of gold. That problem indicates the tremendous need to maintain a substantial surplus of goods and services moving out of the country compared to what enters.

Worldwide competition is therefore a challenge; it cannot be swept under the rug nor can we as a great country avoid that competition. We must meet it.

What action can be taken by working people and by the labor leaders of this Nation? The first thing is that the people of this Nation should be informed of the problems and the experiences with proposed solutions. It is gratifying to note that on April 11, 1961, George Meany, president of the AFL–CIO, urged labor to oppose buy-American campaigns because they jeopardize the jobs of Americans producing for export and force other Western nations to trade with Communist-bloc countries.

Mr. Meany no doubt has many members working for employers who produce for export. Americans will sell over $20 billion of goods and services to foreigners this year. This export industry

is almost as big, measured by sales, as the American automobile industry, and no one will deny the importance of the latter to the economic welfare of the United States.

The logical objection to a tariff policy based on differences between wages paid in the United States and foreign nations involves exactly the objection which Mr. Meany raises: the matter of comparative cost advantage.

The labor costs of making any product in any nation will be governed, generally, by the quantity of labor in relation to other factors of production. As an example, in India the labor ratio is so high that the average Indian worker is assisted by less than $300 of capital equipment. By contrast, the American worker's productivity is assisted by more than $5,000 of capital equipment. Inevitably, wages in India must be much lower than those in the United States. Yet the United States, as a whole, will gain by importing the labor-intensive products in India, and, in return, exporting the capital-intensive products of this country.

Another example often pointed to as a labor-cost problem per se, is the flood of Japanese products on our counters. Yet, Japan's widely publicized cheap labor often is not as much of an asset as it seems—or more specifically, in some industries. Because of sizable fringe benefits, total labor costs in big companies sometimes are more than double their wage payments—and wage rates are rising fast. The remaining cost advantage of Japanese firms often is more than offset by inefficient production methods, high raw material costs, heavy interest payments on loans, and the high cost of Japanese-made production equipment. However, in several cost advantage industries, the Nipponese can and do sell fabrics, transistor radios, cameras, and chinaware at prices well below those of foreign competitors and in those foreign markets.

American investments in productive facilities abroad has raised the question as to whether we are exporting jobs. However, foreign subsidiaries of American companies report that they are not immune from the cost problems, such as those in Japan where total costs are nearly the same as in the United States in major industries. And besides, industry people claim that sales made by these new foreign firms are mostly sales that could not be made on an export basis and that the U.S. exports are increasing in 1961 compared with 1960. Thus there are new jobs created in these foreign nations while there is not an overall job loss in those industries producing our exports.

I submit in view of this that there be undertaken grassroots efforts to educate the union worker of the need to meet foreign competition—not to duck it by artificial trade barriers. No man is an island and no nation is alone, nor can we afford to be. We need to reverse the progressive deterioration of American competitiveness by arousing our working people to the need of accelerating a U.S. export drive. We must develop new products, new processes, new ideas, and new businesses that cannot be matched very easily. We must do so, realizing we are in a worldwide battle—and are fighting for the survival of our economic system. We must be efficient and effective to compete with foreign nations. We cannot indulge in make-work, shirkwork practices, artificial restrictions on uses of new equipment or processes, or have unions quarreling over work jurisdictions whether at missile bases or factories. Although, fortunately, the American labor movement typically has not opposed mechanization, indirect opposition to growth and efficiency generating innovations is fairly common. Municipal ordinances should be reviewed to see whether this indirect opposition to technological change is reflected or not.

In efforts aimed at achieving victory in this economic struggle, we can never lose sight of the fact that the cost of producing our export goods largely determines whether we will succeed or not. As the principle element in the cost of doing business, labor must exercise a statesmanlike restraint so that they, in turn, can enjoy the benefits of a successful venture into the world market.

The balanced public budget does not rank high in the thinking of labor leaders. They urge more spending and endorse virtually every social-economic proposal made but make very little effort at weighing public benefits against tax costs. The national debt is continuing to mount and deficit spending, which eventually causes our dollars to lose value, continues. The working people should schedule discussions on the costs of these vast social programs and conduct secret ballots concerning them and the spending they embrace—much the same as a strike ballot. If this process is followed, they might come to realize wage increases can come from reduced Federal spending as well as from employers.

Mr. Speaker, I respect and applaud the beneficial things which responsible labor leaders are doing. It is certainly vital to have decent wages and working conditions for every working man and woman in America. However, I call to the attention of these labor leaders, their responsibilities and the importance of discussing certain problems objectively with these people they represent. And, in conjunction with this effort, I recommend that every union member give his leaders the attention they need and should turn his TV to the wall for a while and first, attend union meetings to discuss objectively the union's program and the relationship to competition, and foreign trade, tax costs of legislative proposals endorsed, and other current and important matters; second, become active in his political party and in his community affairs where spending and taxing questions are discussed and decided; and, third, concentrate on giving a decent day's work for the decent day's pay and those decent working conditions.

The working people have a responsibility within the total American economy and their leaders must help in preserving and maintaining our system, which in spite of the faults, provides the greatest personal freedom, the widest opportunities for achievement, and the highest standard of living so far known in the world.

Mr. BRUCE. Mr. Speaker, I yield to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Speaker, I wish to compliment the gentleman from Indiana [Mr. BRUCE] and the other members who have spoken on Operation Survival. As I am sure, as has been pointed out, this is an operation of members of the 87 Club, a group of the Republican Party. This is a group which has distinguished itself in the first session of the Congress by its endeavor and intelligence and by the fact that it is, in my opinion, one of the most able composite groups which has ever come to the Congress in any year since I have been a Member of this body, at least. I congratulate its members, and I look forward with a great deal of pleasure, not only as a Member of the House but also as an American to the contributions this fine group of Congressmen will make in the future.

Mr. BRUCE. We thank the gentleman from Arizona.

Mr. FINDLEY. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from Illinois.

A SOUND DOLLAR: FREEDOM'S FIRST LINE OF DEFENSE

Mr. FINDLEY. Mr. Speaker, administration's policies are rapidly moving the United States toward renewed inflation and a new dollar crisis.

Note these warning signals:

The Federal cash budget, which showed a surplus last year, is now in deficit. This will worsen as spending programs get into full gear.

Congress has authorized heavy new spending but has not acted to balance the spending with higher taxes. Spending is expected to hit $88.5 billion this year, up $7 billion from fiscal 1961.

The deficit for the year just ended was $3.9 billion, so an even bigger deficit can be expected for fiscal 1962. No one expects Washington to have the political courage to raise taxes enough to put the budget in the black.

Interest rates are pressing upward, as lenders seek protection against anticipated decline in value of the dollar. Thus the Federal debt is expected to increase in both size and rate of fixed cost, placing new burdens on the taxpayer and new pressure on the dollar.

What are the alternatives?

First. Runaway inflation: This is unthinkable as it would bring such chaos that the Communists could move in without firing a shot.

Second. Fiscal responsibility: This would require a sharp increase in taxes to cover increased spending and provide for orderly debt retirement; or a sharp cut in nondefense spending to accomplish the same goals. Neither the administration nor Congress has shown the slightest inclination in this direction.

Third. Direct government control of wages and prices: This is the expected

administration answer to the growing danger of inflation. Indeed union contract negotiations are being undertaken on the assumption that direct controls are a certainty in the near future. Both management and labor are trying to hedge against wage-price controls, and of course, this effort tends to quicken the inflationary spiral.

Direct controls will not solve any problems. Instead, they will heap new tax burdens on the people and entangle their lives still more in government red-tape.

Government is already paving the way for controls by telling people they need protection from arbitrary wage-price actions of business and union leaders. In reality, controls take decisionmaking away from millions of different people and give it to government. Controls operate directly on the people, reversing our historic concept of people controlling government.

Price-wage controls will call for an expensive new army of Federal policemen to swarm over the landscape, meddling in the private affairs of the people, fixing prices, fixing wages, punishing those who fail to trot in government harness.

Meanwhile, the basic need for fiscal responsibility will remain, because even the harshest government edicts cannot forestall inflationary pressures indefinitely. Even the police state cannot tear up the economics rulebook. Cost-price problems will remain, and as these become acute, those affected will negotiate with government for increases in prices and wages. We will then have inflation by negotiation.

Controlled areas of the world are usually the problem areas. Look at Indonesia, Bolivia, and East Germany. Contrast these with the Philippines, Hawaii, Puerto Rico, and West Germany where private enterprise—relatively free of controls—has resulted in rapid growth.

There is more at stake in this issue of inflation than the menace of peacetime wage-price controls.

A sound dollar is essential if we are to preserve freedom at home.

The savings and investments, the future security of each one of us are at stake, because the days of barter and self-sufficiency on the farm are gone forever. As our society becomes more complex, we become tied more tightly than ever to the dollar sign. No longer can we wait out bad times by living off the land. We need money for our day-to-day living. When money loses its value, we all lose.

The stability of our Nation is at stake. We love this land of freedom, and want our children and grandchildren to enjoy the privileges of citizenship in a free republic, their liberties protected by a system of constitutional self-government. Our Government is no stronger than its currency, and when investors lose faith in the dollar, the whole American dream is in danger.

The moral strength of the Nation is at stake. Inflation hits hardest at the elderly people who have spent their productive years saving money for their retirement—men and women who followed the rules of provident living—a penny saved is a penny earned—the Ben Franklin type of thrift that has made Americans independent and self-reliant.

Now inflation wrecks these dreams of a secure old age. These fine people who represent the moral fiber of our Nation now wonder if thrift was worthwhile after all, and so do their children and grandchildren. Fearful that the dollar will continue to dwindle in value and thus make it difficult for them to meet their own responsibilities, they trade off their liberty for the welfare state.

Today's fiscal philosophy is radically changed from that of the Eisenhower administration. Then the goal was a balanced budget, debt retirement, and a sound dollar.

The new administration tries to meet every problem with increased spending. Debt is to be managed, not paid off. Living within our means is regarded as a luxury we can ill afford in this critical period. We are following the postwar path of England and France, where government policy aimed at making the best possible adjustment to each new crisis, leaving the basic problem untouched.

We are spending the gross and taking in the net. We are spending $1 million an hour more than we take in, and this has been going on 24 hours a day, 7 days a week, since Congress convened last January. As this fiscal loose living brings crises, we meet each one by giving government still greater control over the lives of the people. Thus the price of fiscal irresponsibility is further encroachment on liberty.

A sound dollar is essential if we are to meet the menace of communism abroad. Indeed, it is freedom's first line of defense. It makes possible the Polaris submarine and our continental defenses. Thus it outranks them, important as they are. If Washington were to permit these secondary defenses to deteriorate through neglect and abuse, the reaction would be immediate. Those responsible would be charged with malfeasance in office, heads would roll, and new leadership quickly provided.

Our first line of defense is deteriorating through neglect and abuse, but ironically, those responsible are actually applauded in some quarters, while most other Americans accept the trend without a murmur.

We often hear the declaration, "We must not put a balanced budget ahead of our Nation's defenses." Those who insist on fiscal responsibility are sometimes called pennypinching at the expense of proper defense. Such efforts to separate monetary and military policies show a paucity in understanding of economics.

Since World War II, the American dollar has been basic to the currency of the entire West, and its present instability threatens the economic posture of the entire free world.

When a nation's economy is threatened, its military strength is threatened in exactly the same degree. Gold no longer provides a discipline for government, and unrestrained spending, so much in evidence in Washington today, creates the potential for trouble.

As we inflate our dollar supply through deficit spending, we spur inflation in foreign countries which use our dollar as currency reserve.

When a Frenchman gets a dollar, he exchanges it at the bank of France for francs. Since the dollar is considered reserved currency much the same as gold, France can then issue new francs representing several times the value of the dollar held in reserve. It becomes the foundation for new money supply in France.

Expanding our dollar supply through the device of deficit financing, however, does not increase the intrinsic value of the dollar. The reverse is true. The total gold reserve is unchanged, but it must support not only the expanded quantity of dollars, but, indirectly the new supply of foreign currency enlarged through the expansion of dollar supply.

Deficit financing has another ominous result: It puts new strain on our balance-of-payments crisis.

In the era of the gold standard, no nation could create money beyond the sum of its credit and its gold supply. When a nation had a balance-of-payments deficit in international trade, it had to settle for gold. This served to discipline government monetary policies. No country could play fast and loose with its currency for very long.

Today the situation is different. Dollars abroad not used for U.S. goods and services have tended to stay there as foreign currency reserve and have not been used as a claim on U.S. gold reserves. We have been able to ignore these vast short-term claims.

We own about $17.6 billion in gold at Fort Knox and elsewhere, but foreigners hold $23.3 billion in the short-term claims mentioned above. These can be cashed at will. Thus, our entire gold reserve could be wiped out overnight. We would actually be $8.3 billion short if we suddenly had to meet all international obligations which we have promised, directly or indirectly, to redeem in gold. And, of course, at this point, we are ignoring any possible claim against gold reserves represented by our huge supply of money and credit within the United States.

As long as gold is not claimed, all is well. We can continue multibillion-dollar foreign aid spending, piling up claims on our gold reserves. We can continue living in an international wonderland in which bills never have to be paid. But this threat to our dollar is big as life and ever present. We should remember that, during the depression of the thirties, over 87 percent of our international obligations to pay in gold were called. Our gold situation is like a house of cards. The slightest ill wind could blow it down.

If we return to fiscal responsibility—insist on balanced budgets and orderly debt retirement—we will restore confidence in the dollar and avert the collapse of the free-world monetary system.

In doing so, we will also meet the most pressing need of the American people. The value of the dollar has been sliced in half in 20 years. Our citizens have difficulty meeting their individual responsibilities, because they can no longer

count on the dollar as a reliable standard of value from year to year. It takes an income of $4,800 today to equal the purchasing power of $2,000 in 1939. They are easy prey for those selling the welfare state. Little by little they bargain away their individual freedom in exchange for Government handouts, handouts which are so costly that they have the effect of heaping new fuel on the fire of inflation.

In the 1930's we experienced lack of money, but there was a willingness to discuss the problem and work out a solution. Today everyone tries to beat inflation, and as a result the problem keeps getting more acute.

We need to recognize that monetary responsibility and morality are actually one and the same. As the dollar becomes weaker, so does our moral fiber.

A sound dollar is the key to strength—economic, military, and moral. As such, it is essential to our survival as a free nation. It is indeed freedom's first line of defense.

A sound dollar can be achieved only when we live within our means as a nation, reject deficit financing, and provide for orderly retirement of the Federal debt.

Mr. BRUCE. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. HALL] may insert his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALL. Mr. Speaker, I am appearing not only as a Member of Congress, but as one who is qualified to discuss medical problems by virtue of practicing medicine and surgery for the past 26 years, before arriving here. I am a fellow of the American College of Surgeons, a diplomat of the American Board of Surgery and a delegate to the American Medical Association from the State of Missouri. My 7-plus years of active duty in the U.S. Army included primarily duty as Chief, Personnel Service, Office of the Surgeon General, U.S. Army, during World War II. I have spent 9 years as medical consultant to the Missouri vocational rehabilitation program—under HEW—and as medical referee for the old-age security disability insurance benefits under the Social Security Act for the 22 counties of southwest Missouri.

I mention my own medical background, Mr. Speaker, not as a reason for my appearance in the well of the House today, but as qualifications for my testimony on a very complex issue. I do not intend reflecting on others who might appear, or who will support legislation similar to H.R. 4222, as in recent hearings before the House of Representatives Ways and Means Committee; when I say that many of them in discussing the possible effect of this legislation on our system of quality medical care, have never felt a pulse beat or held a scalpel in their hands. They have not spent long years in technical training. They have no personal experience on which to base their claim that this legislation will not result in a lowering of medical standards. They are theorists, who theorize in a medical field in which they have no knowledge, yet are willing to contract for someone else's personal services. They presume to dictate legislation in a field completely foreign to their own area of experience. I am opposed to the legislation under consideration for the provision of medical care under the Social Security Act, of persons 63 to 65 years of age and over.

As one whose lifetime has been spent in caring for the sick and the aging, and loved every minute of it, my opposition certainly is not because I do not wish to see medical care extended to all persons in need. In fact, it is because I want to see both the quality and the quantity of medical care extended—as American medicine has been extending it for the past 100 plus years—that I am here in opposition to this bill.

First, Mr. Speaker, my opposition stems from the following purely objective observations: We should—

First. State and admit that we cannot afford it as a nation rapidly approaching bankruptcy.

Second. Admit that continued social demands and expedient spending therefor, domestically, in addition to our external commitments, can, does, and is causing an inflationary spiral which cruelly undercuts the value of the dollar saved by the aging in the form of investments, pensions, or hard money.

(a) Further recognize the affect of low labor cost, foreign competition articles versus our high labor rates—fixed nationally; on reduction of the U.S. labor force—including those physically and mentally able, but over age 63–65, to continue working and securing their own futures.

(b) Realize the need in the moral fiber of our people to sense natural obligation, while preserving "freedom of choice" and avoiding third-party interference.

Third. Admit that such Federal redistribution of the wealth is unconstitutional and versus States rights.

(a) Call social security aid to the aging a tax—as it surely is—instead of insurance; because it is compulsory legislation forcing both employees and employers to pay in addition to other taxes and unemployment compensation, steadily mounting funds which must be then passed on to the very consumer, we are constantly trying to aid.

Fourth. Recognize social proposals for what they are, including a total welfare state, the definition of the word and the recognition that, in a socialistic nation there are never unions whether they be of senior citizens or the laboring force.

Fifth. Stand and be counted (as concerned and worried citizens—as well as physicians), as to the true definition and differential between social security tax, and the misnomer of social security insurance.

Sixth. Recognize the inclusion of doctor services in proposed H.R. 4222 insofar as physiatrists, pathologists, anesthetists, and radiologists are concerned, to say nothing of those in training such as interns, residents, and fellows.

Seventh. Not legislate inclusion of the self-secured millionaire, while similarly excluding the 4.5 million not cared for under any form of social security tax.

Mr. Speaker, these are all basic, natural, and moral reasons for opposing this legislation, and in addition I would like to discuss briefly the contention of the concurrent Secretary of Health, Education, and Welfare that such legislation is not socialized medicine.

Insofar as it involves a medical care program, administered by the Federal Government which establishes hospital standards and criteria affecting four separate categories of physicians—to wit above—insofar as it covers an entire group of our population, and insofar as it imposes a compulsory tax on both employees and employers, it clearly meets all the criteria for socialized medicine as defined in Webster's Standard Dictionary, and as defined by the Socialist Party of the United States.

(8) Finally, as to basic reasoning, is there a need for this type of legislation? Absolutely not. Only scattered inconclusive evidence has been presented as requested by repeated State association and individual requests for reference of uncared for hardship cases; all of which have been tracked down and show lack of application, utter untruths, or poor information—to wit the famous Texas Medical Association's burn case which was utterly disproved insofar as lack of care was concerned.

Should humane assistance be under social security, Mr. Speaker?

The avowed purpose of social security is to provide a floor of protection to citizens with limited incomes, to help them meet their minimum needs. It has never been assumed, nor should it—that social security is intended to deprive all our citizens of their personal responsibility to implement this floor of protection. This I am for. But let us define social security for those who would pervert meanings and cast false shadows and images: "social" means, a group or gathering of interested and interdependent persons; and "security" means, something given or pledged to make secure—or safe—the payment of an obligation. Therefore, social security is social by inclusion and definition, as well as usage.

There can be no more logic in setting up a separate category of service benefits for medical care than there is in setting up a separate category of service benefits for food, shelter, or clothing.

Certainly the Congress would never consider an additional 1-percent tax for food benefits or an additional 1-percent tax for clothing. Yet once the door is opened for this kind of illogical reasoning, once the foot of the social-planners is in the door by providing benefits for medical care, what is to prevent the same splintering action being taken toward every other human need? We would then have Federal control of the food industry, and Federal control of the garment industry. It has not yet become fashionable to ask for these controls,

but apparently the Department of Health, Education, and Welfare has no such restraints with regard to the practice of medicine. This is the entering wedge. If this body in its wisdom, decides to increase social security cash payments—and taxes—so that the recipients will then have what is considered adequate to meet all their needs including food, clothing, shelter, recreation, medical care, and others as in the final 4 circuslike days of the Roman Empire; then that is the course which the Congress should take, at least leaving it to the individuals to determine how it shall be spent.

Second, Mr. Speaker, I would inquire whether this legislation has a moral, basic or natural justification on the one hand; or will it destroy personal rights, will, and incentive on the part of the patient (and the physicians), on the other? Based on my own experience, I am certain that the answer to the first question is "No," and the answer to the latter question is a resounding "Yes." I have traveled extensively, as a member of the Armed Forces, and as a private doctor, in other nations of the world; many of which now have socialized medicine. To those who say this bill is not socialized medicine, let me say it is singularly true that no country which has embarked on this path, has ever stopped short of "covering" its entire population. It simply is not reasonable or rational to assume that it would be different here—in fact, major proponents of this legislation have stated this goal in the past. We are today considering—and I hope no more—the beginning of a state system that will engulf all medicine including practice, bedside research, laboratory research, hospital care, home calls and clinical medicine. We are speaking of socialized medicine. I see no reason why we should hasten further down this "primrose path" of welfare-statism.

I have seen the disastrous effect of state medicine in other countries. For instance, the British Broadcasting Co. has recently prepared a documentary movie which confirms and updates my knowledge of that nation, and depicts some of the results of their system. It includes a statement by a hospital administrator to the effect that in his district alone there are 700 people on a 3-year waiting list for needed general surgery; there is another 6-year waiting list for persons needing bone and joint surgery; and nearly 1,000 people waiting for needed intestinal surgery.

The hospitals are literally jammed with persons who are not in need of hospitalization, but who are there because it is paid for them, by the Government; while others in real need, cannot be admitted. Are the political pressures that would result in this country any different from those which have developed in England? I think not.

There has been only one new hospital in the United Kingdom in the past 14 years, according to this documentary, and the ratio of physicians to patients is up from 1 physician for every 800 patients to 1 physician for every 1,150 patients. Contrast this with the United States where the ratio in 1949 was 1 to 741 and in 1959 had only slightly increased to 1 to 749. Both of these sets of statistics are from the respective national medical organizations. Ours, with our medical schools, and with our hospitals, and associated personnel, are doing a great job, furnishing quality and adequate medical care.

What I am saying does not deny the existence of a problem insofar as our desire to provide the best possible medical care for the greatest number of people; but gentlemen, we have had this same problem since our country was founded, and under our present system of free medicine, we have accomplished far greater results than any other nation on earth including those who have long since adopted the path we now have under consideration. Let us not "sell short," and sacrifice our gains.

In our continuing efforts to increase quality medical care and at the same time ease the burden of total medical, drug, hospital and other costs for our aging population, extended life expectancy; brought on by the valuable research we have stimulated in medicine under this free enterprise system, we should recognize a primary cause—inflation—which affects not only the cost of medical care, but every single item in the senior citizen's budget; namely, food, shelter, clothing, recreation, and others. In many respects, the Federal Government has contributed to this inflation by its relentless insistence on assuming more responsibility than it can afford, without taxing us beyond the point of no return. This bill absolutely guarantees more inflation. The Socialists and ADA are fishing with the bait of humanitarianism, and the hook of freedom's loss.

I believe the 86th Congress, if it had to act, adopted sound legislation in the Kerr-Mills bill which preserves the constitutional "States rights," in spite of high-sounding objection to the "means test." We apply a means test in literally hundreds of situations, in Biblical parable, in loans we seek from banks, in Federal scholarships for outstanding needy students, every time we open a charge account, every time we finance an automobile, every time we apply for an FHA home loan, every time we attempt to distinguish real from fancied need. It is basic and natural to the way of life we know. The people recognize its virtue, even if the welfare staters do not. Every Member of this distinguished group at one time or another, has taken a means test, and does not feel that he has been degraded or humilified by the experience. Many States already have enacted legislation to participate in the Kerr-Mills program. That others, my own State included, have not done so; is almost entirely due to the vast propaganda machine generated by those who wish only to pursue a course of socialized medicine, and who have refrained from offering one word of encouragement for action on the part of the separate States. I am sure they would like to see State lines, and State rights eliminated altogether; and all responsibility vested in a vast Washington bureaucracy.

Private insurance companies and the Blue Cross-Blue Shield plans have done a magnificent job, and are making great strides in their efforts to do more. The home State of the Secretary of HEW, Connecticut, has inaugurated private insurance to meet this need for those over 65 years, and already has demonstrated that it can be done at far less cost, than under the social security approach.

Mr. Speaker, I have introduced a bill, H.R. 7756, which would revise the Internal Revenue Code to give greater recognition to the income dilemma that confronts our aging citizens, and their families. A copy of my remarks was printed in the CONGRESSIONAL RECORD for June 20, 1961, pages 10849–10850, when this bill was introduced. I strongly recommend that our colleagues review it as certainly this bill is a step in the right direction, and it is basic, sound and a natural approach to the problem. Gentlemen, I do not profess to be an expert in tax matters, but while not an expert in that field, I do believe I am qualified to discuss the medical implications of the bill now under consideration.

I would urge its defeat, as being inimical to the best interests of our Nation, not only of our aging citizens, but to all our citizens' moral fiber by virtue of destruction of their feelings of obligation; to say nothing of the destruction of the quality of medicine, research, and care of the American people by a great profession which from the days of Hippocrates has responded where and whenever need is evident. I thank you.

Mr. BEERMANN. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from Nebraska.

Mr. BEERMANN. Mr. Speaker, I ask unanimous consent that the colloquy between the minority leader and the majority leader be inserted in the RECORD following the special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

PERMISSION TO REVISE AND EXTEND REMARKS AND TO INCLUDE EXTRANEOUS MATTER

Mr. BRUCE. Mr. Speaker, I ask unanimous consent that all Members participating in this discussion have permission to revise and extend their remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BRUCE. Mr. Speaker, I yield to the gentleman from Kansas [Mr. DOLE].

OPERATION SURVIVAL: GOVERNMENT CONTROL IN THE TRANSPORTATION AND COMMUNICATION INDUSTRY

Mr. DOLE. Mr. Speaker, the early Government intervention in transportation industries of the United States consisted of public funds and resources used to stimulate private enterprise by aiding the building of canals, highways, bridges, and railways. The roots of Government regulations lay in the colonial belief that free markets and a great deal of competition would exist.

(A) RAIL TRANSPORTATION

During the early years of the 19th century, complaints were made that the U.S.

Government was forced to pay exorbitant postal rates to railroads. In 1838 the first regulation of mail payments occurred. Restrictive measures were the exception for many years, however, and the supporters of decentralized government looked to the State and local levels for controls needed.

National Government pressure for regulation first culminated in the Windom Committee under President Grant. The group, studying competition among railroads—or the lack of it—proposed Government ownership of lines parallel to private ones in an attempt to regulate rates. Proposals were advanced for Government-owned waterways.

By 1880, discriminatory practices among railroads gave the Government an opening to step in and control transportation activities. The Cullom bill in 1885, and the committee established by it, stressed the need for Government regulation of interstate transportation. When the Supreme Court ruled individual States could not regulate the part of an interstate trip within their boundaries, the National Government had the choice of regulating railroads or leaving the system alone.

The 1887 Commerce Act, as it concerned railroads, was relatively limited; it had been advanced by the shippers and basically sought to establish fair rates. The Interstate Commerce Commission was empowered to receive annual reports and investigate any complaints, but it could enforce its rulings only through a Federal circuit court order. By the 1890's, however, railroad income had dropped considerably and the ICC was stripped of all power except of advising, after the Supreme Court held the Commission had no power to control rates.

Additional regulations came in 1903 when, through the Elkins Act, it became illegal to charge rates other than those published. At the same time, either giving or receiving rebates was outlawed.

After unsuccessful attempts to secure passage of bills giving the ICC power to establish rates as well as advise on changes, the administration succeeded with the Hepburn Act of 1906. The authority of the ICC increased tremendously and in addition to ratesetting, the Commission could investigate railroad accounts while express companies, pipelines, sleeping-car manufacturers and other parts of the transportation business were made subject to ICC control.

Year 1906 began the trend of growing power for the ICC; within the next decade Congress passed the following:

First. The Mann Elkins Act, 1910, giving the ICC power to stop rate changes until the Commission could investigate and approve.

Second. The Panama Canal Act, 1912, put the ICC in control of joint water and rail travel. There was an attempt to advance competition between water and rail traffic, and no railroad could own ships passing through the Panama Canal.

Third. In 1913 the ICC under the new Valuation Act, could evaluate all railroad property as a basis for fair rates. This act was ambiguous as to the relative importance of various properties, and it became a source of considerable litigation.

Fourth. The Clayton Act, 1914, mainly applying to trusts, also sought to increase railroad competition by controlling business between those railroads and firms which had interlocking directorates.

The question of National versus State control over interstate travel was clarified by a Supreme Court decision upholding the ICC's power to control rates on travel between the States.

During World War I, President Wilson put the railroads under Federal control. This period of nationalization influenced future legislation. In 1920, the Transportation Act was passed which broadened ICC powers once again. It could establish minimum and maximum rates and require any railroad making more than a 6-percent profit to put the amount of money above this percentage into a general railroad contingent fund used by the ICC to make loans to help failing rail companies.

In 1920, the ICC was requested to secure a permanent solution to the railroad problem, however, the whole basis of the 1920 act was soon changed as there emerged competition on water, in the air, and on the highways.

During the depression, the Reconstruction Finance Corporation, established in 1932, made loans to railroads. In 1933, the Bankruptcy Act gave the ICC power to help the railroads in the latter's attempt to decrease fixed charges. This act gave the ICC the position of managing director in the railroad companies' efforts to reduce their debts.

Several bills were introduced during the latter 1940's, though, to reduce ICC power. In 1948, the Railroad Modification Act, permitted a railroad to change the terms of its debt after hearings before the ICC.

(B) WATER CARRIERS

The matter of regulating water carriers was undertaken in part by the Interstate Commerce Act of 1887, but there was no actual central bureau dealing with water transportation before 1940. In that year, the ICC took jurisdiction over inland water carriers; at the same time, about 90 percent of all domestic water carriers were made exempt by Congress from ICC control. Congress was and is very reluctant to place any minimum rates on water transportation generally. Usually the ICC has remained lenient as to fares, number of carriers, and the need for new carriers in the case of water transportation.

The ICC, since 1940, has been trying to follow two opposite policies; one was to keep the "inherent advantage" of each type of transportation, while prohibiting undue preference by controlling the rates, and the other was to promote the joint "rail-barge traffic" in an effort to help water transportation. One goal of promotion usually works counter to the other of regulation.

(C) AIRLINES

While highway and water carriers were coming under the ICC, the airplane business came into being. The Roosevelt administration in 1938 established the Civil Aeronautics Board to centralize control of air traffic. The CAB required published rates and held pooling and other business devices illegal.

When the CAB was created, the "fixed base operators" who made irregular nonscheduled flights—nonskeds—were not included. After World War II, though, the number and unscheduled regularity of nonskeds were making serious inroads into regulated airlines. Using initiative in trying new services, as tourist class, and air cargo, the nonskeds were soon under attack from the regular airlines. By 1949, the nonskeds could not make "joint flights"—which resulted in regular flights—rulings in 1951 that limited the number of flights per month for nonskeds was rescinded.

Generally, the CAB has not had to limit rates, as competition among airlines settled the matter and too, the CAB has not had to consider competing forms of transportation as has the ICC.

In 1958 the Federal Aviation Agency was created by an act of Congress principally to supervise the safety regulations of airliners. The FAA replaced the Civil Aeronautics Agency, but the Civil Aeronautics Board remained in charge of most of its previous duties. The Board still establishes the economic regulations in addition to investigating air accidents. Principally this 1958 act was to improve, widen, and tighten safety rules in air travel.

(D) MOTOR TRANSPORTATION

Motor transportation came under Federal regulation upon enactment of the Motor Act in 1935. Motor carriers did not possess the characteristics of an industry usually having a great deal of governmental regulation, for example, need to invoke eminent domain, undesirable effects of parallel service, and high fixed costs; but regulation has been put on motor transportation because of their deep inroads into railroad markets. The Motor Act gives most power to the States, but if carriers travel in more than three States, a joint board composed of representatives of the States involved is under ICC review. Common carriers are limited more strictly than contract carriers, the former having rates, fares, and charges regulated and published.

PART 2—COMMUNICATION

Control of the wire and wavelength communication industries have posed some of the identical political, technological and economic questions as occurred in the transportation regulations.

(A) TELEPHONE AND TELEGRAPH

In telegraphic communications, the beginnings were marked by many competing companies which soon tended toward consolidation. By the end of the 19th century, two major entities, Western Union and the Postal Telegraph System, dominated the wireless business.

Telephone system development in the United States on the other hand, was synonymous with development of the American Telephone & Telegraph, the Bell System. By 1879, an accord between Bell and Western Union gave the telephone business exclusively to the former.

By 1957, Bell held almost nine-tenths of the telephone industry in the United States.

Before 1934, little regulation of the telephone and telegraph occurred on a national level. Shortly after Roosevelt became President a study of communications was begun, and under the 1934 Communications Act, the Federal Communications Commission was established and empowered to set rates and order the joining of telephone and telegraph systems.

The country's telegraph operations had been in decline, and the FCC had to recognize this in its rulings; by 1935, the Commission permitted consolidation of all telegraph companies into the one, Western Union. The competition in wireless communications remains very weak with A.T. & T. controlling the system.

In 1935, Congress appropriated $1.5 million for an investigation of the national telephone system. The FCC found no scandals or corruption, although evidence of questionable accounting procedures was produced.

The FCC, after succeeding in securing lower rates on interstate calls, found that consumers within a State under looser controls would be paying increased prices for the same distance call. Studies and persuasion by the FCC had resulted, in 1956, in reducing intrastate rates.

Western Electric, the subsidiary of Bell, enjoys a position outside the control, although not the advice, of the FCC.

(B) RADIO AND TELEVISION

In the regulation of utilities, the laws center on limiting the entry, rates, and services of companies; the regulation of radio and television has a multitude of other problems. The entry must be well regulated, while the service of broadcasting ostensibly are to be considered in the light of the public tastes, and the question of censorship. There are no Government regulations on rates as these are established by competition. The fact that there are many more demands to broadcast, and a limited supply of frequency lengths to be divided among private, Government, and commercial uses, makes some regulation necessary.

Government regulations have grown, as has the broadcasting system and the country moved toward controls by establishing a Federal Radio Commission in 1927. The prevailing philosophy, however, was to keep broadcasting as free of Government control as possible. In 1934, the Federal Radio Commission was dissolved, and the new Federal Communications Commission took over control of the airwave communications. Today, the four areas of regulation possessed by the FCC are: First, the allocation of airspace; second, competition and concentration of control; third, regulation and the advance of the art; and fourth, censorship and program control.

Several rulings were passed in the 1930's to establish the policy of the FCC in granting licenses.

In TV operations the stated policy of the FCC is to increase competition when at all possible. The cost combined with small population in many parts of the United States have limited many areas to only one TV station and the number of stations each person can own in one area is limited. The tendency has resulted in concentration of ownership throughout the country.

In radio, dominance by NBC and CBS was curtailed by court order in the early 1940's. NBC was forced to give up its blue network, which became the American Broadcasting Co. Later the Mutual Broadcasting System, through FCC control of individual stations using the two larger networks—NBC and CBS—helped to create a semblance of competition. It is also apparent the rise of television has eroded the network influence in radio, and the dominance in that system is no longer of such concern.

Studies of network concentration in TV by Congress and the FCC have led to many recommendations. Completed in 1957, the FCC report indicated that the high degree of control of TV was not beneficial. In addition to these studies, the Justice Department has planned to bring antitrust suits against the networks if the FCC does not limit their power first. Network spokesmen insist that the amount of concentration is needed to sponsor high-quality programs.

The business failure of FM stations has been another question unanswered by the FCC. Because there were so few FM receivers, the FM stations found it very difficult to secure money from advertisers. The networks, through their AM stations, tried to force their programs on to FM stations. The beginnings of FM, coming on a large scale in 1945, were very enthusiastic, but the mortality rate was very high.

Under the authority of the Communications Act, censorship by the FCC is technically prohibited. The FCC has control through its granting renewal of licenses, which amounts in some degree the same as censorship.

PART 3—WHAT NEXT?—SIGNS ALONG THE NEW FRONTIER

President Kennedy has requested the Department of Commerce to take the lead in developing recommendations for a national transportation policy to be considered and possibly submitted to Congress next session.

Recognizing many of the controversies facing the trucking, railroad, water carrier, and airline industries result from competition with one another, it is also noteworthy, according to Secretary of Commerce Hodges, that the Government has already spent between $1 million and $2 million for "studies" of the transportation industry. It is now time for action—time to determine the proper role of Government, if any, in the transportation industry.

The question of "subsidies" to the transportation industry is discussed in the Joint—House-Senate—Economic Committee of November 1960, and is pertinent because the present administration has indicated a willingness to subsidize. A formidable problem is presented when the words "subsidy" or "subsidize" are used:

Both of these, it seems, are words that are likely to invoke an emotional response. Proponents of a Government program designed to aid a particular industry, group, or type of enterprise avoid and indeed resent the term "subsidy" in describing their program, preferring to call it an aid or an expenditure necessary in the national interest or defense. For their part, opponents of the program, in their use of the label "subsidy," seek to stigmatize, or at least to suggest if not demonstrate, that the program somehow benefits certain individuals at a cost offset, if at all, by doubtful benefits to the American taxpayer in general. General agreement on a definition may well, under the circumstances, be unattainable—(Joint Economic Committee report—November 1960).

The report, in brief, indicates transportation subsidies have been paid and statements therefrom are as follows:

AIR TRANSPORTATION

The original subsidies for air transportation took the form of mail subsidies. The Air Mail Act of 1925 provided for the retirement of the Post Office from flying activities and the awarding of mail contracts to private companies by competitive bidding. Charges of collusion between the mail carriers and Post Office officials led to the cancellation of all airmail contracts in 1934. The Air Mail Act of 1934 restored contract operations and competitive bidding. Total payments to airmail carriers increased from $9 million in 1935 to a little over $14 million in 1938. The Civil Aeronautics Act of 1938 further liberalized airmail payments. Under Reorganization Plan No. 10, which became effective August 1, 1953, it was provided that on and after October 1, 1953, the Postmaster General will pay to each certificated air carrier a fair and reasonable "service" rate for the transportation of mail by aircraft, which will be fixed by the Civil Aeronautics Board without regard to a "subsidy" rate. The Civil Aeronautics Board then pays all compensation in excess of the "service" rate which will represent the "subsidy" paid by the Board to certificated air carriers. This procedure is now authorized under section 406 of the Federal Aviation Act of 1958.

The mail subsidy to certificated air carriers as compared to the actual service mail pay in 1961:

[In thousands]

Fiscal year 1961 (estimated):	
Mail, ton-miles	218,038
Service mail pay	$94,108
Subsidy	69,251
Total service mail pay and subsidy	163,359

Aside from these direct subsidies, air carriers have also benefited from such varied governmental assistance as airport and airway facilities, other navigation aids, aeronautical research and development conducted under governmental auspices, the safety regulations of the Civil Aeronautics Administration, and the sale of surplus aircraft, available to both new and existing companies engaged in civil transport.

MOTOR CARRIERS

Whether the extensive expenditures on highway and street improvement constitute a direct subsidy to the motor carrier industry has been widely debated.

Representatives of the motor carrier industry have contended that through registration fees, gasoline taxes, and other charges which have gone into the construction of public roads, the industry has met all the costs properly attributable to it. This is denied by railroad spokesmen. Studies sponsored by the Federal Coordinator of Transportation indicate that for the periods studied, 1932 and 1934, the motor carrier industry as a whole was not the recipient of any form of public subsidy. However, certain parts of the industry, such as farm trucks and trucks of 1½ tons and less, did not meet the costs assigned to them.

RAILROADS

The principal direct subsidies to the railroads took the form of land grants from 1850 through 1871 to aid in the construction of new railroads. Other early indirect aids to railroads took the form of lowering the import duty of railroad iron, mail service contracts, and grants of rights-of-way over public lands.

The Transportation Act of 1958 provides for Federal guaranteeing of loans to railroads upon approval by the Interstate Commerce Commission and eases the requirements for abandoning and curtailing unprofitable runs.

WATER CARRIERS

Aside from direct land grants to canal companies, public aid to water carriers has historically taken the form principally of Government improvement and maintenance of waterways. Between 1827 and 1866 the Federal Government granted 6,340,339 acres of public lands to private interests to aid in canal building and river improvement, in addition to right-of-way grants. Further, the Federal Government contributed various sums in the form of direct appropriations, subscriptions to the stock of, or loans to, private canal companies, and also deposited with the States so-called surplus funds derived from the sale of public lands. Even today, the maintenance of waterways, improvements of rivers and harbors, and providing various navigation aids such as lights and buoys may be considered to subsidize inland and coastal water transportation companies.

Following a recent statement by the ICC concerning a railroad subsidy proposal, E. S. Marsh, president of the Santa Fe Railroad, stated:

> A Federal subsidy to railroads is the first step toward eventual nationalization of all transportation and it is in my opinion an undesirable alternative to establishing national transportation policies that would allow private ownership to compete on a basis of equality. The timetested American system of free competitive enterprise should prevail in transportation as it does in other business.

Senator LAUSCHE, Democrat, of Ohio, on August 31, 1961, branded the ICC proposal as "the beginning step toward socialization of our railroad system."

The administration has already indicated considerable interest in regulatory agencies affecting the transportation industry.

The Civil Aeronautics Board has been reorganized in accordance with the recommendation of the task force headed by James M. Landis. Ostensibly the reorganization was to facilitate administrative functions. Actually it vests more authority in the Chairman and, in effect, places more control in the executive branch and less in Congress even though the CAB was created to carry out legislative policies.

The Landis report also recommended broad changes in the ICC. Primarily the reports called for greater delegation of authority and more centralization of responsibility.

The trucking industry has indicated its concern is not that there be less regulation but that there be more effective application of the regulations that exist. This industry indicates that generally speaking Federal regulation has been beneficial and necessary to insure progressive development of our transportation system. Railroads point out their major difficulties stem from "burdens and inequities of regulations."

In making suggestion to Secretary of Commerce Hodges on August 28, 1961, concerning improvement of the transportation system, the Association of American Railroads or the American Trucking Association, Inc., point up many areas of wide disagreement but neither organization suggests any material functional changes in the ICC.

In the field of communication the administration has also moved toward a more powerful executive. The first attempt by the President to reorganize the FCC along the lines of the Landis report was sharply rebuffed in the House by a vote of 323 to 77. The initial plan would have permitted administrative decisions to be made by employees far removed from the control of the electorate and the chairman would have become a "wagon boss" on the New Frontier. The plan went far beyond the intent of the 1949 Reorganization Act and finally when Congress created the independent regulatory agencies the intent was to put them beyond the reach and not subject to the political whims of the Executive.

Whether it be transportation or communication, history has indicated a need for basic regulation by independent regulatory agencies created by and responsible to the Congress. The Congress must zealously guard its constitutional right—article 1, section 1—which vests in it all legislative powers and in addition must never surrender its control of regulatory agencies to any executive.

The roots of Government regulation, where necessary, should ever reside with Congress whose members are directly responsible to the people. Let us not subvert the Constitution under the guise of efficiency or economy for power lost is seldom regained.

Mr. BRUCE. Mr. Speaker, at this time I yield to the gentleman from Nebraska [Mr. BEERMANN].

OPERATION SURVIVAL—AGRICULTURE

Mr. BEERMANN. Mr. Speaker, as a Member of Congress, as a member of a Nebraska family that has been engaged in farming for the last 90 years, and as a citizen concerned about the prospect of national and world control of our food supply, I present my views on Operation Survival in Agriculture.

From continuous and personal contact with farmers, I take the position that farmers in my State, as well as others, are anxious for the day when Government will gradually withdraw controls from agriculture. As one farmer wrote me in a letter:

> It's a sorry day when my ability to farm depends more on my skill at interpreting Government farm regulations, than it does on my knowledge of seed and soil.

At the same time farmers yearn for less Government interference, they are also hoping Government will withdraw subsidies and supports from other industries. A completely free economy, kept healthy by the checks and balances of a private enterprise system, must exist if the emancipated farmer is to avoid being caught in the economic bind, commonly referred to as the "cost-price squeeze."

To bear out my contention, namely, that farmers generally do not want Government controls, I need only cite the recent referendum on wheat within my State. Here, approximately 78,000 growers were eligible to vote in a subsidy control referendum. Despite one of the greatest publicity campaigns on record, in which newspapers carrying Government press releases practically pleaded with wheat farmers to express an opinion, only 16,000 did so. These 16,000 represent about 20 percent of those eligible. The favorable vote—12,800 in favor of more control, higher subsidy—represents approximately one-fifth of all growers eligible. Dakota County, Nebr., is my home county and has approximately 700 farms. In this same wheat referendum of August 24, 1961, Dakota County had 24 eligible farmers but 22 did not vote. The Department of Agriculture lists Dakota County as 1 of 11 counties turning out 100 percent in favor because the two who did vote, voted "Yes." I submit these figures hardly constitute an overwhelming approval of the new wheat program as has been reported by many USDA offices through area newspapers.

Instead to me, the result of the referendum indicates about 85 out of every 100 wheat farmers do not care enough about Mr. Freeman's wheat plan to even express an opinion. And what is more heartening, are probably eager for some sort of legislation that will eventually and gradually, withdraw his interference from wheat farms altogether.

Looking at the results of the same referendum from a national point of view, here again I might point out is evidence that farmers do not like controls. Nationally, although farmers were voting on whether they wanted $2 or $1.19 per bushel for wheat, the "No" votes increased in volume by 140 percent. Meanwhile, the "Yes" votes increased only 35 percent. It takes real fortitude to vote yourself off a Government "gravy train." Yet wheat farmers are apparently expressing that opinion just like corn farmers did a few years ago when given an opportunity.

Agriculture, as you know, is our oldest industry. In pioneer times, over 90 percent of our population was engaged in the production of food. Today, with all the improvements in farming methods, less than 10 percent of our population is so employed, and statistics indicate that 1 farmer now produces enough food and fiber to support 26 persons.

This progress has been made possible through many new and improved ideas. Much of the progress is due to the research, experiments, studies, and educational facilities of the U.S. Department of Agriculture. In what I would term the proper exercise of its responsibility, the Department has provided the farmer with new methods of soil nutrition, improved crop varieties, sound soil conservation practices, even better methods of bookkeeping. Private industry has added its share by the development of more efficient fertilizers, and almost explosive gains in industrial technology. To these, American farmers have added what can be called a God-given desire to produce. By way of emphasizing this point I offer these figures quoted from a column by Drew Pearson. On September 6, 1961, in the Washington Post, Mr. Pearson said:

If imitation is the sincerest form of flattery, the Russians have paid us many compliments by imitating our automobiles, our airplanes, our vending machines, and our jazz. Their sincerest compliment, however, is in the imitation of our agricultural methods.

Here they have frankly and enthusiastically followed many of our farm methods, and with equal frankness have published figures showing that they are behind. * * *

The most significant aspect of Soviet agriculture, however, is revealed in official Soviet figures. They show 54,600 collective farms and 6,500 state farms with an average respectively, of 13,684 and 58,000 acres each.

Against this, according to the same Soviet figures, there are 4,785,000 individual American farmers with farm averaging 220 acres each. And the horny-handed individual American farmer has been able to outproduce Soviet farms by about 30 percent.

Soviet production figures show how he has done it—by raising 21.1 bushels of wheat per acre against 16.3 bushels of Soviet wheat; and 59.4 bushels of corn per acre against 22 bushels of Soviet corn.

It is quite apparent from Mr. Pearson's figures that Russia would love to have our agricultural problem.

I believe it should be noted here that while American farmers have accomplished their present high production records, mostly through their own initiative, they have at times been encouraged to abandon their well developed business sense by the gradual encroachment of controls and subsidies into the farm scene. I will frankly admit that, under legislation by Congress, the intrusion of the Department of Agriculture into the farm scene in the 1933 depression was made with the best of intentions.

In the years after 1933, as subsequent administrations made further encroachment into agriculture it was tolerated on the basis it would prevent a reoccurence of what had happened earlier. Lulled by this excuse over subsequent years we have witnessed what has amounted to an almost complete farm takeover by a socialized philosophy that would help farmers by enslaving them. In the last 2½ years we have seen the pattern for rigid control over production and marketing emerge, as outlined in the speeches by former Harvard professor, Dr. Willard Cochrane, an economic adviser to the Secretary of Agriculture.

Each week that I have spent in Washington I have received constant reminders from individual farmers saying they would like less Government interference. I have tried to relay these beliefs to my committee, the House Committee on Agriculture. But despite these constant reminders by other members and me, committee action the last 6 months has hardly been in the direction of farm independence. Instead, the committee has consumed almost an entire session on the consideration of two bills, first, the so-called emergency feed grain bill and, second, the Secretary of Agriculture's dream of farm utopia, H.R. 6400. Both measures increased Government interference in farming instead of decreasing it. In addition, H.R. 6400 would have, if passed, called upon Congress to abandon its recognized constitutional authority to consider all phases of farm legislation. In short, the bill would have reduced the highest legislative branch of the United States to the role of a "yes" man and restricted congressional action to a veto of recommendations by an administration handpicked commodity committee.

Mr. Speaker, the feed grains bill was supposedly an administration "emergency" measure. In committee we were told that its effect would be carefully considered before it became a permanent measure. Yet as you well know, in the middle of the growing season before the first crop year could be experienced under this law, and before the remotest idea of its effect on the general economy could be ascertained, it was extended. I offer these two pieces of legislation as prime examples of the work of political theorists who are attempting to further enslave agriculture without any thought whatever toward the farmers' constant plea for independence.

In regard to the feed grain bill let me remind you that administration spokesmen have said it has been "eminently successful." This point of view hardly agrees with my information. My sources indicate the feed grains law is going to cost taxpayers more instead of saving them the $500 million promised by the Secretary of Agriculture and his advisers. The law will also withdraw about 5 million acres less from production than first anticipated. Remembering first, this important factor; second, the farmers' desire to produce; and third, the importance of God and the weatherman on crop yields, I would venture that this year's application of the feed grain law will not reduce farm surplus any appreciable amount.

Here again to emphasize my main theme of farm independence, I want to point out that the large farm signup, in the feed grain program, was pointed out by USDA and legislative spokesmen as proof that farmers liked controls and subsidies. The truth is many farmers signed up with no thought of participation, but were lured, and naturally so, by the fact that the program offered good-weather insurance. Farmers were assured by the Department that there were no contracts, no penalties for failure to comply, in fact everything to be gained and nothing to lose. Many farmers also signed up under the threat of a policy that would allow the Secretary of Agriculture to dump Government stocks of grain on the market before planting and again at harvest time for the sole purpose of depressing the price for the noncomplier.

Mr. Speaker, I am in full agreement with farmers who believe the answer to farm surplus problems is less Government interference. I recommend that Government withdrawal from farming be gradual, but still as rapid as commonsense would dictate. Meanwhile, there are some things that we can do to help:

First. I understand Congress transferred much of its authority to make decisions in matters affecting agriculture to the Federal Tariff Commission in the 1930's. I suggest Congress, through a duly authorized committee, make a close examination of the actions of the Federal Tariff Commission and some aspects of the administration of Public Law 480 by the Department of State. Information currently indicates that some of our domestic farm products are actually being discriminated against in decisions by these agencies. The subsequent harm to our domestic farm production is excused or justified on the basis of being diplomatically expedient.

Second. As elected representatives of the American farmers let us insist they be given the right to produce crops that are not in surplus. There is no justifiable reason, in my opinion, why the American farmer should not have the opportunity to produce the 45 percent of our domestic sugar consumption that is currently being purchased outside the United States. The right to produce sugar crops would utilize 1,800,000 acres of U.S. farmland that is currently producing unneeded surpluses. The impact this added production would have on the farm would be highly favorable. It would in effect help level out the ups and downs of agricultural economy. In addition, it would aid in preserving the small town, attract industries and factories to rural areas, and in general reverse the trend of declining rural populations.

To add a patriotic flavor to this plea, may I point out that part of our present sugar use tonnage, formerly supplied by Cuba subsequently withheld by the President, is now being produced by countries with political philosophies antagonistic to Operation Survival America. To restrict production and income of our American farmer who might benefit from sugar crops and at the same time assist totalitarian regimes to profit thereby, I suggest is outright stupidity.

Third. As a final step toward the emancipation of agriculture, I would suggest that we confine the U.S. Department of Agriculture to the performance of the technical skills for which it is best suited. Since the early 1930's, directed by socialistic-minded administrators and unrealistic theorists, the Department has

consistently strayed from its original purpose—technical assistance to the farmer. This, I believe, is the Department's proper area of responsibility, and here I suggest that Congress insist the Department direct its talent.

I will frankly admit that agriculture's return to the free enterprise system after 30-odd years of constant Government interference probably may not be easy for some farmers. Many operators may need help through this transitional period, and if such is the case, I suggest it might be offered in the form of crop loans based on a percentage of average costs. Present policy, wherein we loan the full selling price can hardly be called loans. In most cases these aids actually constitute sales, and as long as we pursue this policy, a policy that encourages maximum production without regard for the probable market, we are asking for trouble.

To illustrate, may I say that if you will loan me the full sale price of buggy whips, I will produce them for you until they run out your ears, although the market for them vanished years ago. When no market exists for the surplus, it is just as foolish to loan the full selling price for surplus farm crops.

A percentage of cost loan, on the other hand, could be expedient. In addition to supporting marginal farmers through the transition period, it would also enable them by self-determination to orderly market crops at the year's highest price. At the same time it would not release farmers from the responsibility of planning and tailoring farm operations to the rise and fall of unsubsidized private markets.

Once again I repeat, the solution to the American farm problem is the one advocated and voiced by the farmers themselves:

> Get Government out of agriculture as quickly as possible; and while we are at it get Government out of other business too.

Let us keep in mind the words of Emerson who said:

> For what avail, the plough or sail,
> Or land or life, if freedom fail.

Mr. BRUCE. Mr. Speaker, I yield to the gentleman from California [Mr. ROUSSELOT].

THE FIGHT FOR SURVIVAL IN HOUSING

Mr. ROUSSELOT. Mr. Speaker, our country has always provided the opportunity for each citizen or even noncitizen to enjoy the right of private property. This concept has been broadened to such an extent in our U.S. society that better than 60 percent of our families own their own homes.

Homeownership is more warmly anticipated by newly formed families than most other emerging responsibilities of adulthood.

Private ownership of one's home is more possible in the American system of freedom than in any other society.

Why is this true? Because the Constitution grants the right of private property, individual initiative, and denies the Federal Government the absolute power of land grant. The fifth amendment of our Constitution clearly states that no person shall be "deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation." So we can plainly see that around this sacred guarantee has grown the American institution of private home-ownership.

Further, these principles in our Constitution have guaranteed a broad base for private and competitive home rental units for those owners who wish to supplement or earn their entire income from this source. Rental units are another form of homeownership that provide self-sufficiency of our citizens.

These concepts and realities of homeownership are a far cry from the practices of monopolistic feudalism formerly permitted under the divine right of kings or by government decree in foreign countries. These feudalistic practices of landownership have prevented individual homeownership under past and present governments. Some would contend that it is purely ridiculous to say that this kind of abuse of private right can occur in the United States of America. My question is, Are those who take this position correct, and are they really looking at the signs of the time? President James Madison said:

> Since the general civilization of mankind I believe there are more instances of the abridgment of the freedom of the people by gradual and silent encroachments of those in power than by violent and sudden usurpations.

These words are more applicable today than we are willing to admit. In our fight for survival an important area where these silent encroachments are disintegrating the foundations of our private right is in the sacred field of homeownership.

What is this destructive force to our guarantees of private homeownership? It is the same group of so-called elite specialists and special managers—the collectivists, the Fabian Socialists, and the Communists—who are trying quietly to steal other freedoms. These groups cooperate in one grand brotherhood of organized deceit.

How is this masquerade of destructiveness being advanced? It has many names—some examples of the guises under which it many times operates are "humanitarianism," "a little bit of sugar for everybody," "social welfare," "progressivism," and "better housing through long-range planning by Government experts." Beneath this facade of high-blown phrases it boils down to the same old thing—the management, control, and ownership by Government of the major means of production and distribution of housing—Webster's definition of socialism—in two words, "socialized housing."

Interestingly enough the international Communist conspiracy has a catch phrase for this kind of activity—"creative state housing," mentioned in a new book entitled "Fundamentals of Marxism-Leninism." My name for all this is simply "Federal economic feudalism." Other conservatives call it "a Federal landlord policy." Some will say, "No, you are wrong. It isn't that bad here. In America we haven't drifted that far toward Federal control of housing." Let us scan some of the recent editorials to see if this argument holds true.

House and Home, one of the largest industry publications in the field of housing, states in the August 1961, edition:

HOUSING ACT OF 1961: COSTLY, CONTROVERSIAL

> The Housing Act of 1961 is the most controversially costly and crazily complex piece of law housing has ever had. It is loaded with something for everybody—cities, railroads, farmers, poor people, middle-income families, builders, savings and loan associations, prefabbers, public housers, urban renewal promoters, even trailer park operators.
>
> The new law—and the administrative regulations that are following—is stuffed with new programs intended to stimulate housing (unemployment is heavy among construction workers). But don't expect it to produce a quick upturn in housing. For one thing, most of the new programs are so complicated it will be months before the industry—and officials—know how to use them.

Congressman EDWARD J. DERWINSKI placed an article by O. G. Powell, president of the National Association of Real Estate Boards, in the CONGRESSIONAL RECORD of July 12, 1961. To quote from this article entitled "Victory or Travesty?"

> This association would be remiss in its responsibility, not only to its members and the real estate industry but to the public, if it did not raise some question—indeed some warning—that the philosophy underlying not only the bill but some aspects of its handling in the Congress is inimical to the public welfare.
>
> The bill involves a total financial impact of $9 billion because its composition was determined not on the basis of demonstrated need, but because the practicability of legislating a controversial bill dictated that there be something in the bill for everybody. And so the farmers, the small towns, the big cities, the commuters, the nature lovers, the savings and loan associations, the homebuilders, the low-income groups, America's great middle class, the South, the West, the East, the planners, the trailer park owners and a host of other interests—sectional vested, and ideological—rallied behind the measure, each group hailing the merits of its own provision but oblivious to the impact of the bill on the taxpayers and the moral fiber of the American people.
>
> The bill launches a new form of Government-owned shelter for America's middle class whose self-reliance has always proved the measure of a nation's greatness. The desperation with which the proponents of this bill fought for its enactment is best manifested by the tortuous strain which the bill's handlers placed on the legislative process.

Another excerpt from the article appearing in the August edition of House and Home calls attention to the recent housing legislation with the following headlines: "Look How Big the Housing Tent Has Grown: New Subsidy Programs for Open Space, Mass Transit; Bigger Renewal Grants for Small Towns."

The magazine further quotes the gentleman from Alabama, Congressman ALBERT D. RAINS:

> The housing bill has to have a little bit of sugar in it for Congressmen whose towns don't have renewal and not even public housing.

The Communist Party, U.S.A., has consistently advocated widespread development of public housing. I quote from "Social and National Security"—see pages 20 and 21—a pamphlet by Earl Browder, which was published in 1938 when Browder was general secretary of the party:

> The heart of any serious program of public works must, quite evidently, be a large-scale housing program. Here it is necessary to go far beyond the timid experiments launched so far. The United States must begin to act on housing in a large way, with a program running into billions of dollars. Especially in this field the benefits are so obvious, the resulting increase in national wealth and well-being so much greater than elsewhere that there can be no excuse for further delay.

In 1949 William Z. Foster, who was then chairman of the Communist Party, U.S.A., called for "the development of gigantic housing plans." See William Z. Foster, "The Twilight of World Capitalism," International Publishers, New York, 1949, page 35.

Recently the Communist line was reiterated by Gus Hall, the current chairman of the Communist Party, U.S.A. In an article appearing in the February 1961 edition of Political Affairs—a publication identified by the FBI as an organ of the Communist Party—Hall says:

> We have a general approach that is basically sound. It includes such demands as a 30-hour week, a much higher minimum wage, Government controls to transfer some of the superprofits from automation to the workers and the public in the form of price cuts and wage increases, higher unemployment compensation to be paid as long as one is unemployed, a large public works program of housing, roads, hospitals, schools, etc.

Today legislation is pending in the U.S. Congress which would establish a massive Department of Urban Affairs. Under this proposal an Administrator or Secretary of Cabinet level would sit as a supermayor to supervise the activities of urban affairs, especially of housing—H.R. 8429.

So you see, like the Communists, the collectivists, Socialists, and neo-Marxists collaborate to encourage a program of giant Government housing which is intended to be humane but which really denies the right of each citizen to own his own home. In the name of "better progressive housing" the Government becomes a superlandlord and overseer of interest rates, land management, land development, public housing, private housing, transportation to and from your home, open space, and urban redevelopment. All these Federal programs are activated by administrative permission or decree.

Is this really what we want? Or is it what outside forces want for us?

Next, people say, What can we do? There are several productive approaches that can be taken now:

First. Each individual citizen can stop expecting or asking the Federal Government to do everything. There is really only one way to own a house, and that is to buy it on your own under the best terms that you can obtain from private enterprise in your area.

Second. Congress can begin to eliminate Federal control and unnecessary responsibility in the field of housing. This will require some revisions in the National Housing Act, and as a member of the Banking and Currency Committee, I intend to submit some specific legislation next year.

Third. Citizens can demand the improvement of local area building codes which in the long run will prevent substandard housing from being built in the first place. In an article of the April 1961 edition of House and Home entitled "An Open Letter to the President," suggestions are given for improvement and standardization of building codes.

Fourth. Every citizen who possibly can should invest his savings in financial institutions which provide mortgages for local homes in his own area. This reduces the necessity for Federal financial participation and creates additional financial resources.

Fifth. Our wage earners and salaried personnel should encourage investment of their union and company pension funds in good, sound homebuilding projects.

The above are but a few of the things that we can do as individuals to rekindle the dedicated individual spirit of homeownership that has always existed in this country. It has been only in recent years that we have come to rely so extensively on the Federal Government to assume responsibility for housing.

Karl Marx, in his Communist Manifesto, states that the "abolition of property in land and application of all rents of land to public purposes" is one of the primary planks of Communist philosophy. In our free society we have clearly rejected this proposition. However, there are some very well meaning people who have equated social progress or social consciousness with socialism—Karl Marx was a self-identified Socialist. As Americans we can give our social consciousness full expression through voluntary, private, nonprofit charitable organizations or local government units without changing our Republic to a Socialist state. Therefore, a great many of us reason that our citizens can have a sense of social responsibility in the field of housing without socialized Federal housing.

Most important, the fight for survival against communism and collectivism has to begin at home. This fight is definitely internal as well as external.

The elimination of our constitutional right to homeownership and private property in some instances is being usurped by or given away to the Federal Government unnecessarily. There is one way for us to be participants in the "communal living" concept of housing practiced in Communist countries, and that is to give up our private homes and rights of private property. We do this by exchanging these property rights for less expensive, no-downpayment, subsidized Government-owned rental housing.

President Madison was right. It is possible to allow the abridgement of our freedoms by gradual and silent encroachment. The question the American people must answer is, Are they going to allow this right of private homeownership to be taken away by the Federal Government?

Mr. BRUCE. Mr. Speaker, at this point I ask permission to insert in the RECORD the remarks of the gentleman from Montana [Mr. BATTIN].

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. BATTIN. Mr. Speaker, I am happy to participate with my colleagues in this discussion of a serious topic rightfully termed "Operation Survival."

No speech or discussion on the survival of this country, whether economically or militarily, would be complete without a statement relative to our internal security.

The words "internal security" are perhaps not too descriptive, for they do not dramatically point out the dangers this country faces in a peaceful overthrow of our Government by the Communist conspiracy and by people who act knowingly or unknowingly in undermining our free system of government.

The problem goes back many years, but it does fit into a pattern that tells a miserable story of what has happened and what can happen.

Looking in retrospect and using the facilities of a Monday morning quarterback, it appears without question that the U.S. recognition of the Russian Communist government provided the Communists with a great advantage in their play for world conquest. It gave to them world recognition, financial credit, and a peaceful entrance into this country and the countries throughout the world, which until we recognized them had been withheld.

It did not take the Communists long to take advantage of the economic depression in the country in the 1930's—they moved in and exploited the jobless, the hungry, and those in despair, and were somewhat successful in establishing a beachhead that has never been destroyed.

We found ourselves as an ally of Russia in World War II, an ally for the purpose of a military victory.

During the war years, however, the Communists did not see fit to declare a moratorium on their activities in the United States, but on the contrary used this military tie to foster and promote their subversive activities. The fact is that since the inception of communism the leaders of Russia have been waging an unrelentless war against the forces of free people. Their plan is world conquest and they move slowly or at a quick pace, depending on the resistance offered by their adversary.

Before the Congress found it necessary to pass the Internal Security Act of 1950, faint suspicions of our peril must have been in the minds of Congressmen, for in 1938 the Foreign Agents Registration Act was passed.

The Congress of the United States, on September 23, 1950, passed the Subversive Activities Control Act. Section 2(1) of the act declares that there "exists a world Communist movement, which in

its origin, its development, and its present practice, is a worldwide, revolutionary movement. The purpose of this movement," the act goes on to state, "is by treachery, deceit, infiltration into other groups, espionage, sabotage, terrorism, and other means deemed necessary to establish through the medium of a worldwide Communist organization a totalitarian dictatorship in countries throughout the world."

The act was amended on August 16, 1954, to include the Communist Control Act, and other amendments were passed to tighten our laws and make it more difficult for the Communists to make gains in this country.

Laws are without value unless the people know the problem and decide to do something for their own protection. You cannot legislate pride of country, but as representatives of the people we can and must point out the dangers.

The task of administering the control laws was given to the Justice Department, and, as a result, the Department has formed the Internal Security Division. The Division is headed by an Assistant Attorney General who coordinates the forces of the Federal Bureau of Investigation, and other security agencies.

At the present time under the direction of the Assistant Attorney General in charge of the Internal Security Division there are 126 employees, including 69 lawyers, who make up the administration and clerical end of the enforcement procedure. This, of course, does not include the forces of the Federal Bureau of Investigation.

The Federal Bureau of Investigation is given the responsibility of—first, general criminal investigations; second, domestic intelligence; third, coordination and dissemination of security data which includes the responsibility of correlating information regarding espionage, sabotage, subversive activities and related matters on a national basis; and fourth, specialized security problems which are largely concerned with various sensitive types of applicants and employee investigation.

On page 401 of the hearings before the subcommittee of the Committee on Appropriations dealing with the Departments of State and Justice, the judiciary and related agencies on appropriations for 1962 is found a description of the Communist Party, U.S.A. For purposes of brevity I will paraphrase from the findings made by the Federal Bureau of Investigation. The U.S. Communist Party is the largest subversive organization in existence in our country today. It poses a grave menace to our internal security and its ultimate goal is domination and control of all nations on the face of the globe. Since its founding—U.S. Communist Party—in 1919, the party has taken direction and guidance from the Communist Party of the Soviet Union whose ultimate aim is the overthrow and destruction, by force if necessary, of our Government. The FBI reports there are approximately 200 known or suspected front and Communist-infiltrated groups under investigation and that many of these front groups are national in scope.

Mr. J. Edgar Hoover, in testifying before the committee, pointed out the vast scope of the problem when he stated that "91,844 security matters had been referred to the Department's attention for investigation in the last fiscal year." Imagine 91,844 security matters in 1 year.

Mr. Hoover stated that the Communists exploit every known situation, and cites the sit-in demonstrations, the attack on the House Un-American Activities Committee, and the movement into the youth groups as examples.

Gus Hall, the present head of the Communist Party, U.S.A., is a ruthless, militant, Moscow-trained ex-convict, who is in a position of top influence in the party today. This description is from Mr. Hoover, the leading authority on the subject of communism.

In considering our security it must be remembered that not only is the Justice Department involved, but so is the Department of State, for under the present law the State Department has control over the issuance of passports and visas, and since a decision of the Supreme Court on July 16, 1958, a number of well-known Communists have traveled abroad to Russia and while abroad have made specific attacks against this country.

While considering the passport problem, I think we will all agree that our security should be, and in fact must be, a nonpolitical consideration. Yet, we find that the Honorable FRANCIS E. WALTER, a Member of Congress from Pennsylvania, found it necessary to introduce a bill in this session of Congress to take the positions of Administrator and Deputy Administrator of the Bureau of Security and Consular Affairs of the Department of State out of political hands.

On the floor of the House on July 6, 1961, Representative WALTER said:

> Mr. Speaker, I introduce today a bill designed to correct a deplorable situation which is about to occur as a result of the apparent intention of the administration to place certain vital administrative functions in the field of national security in the issuance of passports and visas in the hands of totally unqualified political appointees.

We also find tied up in our internal security problem the Department of Commerce. This Department has a hand in the administration of the Battle Act which prohibits people in this country from trading with our enemy.

Congressman GLENARD P. LIPSCOMB, of California, in questioning Mr. Hoover when he appeared before the Appropriations Subcommittee, asked this question of Mr. Hoover, which appears on page 437 of the transcript of hearings:

> Mr. LIPSCOMB. Mr. Hoover, is there anything we can do to call to the attention of American businessmen the danger of this kind of trade (i.e., precision ball bearing, machines, etc.) to Communist bloc nations? If Soviet agents are making business contacts with American businessmen in such plants as precision ball bearing, or these motors I was talking about, surely they have access to the plant and other things that they should not be entitled to.
>
> Mr. HOOVER. The Department of Commerce has the authority of granting export licenses and, therefore, has some measure of control over such matters. As you indicated, the Secretary of Commerce withdrew the export license which had been granted. It was probably granted prior to his becoming Secretary of Commerce.
>
> Mr. LIPSCOMB. It was.
>
> Mr. HOOVER. Such matters are generally handled down the line and not at the secretarial level. As to the attitude of the American businessman, a few of the individuals are unwittingly sympathetic, or are inclined to fawn over the Soviets.

Now we find that after rescinding the export licenses the Commerce Department reissued the licenses, and, as a matter of fact, since the first of the year the U.S. trading with the Communist bloc nations has increased somewhere in the neighborhood of 800 percent.

In August 1961 the Department of Commerce approved 41 export licenses for the sale of goods to Communist bloc countries. They went like this: 13 licenses to export to Russia, 11 to Czechoslovakia, 9 to Yugoslavia, 4 to Rumania, 2 to Hungary, and 1 each to Poland and Bulgaria.

Ruled nonstrategic in nature and, therefore, approved for export were all ball bearings, machine tools, power transmission systems, aircraft, and automotive spare parts, electrical machinery, geophysical instruments, and other industrial products and chemicals.

Just who is trying to fool whom? This reminds me of the scrap metal we sent to Japan. Remember, we got it all back in the form of bullets, bombs, and war. With the Berlin crisis before us we must stop this nonsense.

It would seem, therefore, that we are fighting ourselves—that we are waging a war against communism with our right hand and aiding the Communists with our left. The theory of some people in Government is that we should not wage psychological or perhaps military war with a weak enemy, so we should, therefore, do everything within our power to build their might.

Mr. Hoover states that public apathy is a big problem. I am sure that we are all eager to fight with everything within our power against the Communist menace, but do we really know what our enemy looks like or how he fights?

Let us go back a short time in our history and make a few comparisons. After the exchange and repatriation of the American prisoners taken in the Korean war, it became apparent that some of the prisoners had been brainwashed and the hue and cry was raised from the good citizens of the country that something should be done to teach our servicemen just what it was they were fighting for, the things that made America great. Yet, today we find the press, some leaders in Congress, some well-meaning but misdirected people, criticizing the military for instructing our own military forces in the basic rudiments and principles upon which this country was founded.

Some people in high office have gone so far as to write memoranda to the Department of Defense criticizing the military, downgrading its leaders for teaching the American way of life. Contrast this, if you will, with your own feelings when our own boys were brainwashed in Korea.

Take the "justifiers." Not too long ago a well-known Washington com-

mentator tried to explain that there was a difference in communism in countries and used the election of a Communist in British Guiana—South America—as an example. The commentator's statement went something like this: Even though Dr. Cheddi B. Jagan was trained in Moscow, his wife is a Chicago Communist, one of his aids is an English Communist, so we can hope that they will have some influence on him. Contrast again, if you will, the pronouncement of Congress in 1950 as to what the Communist Party, U.S.A., intended to do, remember, destroy our system. In my humble opinion, the only way you can distinguish between Communists is to compare them to a rattlesnake, that is, they are either small, medium-sized, or large, but all deadly.

Remember the general brainwashing of the American people that took place when we were told that the Mao Tse-tung movement in China was nothing more than an agrarian revolt and even now our Ambassador to the United Nations is not sure that Red China will be kept out of the United Nations. Some of the world planners hope you have forgotten about our veto power. Have you?

The Soviet Union has been extremely clever and most successful in using the double standard technique as pointed out by Mr. Edward Hunter, of New York, in his testimony before the Senate subcommittee appointed to investigate the administration of the Internal Security Act and other internal security laws. Hunter is an acknowledged expert in the field of brainwashing and mass psychology and in discussing the double standard he makes it very clear that the Communists have made it unpopular to criticize what they do, for when you do they charge that you are an extremist, or a Fascist, or ultraconservative, or "red herring," or McCarthyism, or that you are invading their constitutional rights, but they reserve the right to call the United States any name they desire. This we have been taught is expected and we should not worry.

We all agree it is time to lay the cards on the table and approach the menace of communism with the same diligence they approach and infringe upon the free nations of the world.

Mr. Speaker, we are not fighting to see whether a Republican or Democrat will be elected President. We are not fighting to see whether the Republicans or the Democrats will control the Congress. We are fighting for the very survival of the system which has produced for the world the greatest economy ever known to man, a system that has produced a free and intelligent people who acknowledge a faith in God and a dedication to their fellow man. We are fighting to maintain a system that will allow the American people freedom of choice, freedom to elect a Republican or Democrat as President, to freely select the leader of this country, and even more important to change leadership without the necessity of a revolution.

Mr. Speaker, survival is still in the hands of the people—we should leave it there.

Mr. BRUCE. Mr. Speaker, I yield to the gentleman from Illinois [Mr. ANDERSON].

OPERATION SURVIVAL—FOREIGN POLICY

Mr. ANDERSON of Illinois. Mr. Speaker, in connection with any discussion of those issues which are linked to our survival as a Nation, the subject of our foreign policy is clearly relevant. A recent article in one of our national magazines estimated that our Chief Executive today must necessarily spend a full 70 percent of his time on matters in the international field.

Prior to coming to the Congress I had the privilege of serving as a Foreign Service officer in West Berlin during the years 1952–55. As a result of that admittedly brief excursion into the operational aspect of our foreign policy, I have followed the course of our country's role in international affairs with keen interest.

It is relatively easy to state the foreign policy goals of the two major powers in the world today—the United States of America and the U.S.S.R. In the case of the United States, it is clearly the maintenance of peace with justice; in the case of the Soviet Union, it is world domination and the overthrow of capitalistic and democratic governments regardless of where they are located.

The Soviet Union employs threats, subversion, some limited economic and military aid to selected countries, and its alliances with Red China and the Warsaw Pact countries to achieve its goals. The United States has relied on world opinion, the United Nations, extensive economic and military foreign aid to more than 100 nations, and its various alliances to implement the goals of its somewhat nebulous policy of peace with justice.

The present administration is not satisfied with containment as a policy. This is scarcely dynamic enough to square with the promise of our present Chief Executive during the presidential campaign to replace the static policies of the 1950's with forward-looking and activist policies to meet the challenge of the 1960's.

It trembles, however, at the idea of liberation. Witness its concern during the still current Berlin crisis lest the restive East Germans revolt against their Red masters.

Walter Lippman, until now a stanch protagonist of the Kennedy administration, in an article published today has pointed out the bankruptcy of this administration's policy vis-a-vis Berlin. He said, and I quote:

> The administration had failed to take into account the fact that Khrushchev could act powerfully, but with measures short of war, to reduce the Western position in West Berlin. It has long been known that an embargo was a possibility. But the preoccupation of the President's advisers with the memory of Stalin's blockade in 1948 prevented them from preparing adequately for the formidable measures short of war which were available to Khrushchev.
>
> The effect of the miscalculation has been far-reaching. It left the administration to concentrate its energy on convincing Khrushchev that the West would fight if he interfered with physical access to West Berlin. This is true. It will fight if he interferes with Western access to West Berlin. It was a prudent precaution to make this plain to Khrushchev. But it should not have been sold to the American people and to the world as a policy. The exclusive and excessive preoccupation with proving our will to fight a blockade left us unprepared to deal with the actual embargo. On August 13 we had no policy, and there is reason to ask whether we are on the way to having one now.

Mr. Speaker, I call the attention of the Members of the House particularly to this sentence in the above quotation:

> On August 13 we had no policy, and there is reason to ask whether we are on the way to having one now.

Apart from its rejection of both containment and liberation, however, it is certainly not clear how the present administration proposes to achieve the goal of peace with justice. The record of the last 7 months is certainly not one that is calculated to show that we have moved any closer to achieving this praiseworthy objective.

Witness the following:

Cuba: Daily becoming a more totalitarian state with complete disregard for human dignity.

Laos: Sinking slowly but surely into an impasse where a so-called neutralist premier with close ties to the Pathet Lao appears likely to assume control.

Berlin: A divided city in not only a figurative but a literal sense with abrogation of Four-Power agreements regarding freedom of travel and access within the city already past history after being the subject of some tepid diplomatic notes.

British Guiana: A newly elected premier who is an avowed Communist.

Brazil: Brought almost to the brink of revolution or civil strife by the resignation of a president who answered our economic aid by awarding one of his country's highest decorations to Cuba's Che Guevara.

Africa: States, like Ghana where we have already committed millions in economic aid, signing a treaty of friendship with Red China.

In the Far East: The vitality of the SEATO Pact undermined by our inability or unwillingness to commit the forces under that treaty arrangement to the defense of either Laos or South Vietnam.

With respect to Outer Mongolia: A belated and grudging acknowledgement by the administration that it would not recognize this Communist-dominated country at the present time.

The spectacle of high administration officials covertly and overtly floating trial balloons concerning a two-China policy.

All of this activity during the last 7 months has only led to the doleful admission in the Congress during the recent foreign aid debate that America stands at the most critical juncture in its history and is in a position where, as the title of this series of speeches indicates, the very question of survival is at issue.

Millions of Americans have awakened to cry—why has this state of affairs come to pass and must it now culminate

in the holocaust of atomic or hydrogen bomb warfare?

Mr. Speaker, during the recent campaign the present occupant of the White House charged the Eisenhower administration with "inaction." He declaimed time and again, "We are going to get America moving again."

Yet on the fateful day in August, 7 months after Mr. Kennedy assumed the Presidency, when the Soviets sealed the border between East and West Berlin, according to Mr. Lippmann, we didn't even have a policy.

I submit that it was an absence of policy that led to the debacle in Cuba at the Bay of Pigs; it was a lack of policy that has mired us in endless negotiation with the Communists over Laos while freedom there goes steadily down the drain.

Many of us believe that Communist imperialism is on the march because they have truly been at war with us while we have tried to make ourselves believe that the cold war was really just a synonym for unrest and sporadic and unrelated military actions brought on by the new nationalism or anticolonialism.

The same people who ridicule the idea of total victory over communism are the same ones who blindly and/or willfully refuse to recognize that the aim of the Communists is the complete destruction of our way of life.

We must pledge our lives, our fortunes, and our sacred honor to the cause of freedom, not just in Berlin as the Vice President recently had occasion to do, but wherever we confront our foe. This, in turn, will require mobilization of our resources—economic, political, psychological, and moral.

In the realm of economic affairs we can scarcely justify the granting of export licenses for the sale of iron and steel scrap to Yugoslavia or ball bearings to one of the Eastern European satellites—thereby strengthening the sinews of the enemies of freedom if we really believe that we are today locked in a global conflict with the forces of tyranny.

In the political arena we cannot tolerate diplomatic recognition and admission to the United Nations of Communist satraps like Outer Mongolia and thereby confer status as a peace-loving nation on a country dominated by a political ideology which has a single-minded goal—the destruction of our freedom.

Rather we must forthrightly state our reasons for declining to sign a separate peace with any country now a Soviet satellite until it demonstrates that it is not a part of the international Communist conspiracy.

The late Secretary of State John Foster Dulles used to refer to neutralism as immoral. For this he has been severely criticized by some of the new and highly sophisticated architects of our foreign policy under the New Frontier as having displayed excessive rigidity.

Can there even be any question that if we accept the premise that we are at war that it is not only immoral but suicidal to enhance the position of our foes?

The spectacle of the recent conference of so-called nonalined nations at Belgrade is a rather clear indication that these countries, many of whom have enjoyed our largess to the tune of millions, can scarcely be depended upon in the current struggle.

I say that for the reason that even though the Soviet Union openly resumed atomic testing in the atmosphere the major clamor of these so-called neutral powers was against so-called Western colonialism and specifically French action at Bizerte. There was no condemnation of Soviet colonialism in Eastern Europe. Indeed, there was not even a resolution directed against the Soviet Union's defiant resumption of nuclear testing—merely some pious expressions of dismay by certain delegates, one of them, Mr. Nkrumah of Ghana, then vied with Mr. Nehru to see who could get to Moscow first after the conference was concluded.

I am not suggesting that it ought suddenly to become our policy to flaunt world opinion. However, I am suggesting we had better abandon some of our exaggerated notions that we are purchasing any dependable allies in our struggle against world communism by trying to befriend nations who carefully distinguish between Western and Soviet colonialism. There is a time for nations to stand up and be counted; I believe that time is now. We are not engaged in a world popularity contest but a deadly struggle.

If these were normal times and we were dispensing aid on a purely humanitarian basis, we could afford the luxury of indiscriminate giving. However, if you accept the major premise that these are times in which the issue of survival is at stake, then we must—just as we did during World Wars I and II— confine our aid and our assistance to those who stand ready to help us. To demand a quid pro quo is not to display a lack of magnanimity under circumstances such as those that exist today.

At the Belgrade Conference a resolution was adopted to the effect that continued American occupation of our naval base at Guantanamo affects the sovereignty and integrity of Cuba. This resolution was signed by the very nations to whom we have extended a helping hand. Do we need any further proof of the futility of hoping that these nations are going to join us in combating our mortal enemy?

Fortunately, we do have some allies in the world with a demonstrated record of loyalty to our common cause. They deserve our help because they stand ready to help us. In other words, I would like to see a little more emphasis on what will best contribute to the shield of our defense. There are times when the social planners who dispense our aid seem more interested in working out their theories concerning economic and social reforms than they do in mutual security, the primary aim of our aid program.

In conclusion, the road ahead will not be easy; our burden will not be light. We will not always be popular. But we can seize the initiative if we look at the present struggle as one where our strategic goal must at all times remain the total liquidation of the international Communist conspiracy.

This does not mean that I believe in or suggest a preventive war, for I do not. There are many things we can do short of war to embarrass the Communists even while we remain ready to fight, if need be. For example, we could have been prepared with an immediate counteraction upon the Soviet sealing of the border between East and West Berlin. We could, for example, have announced that very day a complete cessation of any trade with the Soviet Union and countries under its control.

We must somehow in the coming weeks and months and years by every thrust, parry, and riposte make it abundantly clear that in this duel for survival we have the will, the purpose, and the dedication to win.

SUMMARY OF "OPERATION SURVIVAL"

Mr. BRUCE. Mr. Speaker, I wish to express my appreciation to my colleagues who have participated in this discussion that we have titled "Operation Survival."

This has been Operation Survival, an attempt on the part of 14 first-term Congressmen to pinpoint the tragic trend toward collectivism in the United States. In these relatively few minutes, we have tried to portray only a few of the myriad areas into which the Socialist virus has moved. We do not believe the case is overstated. Days could be spent in detailing many other areas wherein the dead hand of the past, with all of its failures and frustrations, is stagnating initiative and thwarting true progress. As Congressman SCHADEBERG so aptly pointed out, the foundation upon which this country has been built is solid, but the moves over the last 30 years into the area of Marxist-Socialist planning at Government level has thrown the top stories of the building of freedom out of plumb.

Our governmental structure is weaving dangerously in the breezes of deficit financing, confiscatory taxation, and bureaucratic arrogance. Congressman MARTIN warned of the "greatly expanded Federal Government, whose departments long for a greatly enlarged expansion of duties and more control over the very lives of our citizens." He concluded his remarks by saying:

> If we are not more careful, this octopus of a Federal Government will devour its citizens within a very short period of time.

It is indeed tragic that at the time of our greatest peril from alien forces who would destroy us, in the words of Congressman SHRIVER:

> We see unanimous action on appropriations to build up our Military Establishment, but on the other hand, note little interest in reducing deficit spending to perhaps some day achieve a balanced budget.

Congressman NYGAARD pointed out the complicated problems arising from internal inflationary pressures in dealing with the world market.

Congressman HALL has bluntly stated the premise that Federal medical aid under social security not only endangers the existing social security system, but historically does lead to regimented, inefficient, socialized medicine.

Congressman ASHBROOK drew the picture of Socialist planning which would bring about the destruction of our free enterprise system with the nationalization of our power industry, the industry upon which almost all other industries are utterly dependent. When the Government takes control of the power industry, it assumes the whip hand over the entire free enterprise system.

Congressman BEERMANN, himself a farmer, has called for Government to get its fingers out of the farm business, or, as he says:

Each week that I have spent in Washington, I have received constant reminders from individual farmers saying that they would like less Government interference. I have tried to relay these beliefs to my committee, the House Committee on Agriculture, but despite these constant reminders by other Members and me, committee action the last 6 months has hardly been in the direction of farm independence.

Congressman ROUSSELOT graphically draws the picture of the imposition of Socialist planning in the field of housing, wherein the very essence of private ownership will ultimately be imperiled.

Congressman BROMWELL has delineated the constitutional separation of powers between the legislative, executive, and judicial branches, and has shown the erosion of this vital separation and the abdication of legislative authority to the executive and judicial.

Congressman FINDLEY has succinctly demonstrated the desperate need for fiscal responsibility, the deadly danger of inflation, and the destruction of initiative which accompanies excessive taxation.

Congressman BATTIN has stated in broad terms the problem of internal security. As he so aptly says:

We are not fighting to see whether a Republican or Democrat will be elected President, or whether the Republicans or Democrats control the Congress. We are fighting for the very survival of the system which has produced for the world the greatest economy ever known to man—fighting to maintain a system that will allow the American people freedom of choice, freedom to elect a Republican or Democrat as President, to freely select the leaders of this country, and, even more important, to change leadership without the necessity of a revolution.

And then Congressman ANDERSON put his finger directly on the crying need in American foreign policy—the determination to win. He details our wavering and our apparent lack of understanding. He calls for courage and for principle, and summarizes it all by saying:

The late Secretary of State, John Foster Dulles, used to refer to neutralism as immoral. Can there even be any question that, if we accept the premise that we are at war, it is not only immoral but suicidal to enhance the position of our foes?

Let there be no question but what we are involved in a battle for survival. It is a dual battle—a battle against a dedicated, worldwide Communist movement, which has as its goal our complete destruction, and, simultaneously, within our own country, an attempt by sincere but misguided arrogants, who assume unto themselves superior wisdom for handling the affairs of men and would usurp the rights of the people with a centralized, collectivist form of Government. Again I repeat, ours is not a battle of personalities, political expediency, or personal power. Rather, we do it as a battle for the preservation of individual liberty, a battle for restatement and reenactment of the fundamental principles embodied within the Constitution of the United States. Liberty is our most precious commodity. Without it, there can be no progress, and liberty is based upon the spiritual foundation inherent within our Constitution. We shall win in the battle for liberty. Washington warned us with these words:

Let there be no change by usurpation; for though this, is one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed.

Lincoln defined it thusly:

Our principle, however baffled or delayed, will finally triumph, I do not permit myself to doubt. Men will pass away—die, die politically and naturally; but the principle will live and live forever. Organizations rallied around that principle may, by their own dereliction, go to pieces, thereby losing all their time and labor but the principle will remain, and will reproduce another, and another, till the final triumph will come.

Mr. BARRY. Mr. Speaker, I wish to commend the gentleman for his fine presentation and his excellent summary of the remarks made by 14 of our distinguished colleagues here this afternoon. I am sure the Nation, as the people read the words that have been said here, will realize that 14 new Members have helped lead the way to the future, and that what is said here will in large measure help pave the way for a secure future for all of us.

Mr. BRUCE. I am most grateful to the able gentleman from New York.

USE OF ATOMIC ENERGY FOR MUTUAL DEFENSE PURPOSES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Joint Committee on Atomic Energy:

To the Congress of the United States:

For some time members of the North Atlantic Treaty Organization have been taking steps toward the introduction of the most modern weapons into NATO forces. Among these measures is the introduction into forces of our NATO allies of weapons capable of delivering nuclear warheads. Such steps have been proceeding for some time following the considered judgment and agreement of the NATO governments. The objective is to achieve the most effective pattern of NATO military defensive strength. In view of the well-known, purely defensive purposes of the alliance, the introduction of modern weapons into NATO forces to take account of technological developments is in no way a cause for legitimate concern on the part of other countries.

Article III of the North Atlantic Treaty calls upon the members of the alliance to maintain their capacities to resist armed attack through effective self-help and mutual aid. As part of its contribution to the strength of the alliance, the United States has entered into a number of agreements through which we cooperate with NATO allies in the uses of atomic energy for mutual defense purposes. These agreements have been concluded pursuant to the Atomic Energy Act of 1954, as amended. All of these agreements are designed to implement the NATO objectives for maintaining the most modern weapons and techniques in NATO forces.

We have just concluded an agreement with the Government of France which is essentially the same as agreements previously concluded with a number of other NATO allies for cooperation in the uses of atomic energy for mutual defense purposes. This agreement will make possible effective cooperation with France in NATO mutual defense planning and in the training of French NATO forces. Training of certain French NATO forces which plays a significant role in European defense cannot proceed to conclusion until this agreement becomes effective. This agreement should be brought into effect as quickly as possible, in order that we can promptly and fully utilize the potential of French military forces in the development of our NATO defensive strength. In light of the probable time remaining for this session of the Congress and in view of the provisions of section 123d of the Atomic Energy Act of 1954, as amended, it appears that normally it would not be possible to bring this agreement into effect until the next session of the Congress. Accordingly, I would appreciate action by the Congress during the current session which would permit the agreement to come into force promptly.

I understand and respect the importance of mature consideration in the Congress of agreements of this sort, but I believe that in the present case there are compelling reasons for rapid action. The gravity of the international situation, and in particular the Soviet threat to the freedom of West Berlin, have made it a matter of first importance that the unity of the North Atlantic nations should be sustained. The Government of France, in this crisis, has behaved with great firmness, and the stanch and determined position of President de Gaulle, in particular, has reinforced the West. In these circumstances, I deem it of great importance that we should proceed promptly with such a joint undertaking as this one, carefully matured in prolonged negotiation. As has already been explained in informal discussions with interested Members of the Congress, the present agreement provides for a limited release of information to carefully selected personnel. Careful arrangements have been made to insure that all necessary security requirements are met, and the inclusion of France among NATO countries participating in this general undertaking is an important step forward at a moment in which such a step has a wider significance than usual. It is for

these reasons that I urge upon the Congress appropriate special actions to permit the agreement to come into force.

In accordance with the Atomic Energy Act of 1954, as amended, I am submitting to each House of the Congress an authoritative copy of the agreement with the Government of France. I am transmitting also a copy of the letter from the Secretary of State which forwarded to me an authoritative copy of the agreement, a copy of the joint letter from the Deputy Secretary of Defense and the Chairman of the Atomic Energy Commission recommending my approval of the agreement, and a copy of my memorandum in reply thereto which contained my approval.

JOHN F. KENNEDY.

THE WHITE HOUSE, *September 7, 1961.*

LEGISLATIVE PROGRAM FOR THIS WEEK AND NEXT

Mr. HALLECK. Mr. Speaker, I would like to inquire of the acting majority leader as to the program for the balance of the week and as to the program for next week so far as he can tell us.

Mr. ALBERT. Mr. Speaker, the legislative program for this week has been completed.

ADJOURNMENT FROM TODAY UNTIL MONDAY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

Mrs. ST. GEORGE. Mr. Speaker, reserving the right to object, I cannot let this pass without saying that, in my opinion, it is extremely deplorable at this time in the session for the House to adjourn, to all intents and purposes, for 5 days. I know that 2 of these days are Jewish holidays, and it has been our custom to recognize them. That will be Monday and Tuesday.

I can see no reason on God's green earth why some legislative business could not be brought up on a Friday. This custom of doing no work except from Tuesday until Thursday is to my mind a deplorable thing at this time and at this stage of the world's history, and the history of our own country. I say that as a New Yorker. I can go home on Thursday and I can come back on Tuesday. But my people elected me to come down here and do a job. I do not think it is being done. I think it is deplorable.

Mr. Speaker, I withdraw my reservation of objection.

Mr. BROWN. Mr. Speaker, further reserving the right to object to the unanimous-consent request, I feel compelled to agree with that which the gentlewoman from New York [Mrs. ST. GEORGE] has said. I happen to know that there have been rules reported on legislation in the Rules Committee which could have been taken up and considered today and tomorrow. Indeed, we are now reading in the newspapers, Mr. Speaker, that the Congress may be kept in session for 2 or 3 weeks more. It seems to me that grown men and women should go ahead and do their work and get through, perhaps, for the benefit of the Nation. That would be the best thing to do.

Mr. ALBERT. Would the gentleman yield under his reservation?

Mr. BROWN. I yield to the gentleman from Oklahoma.

Mr. ALBERT. I make this comment: This request has been made after consultation with the distinguished minority leader.

Mr. BROWN. I understand.

Mr. ALBERT. And it has been made after consultation with the chairmen of the committees who are responsible for programing bills.

Mr. BROWN. I understand that.

Mr. ALBERT. And it has been made after a conclusion on the part of the distinguished gentleman from Indiana [Mr. HALLECK] and myself, as well as others, that it will have no effect on the final adjournment of this Congress. If it would have any effect, I do not think the gentleman from Indiana [Mr. HALLECK] would, and I am sure I would not, agree to this request.

Mr. BROWN. I appreciate the statement made by the gentleman, and I would like to remind him that there has been no Member in this House who has cooperated more than the gentleman from Ohio who is now speaking, with the leadership on both sides of the aisle.

Mr. ALBERT. The gentleman is correct.

Mr. BROWN. That which I have said is certainly no criticism of our own leadership on this side of the aisle, the gentleman from Indiana [Mr. HALLECK] because he and I have talked about this situation numerous times.

Mr. ALBERT. I agree with the gentleman from Ohio.

Mr. BROWN. I am in sympathy with that which the gentlewoman from New York [Mrs. ST. GEORGE] has said. I know that there is legislation that could have been scheduled for these days, if there had been any desire to do so. Therefore, I again respectfully say I regret that it has not been scheduled, and that we are wasting a lot of time.

Mr. ALBERT. I think we should put this in perspective. This request on this occasion is not made through the leadership's desires not to meet tomorrow, but as a matter of trying to accommodate a legislative situation for the benefit of the Members of the House as best we can under the circumstances.

There is nothing personal involved.

Mr. BROWN. I would like to say this to the gentleman from Oklahoma. I am a little provoked today.

Mr. ALBERT. I hope the gentleman from Ohio is not provoked at me.

Mr. BROWN. I know exactly who will be accommodated by this action. I have been here too long not to know, and it is not the leadership that is being accommodated.

Mr. ALBERT. Would not the gentleman agree that it would not be the gentleman from Oklahoma, who plans to be here on Friday and Saturday, who would be accommodated by this request?

Mr. BROWN. I agree with the gentleman from Oklahoma, for whom I have the highest regard, and the greatest respect, as he well knows.

Mr. ALBERT. And, as the gentleman well knows, I have for him.

Mr. CURTIS of Missouri. Mr. Speaker, reserving the right to object, the reason I make this reservation is just to pinpoint some of these things. Yesterday we had before the House under suspensions of the rules a very important measure, the disclosure and reporting on pension plans.

This is an area where we need legislation. It was obvious, with 20 minutes of debate on each side, that we could not possibly make the legislative history that was necessary on a measure so far reaching. The chairman of the committee said that this was most crucial. I pointed out that there was no reason why that could not have been brought out under a rule and indeed here we see today that it could have been.

I raise the point, what is the purpose of jamming legislation like that through on the floor of the House, when you cannot possibly examine into the details, when there is the opportunity to bring such a matter to the floor of the House under the rule, because we have plenty of time? That measure will have to go over until January. In my judgment it was important enough for the House to have had a debate on it. And it could have been amended, as it should have been amended, in many ways. This just illustrates the frustration that many of us experience who are interested in this legislation. I do not know how many suspensions there were yesterday, but that is no way for the House to consider major pieces of legislation.

Mr. Speaker, I withdraw my reservation of objection.

Mr. GROSS. Mr. Speaker, further reserving the right to object, I should like to point out to the House—and I think that these figures I am about to give are accurate—that up to September 2, 1961, this House met on six Fridays, and six Fridays only. That was from January until September 2. We had three rollcalls on one and only one Friday. The House met on all Mondays except one, but had only 13 rollcalls on all the Mondays on which they met. In other words, we have dillied, dallied, and procrastinated in this session until it has become completely unbearable.

Mr. HALLECK. Mr. Speaker, I should like to ask unanimous consent that whatever time is consumed in this colloquy be not charged against the special order granted the gentleman from Ohio [Mr. ASHBROOK].

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. ALBERT. Mr. Speaker, and will the gentleman add to his request that this colloquy follow the proceedings under the special order?

Mr. HALLECK. I so add to my request, Mr. Speaker.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. JONES of Missouri. Mr. Speaker, reserving the right to object, I want to say first that there was nothing personal toward the gentleman from Okla-

homa in my comments yesterday. I wanted to amplify concerning a statement that this adjournment over was to accommodate a legislative situation. I would like respectfully to disagree; we are not accommodating a legislative situation, we are accommodating a group of individuals, a small minority, who apparently have more influence with the leadership than has a majority of this House.

Also I want to ask the gentleman from Oklahoma [Mr. ALBERT] as a representative of the leadership if he would agree to help me at the beginning of the second session of this Congress to get a resolution through this House, that would be voted on by a majority of the Members, indicating that it was the policy of the majority of the Members of this House that the House should meet and conduct business 5 days out of the week.

Mr. ALBERT. Mr. Speaker, if the gentleman will yield to me, on the proposition he suggests, under the rules of the House, the House meets 6 days a week, and it is only by unanimous consent that any variation from the rule may be had. That would be the same whether we had a resolution or not. We would simply be reenacting the existing rules of the House.

Mr. JONES of Missouri. Mr. Speaker, I differ with the gentleman to this extent. I think a great many people have the idea that this is accepted. I would like us to have the opportunity to go on record indicating that we want to work 5 days a week. I know the leadership says that we may meet 6 days a week. Of course, we all understand that. If the leadership does not want to have legislation acted upon, we can meet and adjourn and we can dillydally around here for 5 days out of the week.

We are going to dillydally around here for 5 days. That is what I would like to get away from. I also realize that unless the leadership approves a resolution to give to this House there is no way to get an expression. I think I know what I am talking about when I say a majority of the House would like to work 5 days a week and then comply with the action of this Congress when it said we would complete the work of the Congress by July 31 and get out of here. I would like to have some assurance from somebody that we can get some action on a resolution indicating what the policy of this House shall be.

I withdraw my reservation of objection, Mr. Speaker.

Mr. ALBERT. I thank the gentleman. The gentleman knows the esteem in which I hold him.

I should like to advise further with regard to the observations of the gentlewoman from New York, with whom I served as a new Member in this House several years ago and for whom I have the very highest regard, that we are going to have important legislative business on Monday and Tuesday, and have only put over the votes that will come on those particular days.

Mr. JONES of Missouri. Can the gentleman tell me why we do not do it tomorrow rather than wait until Monday and Tuesday, on the holidays that will be observed? Friday is no holiday.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

LEGISLATIVE PROGRAM FOR NEXT WEEK

Mr. HALLECK. Before the gentleman announces the program for next week, I see that the supplemental appropriation bill will not be brought up until Friday. I would certainly hope we could have it brought up earlier than that, because that brings us right up to the possible adjournment time.

Now will the gentleman tell us the program for next week.

Mr. ALBERT. Monday is District Day, and there are five bills which will be called, not necessarily in the order in which I name them.

H.R. 8984, relating to the regulation of physical therapy.

H.R. 9009, covering the height of buildings.

H.R. 4892, the firemen's work bill.

H.R. 2838, tax exemption, Army staff.

H.R. 9080, Pennsylvania Railroad siding.

There will also be the conference report on H.R. 7035, the Labor, Health, Education, and Welfare appropriation bill, also the conference report on H.R. 8302, the military construction bill for 1962. Any rollcall votes on Monday and Tuesday under an order heretofore entered will go over until Wednesday.

On Tuesday there will be H.R. 9076, the public works appropriation bill for 1962.

For Wednesday and the balance of the week, H.R. 7576, the conference report on the Atomic Energy Commission appropriations authorization bill.

H.R. 7500, the Peace Corps.

H.R. 6360, relating to an additional Assistant Secretary of Commerce.

On Friday the supplemental appropriation bill for 1962 will be taken up.

I make the usual reservation, that conference reports may be brought up at any time, and that any further program will be announced later.

Mr. HALLECK. May I just say to the gentleman that I think it might be helpful if we could consider the supplemental appropriation bill before Friday. There is no question in my mind but what if we made up our minds to do it we could adjourn sine die by Saturday next.

Mr. ALBERT. May I say to the distinguished gentleman that the leadership certainly would have no objection to that. The committee will not be prepared to bring that bill up, we are advised, until Friday.

CALENDAR WEDNESDAY BUSINESS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of next week be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERSONAL ANNOUNCEMENTS

Mr. FULTON. Mr. Speaker, I was absent on rollcall No. 56, a quorum call on Monday, May 15, 1961, and want the RECORD to show I was in my district in Pennsylvania for the Pennsylvania primary election which occurred on Tuesday, May 16, 1961. Because of my necessary absence to vote, I was also absent on May 16, 1961, on rollcall No. 57, a quorum call, on rollcall No. 58, a vote on the rule of House Resolution 284, and also on rollcall No. 59, a quorum call.

Mr. JOHNSON of Maryland. Mr. Speaker, on the legislative days of September 5 and September 6, I was absent from the House of Representatives because of the death of my father. I notice among the measures acted upon, there was the bill providing aid for federally impacted areas.

Mr. Speaker, if I had been able to be present, I would have voted "yea" on rollcall No. 188 on the bill to aid federally impacted areas.

LET'S LOOK AT THE RECORD

The SPEAKER pro tempore. Under the previous order of the House the gentleman from West Virginia is recognized for 15 minutes.

Mr. BAILEY. Mr. Speaker, in all honesty, I feel I must seriously challenge statements attributed to the distinguished majority leader, the gentleman from Massachusetts [Mr. MCCORMACK] if they are as reported in newspaper stories reflecting the views of the majority leader on the effects of the residual oil import control program.

In the newspaper stories the Congressman from Massachusetts is quoted as saying that, and I quote:

> Import quotas on residual fuel oil have cost the New England area alone more than $21 million in higher fuel and utility charges. All fuels, not oil alone, have gone up in cost to the consumer thanks to price parity clauses in fuels contracts.

The statements attributed to my distinguished colleague simply are not in keeping with the facts, Mr. Speaker.

It is impossible for me to agree that import quotas have cost New England one penny, let alone $21 million annually. Although there have been fluctuations in the posted cargo prices for residual oil during the 2 years of controls, the posted price at Boston Harbor today is $2.26 per barrel, the same as it was when import controls were put into effect, and it is important to remember that the price today is below the average price for the 3 years before mandatory controls were instituted.

Further, it is important to recognize that during the period of residual oil import controls, discounts from the posted prices of residual oil have frequently increased. Consequently, in many instances little change has occurred in the prices actually paid by consumers for residual oil. For example, recent bid announcements by the Commonwealth of Massachusetts indicate that quoted net prices are as much as 35 to 50 cents below posted tank wagon price lists.

The increase in the cost of residual fuel oil, if any, would seem to occur only after the fuel oil has been delivered to a U.S. port and can only reflect various domestic costs and charges such as land transportation, labor costs, or merely the desire for additional profits by importers and distributors.

This latter charge has been made by one of those who is actively trying to have all import controls removed, Gen. E. A. Evans, managing director of the Oil Users Association. General Evans has claimed that blackmarketing conditions exist and that, and I quote, "quota ticket holders can turn a profit of more than 30 cents a barrel for oil they never own and never sell."

It would seem to be more than mere coincidence, Mr. Speaker, that General Evans says that profiteers are marking an additional 30 cents a barrel while others who attack the import control program use the same figure—30 cents a barrel—as the difference between the domestic cost of residual fuel oil and what they term the world price.

Certainly, the availability of residual oil cannot be considered to have increased its prices since a release by the Interior Department last week shows that actual imports for the first 6 months of this year were running nearly 1.9 million barrels below allocations for that period. In other words, Mr. Speaker, there is no shortage of residual fuel oil. In fact, the supply is running ahead of the demand.

Regarding the statement that all fuels have gone up in cost to the consumer, I refer you to coal costs to electric utilities, the major market for coal in New England and the market in which it is competitive with residual fuel oil.

Figures published by the Federal Power Commission show that the cost of coal to electric utilities, as consumed, declined between 1959, when the oil import control program began, and 1960 by 34 cents a ton in Connecticut; 21 cents in Massachusetts; 24 cents in New Hampshire; 2 cents in Rhode Island, and 20 cents in Vermont.

If price parity clauses in fuels contracts are general in New England, tying the cost of one fuel to the cost of an alternate or competitive fuel, these figures would mean that the price of residual fuel oil to electric utilities would have declined, yet my distinguished colleague claims that the price has actually gone up.

Mr. Speaker, I believe a serious consideration of all the information and facts available will show that the import control program on residual fuel oil has had no effect whatsoever on the economy of New England, and that the continuation of controls is essential to the security of this Nation.

Let us make the record clear. Residual oil is not the type of oil that is used as domestic fuel in New England.

PROPER CONGRESSIONAL PROCEDURE

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from Missouri [Mr. CURTIS] is recognized for 30 minutes.

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include related matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, it has come to my attention that one of our colleagues, the gentleman from Texas, Congressman WRIGHT PATMAN, acting in his capacity as an individual Congressman, has undertaken a study of the impact of tax exempt foundations on our economy. Congressman PATMAN is quoted in part as follows by a North American Newspaper Alliance reporter in a recent news item I saw in the St. Louis Globe-Democrat—I wish to introduce the full news article at the close of these remarks:

> In these times, when the American people are overburdened with taxes they are, in my view, completely justified in casting a jaundiced eye at the tax exemption of foundations and their control of businesses.

The news article goes on to state:

> Some areas he proposes to explore include:
> 1. The extent to which foundation-controlled businesses compete with small business.
> 2. The effects on the economy of great amounts of wealth controlled for an undetermined period—in some cases forever—by a few individuals or the successors they choose.
> 3. The power of the foundations "to interlock and knot together through investments, a network of commercial alliances which assures harmonious action whenever they have a common interest."

Congressman PATMAN has sent a letter to many of the foundations requesting a great deal of information which it will take some effort to compile and, indeed, considerable effort to collate. I will set out at the end of my remarks the form letter and attachment A which lists the information desired as sent out by Mr. PATMAN.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. PATMAN. In stating that you will include the letter, remember, each letter was a personal letter; they are not all the same.

Mr. CURTIS of Missouri. If they are not all alike I would be glad to have the gentleman specify them. Certainly attachment A is the same.

Mr. PATMAN. The attachment is the same, but each was a personal letter, personally signed by me; they are not all the same.

Mr. CURTIS of Missouri. I have selected one from among several. If they were not all the same they were substantially similar.

Mr. PATMAN. I am just saying that the gentleman takes upon himself the matter of characterizing the letters I sent out; I am telling him they were personal letters each signed by me.

Mr. CURTIS of Missouri. Let me say that this is just one letter, and I am asking the gentleman now if there were different letters were they any different in form or were they substantially the same?

Mr. PATMAN. They were different in form, yes. They were not the same letter. Each letter was personally signed.

Mr. CURTIS of Missouri. This letter, Mr. Speaker, I am using as a form, reads, as follows:

AUGUST 14, 1961.

Dear Mr. ———:

I have left the name off for obvious reasons.

The responsibilities inherent in my committee assignments necessitate a continuous study of many aspects of our economy. Those assignments include the following: Chairman, Joint Economic Committee; chairman, Small Business Committee; vice chairman, Joint Committee on Defense Production; and second ranking member of the Banking and Currency Committee.

In keeping with such responsibilities, I am making a study of the impact of foundations on our economy. Hence, I am seeking certain facts in an effort to arrive at fair conclusions based on those facts. It would, therefore, be helpful if you will furnish me with the material and information described in the enclosed attachment A, relating to your foundation.

Your cooperation will be appreciated.

Sincerely,

WRIGHT PATMAN.

ATTACHMENT A

1. Copy of exemption application (form 1023) and supporting documents.
2. Copy of charter, or articles of incorporation.
3. Copy of bylaws.
4. Balance sheet as of the date that your foundation was first organized.
5. Tabulation of income and expenditures for each year beginning with the date that your foundation was first organized.
6. Copies of the forms 990–A (or form 1041–A, if applicable), including attachments, filed with the Internal Revenue Service for each year beginning 1951.
7. Copies of annual reports, including list of securities held, as of the close of each year beginning 1951. If complete annual reports are not available for each year, please submit copies of (a) balance sheet, (b) statement of principal account, (c) statement of income account, (d) list of securities held, and (e) accountants' report.
8. Names, addresses, and occupations of present trustees, officers, and members of your finance committee.
9. Names and addresses of the bank, investment counsel, or brokerage house, if any, presently rendering financial investment services to your foundation.
10. List of securities as of August 14, 1961.

TAX-EXEMPT FOUNDATIONS TO BE STUDIED—REPRESENTATIVE PATMAN TO PROBE THEIR USE OF WEALTH

WASHINGTON.—Representative WRIGHT PATMAN, Democrat, of Texas, has initiated what he calls a definitive study of tax-exempt foundations to determine whether the "dead hand" of wealth dominates the U.S. economy.

The 1-man congressional task force has already determined that the number of such foundations, more than 45,000, is almost 4 times the total estimated by most authorities in the field.

Representative PATMAN, chairman of the Joint Economic Committee, got an important assist in his study when Secretary of the Treasury Douglas Dillon this month ordered the Internal Revenue Service to make available photographic copies of an-

nual information forms filed by the tax-exempt organizations.

The Foundation Library Center, a private clearinghouse for the organizations, lists in its files some 13,000 foundations with assets of more than $12 billion. IRS files, however, show the number at 45,124, an increase of 367 percent since 1952.

Says Representative PATMAN:

"In these times, when the American people are overburdened with taxes, they are, in my view, completely justified in casting a jaundiced eye at the tax exemption of foundations and their control of businesses."

Of major concern to the lawmakers are the company-sponsored foundations. He points out that the foundation pays no Federal income tax, that the donor pays neither gift nor estate taxes on his contributions; that the donor (as an individual) may deduct from his income taxes such contributions up to 20 percent of his net income, and that such gifts are "capital" and thus do not have to be distributed by the foundation as does income.

The Congressman contends his study is not designed to "abolish" tax-exempt foundations but "to preserve for them a purpose."

Some areas he proposes to explore include:

1. The extent to which foundation-controlled businesses compete with small business.

2. The effects on the economy of great amounts of wealth controlled for an undetermined period—in some cases forever—by a few individuals or the successors they choose.

3. The power of the foundations "to interlock and knit together through investments a network of commercial alliances which assures harmonious action whenever they have a common interest."

Representative PATMAN concedes that the high current rate of taxation induced the creation of many foundations, and that the foundations provide a legal tax loophole. "Nothing is wrong legally," he says, "but is it wrong morally?"

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. PATMAN. Will the gentleman tell me to whom that is addressed, and I can tell him for sure whether or not it is correct.

Mr. CURTIS of Missouri. Let us put it this way. I am asking the gentleman, Were the other letters the same?

Mr. PATMAN. If the gentleman will tell me to whom that is addressed, I can tell him.

Mr. CURTIS of Missouri. I have no desire to subject the particular organization to any harassment. I may say I have received inquiries from a number. I have no desire to have them harassed further on this.

Mr. PATMAN. They are not being harassed.

Mr. CURTIS of Missouri. We will get on to that. The point I am asking is this: Does this not fairly represent the kind of letter the gentleman mailed to the various companies?

Mr. PATMAN. Part of it is exactly the same. It is not all the same in every case.

Mr. CURTIS of Missouri. In substance it is the same?

Mr. PATMAN. Committee assignments, and things of that kind, are the same.

Mr. CURTIS of Missouri. In substance. That is all I am concerned about here in my presentation.

The news item previously referred to stated that "Congressman PATMAN received an important assist in his study when Secretary of the Treasury Dillon this month ordered the Internal Revenue Service to make available photographic copies of annual information forms filed by the tax-exempt foundation." This news item regrettably is typical of inaccurate news reporting that we are continually confronted with today. Section 6104 of the Internal Revenue Code requires that there be public inspection available for tax-exempt foundations.

Incidentally, this particular portion of the news item, as I clipped it from the newspaper, had this particular point in black type. It becomes important to know that because this news item regrettably is typical of the inaccurate news reports we are continually confronted with today.

Accordingly, Secretary of the Treasury Dillon was not giving Congressman PATMAN an important assist but, to the extent of making the information available he was simply complying with the law.

Any individual citizens, I might state, could avail themselves of the same privilege.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Scrivener, as Acting Secretary of the Treasury in 1958, issued an order as the Secretary of the Treasury preventing the public from obtaining photographic copies. That is the reason Secretary Dillon had to repeal what Mr. Scrivener had done, thereby making it available to me and others.

Mr. CURTIS of Missouri. Does the gentleman deny that the law is as I have stated it to be?

Mr. PATMAN. I do not know about the law. I am not going to question the law.

Mr. CURTIS of Missouri. I am asking a question. In order that we may proceed orderly, I have asked the gentleman a question.

Mr. PATMAN. I am not trying to answer the gentleman's question about the law.

Mr. CURTIS of Missouri. Then I do not yield to the gentleman any further. I am not yielding when the gentleman will not conduct the colloquy in an orderly fashion. If he does, I will yield to him.

First, I want to know if he will admit this is the law that prevails, any citizen—and I have quoted the section of the Internal Revenue Code.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. If the gentleman will answer the question.

Mr. PATMAN. It is the rule of procedure now, after Secretary Dillon amended the 1958 rule of the Eisenhower administration.

Mr. CURTIS of Missouri. The gentleman has a strange idea of what the law is. The law is what the Congress has passed and not what a particular Secretary says at any given time. This is in the statutes, and the gentleman, I am sure, must be aware of it or he would not have gotten this material. This is an erroneous statement that appears in the press release, because this is a requirement in the law, and any Secretary of the Treasury, I do not care under what administration, who would interpret the law as written today otherwise would be in error.

Congressman PATMAN's actions are most extraordinary. I have given some thought to just what should be done in this matter, and I have finally concluded that the best way to proceed is to take the floor of the House, after notifying the gentleman from Texas, Congressman PATMAN, that I was going to do so, as I did this morning, and then later under the 1-minute rule before the House started on its business today to raise the questions I have in mind about the propriety of his actions.

Mr. Speaker, first let me state that I believe it is quite important that Congressmen as individuals inquire into matters of public concern, particularly when they relate to problems in which their constituents are involved. I have no desire by raising the point I am going to raise to discourage this proper procedure. However, there is obviously a point where we could have all individual Congressmen conflicting with the jurisdiction of congressional committees which are set up for the purpose of inquiring into general fields. Usually the individual Congressman, when he finds the matters which he seeks to investigate are sufficiently broad and complex he seeks through the medium of committee activity the powers which the committee alone has to subpena witnesses and records, as well as the financial assistance necessary to pay for personnel and the costs involved in any investigation. However, in going to a congressional committee to bring about an investigation, the Congressman has to persuade the committee involved that this is an area which should be investigated, and the investigation is then carried out under the carefully prepared rules of the House and the rules of its committees.

Mr. Speaker, it is quite clear that Congressman PATMAN's individual investigation is of sufficient scope that it requires a congressional committee's backing.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman.

Mr. PATMAN. The gentleman from Missouri states that he recognizes I have the right to make an inquiry on any matter affecting my own constituents?

Mr. CURTIS of Missouri. That is correct.

Mr. PATMAN. Does he restrict it to my constituents? What about the country, and what about the gentleman's constituents.

Mr. CURTIS of Missouri. The gentleman is misquoting, and that is one reason I was careful in preparing a written text so we could refer back to it.

I said particularly where he is investigating matters that affect his constituents, but the Congressman obviously—and I myself—can go into any areas that are apart from the problems of my constituency. I am merely pointing out that there comes a point at which an investigation that an individual Congressman conducts and should conduct, and that which is an investigation that should be conducted by a congressional committee, should be decided. Now I will read again:

> It is quite clear that Congressman PATMAN's individual investigation as set forth in the news item is of sufficient scope that it requires a congressional committee's backing.

Mr. Speaker, it seems reasonable to infer that the gentleman from Texas, Congressman PATMAN, is relying upon the committees of the Congress in furthering his investigation when he lists for the benefit of the foundations from whom he is requesting information the various chairmanships and the committee positions he holds. Why, one can appropriately ask, did not the gentleman from Texas, Congressman PATMAN, as chairman of the Joint Economic Committee, request that committee to make this study? As the ranking House minority member of the committee, I and the rest of the members of this committee might well have been interested in seeing such a study being made, or why not have the Banking and Currency Committee to make the study, or the Small Business Committee, or even more appropriately, why not ask the Ways and Means Committee to inquire into this matter? It is essentially within the jurisdiction of the Ways and Means Committee. The Ways and Means Committee has made studies in this area in the past.

Mr. PATMAN. Mr. Speaker, will the gentleman yield at that point?

Mr. CURTIS of Missouri. I yield to the gentleman.

Mr. PATMAN. I recognize the authority of the Ways and Means Committee. At the same time there are two committees of which I happen to be chairman which might have jurisdiction over this matter.

Mr. CURTIS of Missouri. Why did you not ask those committees to go into it?

Mr. PATMAN. That is a matter for me to decide. I have not finished the preliminary inquiry. In fact, I have hardly gotten started.

Mr. CURTIS of Missouri. That is the subject of the discussion here, and the point I am making.

Mr. PATMAN. I am making a personal inquiry. You can ask either staff of either committee of which I am chairman, and neither one of them can tell you a thing about this matter, because they have not been consulted about it. But they will be consulted when I decide which committee I think it should go to, if to any committee.

Mr. CURTIS of Missouri. This is the point I am driving home. I question the propriety of what the gentleman is doing.

As a matter of fact, in the recent past this very area was felt to be of sufficient importance by the Congress that special committees were set up to make this investigation. I refer to the Cox committee in the 82d Congress, 2d session, House Resolution 561, CONGRESSIONAL RECORD, volume 98, part 3, pages 3489 and 3491, and to the Reece committee of the 83d Congress, 1st session.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. Yes.

Mr. PATMAN. Does the gentleman know that the Reece committee report of 1954 called for a continuing study of foundations by Congress?

Mr. CURTIS of Missouri. Yes. I think there is reason why they might have. It is even more pertinent to ask then why the gentleman, if he feels that way, does not use the committee structure to further these investigations if he thinks they are that important. The Congress has always had a proper concern for preserving the integrity of people's tax returns. Section 26, United States Code, 6103(d) sets forth a carefully prescribed procedure by which the Ways and Means Committee and the Senate Finance Committee can get income tax return information.

Section 26, United States Code, 6103 (b) sets forth the procedure for other congressional committees; and Treasury Regulations 6103 A–101 implements these provisions.

The House Ways and Means Committee when it utilizes this authority does not permit itself this tremendous power except after formal vote of the committee coming after discussion as to why this is necessary. When the committee does feel it is necessary to look at individual returns it frequently orders the Bureau of Internal Revenue to black tape the names and refer to the returns by number rather than name.

I am sure the reason behind the caution of the Ways and Means Committee is understandable and appreciated by our taxpayers. Of course, if a Congressman's purpose is to conduct a study merely to air his own preconceived notions rather than to develop fairly and impartially what actually exists, a committee investigation is certainly limited.

Mr. PATMAN. Mr. Speaker, I did not hear the first part of the gentleman's last statement; will he be good enough to repeat it?

Mr. CURTIS of Missouri. I say of course, if a Congressman's purpose is to conduct a study merely to air his own preconceived notions rather than to develop fairly and impartially what actually exists, any investigation is certainly limited.

Mr. PATMAN. I can deny that now.

Mr. CURTIS of Missouri. A careful investigation is bound by the House rules and committee rules. It requires the concurrence of both the majority as well as the minority members in moving forward. It requires concurrence of both the majority and minority in writing reports. And I think the gentleman from Texas, Congressman PATMAN, should state—and I note that he has been granted time after me, and I hope he will—why he did not show the courtesy to the Joint Economic Committee and ask them to conduct this study, if he felt it was as important as he says he deems it to be, or the Ways and Means Committee, or any other committee.

One other matter I would ask the gentleman from Texas, Congressman PATMAN, about. Is he using the personnel and overhead of the congressional committees he heads in carrying on this investigation? I am certain he is not, because I know that he fully appreciates that this is in violation of the rules and procedures of the House and Senate and its committees. The scope of the study that Congressman PATMAN has embarked upon, however, will require considerable personnel and expense. I believe it is within the spirit of the lobbying laws of Congress for the gentleman from Texas, Congressman PATMAN, to disclose what private group is financing the cost of this proposed investigation and the extent of the financing either in direct money or by supplying personnel and overhead, if such is the case.

Mr. PATMAN. Mr. Speaker, I consider that an attack upon me.

Mr. CURTIS of Missouri. No, this is a question.

Mr. PATMAN. And I demand that the gentleman disclose the basis of his information, if he has any, to warrant such a question, or delete that from his statement.

Mr. CURTIS of Missouri. No; I will read the statement again.

I believe it is within the spirit of the lobbying laws of Congress for the gentleman from Texas, Congressman PATMAN, to disclose what private group is financing the cost of this proposed investigation and the extent of the financing either in direct money or by supplying personnel and overhead, if such is the case.

Mr. PATMAN. I am asking what the gentleman is using as a basis.

Mr. CURTIS of Missouri. I am saying, if this is the case.

Mr. PATMAN. That is absolutely untrue. You have no right to say it. You should not have. I repeat, that is attack on a colleague without any basis of kind whatsoever. You are pulling your derogatory insinuation out of thin air.

Mr. CURTIS of Missouri. No, I am not. I have pointed out the first question is, Are you using personnel and the financing of the congressional committee which you had?

Mr. PATMAN. This is a personal attack.

Mr. CURTIS of Missouri. Mr. Speaker, I demand the regular order. I am trying to give him an opportunity——

Mr. PATMAN. You are making charges against me.

Mr. CURTIS of Missouri. I will give the gentleman ample time to answer.

Mr. PATMAN. There is nothing to answer. You have nothing to base it on.

Mr. CURTIS of Missouri. I am now trying to restate the facts.

Mr. PATMAN. They are not facts.

Mr. CURTIS of Missouri. If the gentleman does not care to say anything further than what he has, I am stating the case.

Mr. PATMAN. You do not even certify yourself it is a fact. Would you say that is a fact?

Mr. CURTIS of Missouri. The first one is a question. Is he using the personnel and overhead of the congressional committee he had in carrying on that investigation?

Mr. PATMAN. If you will say it is a fact, I will answer it.

Mr. CURTIS of Missouri. No, I am asking.

Mr. PATMAN. You have no basis for saying that at all. You bring it up thinking it will embarrass me, when it does not embarrass me.

Mr. CURTIS of Missouri. If you are not embarrassed, then sit down.

Mr. PATMAN. You are throwing out something as true when it is not true. The gentleman is unfair.

Mr. CURTIS of Missouri. I will repeat it again on the floor and elsewhere. The point is this. The investigation the gentleman is conducting is going to require considerable personnel and expense if it is going to be carried out. That is a fact. Now then, I ask the question, Is he using the personnel and overhead of the committee he had in carrying out this investigation. Your answer is no. Is that correct?

Mr. PATMAN. Anything you say as a fact I will answer.

Mr. CURTIS of Missouri. I am asking you a question.

Mr. PATMAN. You have no basis for it.

Mr. CURTIS of Missouri. I am asking you, is it true?

Mr. PATMAN. Anything you charge to be a fact, I will answer completely.

Mr. CURTIS of Missouri. All right; is it true?

Mr. PATMAN. Will you say it is a fact?

Mr. CURTIS of Missouri. I am asking whether you are.

Mr. PATMAN. Will you keep repeating it if I say it is not true? You can ask the directors of the committees, and either one of them will tell you I have not consulted with them or the staff about it.

Mr. CURTIS of Missouri. Wait just a minute. I do not yield at this point.

Mr. PATMAN. Fairplay demands you withdraw that.

Mr. CURTIS of Missouri. I then go on to say, Mr. PATMAN, if you will listen carefully, that I am certain he is not because I know that he fully appreciates this is in violation of the rules of procedure of the House and of the committee. So I now come to the question based on the fact that this will require money and personnel, so I say this is the scope of the study that Congressman PATMAN had embarked upon which requires considerable personnel and expense, and I think it will.

Mr. PATMAN. The gentleman is on a fishing expedition, and for the person whose name is on that letter.

Mr. CURTIS of Missouri. I bet you would.

Mr. PATMAN. Yes; because you are on a fishing expedition for him.

Mr. CURTIS of Missouri. The gentleman puts words in my mouth. I might say that is what the gentleman is on himself. But it is going to require considerable personnel and expense, so now I am trying to find out where is that personnel and expense going to come from, so I pose a question. And that is the case, and that is the way this was stated. If such is the case, I believe it is within the spirit of the lobbying laws for Congressman PATMAN to disclose what private group is financing the cost of this proposed investigation, the extent of financing either by direct money or personnel or overhead. As I understand it, the gentleman says that is not the case.

Mr. PATMAN. I hope you will not repeat it any more because it is not true.

Mr. CURTIS of Missouri. I take the gentleman's word.

Mr. PATMAN. Then why do you not withdraw your insinuation? There is nothing to it. There is no basis to it.

Mr. CURTIS of Missouri. How is this being financed?

Mr. PATMAN. We will come to that when we get to the investigation. At present, I am merely gathering information.

Mr. CURTIS of Missouri. You are financing it out of your own office; is that right?

Mr. PATMAN. We have committees, if it turns out that I need help in reading the responses to my inquiries.

Mr. CURTIS of Missouri. Answer the question.

Mr. PATMAN. We have committees that can do this. I happen to be the chairman of two committees, either one of which can do this work.

Mr. CURTIS of Missouri. Why do you not present it to the committee?

Mr. PATMAN. That is for me to decide in my own time; the gentleman cannot run my business. You can run your business according to the way you want, but you cannot run my business.

Mr. CURTIS of Missouri. The gentleman happens to be on one of the committees that is primarily concerned, the Joint Economic Committee, and the gentleman happens to be on the other committee that has primary jurisdiction of this area, the Committee on Ways and Means. The gentleman has checked with minority members of the Committee on Banking and Currency and the Small Business Committee and we found this is not being done. Yet, I will say this to the gentleman, whether you have done it intentionally or otherwise, in the formal letter you have sent to the foundations, you have created the impression—granted you say as an individual Congressman, but you do create the impression that this is committee work.

Mr. PATMAN. Read that language where I said it was committee work. You cannot do it because it is not there. You see, you are just implying things and insinuating things that you have no basis for. You ought to be ashamed of yourself—you ought to be ashamed of yourself making statements like these—against your colleague and the dignity of the House, when you have no basis for them at all.

Mr. CURTIS of Missouri. Mr. Speaker, the gentleman might state that he is not ashamed of a thing that he is doing here and I think the gentleman himself, if he cannot answer these questions, that is all right.

Mr. PATMAN. Any assertion of fact you make will be answered quickly and fully, but now, all you are doing is a fishing expedition for impropriety with no basis for it.

Mr. CURTIS of Missouri. The record is being made, I will say to the gentleman from Texas, for anyone to read. The record is being made for anyone to read and now is your chance to answer and if this is the extent of the gentleman's answers, then let the record show that.

Mr. PATMAN. There is no record; only repeated insinuations after I have already assured the gentleman his insinuations are false. Furthermore, I have said that after I have studied the information I receive, I will decide which committee will be asked to take it over, if any, because it will require study and it will require the use of personnel to fully analyze it. But, when we find out what we have, then, of course, we will determine which committee will have it, if any.

Mr. CURTIS of Missouri. I would suggest that the gentleman, obviously, has the cart before the horse. If this is something he thinks a committee should do, do you think it should go to the Committee on Ways and Means then refer to them; or if it is the Joint Economic Committee or the Committee on Banking and Currency or the Small Business Committee or as I think it properly should be, to talk to members on the Committee on Ways and Means? But it is quite clear he does not want to follow that kind of procedure. That is exactly why I am taking the floor of the House now.

Mr. PATMAN. Mr. Speaker, will the gentleman yield at this point in reference to the Committee on Ways and Means?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. PATMAN. I talked to the chairman of the Committee on Ways and Means.

Mr. CURTIS of Missouri. Did you ask his committee to do it?

Mr. PATMAN. Oh, no.

Mr. CURTIS of Missouri. Why not?

Mr. PATMAN. This is a small business matter and also involves the entire economy.

Mr. CURTIS of Missouri. Yes, it involves the economy, but not just the Small Business Committee, if the news item is accurate and apparently it is. If so, this investigation covers many aspects of our economy. Now it would be my advice to the foundations to whom Congressman PATMAN has written for detailed facts to reply courteously and suggest that the subject of his investigation, though a proper one for the Congress, seems to be of a type a congressional committee rather than an individual Congressman should be embarking upon. I am certain they will receive a courteous and understanding reply back from the gentleman, and that will end the matter. I also feel certain that the press will be equally understanding in reporting such refusals in the interest of fairness and orderly congressional investigatory procedures.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Texas.

Mr. PATMAN. Many replies have been received, and I do not remember a single foundation refusing. They have all been very nice. My letter does not contain any threats. It does not threaten, but merely asks for information that the foundations have to file anyway. There is no trouble about this. They have the information. These are public funds. Why should anybody object to the expenditures of public funds being made public?

Mr. CURTIS of Missouri. They do not.

Mr. PATMAN. Why should anyone object to that?

Mr. CURTIS of Missouri. All right, I will tell you. I told you the answer quite clearly in my preliminary speech. It costs them money. They have to spend a lot of effort on it, and I wish the gentleman would wait and let me finish. If this were a congressional committee investigation which was going to be carried out following the rules of the House which are fair and the rules of the committee, then, of course, that is one thing.

Probably they would be willing to spend the money. One of them says it costs as much as $10,000 to gather this information. I think it is unfair for an individual Congressman to ask these foundations and put them to that embarrassment. Just as the Congressman said, "Why should they be afraid?" They are not afraid, but they want to be certain that this is a properly conducted investigation, if it is going to be one, and a proper investigation in this area, I submit, is one by a congressonal committee, not by an individual Congressman, particularly a Congressman who, being chairman of three committees here, or two committees, could refer it very easily to those committees and ask that those committees go into it, whichever one he chose. But, he has not chosen that course.

Mr. PATMAN. No foundation has protested to me that it would cost $10,000. And this inquiry has not reached the investigation stage.

Mr. CURTIS of Missouri. What do you call that letter?

Mr. PATMAN. If they refuse to give the information, why, then, it may reach the stage of investigation. Then a committee will take it up at my request, I hope, and, if necessary, get the information that is desired. But I can foresee no reason why any foundation would refuse to answer my inquiry.

Mr. CURTIS of Missouri. The case has been made and anybody can read it and evaluate it.

TAX-EXEMPT FOUNDATIONS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 30 minutes.

Mr. PATMAN. Mr. Speaker, I have a high regard and great respect for the gentleman from Missouri. It happens that I serve on the Joint Economic Committee with him. He has been the ranking Republican member of the House-Senate committee for a number of years, and I am greatly surprised that he would make statements and ask questions that amount to a charge against me, without even claiming that he has any source material, any facts, and without even claiming that anyone has ever told him something or that he has read something in a newspaper, or that he has any knowledge of the matter whatsoever. He just wants to go on a fishing expedition to try to find something. Well, he will not find anything. Do you know why? Because I am working in the public interest, on my own motion, and not for some private interest as the gentleman seems to suggest.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. Not right now. What I am saying is in the interest of the gentleman's constituents in Missouri and in the gentleman's interests. I am not working for any private group. No private group has put up a penny and will not be allowed to do so. But, the very fact that the gentleman mentioned that means that he is making a charge that I am. He is making a charge that I am, on the floor of this House, which is absolutely untrue, and in all fairness to a colleague, he should withdraw that statement. I wonder if he will do it.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. CURTIS of Misscuri. We have been over this in my original statement. I think the record stands that no charge was made. Questions were asked, and the questions were not answered. Whatever charge might lie from the incompleteness of the gentleman's own answers is the only charge.

Certainly an operation like this does require financing, and if the gentleman says that it does not, out of thin air here, that is the answer.

Mr. PATMAN. The gentleman from Texas has given the gentleman from Missouri the correct information, and what the gentleman suggests happens to be untrue, and it happens to be of great disservice to the gentleman from Texas to repeat it. Does he insist on keeping it in the RECORD? Does he want to keep something in the RECORD that he has no foundation for whatsoever?

Mr. CURTIS of Missouri. Yes, the questions should remain in the RECORD and the answers that were made should be there.

Mr. PATMAN. I thought the gentleman was just a little fairer than that. I did not know that he would imply something against a colleague here that there is no basis for, absolutely no justification for, and then after he is told the truth about it he refuses to admit that he is wrong. He is going really beyond what I thought he would.

The truth is the Small Business Committee as well as the Joint Economic Committee have a lot at stake in these foundations. The Ways and Means Committee has jurisdiction, that is true; but for a number of years the Ways and Means Committee has not touched this question at all. And may I invite the gentleman's attention to the fact that in a recent contest for control of the Alleghany Corp., it was charged in the newspapers of the country, and was well known by the people in financial circles, that each side in the contest had private foundations which were out buying stock, voting stock, in an effort to gain control of that railroad empire.

So that implies that these foundations are used sometimes for purposes other than charity or other public service; and I can tell you other instances.

Why should the gentleman be opposed to making public information about tax-exempt institutions that can do such things as that?

Does the gentleman believe that foundations should be allowed to buy stock with foundation money and use that stock to vote to defeat the other side that is also purchasing stock through foundations to acquire control?

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield for an answer to that?

Mr. PATMAN. I yield to the gentleman.

Mr. CURTIS of Missouri. The answer is quite clear. I do not favor it. I said the committee should go into that area. I said to the gentleman I would request it.

Mr. PATMAN. I am only doing a study in a preliminary way. It would be enlightening to know, if the gentleman would tell me, who his complainant is. It might be revealing. The gentleman might be pursuing a course he would not pursue if he knew who was behind it.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. CURTIS of Missouri. The answer to that is, There have been many complaints. My concern is not with the individual; my concern is with the committee procedure. My concern is to urge the gentleman to reconsider the method in which he is going about this.

Mr. PATMAN. If that is the purpose, I appreciate the gentleman's advice very much, but no committee procedure, and no committee is involved; it is up to me, entirely, as to the course I follow. As long as I am conducting myself within the rules of the House, and within the laws of this country, the gentleman is being presumptuous in insisting I adopt his suggestions.

This study is being made solely in the public interest. You know, the tax burden has become quite heavy, and if these foundations use funds as it is alleged they are using them—and a study will probably disclose enough information to determine whether or not there should be an all-out investigation—and then if it should happen to be in corroboration of the charges that have been made, it will save the taxpayers of this country a lot of money.

I happen to be connected with the Small Business Committee, and I am very proud of it. Small business is the biggest business of this country in the aggregate, although the separate units

may be somewhat weak. They need somebody on the floor of the House to speak for them.

I am not the only one. The gentleman from Missouri claims to be for small business and offers bills now and then. It is very difficult to understand, however, why the gentleman should go through this strange performance to try to block an investigation of a situation which confers a great advantage on the big corporations and works to the disadvantage of their small competitors.

May I invite the gentleman's attention to the fact we have gone through somewhat of a revolution here in this country in the last few years. I can remember when the little towns had fine little businesses, local department stores, hardware stores, restaurants, banks, and similar places of business that could be operated by local people. There were always local people who could perform the duties and run the businesses in the retail trade, in banks, and such as that. When a person became too old to do a full day's work, there was always some good neighbor in business who would give him a useful job, or he could go into some moneymaking opportunity of his own, and he would continue to take care of himself and his family.

But look at the situation now. You will find these big concerns have gone into all the local towns and have either bought out these local concerns, or squeezed them out through abuses of power.

That has gone on in this country until now community businesses and community living in America is drying up to a large extent. The spirit of the community has been weakened, and in some instances absolutely destroyed, because the moneymaking opportunities are not in the local communities any more. Today, when a man who is over 40 or 45 years old happens to lose his job, he can seldom get another job. There are too few locally owned businesses to provide jobs. The big corporations control most of the jobs, and they have policies against hiring a man who is over 40 or 45.

Perhaps one of the letters the gentleman has came from the Hartford Foundation, or the A. & P. Tea Co. They have stores all over America, and they are doing a business of $5 or $6 billion a year. When A. & P. has a competitor across the street they want to get rid of, they discriminate in price, perhaps even sell below cost, until the little competitor is driven out of business; he has to quit, he is ruined, or he is in bankruptcy. They then have the business in that community, in that area, and they put the prices up.

I am not making idle statements such as the gentleman made a while ago. I am telling you that the court records verify and corroborate this. After they have squeezed out the local merchant the chain will sell at a higher price and use the extra profits they make there to put some other independent out of business. That has gone on all over America.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman, if he denies that statement.

Mr. CURTIS of Missouri. No, I do not deny it or affirm it. All I am asking is if the gentleman has made his findings why does he not make a report? Why does not the gentleman have a committee investigate these things so that we can firm it up and do something about it instead of making these charges without the people having an opportunity to come in and meet them?

Mr. PATMAN. My inquiry has just begun. There are no findings; the gentleman is objecting before I receive the preliminary information I have asked for. They will have an opportunity to be heard.

Mr. CURTIS of Missouri. Not the way the gentleman has gone about it.

Mr. PATMAN. Big people such as these have always been heard when they wanted to be heard.

Mr. CURTIS of Missouri. The gentleman knows the way of getting into an investigation.

Mr. PATMAN. I do not yield any more. The gentleman is just harassing me.

Mr. CURTIS of Missouri. I am trying to make a point.

Mr. PATMAN. The gentleman is not denying anything.

Does the gentleman know about absentee owners? Is the gentleman in favor of absentee ownership in preference to local ownership?

Mr. CURTIS of Missouri. The gentleman knows——

Mr. PATMAN. The gentleman will not answer that, either.

Mr. CURTIS of Missouri. I will answer it. Of course I am not.

Mr. PATMAN. You mean you are in favor of the locally owned businesses?

Mr. CURTIS of Missouri. Why, of course.

Mr. PATMAN. Then you should be working right down my alley.

Mr. CURTIS of Missouri. Will the gentleman yield?

Mr. PATMAN. Wait a minute.

Mr. CURTIS of Missouri. The gentleman's tactics in this debate are not proper.

Mr. PATMAN. Let me comment on what the gentleman said.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. The gentleman from Missouri said he was for locally owned businesses.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield? If not——

Mr. PATMAN. Not at this point.

The gentleman says he is for locally owned businesses. That is exactly why he should be for this study, and I am going to solicit his aid and advice and help at the proper time, after I obtain the information he objects to my obtaining. In the meantime, if he has any basic information, I will be glad to have it. Let me tell you where the gentleman stands on local business. I have not heard of him doing anything in that direction. I have a bill pending before the gentleman's committee which would deny these big concerns the right to deduct for tax purposes the money they lose in destroying of the local businesses. I have never gotten a hearing on that bill, and I have never heard of the gentleman being for it.

Is the gentleman for that bill?

Mr. CURTIS of Missouri. Will the gentleman yield?

Mr. PATMAN. I yield for the purpose of his answering that question.

Mr. CURTIS of Missouri. This is the first time I knew the gentleman from Texas had such a bill.

Mr. PATMAN. It shows you are not on the alert for the small businessman.

Mr. CURTIS of Missouri. I beg to disagree. It shows the gentleman from Texas is not interested in it enough to contact members of the Ways and Means Committee in support of his bill.

Mr. PATMAN. Certainly I have. I have contacted them, I have written letters, and I have put them in the CONGRESSIONAL RECORD.

Mr. CURTIS of Missouri. Did the gentleman ever contact me?

Mr. PATMAN. If the gentleman from Missouri had been on the alert for the small businessman, as he is on the alert when I step on the toes of a big man, he would have known about it. When I step on the toes of a big man, the gentleman is on the alert right quick.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield to answer my question?

Mr. PATMAN. If you get on the alert for a small businessman, we can get together and do some good.

Mr. CURTIS of Missouri. Mr. Speaker, I want to find out if the gentleman intends to yield to me so I can carry on a colloquy. If he does not yield, I shall desist.

Mr. PATMAN. You made your speech. You had 30 minutes.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield for an answer?

Mr. PATMAN. The speaker does not have this time; I have the time.

Mr. CURTIS of Missouri. Will the gentleman yield?

Mr. PATMAN. I do not yield right now. Wait until I finish my statement.

Let me follow through on this, and I will yield to the gentleman.

Mr. Speaker, I find it hard to understand why the gentleman objects to uncovering information which could be very important to the survival of small business.

You know that under the present tax laws the national chains and other big companies receive a triple bounty for destroying the independent competitor. These bounties for the hides of the small businessman are well known, and what we are dealing with here, in these foundations, could very well be the fourth and fifth bounty.

The first bounty occurs when the big corporation takes a loss to drive an independent competitor out of business. A national chain, for example, can abuse its power in any number of ways to drive out the little man across the street from one of its stores. It can skate around the antitrust laws to discriminate in prices at that one store; it can even sell

below cost to drive the little man out. If the chain wants to take a $100,000 loss at that one store in the process of driving the little man out of business, it does not really lose $100,000. Uncle Sam pays half of the loss, because the corporation can deduct it from taxes. But the little man cannot make any recoveries for his loss out of taxes; he is out of business and does not have any current or future profits from which to deduct his $100,000 loss. That is bounty No. 1 for destroying the small man.

Bounty No. 2 is paid when the chain turns around and buys the firm of the little man it has driven out of business. It acquires the privilege of using that little firm's loss as a tax deduction in its own business, either as a current loss, or as a carry-forward provision. In other words, the loss which the little man has suffered, the big corporation uses for another tax deduction. So now Uncle Sam pays the other half of that $100,000 loss the chain took in order to drive the little man out of business. That is bounty No. 2.

Now comes bounty No. 3. The chain can now turn around and, in effect, pay the stockholders a dividend equal to the amount of the capital invested in the little man's firm, only the chain does not call this a dividend. It calls it a "return of capital" to the stockholders, and the stockholders do not have to pay individual income tax on this. That is bounty No. 3.

Now we come to these foundations and what is quite possibly bounties Nos. 4 and 5. Take the big stockholders in A. & P., for example. They have more wealth than they know what to do with, but they avoid paying income taxes and in their estates avoid estate taxes by reason of the fact that they give some of their stock in A. & P. over to the Hartford Foundation. That is a tax avoidance which the tax laws permit on the theory, as I understand it, that these foundations are in the public interest, because the money given to them is going to be used only for charity or some other public service.

The foundation now receives dividends on the stock it holds and pays no taxes on these dividends, although if the individual stockholders held this stock directly, they would have to pay individual income taxes on the dividends. So the bounties which the tax laws provide for the destruction of small business now flow into these foundations, tax free.

Furthermore, the corporation has under its control, and at its fingertips, a vast pool of funds for use any time it needs funds. The small businessman in contrast has a very difficult time raising any amount of capital or obtaining even a halfway adequate amount of credit. The big corporations, in effect, accumulate a large pool of retained earnings, in these private foundations, which funds avoid the individual income tax which would apply if the dividends were paid individually to the stockholders and also avoid the section 102 tax which would apply to excessive retained earnings, if the dividends were not paid out to the stockholders.

These questions about possible favoritism in the tax laws to the big corporations which operate to the competitive disadvantage of the smaller independent business firms interest me very much. There is no question but what somebody who is interested in seeing that small business gets an even break ought to look into this. It is very puzzling that the gentleman objects so strenuously to my asking for information on this subject.

Who is the Hartford Foundation? It is the Hartford family and associates. They own the A. & P. Tea Co. They own a large part of the stock of the A. & P. Tea Co. For the gentleman's information the foundation and the few Hartfords own 72 percent of the A. & P. Tea Co. So, when they give stock to this foundation, they get a tax exemption or tax deduction for giving that to the Hartford brothers' foundation. They get a tax deduction. They not only do not have to pay taxes on it, but they can get a benefit from it.

Then when it goes to the Hartford Foundation, they have hundreds of millions of dollars, and they can use that backlog of credit and money to help put out of business any independent merchant in America.

I know the gentleman would not want that. My inquiries for information are preliminary. Perhaps I will eventually ask for a committee investigation, depending on how far this situation goes. I know that it goes not to only one, but to a number of chains. It applies to the A. & P. Tea Co.; it applies to Kresge; it applies to Kress. The main question now is whether the control of the foundations and the terms of their charters are such that these tax-exempt institutions can be used in the competition with taxpaying business firms.

There is a difference between a locally owned store and a store that is owned by Wall Street. Most of the interstate chains have direct Wall Street connections and are owned there. When the chain gets its money in the local community, the net profits go straight to New York, usually the same night. The net profits of the local man go into the local bank and the local bank uses that money to help other enterprises in the local community. That helps every local community.

The gentleman would not deny that that is better than having it fly to New York every night. That is what is happening in America. We have got to do something to stop that trend. And if we make a study of these foundations and it is found that their funds can be and possibly are used in competition with taxpaying business firms, then I will ask for an investigation and we will have it by a congressional committee. I am sure the gentleman will vote for it. I believe he will vote for it because he could not afford to vote against it, since he says he is in favor of the local man in preference to the absentee owner.

Now, Mr. Speaker, I yield to the gentleman from Missouri, if he wants me to yield.

Mr. CURTIS of Missouri. Mr. Speaker, I appreciate the gentleman's yielding. Of course, he has made a lot of charges that are perfectly proper if he wants to make them. The only question I have raised here is, if he believes so strongly this way, why does he not follow the orderly procedure and have a congressional committee handle it, so that those who might disagree with him would have the opportunity to present their side of the case. That is the fair way of proceeding. The only issue I have raised is one of correct congressional procedure. I think the gentleman is making a beautiful case for exactly what I am driving at, the danger of an individual Congressman with preconceived notions, without the balance that we derive from our other colleagues on a committee, tempering their remarks and insisting on fairness to all concerned—the gentleman has made a beautiful case for the dangers of single or individual investigations.

Mr. PATMAN. This is a survey that I am doing myself. If it suggests a committee investigation should be made, and if we decide to put it in the Joint Economic Committee, I am sure I will have the gentleman's support to have it in that committee. But first I want to make this study and see how far these foundations are going.

The taxpayers of America really may be subsidizing the extermination or the destruction of the independent merchants in this country. The tax laws offer a triple bounty, as I said, a triple bounty for big companies to destroy independent merchants, like a bounty against a wolf or a wildcat. That ought to be stopped.

I feel we should get America back more in the form of a better democracy. We do not want to do anything that would cause Mr. Khrushchev to look with favor on what we were doing. But I want to tell the gentleman from Missouri, as long as he does have concentrated wealth and monopolies and everything in the hands of a few people, he is helping, unwittingly, I am sure, but nevertheless he is helping place this country in an environment, an atmosphere, and a condition where it will be ripe for Mr. Khrushchev and the Communists. Although Mr. Khrushchev is not a guide for the people who are doing these things, these people are doing what Mr. Khrushchev would like to have done. It is very pleasing to him. So the way to keep this country democratic and fight communism is to have these millions of small shopkeepers, independent businesses, independent merchants all over America, and not have these giant monopolies that are destroying them by unfair methods.

Mr. CURTIS of Missouri. The gentleman is not implying that is the way I had voted?

Mr. PATMAN. I have not looked up the record. If the gentleman votes like he talks, I would have to say "Yes," but I have not looked up his record.

Mr. CURTIS of Missouri. Mr. Speaker, I am afraid that in the light of that I will have to have the gentleman's words taken down.

Mr. PATMAN. I say if he voted like he talked—I have not had the votes

looked up. I say since you have asked me about something I do not know about, I will just say that I do not know now.

Mr. CURTIS of Missouri. You certainly should, in view of wrapping the flag around your shoulders.

Mr. PATMAN. I said something I was not sure about, because I am not sure of the gentleman's record.

Now, let him be as fair with me and withdraw the implications and insinuating questions he has made against me, without any accord or any basis. Since I have withdrawn that statement, since I have not looked up the record, let him withdraw his unfair statement against me.

Mr. CURTIS of Missouri. I do not admit I have made an unfair statement.

Mr. PATMAN. You implied.

Mr. CURTIS of Missouri. I asked the gentleman some pertinent questions. The gentleman answered, and the record is there.

Mr. PATMAN. When I told you there was not a word of truth in your suggestions, you denied making a charge, that is true, and I corrected you. Then you still do not correct the record.

Mr. CURTIS of Missouri. The record is there. I made no such statement. I asked the gentleman a question. The gentleman has answered the question. The record is there for anyone to read.

Mr. PATMAN. I am going to put some questions in the RECORD tonight, and I hope the gentleman looks at it, and I hope he gives me candid answers to all of them. I hope he gives me answers that are true and that he will back up.

I think that I can say that the gentleman has said all the time that he is for small business, but I have not seen any evidence of it. I think I can truthfully say that.

Mr. CURTIS of Missouri. Well, I authored the Curtis-Ikard bill. I happen to be a coauthor of it.

Mr. PATMAN. Let me take the case of big chains destroying local ones, the local merchants in your town and mine. I have never known the gentleman to take a stand on that. Am I wrong on that?

Mr. CURTIS of Missouri. Yes, the gentleman is wrong.

Mr. PATMAN. What has he done?

Mr. CURTIS of Missouri. I will tell you one thing I did, I backed to the hilt Assistant Attorney General Bicks on his antitrust work and I have been one of the most ardent supporters of the antitrust laws, and the gentleman should know it.

Mr. PATMAN. I am glad to know that, and I expect the gentleman's help in this campaign to restore community life in America to the place it should be, with local businesses and local ownership, operated by local people, as distinguished from absentee-owned businesses owned by absentee owners where the profits go out of town every night. That is disastrous to our economy and is destructive to our country.

The gentleman is suggesting some new principles, and some quite strange principles, for limiting the freedom of an individual Member of Congress to ask for information.

First, his argument seems to be that an individual Member should not seek information at all, but that only a committee of the Congress can properly seek information. More than that, the gentleman seems to suggest that when an individual Member does seek information, he is properly suspect of improper uses of funds and becomes a proper target for insinuation and innuendo by a colleague on the floor of the House.

I might point out to the gentleman that he has recently gone through a large-scale exercise, though a rather uninteresting exercise, of getting information from some 40 or so economists. It did not occur to me to challenge his right as an individual Member of Congress to seek and obtain information from these 40 or so economists.

However, since the gentleman seems to think he has a right to demand to know about the financing of my questionnaire to the foundations, and I have fully answered his question on this subject, I will now adopt the standard he imposes on me and ask him, in turn, to state in the record the source and nature of his financing of the papers he obtained from those 40 or so economists. Just how much did this whole project cost, who provided the funds, how much were these economists each paid, and what was the real source of the funds used to finance this project?

I will also ask the gentlemen to state whether or not any tax-exempt foundation provided any funds, or met any of the costs, directly or indirectly, of this project involving the 40 or so economists and, if so, what are the names of these foundations and how much of the cost did each meet?

I will not demand that the gentleman give an off-the-cuff answer to these questions; he may take his time to think the matter over and to make some inquiries concerning the use of foundation funds where he may need to make inquiries. But I hope he will put his answers in the RECORD, within the next few days, before the Congress adjourns.

Since the gentleman from Missouri has either ignored or distorted parts of my speech of August 7, I feel I should place excerpts from it into the RECORD. Hence, much of the following is from said speech.

The gentleman from Missouri is saying that I, as a Member of this U.S. Congress, do not have the right to gather information in order to fulfill my responsibilities?

In my statement of August 7, I pointed out that the mail I have received from all parts of the country, as well as press stories and editorials, indicate a growing public concern over the lack of adequate regulation of privately controlled, tax-exempt foundations. Some question the economic consequences of vast fortunes being held in unregulated foundations; others express fear of possible control of businesses by foundations through acquisition of large amounts of stock.

In order to be able to form fair judgments, I am gathering information preliminary to having any committee discussions. The data I am gathering is public information, some of it published in the annual reports of certain foundations.

Briefly stated, I am concerned, in part, with first, foundation-controlled businesses competing with small businessmen; second, the economic effect of great amounts of wealth accumulating in privately controlled, tax-exempt foundations; and, third, the foundations' power to interlock and knit together, through investments, a network of commercial alliances, which assures harmonious action whenever they have a common interest.

FOUNDATION-CONTROLLED BUSINESSES HURT SMALL BUSINESS

A foundation's income from stockholdings is tax exempt. At the same time, the businesses under their control are competing with taxpaying businessmen. For example:

First. The John A. Hartford Foundation of New York City is the largest single stockholder in the Great Atlantic & Pacific Tea Co. Mr. Ralph Burger, president of the A. & P., heads its board of trustees. According to the Wall Street Journal of July 10, "There is no question that the foundation trustees have had a strong voice in the operation of A. & P. down through the years."

The Hartford Foundation holds 7,799,822 shares—33.96 percent—of A. & P. Thus, the foundation's tax-exempt income from its A. & P. stock was in the neighborhood of $7,500,000 in 1960, and over $8 million in 1959.

Various members of the Hartford family own a total of 8,297,041 shares—38.35 percent—of A. & P. so the foundation and the Hartford family have the company well locked up.

Second. The Samuel H. Kress Foundation of New York City owns 995,064 shares—42 percent—of S. H. Kress & Co., a chainstore operation with 266 stores in 30 States. Mr. R. H. Kress, honorary chairman of the board of S. H. Kress & Co., is president of the foundation; he owns 104,697 shares—4.5 percent—of the company, and is trustee for another 4,000 shares.

According to the Wall Street Journal of July 10, the foundation has been directly involved with the management of S. H. Kress & Co. In 1958, the trustees of the foundation placed four men on the company's board of directors, and "soon thereafter the board received the resignation of four Kress executives, including the president."

The foundation's tax-exempt income from its S. H. Kress & Co. stock totaled over $497,000 in 1960, and over $1,990,000 in 1959.

Third. The Kresge Foundation of Detroit holds 1,900,000 shares—34.4 percent—of S. S. Kresge Co. Mr. Stanley S. Kresge, a director of S. S. Kresge Co., is president of the foundation; he owns 75,000 shares of the company. Mr. S. S. Kresge, chairman of S. S. Kresge Co., is treasurer of the foundation; he holds 26,300 shares of the company.

The foundation's tax-exempt income from its S. S. Kresge Co. stock totaled $3,040,000 in 1960 and $3,040,000 in 1959.

BIGGER TAX BURDEN FOR OTHERS

Such exemptions, of course, create a greater tax burden for the rest of the American people.

The unfairness and the dangers are self-evident:

First. There is, at present, no limit on the number of tax-exempt foundations.

Second. Foundations are established with money a large part of which would otherwise go into the Federal Treasury as taxes.

Third. We are faced with a rapidly increasing number of foundations being used to perpetuate control of businesses by families or small groups controlled by them.

This poses some real problems for our economy.

In Texas, the attorney general has recently established a new division in his department to "ride herd" on the 200 or more foundations and trusts in the State. Attorney General Will Wilson explained the reasons for his action as follows:

We face an increasing number of legal problems as to whether these tax-exempt funds are being used as a vehicle for empire building. Because of the tax exemption granted them they must be dedicated to public purposes, and they are public trusts, administering funds of which the public is the equitable owner.

FOUNDATION CONTROL BUSINESSES

As for the investment policies of the foundations, Mr. Andrews, director of the Foundation Library Center, New York, observes, in his 1956 book, that the foundations' sharp swing toward common stocks raises a fresh problem. As foundations increase common stock holdings, which involve voting rights, they may acquire a substantial voice in the business, personnel, and social policies of those companies. He also points out:

In Ontario Province, Canada, the 1950 Charitable Gifts Act limits to 10 percent a charitable trust's holdings in any business. In the absence of any such legislation in the United States, foundations in recent years have become owners of substantial blocks of stock, and sometimes effective control, in many businesses. No broad survey has yet disclosed how this new responsibility is being discharged.

Apropos of Mr. Andrews' observations, the Rockefeller Foundation Annual Report for 1959 lists a securities schedule totaling $584,456,318—based on market quotations of December 31, 1959—of which $498,198,262 was in the common stock of 36 companies.

In 1916, the report of the Commission on Industrial Relations estimated that the Rockefeller and Carnegie Foundations together had funds amounting to at least $250 million yielding an annual revenue of at least $13,500,000—final report and testimony submitted to Congress by the Commission on Industrial Relations, Senate Document 413, 64th Congress, 1st session, 1916. By way of contrast, despite 45 years of expenditures, the Rockefeller Foundation had total assets of over $588 million, as of December 31, 1959—based on market quotations of the same date—and income from securities of $23,044,031 during 1959. The Carnegie Foundation of New York had assets of $259 million, as of September 30, 1960—based on market quotations of the same date—and income from securities of $9,914,681 for the year ended September 30, 1960.

Does the gentleman from Missouri consider that full disclosure of nonsecret Government information is in the public interest? Does he know that public information regarding tax-exempt foundations was made difficult to obtain by the previous administration?

It may be of interest to the gentleman from Missouri that this administration has amended the regulations under section 6104 of the Internal Revenue Code of 1954, in order to permit the furnishing of photographic copies of certain tax-exempt foundation documents to the public. As I pointed out in my speech of August 7, the Secretary of the Treasury has informed me that he has instituted reforms within the Department which substitute light for the darkness that has existed since November 1958 in the highly controversial area of tax-exempt foundations.

By letter to me, dated August 3, 1961, the Secretary states that he has ordered the amendment of regulations under section 6104 of the Internal Revenue Code of 1954, relating to publicity of information required from tax-exempt foundations and certain tax-exempt trusts, in order to permit the furnishing of photographic copies of certain documents to all Members of Congress, the press and the public. The changes in Treasury Department procedure provide as follows:

First. The Internal Revenue Service will furnish photographic copies of pages 3 and 4 of the annual information returns—form 990–A, showing income, expenditures, balance sheets, and so forth including supporting documents, of tax-exempt foundations and certain trusts.

Second. The Internal Revenue Service will furnish photographic copies of applications for tax exemption—form 1023—including supporting documents, which were approved subsequent to 1947. Applications approved for exemption prior to 1948 were destroyed some time ago under congressional authority.

PHOTOGRAPHIC COPIES NOW AVAILABLE

Thus, for the first time since November 1958, photographic copies of important information regarding tax exempt foundations and certain trusts will be furnished to the public. This is a reversal of the previous administration's prohibition on photographic copies of public information in the files of the Internal Revenue Service regarding tax exempt foundations. From November 1, 1958, to the present time, the Treasury Department has permitted the public to manually copy the material which was open to public inspection, but it would not furnish photographic copies, in spite of the fact that such prohibitions are clearly contrary to the intent of the Revenue Act of 1950. Of course, the previous administration's requirement that copying of such material could only be done manually limited its usefulness and curtailed inspection by the public.

Many of us will recall that the hearings and reports on the Revenue Act of 1950 clearly indicate the desire of Congress to prevent certain abuses, including secrecy, which existed prior to 1950 among certain tax exempt organizations. There is nothing in the legislative history of the Revenue Act of 1950 which suggests the prohibition of photographic copies of information to be made available to the public regarding tax exempt foundations. On the contrary, the history of the act, as set forth below, leaves no doubt as to the intent of Congress.

First. The conferees agreed that certain tax exempt organizations "shall furnish annually information respecting income, expenses, disbursements, accumulations, and a balance sheet, which information is to be made available to the public"—House Report 3124, page 37, 81st Congress, 2d session, 1950.

Second. Public Law 814, 81st Congress, 2d session, provides as follows:

(c) Information Available to the Public—The information required to be furnished by subsections (a) and (b), together with the names and addresses of such organizations and trusts, shall be made available to the public at such times and in such places as the Secretary may prescribe (64 Stat. L., pt. 1, p. 960, sec. 341 creating sec. 153(c) of the Revenue Code of 1939).

STOPPED IN 1958

Instead of following the congressional intent to make readily available the information, which, by law, had to be filed with the Internal Revenue Service, it was made difficult to obtain. It is my understanding that the rule of procedure, which prohibited photographic copying of such material, was urged upon the Treasury Department by Under Secretary Fred C. Scribner, Jr., and was prescribed by Treasury Decision 6331, approved on October 30, 1958. Prior thereto photographic copying was permitted, and the 1958 prohibition was, without question, a sheer distortion of congressional intent, and utterly indefensible; it only served to keep the public in the dark, and to promote secrecy in Government.

Is the gentleman from Missouri acquainted with the tremendous growth in the number and size of foundations? As stated in my speech of August 7, the Treasury Department has furnished me with statistical data showing the tremendous growth in the number of foundations since 1952. Such data has not been made available during the past 8 years. Indeed, in past years, congressional committees have complained of the dearth of accurate information regarding tax-exempt foundations, despite the fact that the Treasury Department has the greatest amount of information on the subject. In 1954, the report of the Reece committee stated that "no comprehensive statistics are available." The same committee estimated that there were between 6,000 and 7,000 foundations at that time. Hence, the tabulation, as set forth below, which was prepared for me by the Treasury Department, constitutes figures never before disclosed to the Congress. It indicates the number of annual information returns—form 990–A—which the

Internal Revenue Service has received from tax-exempt foundations and certain trusts during each year beginning with 1952. This tabulation excludes the following types of tax-exempt organizations, among others, since they are not required to file form 990–A: First, religious organizations; second, educational organizations of a certain type; and, third, charitable organizations, or those for the prevention of cruelty to children or animals, which are supported in whole or in part by Federal or State governmental units, or primarily by contributions from the general public. The figures show that the number of tax-exempt foundations totaled 12,295 at the end of 1952, and rose to the staggering figure of 45,124 at the close of 1960, an increase of 367 percent.

Number of returns (form 990–A) received by the Internal Revenue Service

Period:	
1952	12,295
1953	21,598
1954	24,839
1955	28,859
1956	30,021
1957	33,373
1958	39,264
1959	41,444
1960	45,124

I wish to commend the Secretary of the Treasury for the prompt and vigorous steps he has taken to improve the flow of Government information on tax-exempt foundations. Such reforms indicate a full and faithful adherence to President Kennedy's desire to give the American people all possible information.

The Wall Street Journal of July 10, 1961 carried a front-page story entitled "Charity and Business." The article points up the fact that many tax-exempt foundations are part and parcel of the business operations of the directors or trustees who control them—that is, they—the foundations—have major holdings or controlling stock in such businesses.

WAVE OF COMPANY-SPONSORED FOUNDATIONS

In the Foundation Directory of 1960, Mr. F. Emerson Andrews, now director of the Foundation Library Center, points out that "a wave of foundations of a new type has crested in the past decade. These 'company-sponsored' foundations are tax exempt, nonprofit legal entities separate from the parent company but with trustee boards consisting wholly or principally of corporation officers and directors." The Foundation Directory lists 1,333 company-sponsored foundations. Five of them have assets exceeding $20 million each: Ford Motor Co. Fund, Dearborn, Mich., year ended December 31, 1958; General Electric Foundation, Ossining, N.Y., year ended December 31, 1958; Sears, Roebuck Foundation, Chicago, Ill., year ended April 30, 1959; Standard Oil Foundation, Chicago, Ill., year ended December 31, 1958; and United States Steel Foundation, New York, N.Y., year ended November 30, 1958.

Neither labor nor individual stockholders are kindly disposed toward company-sponsored foundations. Labor says that a company's extra surplus should be paid out in increased wages, and the individual stockholder feels that any extra surplus should go to him in the form of dividends.

USING PUBLIC'S MONEY

The company-sponsored foundations, like all others, are using the public's money without Government supervision. It is the public's money because foundations are recipients of certain Federal tax exemptions:

First. The foundation pays no Federal income tax.

Second. The donor neither pays gift tax nor estate tax on contributions to the foundation.

Third. For income tax purposes, an individual donor is granted a deduction up to 20 percent of his net income; a corporate donor is allowed to deduct up to 5 percent.

Fourth. The donor's contributions constitute capital to the foundation, not income, and thus need not be distributed.

Does the gentleman from Missouri know that there is a dearth of information available on foundations?

NO COMPREHENSIVE DATA

The public need for comprehensive, basic information on foundations has not been satisfied by private surveys of the foundation field. Undoubtedly, Treasury Department obstructionist tactics during the past several years have contributed, in a very substantial degree, to the scarcity of comprehensive published data on tax-exempt foundations. Most of the surveys published are written by foundation administrators or persons closely connected with foundations.

The Foundation Library Center, incorporated in 1956, as an educational institution under authority of the Board of Regents of the University of the State of New York, has been described as the fact-finding, statistical organization on foundations. According to the Foundation Directory of 1960, "It is an independent agency under its own board of trustees, men knowledgeable about foundations but representing the public interest. With an initial grant from the Carnegie Corp. of New York it is charged with the tasks of gathering comprehensive information about foundations, stimulating adequate reporting where such does not exist, and making its collections freely and generally available." Yet, recently, the center wrote me that it was unable to furnish me with: first, a study or analysis of investment portfolios of foundations—that is, an analysis of their investments in common stocks, preferred stocks, et cetera, and second, names and addresses of foundations which are the largest single stockholders or major stockholders in a commercial enterprise.

The public need for information has been only partially satisfied by the Foundation Directory of 1960. This directory, prepared by the Foundation Library Center and published by the Russell Sage Foundation with grants from the Carnegie Corp. of New York, and the Ford Foundation, lists 5,202 foundations. For the most part, the figures shown are for a calendar or fiscal year 1956, 1957, or 1958; only 8 percent are for 1959.

The Foundation Directory of 1960 discloses expenditures amounting to $686 million for 5,143 of the total of 5,202 foundations listed, but it omits income figures. The directory contains no income figures despite the fact that it was compiled from, first, records in the Foundation Library Center's extensive files, second, detailed questionnaires (which included a request for income data) sent to 5,000 foundations, third, public records of the district offices of the Internal Revenue Service, and fourth, news reports. However, an income tabulation is shown in the book, "Philanthropic Foundations," by Mr. F. Emerson Andrews, director of the Foundation Library Center, and published by the Russell Sage Foundation in 1956. Income, for the purposes of the tabulation, is defined as income from investments. Profit or loss from security transactions, or income in the form of new gifts, is not included. In his 1956 volume, Mr. Andrews says that income from assets for 77 larger foundations totaled $165,996,000 in 1953. Despite the fact that the Revenue Act of 1950 denies tax exemption to an organization that engages in an unreasonable accumulation of income, the expenditures of a number of them in 1953, were considerably less than their income. Some such examples are listed below:

	Income from assets, 1953	Expenditures, 1953
Carnegie Corp. of New York, New York City	$7,572,000	$4,957,000
China Medical Board of New York, New York City	1,116,000	292,000
Danforth Foundation, St. Louis	1,089,000	148,000
Duke Endowment, New York City	6,800,000	5,587,000
Hartford (John A.) Foundation, New York City	1,706,000	377,000
Mellon (Richard King) Foundation, Pittsburgh	779,000	537,000
Noble (Samuel Roberts) Foundation, Ardmore, Okla.	1,024,000	534,000
Olin Foundation, New York City	2,129,000	1,094,000
Reynolds (Z. Smith) Foundation, Winston-Salem, N.C.	1,103,000	453,000

Is the gentleman from Missouri saying that tax-exempt foundations should be privileged entities with no Federal supervision while the Nation's taxpayers carry an ever-increasing burden of taxation?

Does the gentleman from Missouri subscribe to the novel economic concept of control of property without ownership?

Such is the case when a donor gives his stock in a corporation to a foundation which he, in turn, controls.

Some people have attacked privately controlled foundations as sources of family control of tax-exempt wealth.

Does the gentleman from Missouri believe that tax-exempt foundations should be allowed to accumulate funds in perpetuity?

Does the gentleman from Missouri believe that tax-exempt foundations owe a full and complete reporting of their activities to the public?

Does the gentleman from Missouri believe that there should be a definite limitation on the amount of stock which a tax-exempt foundation should be permitted to hold in any single company? If so, how much of a limitation?

Does the gentleman from Missouri believe that there should be a limitation, by law, on accumulation of income in tax-exempt foundations?

I am happy to report that many of the foundations I queried are submitting the information requested. They apparently do not share Mr. CURTIS' apprehensions.

Mr. CURTIS also makes the statement that one foundation claims that furnishing such information will cost $10,000. Considering the fact that much of what I have requested has already appeared in printed form—that is annual reports—or in documents submitted to governmental agencies by the foundations, I wish to suggest that Mr. CURTIS divulge the name of the "$10,000" foundation. Perhaps, I can show the foundation how to furnish the data at relatively small cost, although I wonder why, if there is any such foundation, it was not suggested to me that it will incur such a cost.

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE ON WAYS AND MEANS

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight, September 9, to file a report to accompany the bill, H.R. 8847.

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from Arkansas?

There was no objection.

FILING CONFERENCE REPORT ON MILITARY CONSTRUCTION APPROPRIATION BILL

Mr. CANNON. Mr. Speaker, I ask unanimous consent that the managers on the part of the House have until midnight tomorrow to file a conference report on the bill, H.R. 8302, the military construction appropriation bill and that such report may be printed in the CONGRESSIONAL RECORD notwithstanding the fact that the House may not be in session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

COMMITTEE ON AGRICULTURE

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight Saturday to file sundry reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. PATMAN. Mr. Speaker, on behalf of the gentleman from South Carolina [Mr. MCMILLAN], I ask unanimous consent that the Committee on the District of Columbia may have until midnight Saturday to file sundry reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

SOCIAL-SECURITY-BASED MEDICAL INSURANCE FOR OUR SENIOR CITIZENS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that the gentlewoman from Oregon [Mrs. GREEN] may extend her remarks at this point in the body of the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mrs. GREEN of Oregon. Mr. Speaker, some organizations of physicians seek to give the impression that the medical profession is monolithic in its opposition to the President's proposal for social-security-based medical insurance for our senior citizens. For reasons known best to the leadership of the AMA, that organization seems determined to persuade the American people that the medical profession is interested solely in the pocketbook aspects of the healing arts.

All of us, I think, know physicians who are dedicated to the proposition that their function is to heal the sick, and not primarily to increase the average income of medical practitioners. The unselfish family doctors, the hard-working and brilliant specialists, the dedicated medical research men—all these are, I am sure, far more typical of the medical profession in America than the political propaganda of the AMA would indicate.

One such physician is one of the most distinguished medical men of my own State and district, Dr. Morton J. Goodman. I have known Dr. Goodman for many years, and, while we are not always in agreement on all issues, he has long shared with me a firm belief that our country is able to establish workable machinery by which the average citizen can insure himself against the high costs of medical and hospital services which will plague him in his years of retirement. Dr. Goodman recently discussed the administration proposal before the Portland, Oreg., City Club, one of the most respected forums in the West. Under leave to extend my remarks, I ask that the following newspaper account of that speech, appearing in the Portland Oregonian for September 3, be printed at this point:

PORTLAND DOCTOR LAUDS KENNEDY MEDICARE PLAN

The social security system is the only way for Americans to build up medical protection for their old age, Dr. Morton J. Goodman told the City Club in the Benson Hotel Friday noon.

He was speaking in favor of the King-Anderson bill, now pending in Congress, which he called the Kennedy plan.

"This bill is not socialized medicine, nor will it lead to socialized medicine," he stated. "The University of Oregon Medical School, to which our Governor is rushed each time he's ill, is socialized medicine. So is the Walter Reed Hospital which twice saved the life of our last President. And so is the Armed Forces Medical Corps which saved thousands of lives during the last war."

Medical care for the aged can be approached from two ways—Kennedy's social security plan or the tax-supported charity plan advocated in the Kerr-Mills bill, he continued.

PATIENTS ON INCREASE

"Thanks to medical progress, the number of aged has increased rapidly," Dr. Goodman pointed out. "Over half of these people have an income of less than $1,000 a year. They go to the hospital more often, they stay longer, and their income is much less than their younger neighbors. No one doubts that they constitute a problem. The issue is how to meet it."

The Kerr-Mills approach is designed to help older persons after they have become dependent, he explained. Only eight States have adopted it and most States are too poor to fill out their welfare programs, let alone take on the Kerr-Mills law.

He classified Oregon as one of the more fortunate States under the Kerr-Mills plan. Here the patient must pay the first $50 in doctor bills. In Oklahoma, only two visits to the doctor are allowed a month.

TWO PLANS COMPARED

"The Kerr-Mills bill swats the flies rather than draining the swamp," he observed. He termed the Kennedy plan, "a modest, conservative approach which is fiscally sound. I can't understand how any person who has really read this bill doesn't favor it." The Kennedy proposal provides for 3 months in the hospital for any one illness.

The cost is low because so many people contribute to it. "It's like fire insurance. Many contribute, but not everyone's house burns down," he said.

He estimated the cost of the Kennedy plan at $1½ billion a year, comparing this to the $4 billion a year Americans spend on deodorants and face creams.

"Under the Kennedy plan, medical care becomes a right, not a dole," said Dr. Goodman. "The Kerr-Mills funds are derived from compulsory taxes. So are the funds raised under the social security approach."

He prefaced his remarks by saying, "I realize that my position is somewhat less than popular with some of my colleagues."

Speaking of the American Medical Association, he said, "In the social-economic field, their record has been somewhat less than distinguished."

During the question period, he was asked whether he favored social security for doctors. "My banker has social security, my dentist has social security, my dog's doctor has social security, but the AMA tells me that I don't want it," he concluded.

Dr. Goodman has been in private practice in Portland since 1934. He is past president of the University of Oregon Medical School alumni and presently serves as assistant clinical professor of medicine at the medical school.

ANATOMY OF THE COLD WAR

Mr. BARRY. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. HOSMER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HOSMER. Mr. Speaker, America's awakening to the vital challenge thrust upon us by the international Communist conspiracy is one of the most significant and encouraging events of our time. But merely to be awakened to the danger is one thing. Handling it intelligently and effectively is another.

This requires a broad general understanding of who we are up against and what we are up against. It requires the relinquishment of many outdated concepts no longer applicable to the world situation today. It demands original, hard thinking to replace them with concepts that are realistic in relation to facts as they brutally are, not as we might wishfully think them to be.

For instance, we must accept the concept of a bipolar world in which the U.S.S.R. and the United States represent the poles. No longer is the world the "family of nations" conceived by late 19th and early 20th century political thinking. Nor do the so-called uncommitted nations of today possess power of sufficient strength, moral or physical, to sway these poles.

We must regard the international Communist conspiracy which opposes us as first, the force described by Marx, Engels, and Lenin, plus second, all the considerable human and physical resources enslaved behind the Iron Curtain. The two are, in fact, in combination.

This discussion seeks to define and analyze only some of the background involved, only some of the strategy and tactics applicable, and only a few of the cold war techniques utilized to advance Communist objectives. Necessarily only a few, because altogether they are as vast as the problem itself. Hot war also is discussed. Necessarily because hot war and cold war are interrelated parts of the total conflict in which we find ourselves.

COMMUNISM'S GOAL: WORLD DOMINATION

The resolve of Soviet Communist leaders to extend their domination worldwide—with Moscow as the seat of authority—has remained unshaken for over four decades. There were periods when it was expedient for them not to press this determination because of some more urgent problem, as in World War II. But once they have dealt with a crisis, the Soviets waste no time in renewing their attack. There is current evidence of a desire by Chinese Communists to play a larger role in directing communism's expansion. Their leverage is growing as witnessed by the Communist bloc's intense ideological struggle over the peaceful coexistence policy. But, and though this may not always be the case, it is still Moscow, not Peiping, against which the West principally must calculate its dangers and erect its military and nonmilitary defenses to thwart the master plan to install a Communist government in every nation on earth, with all looking to Moscow for guidance.

COMMUNIST STRATEGY: TOTAL CONFLICT

Toward achieving its ends, Communist dogma dictates utilization of any means which are expedient, as long as the Soviet revolutionary base is not endangered. Military force is one instrument for carrying out this policy, and the Communists are inhibited by no moral restrictions from using it to gain their ends. To them, the important factor is that inadmissible risks must not be undertaken. To do so would constitute adventurism, a serious deviation from Communist ideology.

At the same time, if within the limits of the risks which Soviet leaders deemed wise to take, an opportunity presented itself to strike the United States a blow which would remove it as the chief obstacle to the Soviet goal, Soviet leaders would consider it a sin just as serious as the other deviation not to take advantage of the opportunity.

In short, Communist doctrine places on Communist leaders a constant responsibility to proceed by the most expeditious means possible and these may range from dropping pamphlets to dropping thermonuclear bombs. The degree of violence to be selected is that which can gain the most advantage with the least proportionate cost under the particular circumstances existing at the time of decision.

THE SPECTRUM OF CONFLICT

Thusly Communists fight toward their goal all the time over a spectrum of conflict which can span the full scope of human activities—from sports competition to thermonuclear war. They have no set time schedule for bringing this conflict to a successful conclusion. The Communists are patient, willing to accept temporary setbacks if necessary. They conceive the conflict as a protracted one and their patience in waging it is based on a confidence in the ultimate victory promised by Marxist-Leninist doctrines.

It is obvious that the spectrum of conflict divides itself into two major segments according to degrees of violence: military war and nonmilitary war—hot war and cold war. In turn, each segment resolves itself into sectors based on the same patterns of intensity.

Cold war in its present stylized spectrum ranges from scientific demonstrations, such as space efforts, propaganda, and economic competition, to military-political-humanitarian foreign aid, to presence of forces, as in East Germany, to threats of force, such as Khrushchev's talk of 100-megaton nuclear bombs, to assistance to engaged allies, as was given to Red China in the Korean war. In the same style hot war ranges from police action, to limited war, to graduated retaliation to unrestricted war. In a gray area between hot war and cold war fall such modern-day instruments of aggression as rioting, border incidents, and guerrilla warfare.

Fundamental to U.S. survival is, first, recognizing we are engaged in this total, protracted conflict; and second, developing an irrevocable determination to win it. But that is only the beginning. We must organize ourselves to fight it as a major enterprise, on a scale for victory, with all the physical and moral resources at our command. We must never forget that the weapons employed against us are varied and limitless. Subversion, spying, sabotage, and diplomatic perfidy are but a few illustrations. We cannot concentrate exclusively on defending against just some of the weapons of Communist attack, leaving the ramparts unguarded elsewhere. We are faced with total conflict and we must fight that conflict in all its totality—on all the cold war fronts at all times, on all the hot war fronts if ever we must.

Moreover, we can never expect victory if we fight only defensively. We must take the initiative, bring the fight to the enemy's own home base in cold war just as we are prepared to do in hot war. Doing this involves risks and it involves escalating up the scale of violence whenever required. The risks so involved must always be calculated against the risks of not taking action of sufficient intensity to achieve our purposes. Often timidity is more risky, in the end, than boldness. In any event, our enemy must be convinced we treasure our freedom, our way of life, and our country sufficiently to take the degree of action necessary for preserving them. Otherwise he is left free to achieve his ends via the piecemeal surrender route of bluff, bluster, and blackmail.

DETERRING HOT WAR

The willingness and ability to fight the hottest kind of war, if survival depends upon it, feeds back into considerations regarding the taking of all kinds of actions less in degree of violence. This is because the hottest kind of war is the reference point from which decisions are calculated for the taking of all lesser military and nonmilitary actions in relations between nations.

During the Lebanon crisis the landing of U.S. Marines and presence of U.S. Naval Forces evidenced a U.S. determination and willingness to fight, if necessary, to keep the Communists from taking over this part of the world. The Soviets, in face of this clear evidence of intention to resist piecemeal surrender, backed away. Put another way, they were deterred from pursuing the course of aggression in this area they had embarked upon. Had we not taken the risk of displaying this show of power, they could have achieved supremacy in the Mideast. The consequence of that would be to put us in a situation far more risky than proceeding as we did. By way of contrast, we failed to provide air cover for the Cuban invasion in the spring of 1961 even though the risk involved was small. As a consequence, Castro achieved even greater power over Cuba and the resulting situation is more risky than before.

The same principles apply to deterring Communist leaders from attempting to achieve their goals by starting all-out nuclear war and attacking the United States. Our deterrent system must

plainly be capable of inflicting unacceptable damage on the enemy. If he believes we will use it for that purpose if he does attack, he will be deterred from doing so.

Like a parachute, the deterrent system must always work or disaster will follow. Its most obvious capability must be to accept whatever damage a Soviet first strike may inflict and still retain sufficient second strike capability to impose unacceptable damage on the Soviet homeland. It does not involve a capability merely to strike first. Nor does it require expenditures for a capability to strike second with vastly more destruction than needed to deter.

The very success of a system deterring all-out nuclear war makes more likely the resort to lesser violence in the form of limited war and intensified cold war. Thus skeletonizing limited war conventional land, sea and air capability by overexpenditure on deterrence cannot be tolerated.

Neither can the important third front, nonmilitary warfare, be neglected if our overall defense posture is to succeed in thwarting Communist ambitions. We can freeze to death in cold war as easily as we can burn to death in a hot war.

In any event, the cost of creating and maintaining a deterrent force is extremely high. For the sake of our national economic health it is important that money is not spent unnecessarily in this direction.

WHAT WILL DETER THE SOVIETS?

Determining what will deter the Soviets can be learned from the answer to another question: How much destruction to their homeland are Soviet leaders prepared to risk in order to achieve their ultimate goal if cold war methods do not succeed or, in their opinion, they are too slow?

Obviously, only the Soviet leaders themselves can answer that question. It is doubtful if even they have arrived at it precisely. It is likely that within limits the answer will vary from time to time because of the Communist doctrine holding that whatever is dictated by historical circumstances is true party line at any particular moment and shall be implemented.

Nevertheless we should be able to achieve an order of magnitude concept of the destruction they might be prepared to accept by examining Communist objective and doctrines, making historical comparisons, studying the writings and speeches of Soviet authorities and analyzing the progress which the Communists have made so far toward their goal.

It is clear that Soviet leaders, if it can be avoided, have no desire to become involved in nuclear war, either growing out of surprise attack or by escalation of limited war. Khrushchev often refers to the deadliness and horror of general nuclear war in his speeches. A leading Soviet military analyst, Maj. Gen. Nicolai A. Talensky, recently wrote a widely publicized article pointing out the futility of resorting to nuclear war to decide political controversies.

How accurately such expressions reflect Soviet military philosophy and how much they reflect the long standing Soviet propaganda campaign aimed at nuclear disarmament of the West cannot, of course, be determined. It would be dangerous error, in any event, to assume Soviet leaders would not make a sudden massive attack against the United States if their calculation of relative strength convinced them it could be done without serious risk of disaster to the Soviet revolutionary base.

Such a situation could arise if the relative balance between forces suddenly tipped in the Soviet's favor through some scientific or technological breakthrough. It could arise should the United States allow its deterrent system to deteriorate badly. It could arise if the U.S. position became so weakened by repeated cold war and limited war defeats that retaliation would be made quixotic and unbelievable. Our only security against surprise nuclear attack is balanced strength, which includes a retaliatory capacity so swift, so certain and so deadly it rules out the possibility. How deadly?

WHAT PUNISHMENT WILL SOVIETS ACCEPT?

What punishment would be too great to accept to achieve victory over us? While some contend there would be no victory in a general nuclear war, this is not the present Soviet view. In January, 1960, Khrushchev told the supreme Soviet that in such a war the U.S.S.R. would suffer heavy misfortune and sustain great loss of life, but it would survive because its territory is enormous and its population less concentrated in large industrial centers than in many other countries. On the other hand, the West would find that it would be their last war, and it would be the end of capitalism.

One way of arriving at some understanding of how much destruction Soviet leaders might be willing to exchange for gaining their objective is by making historical comparisons. For one thing, the standard of living is substantially higher in the United States than in the Soviet Union, and the further a civilization progresses from its primitive beginnings, the more value is placed on human life. Also, the continental United States has enjoyed nearly a century of stable government without suffering the consequences of invasion or attack by cutside military forces. During this period the Russians have had a very violent nationwide revolution and civil war and have experienced extensive destruction of life and property during two world wars, as well as a costly and humiliating defeat in the Russo-Japanese war. What would deter them is not necessarily what would deter us.

Another factor which has bearing on our question is Soviet civil defense. Until late 1953, the Soviets made no preparation for civil defense in a nuclear war. Today their effort is the most extensive to be found anywhere in the world. The effort which the Soviet government has made in this direction indicates it takes a realistic attitude toward the possibility of Soviet participation in a general nuclear war. However, its objective should not be misconceived There is no evidence of a newly acquired benevolence toward human life amongst Kremlin bosses greater than amongst western leaders in the ratio of Soviet to western civil defense efforts. A characteristic of communism is callousness toward human life. Primary interest is not in saving human lives per se, but in preserving the skills, so important to Soviet industry and strength, represented by them.

Nevertheless, assuming reasonable effectiveness of the civil defense program, the result is this: If concurrently with a Soviet first strike, 80 percent of the 50 million people in the largest 160 Soviet population centers are evacuated to nontarget areas with reasonable fallout protection, casualties from nuclear retaliation would be cut from 50 million to 10 million— a factor of five.

Ten million lives is a large number, but, in U.S.S.R. experience, by no means a prohibitive or even a crippling price to pay to achieve important objectives. A study made in 1959 by Prof. Warren W. Eason of Princeton concluded that the Soviet Union suffered 25 million World War II casualties, about 13 percent of total population. This followed the purges of the 1920's and 1930's which accounted, by some estimates, for almost another 25 million deaths.

Physical damage of all kinds from Nazi military operations also was massive. In addition to nonindustrial losses, the official Soviet historical review of World War II estimates 40 percent of the U.S.S.R.'s industrial capacity was totally destroyed, a figure generally accepted by Western students of the war's consequences.

Despite these huge losses of life and the enormous damage inflicted on the Soviet economy, the rate of production in the U.S.S.R. by 1950 was greater than at any time in its history. Even granting some increase on the value placed on human life by reason of improved living standards, it seems reasonable to assume that Soviet Communist leaders would accept punishment at least equivalent to World War II in exchange for eliminating the United States as a checkmate to their goal.

WHAT PUNISHMENT MUST UNITED STATES BE ABLE TO INFLICT?

Here then, is an absolute minimum limit for U.S. deterrent capability: A second strike ability to inflict damage equivalent to the combined effect of erasing 14 percent of the Soviet Union's population and 41 percent of its industrial capacity.

That these are damage equivalent figures and not the outline for a targeting pattern must be understood. Aside from the moral questions involved in threatening death to such large numbers of people, over 29 million in a population of some 209 million, the combination of civil defense and natural dispersal over 8½ million square miles of territory make attempting it utterly impractical.

For this reason a deterrent system targeted against population would not be believable and would fail to deter. Further, even if it were practical to carry out a death threat against 14 percent of Soviet citizens, there is no good reason to believe Soviet leaders would not willingly trade that many—or 15 or 20 or 50 percent or even more—if the deal guaranteed them world supremacy. Equally

clear is the physical futility of basing deterrence on a major threat to the agricultural economy of this vast land stretching across two continents.

All this by no means implies that within the limits of peacetime budgets a steady, stable deterrent to Soviet button-pushers cannot be achieved. In the final analysis what Soviet leaders fear most is impairment of the means by which they seek to accomplish the Communist goal of world domination. Their principal instrumentalities for exercising power on the international scale are first, the Soviet military establishment, and second, the Soviet industrial economy. Consequently, a positive U.S. second strike capability targeted at crippling these to an unacceptable degree will effectively deter. Moreover, these are the targets within the U.S.S.R. particularly vulnerable to nuclear impairment by the present and projected combinations of manned aircraft and missile weapons systems making up U.S. strategic forces.

It would be necessary to utilize only a small portion of these forces to achieve the minimum damage figure discussed earlier. Just under 100 retaliatory missions would be needed to bring 60 percent of the U.S.S.R.'s industrial complexes under attack. Even assuming as many as one-third were turned back by Soviet defenses, the resulting destruction would still approximate 41 percent of all Soviet industrial capacity.

U.S. RETALIATORY CAPABILITY EFFECTIVELY DETERS

U.S. capability obviously goes far above that percentage. This is because an adequate, flexible transportation system is essential to any nation seeking to exercise the role of a major world power. It is a prerequisite for effective utilization of military forces and vital to bring in raw materials, supply power, and move out the finished goods of an influential industrial society.

The Soviet transportation system is characterized by an especially heavy reliance on railroads, 85 percent of all tonnage, compared to 50 percent for the United States. About 10 percent is moved on inland waterways and the remaining 5 percent by highways, pipelines, coastal shipping, and air transport combined. The estimated number of major centers fed by the national rail network is 160. Only 160 nuclear knockout blows need be pressed home against this rail system at freely chosen, less defended locations to fragmentize the U.S.S.R.'s interdependent society into as many cutoff and isolated segments.

It is clear that U.S. strategic forces are fully capable of deterring Soviet leaders from initiating nuclear war. We possess the determination to strike back without hesitation and the capability of destroying that which they know they cannot afford to lose. The real question is how much more deterrent capability are we buying than we really need?

DETERRED FROM HOT WAR, SOVIETS WAGE COLD WAR

Thus, deterred from quick explosive victory, the Soviets and their allies in international communism have turned to measures short of all-out nuclear war to advance toward communism's goal. While carrying on a general nonmilitary offensive against the free world—aimed at weakening its physical ability as well as destroying its will to resist—on a geographical basis they are employing a three-prong strategy calculated to segment the free world and isolate its parts.

The prongs are thrusting:

First. Over the pole through Iceland and down the Atlantic—to be aided by the large submarine fleet—for the purpose of cutting off Europe from North America;

Second. Down from the soft underbelly, through the Mideast, into Africa and spanning the Atlantic to Cuba—to sever North from South America and Europe from the Far East; and

Third. Out from Communist China through Vietnam, Laos, Burma, Thailand, Cambodia, the Malay Peninsula, and hopefully turning the corner and proceeding up the Philippines and Japan—to cut off the Americas from the Far East and isolate India and Australasia.

The importance which Communist leaders attach to securing these geographical areas is evidenced by their willingness to escalate considerably up the scale of violence where they are concerned. Limited war by proxy in Korea, guerrilla fighting in Laos, the revolution in Cuba, civil disorders in Iraq, the Congo, and elsewhere, are examples.

Our enemy's successes using such techniques amply illustrate that our posture in these sectors of the spectrum of conflict is inadequate. Our limited war forces are seriously handicapped by lack of proper mobility, by obsolescence of conventional weapons and by a confusion with respect to the role of nuclear weapons. As to the latter, aside from whether or not nuclear weapons should be used in specific and particular limited war situation, there is no validity to the notion they can never be so used without inevitably resulting in escalation to all-out war. It simply does not follow that facing defeat in a limited nuclear war, a nation will choose to be decimated in an all-out one.

Because of the nature of nuclear warheads and the 15-year Communist propaganda campaign against them, to many, their use under any circumstances has been enshrouded in a calamity curtain which, if parted, they say, would mean the end of mankind. This is false. A legitimate distinction exists between strategic and tactical use of nuclear weapons, and, it is, whether the range of the delivery unit is within the rather sizable dimensions of today's battlefields or beyond.

PEACEFUL COEXISTENCE

Peaceful coexistence is what Khrushchev chooses to call this present state of affairs. We call it cold war or nonmilitary war. Khrushchev says it is merely a form of intense economic, political, and ideological struggle between the socialist camp and what he calls the aggressive forces of imperialism. This, he says, is a better way of achieving world communism than war. But what he means is that today it better advances the Communist cause to proceed by nonmilitary warfare than it does by military warfare—tomorrow it may be different, if tomorrow's circumstances are different. Even under today's circumstances peaceful coexistence as waged by the Soviets must be understood as neither peaceful nor aimed at coexisting for one instant longer than necessary.

Except for all-out war between major powers, in the final analysis, it amounts to a no-holds-barred conflict for world domination played under Soviet ground rules.

One of these rules is that the world is divided into the peace zone—Communist territory—and the war zone—non-Communist territory. And the contest shall be carried on entirely in the war zone. Another is that all action to forward the Communist cause is just and any action to resist it is unjust. Thus, subversion and sabotage of free world institutions are Communist instruments of peaceful coexistence and revolts such as in Algeria and Latin America are encouraged under the guise of national liberation movements. These are deemed just acts and just wars, to be fully supported by the Kremlin.

Recent successes lend weight to Moscow's contention that their current policy is, indeed, a presently effective substitution of political-economic-psychological warfare for military force.

THE BERLIN CRISIS

The current Berlin crisis is a classic example of Communist strategy and tactics in waging cold war to gain their objectives. For months Khrushchev's truculent belligerency built up tensions over Berlin. Fear was fed on fear. Then with dramatic ruthlessness he torpedoed the Geneva A-test-ban talks and announced Soviet test resumption. He coupled this with terror talk of 100 million million ton K-bombs—K for Khrushchev. All aimed at creating worldwide hysterical fear in hopes of euchering concessions which will give him control of Berlin as a step toward control of Germany as a step toward control of all Europe.

Why the Kremlin plays this bold game of nuclear blackmail is simple. It has little to do with Communist ideological abstractions and our resistance to it has little to do with democratic idealism. It is because Berlin is the political key. West Germany is the industrial lock. And West Europe is the economic gate to the world.

To control the world by force requires a superior economic-industrial base in support of arms. To control the world by economic domination requires a superior economic-industrial base in support of an unfaltering flow of capital goods and trade. By 1970 the estimated value of all goods and services, gross national product, and thus the most comprehensive measure of productive activity will be:

	Billions
West Europe	$800
United States	740
Soviet bloc	630
Underdeveloped nations	300

Thus, the United States, plus West Europe, equals $1,540 billion against Soviet bloc equals $630 billion.

But, if the Soviet bloc can successfully use West Berlin as the key to West Germany, the lock, to gain access to the industrial capacity of West Europe, the power situation radically changes to the following:

The United States equals $740 billion against Soviet bloc plus West Europe equals $1,430 billion.

The Soviet Union now knows it cannot surpass West Europe and the United States in the industrial capacity needed to support an arms race or a protracted armed conflict.

The Soviet Union now knows it cannot, even by the most stringent denial—industrial growth without public consumption—match the combined economic resources of the United States and West Europe.

But the Soviet Union knows that with the industrial plant, economic resources, scientists and technicians of West Germany and West Europe it can control the world.

These are the stakes in the Berlin crisis. These are the reasons why Mr. Khrushchev intensifies the cold war to the hilt and threatens a nuclear holocaust. They are also the reasons why he will not go beyond the brink and start a nuclear holocaust. If he does all Europe's industrial capacity will be reduced to ashes. There will be no $800 billion gross national product of Europe to strengthen his empire. He must obtain these assets undamaged, in running order and with the people to run them. If we but keep our cold war wits and act accordingly, the crisis of Berlin can be passed without loss and without damage. Mr. Khrushchev will be relegated to another way and another day to seek his objectives.

COLD WAR

Unfortunately these cold war wits of ours I have mentioned are, at this point, neither sharp nor plentiful. Our enemy has 40 years leadtime in knowhow and experience in fighting cold war. There are many things we must do and do quickly, not only to surmount the crisis of Berlin, but other crises to come again and again in the future from aggressive actions by our relentless challenger.

I have mentioned that we must actually recognize we are now engaged in a conflict in which the stakes are freedom and national existence itself. This, the cold war, need not necessarily be a mere preliminary bout to a hotter main event. It could well be the main event itself and the loser will have no second chance. I have mentioned that we must develop an irrevocable determination to win this contest. Having developed it, we must broadcast that determination to the world and enlist the help of all men everywhere who cherish freedom in this great battle for its survival.

Americans are not unique in their desire for freedom, only in their vast power which causes people throughout the world to look to the United States for leadership in the contest to preserve it. These people, too, want to fight effectively in the common cause. They, too, have their worries, their doubts, their fears that the time of freedom is running short. But until the United States moves, and moves decisively, as a world leader should, others cannot be expected to go it alone in these battles.

As such a call to nonmilitary arms I recently introduced House Joint Resolution 517. It is patterned after the declaration of war following the Japanese attack on Pearl Harbor, but declares conflict rather than war. It states that the international Communist conspiracy has committed repeated acts of nonmilitary aggression against us and our allies, formally declares the state of nonmilitary conflict thus thrust upon us, authorizes the President to employ the entire power of the United States to carry on nonmilitary conflict, concluding: "and to bring the conflict to a successful termination all the resources of the country are hereby pledged by the Congress of the United States."

There are several important considerations that are often overlooked in discussing cold war and how to wage it that I now propose to touch upon.

IDENTIFICATION OF THE ENEMY

We must clearly identify the enemy. There are two U.S.S.R.'s. Only one is the enemy. U.S.S.R. B is the people, the country and its resources. It is not our enemy. Country B is the poor country, the horsemeat country, which sometimes cannot even supply its capital city with food and fuel. Our enemy is U.S.S.R. A, the international Communist conspiracy of an elite few who have enslaved country B and extort from it the wherewithal to present the illusion of a large and powerful society and the false image of a new system to better mankind's lot.

In reality, country A is no stronger than country B. This we must understand ourselves. And to the people of U.S.S.R. B, China B and all the other B countries—the captive nations—we must drive home that they have friends outside the Iron Curtain who seek to share with them their freedom.

WHOLE THINKING

As a people we tend to cling to a kind of fragmentized thought process in international affairs which categorizes peace and war into two separable states, which, in fact, no longer exist. We live in a world which is neither at war in the classic definition of the word or at peace. It is in conflict—a new and deadly kind of conflict—and we must think in terms of its totality and the wide spectrum of actions over which it is being fought. The Reds do not make this mistake. They are realistic, if nothing else. Their thinking is as total and integrated as their objectives are clear and precise. Let us examine how this affected the postwar situation following both the World Wars.

World War I was carried on by the Allies as a purely military operation. Only after the Armistice, at Versailles, in 1919, was the problem of securing the peace faced. A cordon sanitaire, or series of buffer states, came out of Versailles—Czechoslovakia, Poland, Jugoslavia, and the like. All to protect the Western European peninsula from what Sir Halford J. Mackinder so vividly described in terms of: "He who controls the Eurasian land mass controls the world island and thus controls the world."

In World War II—at the insistence of the United States and over the protests of Sir Winston Churchill—we of the West carried on the war in terms of total military victory and unconditional military surrender. There was little or no thought of postwar problems and postwar strategy. The old World War I conventional thinking all over again. However, this time there was no Versailles to bail out postwar problems. The Soviet Union, with due regard for the totality of the spectrum of external relationships, while still in hot war was thinking whole—looking forward to postwar. It realistically secured these peripheral buffer zones to itself and satellized them. Thereby, both enhancing its own future defense and weakening the future position of its then temporary allies, but future protagonists.

Only both a great understanding on their part—and a great ignorance on our part—of the basics of national external relationships could underlie two such divergent courses of action. The best that can be said is that it presents us a clear lesson in facts of international life which we must learn and learn well.

CRITERION FOR SACRIFICE AND EXPENDITURE

There is, however, apparent from this fiasco one absolute criterion about which there can be no argument—only understanding—which, again, it appears that the Reds possess and we do not.

It is, simply: the efficacy with which a particular action will implement a nation's external objective should determine the amount of money and manpower to be expended upon it—not the irrelevant consideration of whether the action is being taken in time of "war" or time of "peace."

Our country will accept every sacrifice in resources, men and money when it comes to fighting a war; but because of our fragmented thinking and naive misconceptions about the implementation of our external objectives, we irrationally tend toward the opposite extreme when there is no shooting going on.

This kind of inflexibility is not characteristic of the Kremlin. Not only in expenditure, but right down to Khrushchev's alternating smiles and frowns to probe our weaknesses, there is exhibited a quick effective flexibility. This, notwithstanding our fervent eagerness to accept a monolithic concept of the operations of the Communist apparatus.

We must learn that what will be achieved, not whether it is achieved during hot war or cold war, is the true standard for our efforts and sacrifice during the protracted conflict.

COMMUNIST AND FREE WORLD OBJECTIVES COMPARED

Now it becomes logical to examine what is to be achieved, and to compare the external objectives of the Communist world and our own. Perhaps real understanding of the contrasts here is as important as anything else toward achieving understanding of what we are against and how to go about combating it.

In briefest form, these objectives can be summarized this way: Ours, peace

and friendship in freedom; theirs, peace and friendship in communism.

Only a word of difference—but they are poles apart. One states a positive objective, the other a negative one. One states an indefinable objective, the other a definable one.

Since Karl Marx first put pen to paper, double meanings for stock words and phrases have been standard tools in Communist dialectic. I have purposely stated these objectives in these double meaning words to reemphasize the tricky business of Red rhetoric of which we must beware.

Light was shed on a facet of our problem by former President Eisenhower in his 1960 state of the Union message, when he said:

> We live in a sea of semantic disorder in which old labels no longer faithfully describe. Police states are called people's democracies. Armed conquest of free people is called liberation. Such slippery slogans make more difficult the problem of communicating true faith, facts, and beliefs.

To the former President's list we can surely add the word "democracy" which means "communism" to the Communists and the opposite to us. Indeed, today, such fundamental words as "peace," "friendship," "war," and many others are no longer meaningful without rather extensive qualification.

Peace has come to mean, rather than a state of tranquillity amongst nations, a misty goal as legendary as the Seven Cities of Cibola. In terms of relationships between nations, friendship hardly can be recognized as meaning what the dictionary describes as a "mutual regard cherished by kindred minds." "War" must be qualified by the adjectives "hot" and "cold" and the line between tension, strife, and war is illusory.

When Nikita Khrushchev came to this country in 1959 seeking "peace and friendship" he blew up a considerable storm on this "sea of semantic disorder." Freely translated, this is what he meant when he talked of seeking "peace and friendship" with the United States:

> I seek a Communist United States of America. Our dogma says capitalism breeds wars. Tear up your capitalistic Constitution, turn Communist, and we'll have peace. One doesn't oppose his friend's desire. We desire to rule the world. Be friendly—stop bucking us.

On another occasion the Red dictator summed up communistic objectives more bluntly and less dialectically in the phrase: "We will bury you."

That is a clearly stated and certain objective, if ever there was one. The clarity with which it can be stated is of obvious value in the day-to-day, week-to-week, month-to-month, year-to-year selection of techniques and actions to implement it.

MORALITIES

Further, Communist rationale places no moral restrictions whatsoever on their selection of these techniques and actions. Starting with the premise that capitalism breeds wars and thus must be rooted out and destroyed to achieve peace—anything, however immoral in and of itself, when used to this end is moral. Lying, cheating, betrayal, murder—the entire list of perfidies—are thus approved weapons in the Communist arsenal, to be used freely whenever, wherever, and however they will implement its objectives.

By way of contrast, our own external objectives basically represent attainment for all mankind of those enlightened precepts of morality, freedom, dignity of the individual, inherent human rights, and so on that can hardly be defined other than as: "The best and highest values which Western civilization has to offer."

Because of the inherently nebulous nature of our objectives, they are incapable of precise definition. As a consequence, selection of techniques and actions to implement them can never be accomplished with calculated precision.

And, because of the moral characteristics of these objectives, we are limited in selecting means to implement them which in and of themselves fall within the range of Western civilization's standards for individual and national morality.

The advantage of precise objectives and unlimited choice in means in achieving them is great.

NEGATIVISM

Nor can the advantages of conducting a negative campaign be underestimated. It is always easier to criticize, tear down, and destroy than it is to accomplish constructive action. Watch the way the prosperity issue is handled in political campaigns—it is not so much a positive promise of a chicken in every pot as it is a negative warning of "no chicken in the pot if you elect the other fellow instead of me." Millions of dollars of a certain toothpaste have been sold not on the merits of the product, but upon the demerits of having bad breath. The slogan about "a thinking man's cigarette" is not a positive appeal to the intellectuals—there are too few of them for a mass market—it is a negative warning not to be tagged as stupid for dragging out somebody else's brand.

In short, the contrast between the Communist and the free world in terms of objectives and techniques and actions to implement them is simply this:

Communism: Clearly defined negative objective. No restriction on techniques and actions for implementation.

Free world: Nebulously defined positive objective. Restrictions on techniques and actions for implementation.

Understanding our problem thus requires recognition that we start out with these unavoidable handicaps:

First, imprecision of objectives; second, restriction on implementation; third, the extra burden of positiveness.

Although the foregoing handicaps are unavoidable, there are very many courses of cold war action that we are not restricted from taking, should be taking, but, because of our generally fuzzy conception of what we are up against, we are not taking. For example:

CIVIL DEFENSE A COLD WAR WEAPON

Earlier the very substantial Soviet civil defense effort was mentioned. It was estimated to be sufficiently effective to enable them to reduce casualties by 80 percent in case the Soviet homeland suffers attack.

Thus Soviet civil defense constitutes a major dulling of the deterrence capability of our retaliatory bomber and missile strikeback forces. That is, it makes it less costly for the Soviets to initiate war and thus operates as a factor encouraging them to do so. This situation also presents monumental possibilities in connection with nuclear blackmail. This is adequately illustrated by hypothecating a full-scale Soviet civil defense evacuation timed in coordination with an "or else" ultimatum, taken in context of our own daily 5 to 7 p.m. metropolitan area evacuation problems.

Civil defense is thus, in fact, a cold war weapon of equivalent value to say, the DEW line-Pinetree line warning systems and anti-missile missiles. But contrast our "bit-thinking" relative expenditures on civil defense in comparison to these warning systems. Moreover, civil defense is a moral type of action which is not denied to us. Failing to recognize its cold war possibilities, we have almost completely neglected it and given our challenger a decisive advantage on this rampart of the total conflict.

During the hearings in 1959 the Joint Committee on Atomic Energy attempted to estimate the effect on the United States should we suffer a surprise nuclear attack totaling 1,500 megatons. It found that 60 million U.S. casualties would result—one-third of our population—48 million killed and 12 million injured. Yet, at the same hearings a Navy scientist testified that simple fallout shelters giving protection against nuclear radiation by a factor of 1,000 can be built at a cost of only $100 per person. These would be sufficient, he estimated, to avoid two out of every three of the hypothecated casualties.

In short, for just 1 year's cost of the U.S. farm subsidy program, $6 billion, shelters could be built that would prevent 40 million surprise attack casualties—avoid 32 million deaths and 8 million injuries. Coupled with workable evacuation procedures, this 66⅔ percent avoidance of casualty rate could well be upped to the 80-percent figure I have estimated for the U.S.S.R. civil defense program.

I leave you to your own speculation how far adrift in the sea of semantic disorder we are when we take civil defense to mean only what the dictionary may define the words to mean. I also leave to your speculation how great a part our reserve forces, marking time in almost every city and hamlet of our country, could play in our total effort vis-a-vis the international Communist threat if they were realistically put to work preparing an adequate U.S. civil defense effort.

A good deal of resistance to spending money on civil defense as well as some of the other necessary actions we must take for survival stems from those who argue that thermonuclear war is neither believable nor feasible, so basing any efforts on the possibility of it occurring are senseless. Resistance also comes for others who argue that such a war would be so terribly destructive that we should surrender rather than fight it. In short, they say, "it is better to be Red than

dead." It is now my purpose to expose the fallacies of these arguments.

BELIEVABILITY OF THERMONUCLEAR WAR

We may quite agree that thermonuclear war is horrible to contemplate and that every intelligent effort should be made to avoid it. But it is feasible and unless we are willing to submit to nuclear blackmail and capitulate to the Communists, we must so regard it.

This is founded on my earlier mention that the believability of a nation either initiating or accepting the most violent action, unrestricted war, underpins first, the effectiveness of any less violent steps toward implementing national objectives; and second, the capability to resist nuclear or other blackmail.

It is obvious that a less violent degree of action could not succeed in implementing an objective of the U.S.S.R. if the United States knows it can threaten to resist with only one higher degree of violence and thereby cause the U.S.S.R. to back down.

By like token, the United States could never thwart the U.S.S.R.'s implementation of a national objective, say control of the Mideast, if the U.S.S.R. knows that all it has to engage in is a little blackmail by threatening more heat than we will risk.

Within the recent past: First, the Rockefeller study concluded that the possibility of nuclear war must be faced. Second, hundreds of Russian military books and articles translated by the Pentagon all reveal the U.S.S.R. thinks in such terms as a matter of course. Third, a Johns Hopkins University study for the Senate Foreign Relations Committee warns that the United States is open to nuclear attack. Fourth, Congress appropriated almost $45 billion for national defense, which included substantial amounts for maintaining our own nuclear arsenal operative.

FEASIBILITY OF THERMONUCLEAR WAR

Mathematician Herman Kahn recently completed a 2-year study for the Rand Corp. and concluded that thermonuclear war is feasible.

The facts and assumptions on which Dr. Kahn reached his decision were corroborated fully during our Joint Atomic Committee hearings last year which took several days' testimony from expert witnesses regarding the effect of a hypothecated nuclear attack on the United States followed by our nuclear retaliation against the attacker.

Briefly, the most pertinent thermonuclear war facts are these:

Genetic effects: An increase in children born seriously defective of about 25 percent from the current level of 4 per 100 of all births to 5 per 100. This is a large penalty since it would have to be paid through 30 to 40 generations. But it is far from annihilation.

Medical problems: Bone cancer, leukemia, and other life-shortening effects of internal and external radiation would amount to 1 to 2 years for lighter exposures and 5 to 10 years for heavier exposures. In any case, life will go on.

Economic recuperation: Assuming casualties in the 60 million range and semitotal physical destruction of the 53 standard metropolitan areas, expect full recuperation; that is, restoration of immediate preattack gross national product within 5 to 10 years. This is far from national suicide.

Conclusion: So much for feasibility. It exists, as does believability.

BETTER RED THAN DEAD?

Disposing of the depressingly cowardly and unrealistic "better Red than dead" philosophy requires us to get out of the rut of the 1,500 megaton, mass-destruction Hollywood movie script-congressional hearing's pattern for a moment and think about some other possibilities should the Communists really decide the day has come to push the button.

Hypothecated wars are never fought. No actual war ever has been carried on in the manner previously predicted. Casualty figures are statistics. Statistics always apply to the other fellow, not to you or me. With these truisms in mind, I will indulge in a little hypothecation myself in order to illustrate a means of getting down to an individual, personal answer to the question: Would I be better off Red than dead—or does my survival still depend on the intelligent, effective, and protracted conduct of survival efforts for my free country?

A wholly depopulated, totally destroyed United States would serve only one Communist purpose: Elimination of the opposite pole of a bipolar world and accomplish their one world, a Communist one, objective. But it would be done at the price of denying to them a number of things they could put to advantageous use. Recalling their attribute of whole thinking, we should at least contemplate other possibilities for action they may be considering in their strategic thoughts.

For instance, they could utilize the production of our machine tool factories, our steel furnaces, and certain of our other industrial capacities. All, of course, assuming selected trained slave labor survived to operate them. They do not need our oil or chemical production, for example, but they would be glad to dismantle the undamaged plants and haul them back for use in their own country as they did with so many German factories. I suppose quite an inventory could be made—and probably has been made in the Kremlin—along these lines.

HYPOTHECATED COMMUNIST ATTACK

Assuming so, the Soviet move might well be one calculated to induce surrender with the least possible material damage and personnel casualties, then to go about the business of mass murder and destruction on a selective basis afterward.

It might go something like this:

Strike terror with a few nuclear bombs—the horrors of nuclear war propaganda background already has been laid for that—but forgo the all-out attack. Damage communication facilities as little as possible so that where panic is created, it can be communicated elsewhere and infect other parts of the country. Delve into the unknown, it is always more terrifying than the known. Strange, horrifying and morale cracking nerve gases might be released by infiltrated saboteurs and fifth columnists. Shockingly hideous physical and psychological illnesses might be induced by germ warfare. Avoid destruction of Washington, D.C., so a Government will exist to surrender as panic, terror, and hysteria mount in increasing crescendo to demand it.

Then follow with a military occupation to carry out what, for lack of a better name, I call selective genocide. Genocide is defined as the systematic extermination of whole racial, political, and cultural groups. Here we are dealing with such a systematic extermination as it applies to:

First. Occupational groups which do not contribute to the needs of the Communists;

Second. Nonproductive persons; and

Third. All persons philosophically hostile to the regime.

Selective genocide was carried out ruthlessly in Russia itself when the Communists seized power. It happened in China. It happened in Hungary. It is an accepted Communist power technique and would certainly be used if they took over here.

The pattern is all too clear. In the initial phases they send agents out to stir up resistance movements and march the nonconformists against prepositioned guns and tanks as they did in Budapest. That does a pretty complete, quick, and dirty job of getting rid of most potential antigovernment leadership. They dump the ill, the aged, the insane, all the military and like groups into concentration camps where starvation and disease soon eliminate them. Lawyers, ministers, teachers, farmers always go this way, too, when the Reds take over. No bankers, insurance men, advertising executives, newspapermen, or even file clerks would be required by the Red regime, so they would be exterminated, too. Scientists and engineers could look forward to the same fate suffered by their German counterparts following World War II. Not many slave doctors would be needed either, to tend the few slave laborers left operating plants and facilities of value to the conqueror.

INDIVIDUAL'S SURVIVAL TEST UNDER COMMUNISM

This hypothecation of mass murder could go on and on. I think I have said enough as preface to the proposition that all you need to do to estimate your chance of survival if the Reds ever took over is honestly to answer the questions: Is what I think OK with the Communists? Is what I do any value in a Communist regime?

Think it over.

IF THE REDS TOOK OVER: U.S. CASUALTY ESTIMATES

I have tried estimates for this from population employment statistics, and when you include the family along with the employed person, which you must do, and count about 10 million deaths from the initial bombs, nerve gas, germ warfare, and the like, the total U.S. casualties start at a low of around 60 million and run as high as 100 million dead within 12 months following a Red takeover.

Americans have a personal stake in this thing all right—it is their lives. Even if the Communists took over without firing a shot, there still would not be a choice between being "Red" or "dead." The sooner we understand it the better. The price tag on surrender in terms of lives, freedom, and every other way is much greater than the price tag on fighting and winning the protracted conflict.

But, say some, there is a third alternative to fighting or surrender that is open to us and should be used. It is the alternative of negotiation. We should negotiate our differences with the Communists. It is true that ordinary negotiation is a third alternative. But only in instances where both sides are willing to negotiate, willing to forgo some of their demands as a price for peaceful settlement, and willing to keep the promises made. Although Communists are willing to negotiate, they are seldom willing to negotiate at any cost which involves foregoing their ultimate goal of world domination. In fact, they have, since the beginning, pursued a calculated course of insincere negotiation wherever it would forward that goal. This is not to say that no negotiation at all is possible, but to warn that only is it possible in those limited cases where some factor in addition to good faith alone is present to compel Communists to keep their treaty promises.

TREATY VIOLATION

Summed up masterfully by the distinguished international lawyer, Adm. Chester Ward, the Communist philosophy on treaties is this:

> Communist dogma insists that promises, like piecrust, are made to be broken. Whom the Communists would destroy, they first invite to coexist, and offer a nonaggression pact.

In its 40-year history, the Soviet Union has signed over 2,000 agreements with non-Communist governments. It is safe to say that those remaining unbroken by the Kremlin are only those which expediency has not yet dictated the breaking. Last summer I prepared an illustrative table of only some of the more important of these treaty violations. It took six legal size, single-spaced pages to list them. If nothing else, it indicates the order of magnitude of treaty violations as a device for Communist aggrandizement.

Treaty violation, as practiced by the Communists, has two facets:

First. The conventional breach of existing treaties whenever, because of changed circumstances, they no longer serve its current purpose; and

Second. The more Machiavellian practice of deliberately seeking treaties involving immediate concessions by the non-Communist signatory in exchange for delayed Communist concessions which are subsequently avoided by formal or informal treaty violation at the time performance is called for.

Such Communist diplomatic perfidy is a regrettable fact of international life that cannot safely be ignored. It must be recognized as a dangerous pitfall in any and all negotiations between East and West. It must be accepted as a limitation on talks, conferences, and negotiations as a means toward achieving a stable world order, based on respect for, and conformity with, international law.

Realistically citing the demonstrated disregard by the Communists of their pledges as one of the greatest obstacles to success in substituting the rule of law for rule by force, former President Eisenhower declared a basic rule for Western self-preservation in his 1959 State of the Union message by saying:

> We have learned the bitter lesson that international agreements, historically considered by us as sacred, are regarded in Communist doctrine and in practice to be mere scraps of paper. As a consequence, we can have no confidence in any treaty to which the Communists are a party, except where such a treaty provides within itself for self-enforcing mechanisms.

The inspection—self-enforcement procedures Eisenhower called for are necessary because the process of negotiation and agreement inherently involves concessions. Unless matched by equivalent Communist bloc concessions any Western concessions can represent only steps away from, not toward, the goal of successful conclusion of the protracted conflict for they would constitute a further whittling away of an already weakened Western position.

Equivalency, however, is not measured by the paper magnitude of mutual concessions. Concessions by the Soviet bloc must be self-enforcing upon them. Unless this is so, they will never be honored to the impediment of the advancement of international communism. The quid pro quo of the agreement's words is an illusion without this inherent safeguard. Without it, no agreement "relaxing tensions" as a "first step" toward peace, as the emotional agreement goes, is a step toward peace as the West understands it. It is a step toward peace as the Hungarian freedom fighters were savagely taught it.

INTERNATIONAL LAW CONCEPTS CONTRASTED

As the West understands it, the solemn observance of international obligations is the backbone of international law and underlies settlement of differences between nations without resort to war. As the Communists understand it, the timely breach of international obligations is simply another expedient weapon in their protracted conflict arsenal, and international law is only a "shell game" for playing on a worldwide scale.

This is the basis of Stalin's observation regarding relations with non-Communist countries that:

> Sincere diplomacy is no more possible than dry water or wooden iron.

And from the standpoint of Western concepts of morality, it is the basis for the Senate Internal Security Subcommittee's evaluation:

> You must be a liar, a cheat, and probably a spy before you can represent a Communist nation in international diplomacy. You must have no more regard for honor when you sign an agreement on behalf of your country than a forger does when he puts a name on a check.

Communist contempt for international law and decency is the theoretical and practical basis on which Red Army commissars, despite promise of safe conduct, arrested and executed the leaders of the Hungarian revolution while ostensibly negotiating an armistice.

NEGATORY PROPAGANDA

With the Hungarian example in mind, we reach a point where negatory propaganda can be defined and illustrated using the nuclear-test-ban issue as an example.

By negatory propaganda I seek to describe a technique aimed at negating use by your opponent of a device or weapon of value to him by propaganda aimed at creating such intense public opinion against its use, that it is in fact denied or negated.

BAN THE BOMB

For a period following 1945 the United States, only, possessed nuclear capacity. We had a weapon which could overcome the Communist bloc's great military superiority in terms of conventional arms and armaments. As a consequence, to deny us use of the weapon, and thus the superiority, the Kremlin and Red agents everywhere propagandized the world on the alleged horrors which would stem from use of the weapons. Many well-intentioned non-Communists became inadvertent allies of the Communists by taking up the ban-the-bomb hue and cry. The propaganda did, in fact, negate our use of nuclear weapons in Korea. This cost us dearly in both lives and effort.

The Communists adopted a two-step technique by directing major propaganda efforts first against nuclear testing. Strontium 90 was made a household word and its terribly crippling effects milked right down inside the tender bones of newborn babes suckling at their mothers' breasts. All to the end of banning tests of the bomb because that is too horrible, and then, when that is accomplished ban the bombs themselves with the argument: "If they are too horrible to test, they are too horrible to use."

But while feverishly denouncing nuclear weapons, the Soviets mounted a massive effort to achieve them. They did so by the early 1950's. This did not change their line or alter their efforts, however, because denial to the West of the use of nuclear weapons still is an obvious way to tilt the balance of power to their direction.

Their gigantic propaganda campaign raged on with consummate skill right up until the recent moment when it became more advantageous to them to torpedo the Geneva A-test ban talks and resume atmospheric testing than it was to keep the talks going and stall us from improving our own defensive weapons stockpile. Revelation to the world of their total hypocrisy by firing off a series of tests—obviously in long preparation under cloak of the Geneva talks—was a small price to pay for the advantages they gain thereby.

An obvious advantage is the jump it will give the Soviets over the West in nuclear weaponry. A less obvious, but perhaps greater, advantage calculated by Kremlin minds is nuclear blackmail in connection with the Berlin crisis. Coupled with the already high tensions

generated by Berlin, "terror talk" of a 100-megaton super-bomb plus new fallout in the atmosphere is supposed to generate such hysteria in the world that concessions to the Reds will come out of negotiations over the issue.

Aside from the quite apparent fact that the only way to handle blackmail is to resist it and the only way to surmount a bluff is to call it, there is a more basic lesson we must learn from the 2½-year test-ban fiasco. It is: The moral issue is not the type of weapon which the free nations must stock in their arsenals to preserve freedom and the rich heritage of Western civilization. The issue is: The morality of stripping those arsenals, imperiling that civilization and relegating its millions of souls to mass murder or to the slavery of the communes.

Whether we surrender in one lump sum or are propagandized and blackmailed into it on the installment plan, the result is the same.

FREE WORLD PROPAGANDA

There are many who observe these Communist propaganda efforts, their successes, and say if only we spent more money on our own propaganda overseas they could be turned back. True, our efforts can and should be stepped up. But we must accept the fact that our own propaganda efforts cannot, in the short term at least, produce results as impressive as theirs simply because theirs is based on lies, exaggerations and deceptions rather than upon truth. Truth is by far the greater power, but by far the more difficult and time consuming to propagate. The standards of morality by which we must gage our actions limit us to the truth.

Further, as to areas behind the Iron Curtain, we are under additional handicaps to the transmission of information. First, the Iron Curtain blocks communication in both directions. Second, neither world public opinion nor internal public opinion is an appreciable factor in the decision-making process of the Communist masters. Third, even if you overcome physical barriers to communication with people behind the Iron Curtain, there is still a psychological barrier to surmount. It stems from the fact that most of the population has come to adulthood since communism took over. Large gaps in public understanding and knowledge exist which cannot be spanned by the kind of appeals effective with Western minds. Their policy of brainwashing from birth to death often has so twisted truth and history that counterappeals must be developed from that specialized frame of reference.

A personal illustration concerning this last statement: While in Russia in 1959 I attempted to discuss the brutalities committed by the Red army in Hungary. No Russian ever heard of them, nor would any believe what I said. Yet all would tell you for hours how the "brutal, bestial, U.S. Marines aggressed against the defenseless people of Lebanon at the behest of Wall Street millionaires." They also told me again and again that the United States was blocking a nuclear test ban treaty by demanding that it include inspection and enforcement procedures to insure compliance. "The U.S.S.R.," they told me with straight faces, "always lives up to its treaties."

SUBVERSION

Subversion is one of communism's most potent cold war techniques and is practiced all the time, everywhere. What we must keep in mind is that it is only one of many techniques, however. Nor is it even as potent a weapon for the Communists, within the United States, at least, as our own general lack of understanding of what they want and how they are going about getting it. I recently suggested that the President order a good course on "Communism and How To Fight It" prepared and taught to every person in Government from himself on down. Passing the course would be required before any Government employee could draw his paycheck. The course would also be available to the public generally. This step alone would obviate a necessity many have suggested for investigating the State Department or any other Department of Government—where in my belief ignorance is a hundred times more responsible for the inept conduct of our defense against communism than are subversion and disloyalty. This ruthless, resourceful, determined enemy cannot be combated effectively unless Americans know its true identity and understand the way it fights.

LATIN AMERICA

The real danger from subversion is in less-developed areas, Latin America, for instance, where communism is attempting to leapfrog the Atlantic and take over countries both by infiltration of existing governments and by seizing control of liberal revolutionary movements. Each year hundreds of Latins receive revolutionary training in Moscow and are sent back to work ceaselessly to replace lawful government with regimes dominated and controlled by international communism. In connection with Cuba in particular and Latin America in general the following seven-point program is suggested:

First. Take a firm stand against Communist expansion, then tell and show the world we mean what we say—that the Monroe Doctrine is not dead.

Second. Declare the Western Hemisphere to be a peace zone, and tell the world we mean to keep it that way through use of national power, if necessary.

Third. Declare all Communist war material, including fuel, as contraband and prohibit its shipment into the peace zone.

Fourth. Use national power to send back, jettison, or seize all contraband sent into the peace zone.

Fifth. Adopt as U.S. policy the ousting of Castro's Communist dictatorship from Cuba, and enlist active support from anti-Castro and anti-Communist forces in Latin America to help us get the job done.

Sixth. Develop and expedite a tailormade information program for our hemisphere which makes it clear that we will not tolerate guerrilla invasions and power seizures of Latin American countries by Cuban or other Communist forces, or Communist expansion of any kind.

Seventh. Use our national power to the extent and in the manner required to free the Cuban people and give them the right of self-determination.

In order to implement the first four points mentioned above I have introduced House Joint Resolution 524, declaring Communist arms and munitions contraband in the Western Hemisphere and making provisions to enforce the same.

ORGANIZATION FOR HOT WAR

Our present military structure—Army, Navy, Air Force—coordinated at the Department of Defense and Joint Chiefs of Staff level, represents an effective overall organization for waging hot war. Because of its effectiveness it actually deters hot war. Our military leaders are skilled and knowledgeable. They do the best possible job with the hardware and forces at their command.

I do not agree with Maj. Alexander de Seversky's contention that the services should be merged and overriding emphasis placed on airpower for delivery of massive nuclear destruction. That would limit us to a choice between nuclear holocaust and surrender—an inherently hopeless set of alternatives which would merely afford the "better Red than dead" propagandists more chance to spread their poison. With properly balanced military forces we can control and deter all-out nuclear war. Then, with proper organization for nonmilitary war—cold war—we can achieve victories instead of defeats in this area.

ORGANIZATION FOR COLD WAR

But, in contrast to our splendid organization for hot war, we are almost totally unorganized to wage and win cold war.

It would be madness to attempt to fight a military war without national strategy, without a top-level command, without war plans, without offenses and planned defenses, without mobilizing the national effort and without appealing to the patriotism of our people to work, to sacrifice, and to win. Yet, without any of these things, we are engaged in a new, strange, and deadly kind of war which we are not winning. It is our clear duty to establish the organization we need to fight this kind of war, to mobilize our people and our resources, and to embark on the long, difficult road toward victory.

This effort involves economics, diplomacy, intelligence, science, psychology—all the phases of human activity short of military operations between major powers. The effort required goes far beyond the State Department or any other department of Government—far beyond the formal government even—it sweeps across our whole society.

The President alone has the broad power and control over the wide range of functions which must be organized, carried on, timed, coordinated and pushed to overall success to meet the enemy and overcome it. At the top, with the President's daily attention, must be the national nerve center and command post. Call it the Strategic and Tactical

Office of the President—STOP. Here at COMSTOP, in the White House itself, stopping communism must be a 24-hour-a-day operation for as long as it takes to win.

Here are just a few of the activities that must feed to and from COMSTOP:

National strategy and tactics, military and nonmilitary strategy and tactics, intelligence, political operations, diplomatic moves, labor and industrial mobilization, economic operations, finance, agricultural and commercial functions, covert and overt international operations, cover and deception, informational and cultural programs, ideological positions, psychological warfare, military liaison, posture evaluation and a host of others.

All these operations must be tied together constantly—orchestrated like a symphony. Each must be run by managers who are themselves knowledgeable in the political, strategic, and psychological nuances of nonmilitary war. Command of these activities requires as great a skill as military command. We must quickly train in our universities and elsewhere the knowledgeable Americans needed to officer and man this fourth force in our defense.

It should be reemphasized that COMSTOP must not only defend against actions the Soviets mount in what they regard as the war zone, but must, if we are ever to win, carry the fight into their peace zone. Within the Communist empire are countless areas of weakness and possible internal strife. Brig. Gen. David Sarnoff in urging former President Eisenhower to wage cold war and turn Moscow's own weapons against world communism said: "Our potential fifth column is greater by millions than the enemy's."

CONCLUSION

Concluding a discussion of this nature and extent by attempting a summary would be futile. I have given little more than a skeleton outline of the dangers we face and what we must do to surmount them. So I will reiterate only that we must constantly deter hot war by being capable of fighting and winning it, if necessary, and we must declare the nonmilitary war and mobilize all our physical and material resources to win it.

All this will take the highest and best our generation of Americans has to offer its country. Let us take faith from the courage and wisdom of the men who founded our country and made her great. If we, today, but possess equal courage and wisdom—and I firmly believe we do—there is no domestic problem we cannot solve nor foreign force we need ever fear.

NATIONAL CLEAN-UP, PAINT-UP, FIX-UP MONTH

Mr. BARRY. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, the month of May 1962 marks the 50th anniversary of a movement dedicated to the improvement of America's homes and communities, the clean-up, paint-up, fix-up movement. Originated in the city of St. Louis by the late Allan W. Clark, this movement is embodied in the National Clean-Up, Paint-Up, Fix-Up Bureau whose proclaimed goals are the prevention of slums and the rehabilitation of blighted areas for a healthier and more progressive community. I have today offered a resolution requesting the President to commemorate the 50th anniversary of this movement by proclaiming the month of May 1962 as Clean-Up, Paint-Up, Fix-Up Month.

Since 1912 some 6,000 communities have taken part in this movement, a symbol of the interest of a community in its beautification and improvement, a sign of community pride. The concept of this movement is that of rehabilitation. It is centered on improvement within a community by the collective efforts of the members of that community, efforts toward improving each individual's home and efforts toward beautifying the community as a whole. This is the proper concept of urban renewal—rehabilitation of a community with the cooperation of the homeowners, improving homes which meet community standards and bringing those which do not reach those standards up to that level. As in so many other fields, the Government can learn from the example which has been set by the private sector of the American society.

FEDERAL IMPACT LAWS

Mr. BARRY. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. WILSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WILSON of California. Mr. Speaker, may I rise in support of the proposal to extend Public Laws 815 and 874, the Federal impact laws. These laws must be extended for they are vital to many school districts throughout the United States and in particular are most critical to the school districts within my congressional district where there is a heavy concentration of Federal activity.

Considerable hardship has already been experienced by these school districts as a result of our delay in extending these laws. The budgetary deliberations that have been required of the many school boards of my district and others throughout the country have accentuated the responsibility of the Federal Government to continue these laws in their present form. These laws constitute payment to school districts because the Federal activity in the respective areas has removed from the tax rolls certain properties which normally would be paying taxes in support of these schools.

I have had correspondence with the Department of Health, Education, and Welfare with respect to this problem and wish at this time to include in my remarks a portion of a letter dated April 14, 1961, received from the congressional liaison officer, Jim G. Akin, of the Department of Health, Education, and Welfare. This quote is significant in that the Department points out in no uncertain language that it is because of the tax-exempt status of federally controlled properties that in-lieu-of-tax payments must be made to local educational agencies that support free public education for the children of these school districts.

The Office of Education administers Public Laws 815 and 874, designed to authorize funds to alleviate burdens imposed by the United States on local school districts by reason of the fact that they provide free public elementary and secondary education for children who either reside on Federal property or reside with a parent employed on such property, or both, or whose attendance in a particular school district is a direct result of Federal activities. Formulas for eligibility and payment are provided in both laws. Payments under these laws are not authorized with respect to military dependents as such, but are based on the underlying rationale that because of the tax-exempt status of its properties the Federal Government should make payments in the nature of in-lieu-of-tax payments to local educational agencies that provide tax-supported, free public education for children who either reside on Federal property or reside with a parent employed on such property, or both. There is no Federal restriction imposed on the school system. The school district may supplement funds granted under Public Law 815 for school construction, and it may use funds received for school maintenance and operation under Public Law 874 for any purpose for which the State or local tax funds levied for school maintenance may be used under State law.

We owe a responsibility to the school districts of America who are due these payments as a result of Federal activity. These are, in fact, in-lieu-of-tax payments to these school districts. I urge support of the legislation that will extend Public Laws 815 and 874.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. HOLLAND (at the request of Mr. WALTER), on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAILEY, for 15 minutes, today.

Mr. CURTIS of Missouri, for 30 minutes, today.

Mr. PATMAN, for 30 minutes, today, immediately following the remarks of Mr. CURTIS of Missouri, and to revise and extend his remarks and include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL

RECORD, or to revise and extend remarks, was granted to:

Mr. ROUSH.

Mr. EDMONDSON.

Mr. LANE and to include extraneous matter.

Mr. PUCINSKI.

(The following Members (at the request of Mr. BARRY) and to include extraneous matter:)

Mr. KEARNS.

Mr. VAN ZANDT.

(The following Member (at the request of Mr. PATMAN) and to include extraneous matter:)

Mr. DOWNING.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 174. An act to establish a National Wilderness Preservation System for the permanent good of the whole people, and for other purposes; to the Committee on Interior and Insular Affairs.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on September 6, 1961, present to the President, for his approval, bills of the House of the following titles:

H.R. 32. An act authorizing the establishment of the Fort Smith National Historic Site, in the State of Arkansas, and for other purposes; and

H.R. 256. An act to amend the District of Columbia Alcoholic Beverage Control Act.

ADJOURNMENT

Mr. PATMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 59 minutes p.m.), under its previous order, the House adjourned until Monday, September 11, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1297. A letter from the Administrator, General Services Administration, transmitting a notice of a proposed disposition of approximately 155,676,000 pounds of castor oil now held in the national stockpile, pursuant to (50 U.S.C. 98b(e)); to the Committee on Armed Services.

1298. A letter from the Secretary of State, transmitting a draft of a proposed bill entitled "A bill to authorize the Secretary of the Treasury to effect the payment of certain claims presented by the Government of the Polish People's Republic against the United States"; to the Committee on Foreign Affairs.

1299. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report to the Committee on Science and Astronautics of the House of Representatives pursuant to section 1(f) of the act of June 1, 1960 (74 Stat. 151), and is submitted through the Speaker of the House of Representatives pursuant to rule XL of the House of Representatives; to the Committee on Science and Astronautics.

1300. A letter from the Under Secretary of State for Economic Affairs, transmitting the report of the President on determinations under the Mutual Defense Assistance Control Act of 1951 for the quarter ending June 30, 1961, pursuant to section 103(b) of the act; to the Committee on Appropriations, Armed Services, and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAYS: Committee on House Administration. House Joint Resolution 558. Joint resolution providing for printing copies of "Cannon's Procedure in the House of Representatives"; without amendment (Rept. No. 1129). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Concurrent Resolution 12. Concurrent resolution authorizing the printing of additional copies of House Document 412, 85th Congress; without amendment (Rept. No. 1130). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Concurrent Resolution 364. Concurrent resolution to print as a House document the publication "World Communist Movement—Selective Chronology 1818–1957, Volume 1," and to provide for the printing of additional copies; without amendment (Rept. No. 1131). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Resolution 397. Resolution providing for additional copies of House Report No. 2228, 86th Congress, 2d session, entitled "The Communist-Led Riots Against the House Committee on Un-American Activities in San Francisco, Calif., May 12–14, 1960"; without amendment (Rept. No. 1132). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Resolution 398. Resolution providing for additional copies of House Report No. 2237, 86th Congress, 2d session, entitled "Annual Report for the Year 1960," prepared by the Committee on Un-American Activities; without amendment (Rept. No. 1133). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Resolution 408. Resolution authorizing the printing of additional copies of the report, House Report No. 851, on H.R. 8400; without amendment (Rept. No. 1134). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Concurrent Resolution 385. Concurrent resolution authorizing the printing of a manuscript entitled "History of the House of Representatives"; without amendment (Rept. No. 1135). Ordered to be printed.

Mr. HAYS: Committee on House Administration. Senate Concurrent Resolution 39. Concurrent resolution to print 3,000 copies of a compilation of the hearings, reports, and committee prints of the Subcommittee on National Policy Machinery; without amendment (Rept. No. 1136). Ordered to be printed.

Mr. HAYS: Committee on House Administration. House Concurrent Resolution 384. Concurrent resolution authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics"; without amendment (Rept. No. 1137). Ordered to be printed.

Mr. FRIEDEL: Committee on House Administration. House Resolution 433. Resolution to provide for the further expenses of the investigation and study authorized by House Resolution 23; without amendment (Rept. No. 1138). Ordered to be printed.

Mr. FRIEDEL: Committee on House Administration. House Resolution 439. Resolution to provide funds for the expenses of the investigation and study authorized by House Resolution 420; without amendment (Rept. No. 1139). Ordered to be printed.

Mr. POWELL: Committee on Education and Labor. H.R. 8871. A bill to amend the Federal Employees' Compensation Act of 1960; without amendment (Rept. No. 1140). Referred to the Committee of the Whole House on the State of the Union.

Mr. BLATNIK: Committee on Public Works. H.R. 8921. A bill to provide for the annual audit of bridge commissions and authorities created by act of Congress, for the filling of vacancies in the membership thereof, and for other purposes; without amendment (Rept. No. 1141). Referred to the Committee of the Whole House on the State of the Union.

Mr. POWELL: Committee on Education and Labor. H.R. 9030. A bill to amend the act to promote the education of the blind, approved March 3, 1879, as amended, so as to authorize wider distribution of books and other special instruction materials for the blind, and to increase the appropriations authorized for this purpose, and to otherwise improve such act; with amendment (Rept. No. 1142). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 454. Resolution providing for the consideration of H.R. 7500, a bill to provide for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower; without amendment (Rept. No. 1143). Referred to the House Calendar.

Mr. POWELL: Committee on Education and Labor. H.R. 9011. A bill to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities; without amendment (Rept. No. 1144). Referred to the Committee of the Whole House on the State of the Union.

Mr. POWELL: Committee on Education and Labor. H.R. 9053. A bill to amend title II of the National Defense Education Act of 1958 with respect to the periods for which loans under that title are made; without amendment (Rept. No. 1145). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. S. 1762. An act to regulate the practice of physical therapy in the District of Columbia; without amendment (Rept. No. 1146). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. H.R. 4892. A bill to amend the act of June 19, 1948, relating to the workweek of the Fire Department of the District of Columbia, and for other purposes; with amendment (Rept. No. 1147). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 8842. A bill to amend subsection (h) of section 124 of the Agricultural Enabling Amendments Act of 1961; with amendment (Rept. No. 1148). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 8914. A bill to amend subsection (d) of section 16 of the Soil Conservation and Domestic Allotment Act, as amended; with amendment (Rept. No. 1149). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 9013. A bill to provide for the transfer of rice acreage history where producer

withdraws from the production of rice; without amendment (Rept. No. 1150). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee on the District of Columbia. S. 1529. An act to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended; without amendment (Rept. No. 1151). Referred to the House Calendar.

Mr. FOGARTY: Committee of Conference. H.R. 7035. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes (Rept. No. 1154). Ordered to be printed.

Mr. MURRAY: Committee on Post Office and Civil Service. H.R. 7927. A bill to adjust postal rates, and for other purposes; with amendment (Rept. No. 1155). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. McMILLAN: Committee on the District of Columbia. H.R. 2838. A bill to exempt from taxation certain property of the Army Distaff Foundation; without amendment (Rept. No. 1152). Referred to the Committee of the Whole House.

Mr. McMILLAN: Committee on the District of Columbia. H.R. 9080. A bill to authorize the Philadelphia, Baltimore & Washington Railroad Co. to construct, maintain, and operate branch sidings over First Street SW., in the District of Columbia; without amendment (Rept. No. 1153). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASPINALL:

H.R. 9084. A bill to provide that certain Federal lands exclusively administered by the Secretary of the Interior shall be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SAYLOR:

H.R. 9085. A bill to provide that certain Federal lands exclusively administered by the Secretary of the Interior shall be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mrs. PFOST:

H.R. 9086. A bill to provide that certain Federal lands exclusively administered by the Secretary of the Interior shall be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CUNNINGHAM:

H.R. 9087. A bill to provide that certain Federal lands exclusively administered by the Secretary of the Interior shall be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BONNER:

H.R. 9088. A bill to amend section 510 of the Merchant Marine Act, 1936, to provide for the trade-in of obsolete vessels in connection with the construction of new vessels, either at the time of executing the construction contract or at the time of delivery of the new vessel; to the Committee on Merchant Marine and Fisheries.

By Mr. KEOGH:

H.R. 9089. A bill to amend section 402 of the Internal Revenue Code of 1954 with respect to the tax treatment of the transfer of an employee's account from one retirement system of a State to another retirement system of the same State; to the Committee on Ways and Means.

By Mr. MILLS:

H.R. 9090. A bill relating to the income tax treatment of certain Communist organizations, and for other purposes; to the Committee on Ways and Means.

By Mr. MONAGAN:

H.R. 9091. A bill to amend the Federal Property and Administrative Services Act of 1949 to provide an orderly program of decentralization and relocation of facilities and personnel of executive agencies; to the Committee on Government Operations.

By Mr. REUSS:

H.R. 9092. A bill to amend the Employment Act of 1946 to provide more effective means for bringing to bear an informed public opinion upon price and wage increases which threaten economic stability; to the Committee on Government Operations.

By Mr. RHODES of Pennsylvania:

H.R. 9093. A bill to designate the third Library of Congress building the John Philip Sousa Memorial Library, and to provide for the establishment of the John Philip Sousa collection in the Library of Congress, and for the placing of statues of John Philip Sousa and Dr. Harvey W. Wiley in Statuary Hall; to the Committee on House Administration.

By Mr. ROUSH:

H.R. 9094. A bill to authorize the establishment of the Frances Slocum National Monument; to the Committee on Interior and Insular Affairs.

By Mr. UTT:

H.R. 9095. A bill to deny the use of the U.S. postal service for the carriage of Communist political propaganda; to the Committee on Post Office and Civil Service.

By Mr. CELLER:

H.R. 9096. A bill to amend the antitrust laws to authorize leagues of professional football, baseball, basketball, and hockey teams to enter into certain television contracts, and for other purposes; to the Committee on the Judiciary.

By Mr. HARDING:

H.R. 9097. A bill to authorize the Secretary of the Interior to sell certain public lands in Idaho; to the Committee on Interior and Insular Affairs.

H.R. 9098. A bill to provide for the sale of the undisposed-of lots in the townsite of Pocatello, Idaho, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HARVEY of Michigan:

H.R. 9099. A bill to deny the use of the U.S. postal service for the carriage of Communist political propaganda; to the Committee on Post Office and Civil Service.

By Mr. KYL:

H.R. 9100. A bill to provide for the protection of residential and business realty in the District of Columbia which is not substandard and which is held by homeowners and small businessmen in urban renewal project areas in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. PIKE:

H.R. 9101. A bill to amend clause (3) of section 402(a) of the Federal Food, Drug, and Cosmetic Act; to the Committee on Interstate and Foreign Commerce.

By Mr. KEITH:

H.R. 9102. A bill to amend clause (3) of section 402(a) of the Federal Food, Drug, and Cosmetic Act; to the Committee on Interstate and Foreign Commerce.

By Mr. RIVERS of South Carolina:

H.R. 9103. A bill to authorize the Secretary of the Navy to accept H.M.S. *Seraph* as a gift from the United Kingdom, for the purpose of redonating it to the Citadel of Charleston, S.C.; to the Committee on Armed Services.

By Mr. TOLLEFSON:

H.R. 9104. A bill to amend section 510 of the Merchant Marine Act, 1936, to provide for the trade-in of obsolete vessels in connection with the construction of new vessels, either at the time of executing the construction contract or at the time of delivery of the new vessel; to the Committee on Merchant Marine and Fisheries.

By Mr. CURTIS of Missouri:

H.J. Res. 564. Joint resolution to authorize the President to proclaim the month of May 1962 as National Clean-Up, Paint-Up, Fix-Up Month; to the Committee on the Judiciary.

By Mr. KARSTEN:

H.J. Res. 565. Joint resolution to authorize the President to proclaim the month of May 1962 as National Clean-Up, Paint-Up, Fix-Up Month; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H.J. Res. 566. Joint resolution to authorize the President to proclaim a week in March of each year as National Health Week; to the Committee on the Judiciary.

By Mrs. SULLIVAN:

H.J. Res. 567. Joint resolution to authorize the President to proclaim the month of May 1962 as National Clean-Up, Paint-Up, Fix-Up Month; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois:

H. Con. Res. 389. Concurrent resolution endorsing the World Economic Progress Exposition; to the Committee on Foreign Affairs.

By Mr. KITCHIN:

H. Res. 453. Resolution to provide funds for the expenses of the investigation and study authorized by House Resolution 403; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CORMAN (by request):

H.R. 9105. A bill for the relief of Gertrud Swienty; to the Committee on the Judiciary.

By Mr. HAGAN of Georgia:

H.R. 9106. A bill for the relief of Athena Voyadjis; to the Committee on the Judiciary.

H.R. 9107. A bill for the relief of Hyacinth Francis; to the Committee on the Judiciary.

By Mr. LANKFORD:

H.R. 9108. A bill for the relief of Antonio M. Garcia; to the Committee on the Judiciary.

By Mrs. ST. GEORGE:

H.R. 9109. A bill for the relief of Alexandra, Emily, and (Shurki) Shukri (Dabbeekeh) Dabeekeh; to the Committee on the Judiciary.

H.R. 9110. A bill for the relief of Ines Clorinda Carriero Manes; to the Committee on the Judiciary.

By Mr. WALTER:

H.R. 9111. A bill for the relief of Pepito Guaro Dignadice; to the Committee on the Judiciary.

By Mr. WILSON of California:

H.R. 9112. A bill for the relief of Consuelo Alvarado de Corpus; to the Committee on the Judiciary.

H.R. 9113. A bill for the relief of Anthony William White; to the Committee on the Judiciary.

H.R. 9114. A bill for the relief of Ionna Ganas; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Troika Crisis Looms in Redistricting Hassle

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 7, 1961

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following very interesting and most timely statement of Mr. Charles H. McGlue, former special assistant attorney of Massachusetts on the subject of redistricting.

TROIKA CRISIS LOOMS IN REDISTRICTING HASSLE

Early in the first F.D.R. administration, the word "troika" would recall memories of "La Troika," a Russian night spot on Connecticut Avenue, Washington, D.C., just below the then newly opened swank Hotel Mayflower, or perhaps the familiar three-horse Russian sleigh which made its appearance in "A Night at Garde's" in a very intriguing scene in the Russian musical, "Chauve-Souris."

"Troika" today has an entirely different connotation. It is a Khrushchev expression for a three-way operation to administer or maladminister a given proposition. The Troika setup is a factor in the congressional redistricting problems, affecting three States; namely, Massachusetts, Illinois, and Pennsylvania. In each of these three States, there is a potential deadlock that might result in requiring all Congressmen to be elected at large.

TROIKA DILEMMA

Massachusetts has a Democratic senate, a Democratic house of representatives but a Republican Governor. Illinois has a Republican senate, a Democratic house of representatives, but a Democratic Governor. Pennsylvania has an evenly divided senate, 25 Republicans and 25 Democrats, a Democratic house of representatives, and a Democratic Governor. In accordance with the population count in 1960 national census, Massachusetts will lose two Congressmen, dropping from 14 to 12; Illinois will lose one Congressman, dropping from 25 to 24; while Pennsylvania will lose three Congressmen, dropping from 30 to 27.

The law governing congressional redistricting generally requires the passage of a redistricting measure through both State legislative branches together with the signature of the Governor of each State. The case of *Smiley* v. *Holm* (285 U.S. 355 (1932)) determined that a redistricting act in order to be legal required the same process as that of any legislative bill and that the term "legislature" as used in article IV section 1 of the U.S. Constitution, referred to the legislative power of the State however it might be distributed.

Thus it becomes obvious that in each of these three States there must be an agreement for the passage of some form of redistricting, or in lieu thereof, Massachusetts, Illinois, and Pennsylvania must resort to a superchaotic election-at-large for all their Congressmen in November 1962.

The existing U.S. statute on redistricting States that if the number of Representatives (Congressmen) is decreased and the number of districts in the State exceeds that number, then all are elected at large. However, Congress still retains its constitutional right to change the statutory provisions at any time. Also, the constitutional right of Congress to be final judge of the elections and qualifications of its own Members should not be overlooked. U.S. Constitution, article 1, section 5.

CONGRESSMAN CELLER

Congressman EMANUEL CELLER, Democrat, of New York, chairman, Committee on the Judiciary, U.S. House of Representatives, has made an exhaustive study of the problems arising from congressional redistricting. Representative CELLER states that the question of congressional control over the acts of the State legislatures regarding apportionment was first met in 1843 when objections were raised concerning the election of certain Members from States wherein the elections were not held by districts. By parliamentary maneuver the House avoided the direct issue and the Members in question retained their seats. In 1901, the power of Congress to regulate districts was challenged in an election case, but this time the House took no action and the Member retained his seat. In 1910 the House was faced with a similar issue, but no action was taken.

Although the most direct attack upon the power of the Congress to regulate redistricting under article 1, section 4 of the Constitution is found in the reports of the House itself, it appears to be well-established by the decisions of the U.S. Supreme Court that the Congress has general supervisory power over the subject of the elections of the Representatives, including the matter in which a State is divided into congressional districts. (*Smiley* v. *Holm* (285 U.S. 355 (1932)), *Ex Parte Siebold* (100 U.S. 371 (1879)), *Ex Parte Yarborough* (110 U.S. 651 (188–)), *Wood* v. *Broom* (287 U.S. 1 (1932)), *Colegrove* v. *Green* (328 U.S. 549 (1946)).)

JUSTICE FRANKFURTER'S OPINION

In the case of *Colegrove* v. *Green* (328 U.S. 549 (1946)) Mr. Justice Frankfurter in a majority opinion of the U.S. Supreme Court invited congressional action in the following statement:

"The one stark fact that emerges from a study of the history of congressional apportionment is its embroilment in politics, in a sense of party contests and party interests. The Constitution enjoins upon Congress the duty of apportioning representatives among the several States according to their respective number (art. I, sec. 2). Yet Congress has at times been heedless of this command and has not apportioned according to the requirements of the census. It never occurred to anyone that this Court could issue mandamus to compel Congress to perform its mandatory duty to apportion. 'What might not be done directly by mandamus could not be attained indirectly by injunction' (Chaffe) congressional reapportionment (1929), 42 Harvard Law Review 1015–1019)."

STATEMENT OF CONGRESSMAN CELLER

"In the light of the court decisions and the legislative enactments, the importance of the problem of fair, equitable apportionment both by the Federal and State legislatures is one that demands a final and prompt solution.

"It must be a solution which goes to the very root of the problem and eradicates the sources of the evil. A mere glance at the contours of various congressional districts and the wide variances in the population of these districts compels the conclusion that the drawing of congressional districts cannot be left to the whims and uncontrolled discretion of the State legislatures. The problem is one that involves the fundamental principle of equality which permeates our entire Constitution so that this denial imperils the very heart of our democracy."

Youth Fitness Program Initiated at Muskogee

EXTENSION OF REMARKS
OF
HON. ED EDMONDSON
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 7, 1961

Mr. EDMONDSON. Mr. Speaker, this week the pilot project of President Kennedy's physical fitness program gets underway in the public schools of Muskogee, Okla. On this occasion I think that both the fine teachers and administrators of the Muskogee public schools and Bud Wilkinson as national director of the physical fitness program should be congratulated for their effort to conserve our Nation's most important resource—our Nation's youth.

I think it is very appropriate that the Muskogee public school system, which is among the finest in the country, should be picked for this pilot program. In the past, Muskogee schools have been leaders in scholastic achievement and competitive sports. Now the Muskogee schools will be leaders in this other vital role of education—the physical advancement and well-being of all the students as well as the natural athletes.

Coach Wilkinson personally got the program underway last week when he addressed a general faculty meeting of all Muskogee teachers. He emphasized that the success or failure of this program will depend largely on its success in Muskogee.

I am happy to report after visiting Muskogee this weekend that everyone in the city is enthusiastic about undertaking this vital project.

All students, except for the first three grades, will participate in the program.

As Coach Wilkinson outlined, there are four major points to the physical fitness operation:

First, all pupils must have a continuous health appraisal.

Second, the undeveloped children must be recognized and brought up to par.

Third, every boy and girl must get a minimum of 15 minutes of vigorous exercise every day.

And fourth, the same type tests for grading in academic subjects will be used to grade a student's physical advancement.

Mr. Speaker, a great deal has been written and said recently about America's arms races and space races with the Russians. Almost totally overlooked until this year is the effort we must maintain for individual physical fitness. In the final analysis, it is the American man and woman, and not powerful

weapons, which must swing the balance of power in the continuing race for world leadership.

Mr. Wilkinson ably pointed this out in his article in Sunday's Parade magazine. He said:

There will be many stresses for us as a nation in the months ahead. Whether we turn back or surge to the top will depend upon our fitness and determination. It is a fact noted by historian Arnold Toynbee that 19 of the 21 notable civilizations perished not because of conquest from without but from decay within. National softness could prove in the long run to be more deadly than missiles.

As an American, as an Oklahoman, and as a father, I am proud of the work Coach Wilkinson and the Muskogee public schools are doing in spearheading the prevention of this internal decay, and in building a stronger people and Nation.

The American Heritage: Address by the Honorable Herbert C. Bonner, of North Carolina

EXTENSION OF REMARKS
OF
HON. THOMAS N. DOWNING
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 1961

Mr. DOWNING. Mr. Speaker, under leave to extend my remarks, I would like to include in the RECORD, a splendid, thoughtful address by the Honorable HERBERT C. BONNER, from the First District of North Carolina, presented during the closing ceremonies of the great historical pageant "The Lost Colony," at the amphitheater in the Fort Raleigh National Monument at Manteo, N.C., on Saturday, September 2, 1961. Congressman BONNER spoke at the 1,999th performance of this dramatic portrayal of the beginnings of Anglo-American civilization in the Western Hemisphere.

The message draws a clear analogy between the ferment and turmoil in the world of the 16th century and our own troubled times. The inspiration of his address upholds America's dream for peace and progress throughout the world.

The text of Mr. BONNER's speech follows:

Friends, you and I are honored to be here tonight, in attendance at this magnificent pageant conceived and staged by a great native North Carolinian, Paul Green, in celebration of the very beginning of Anglo-American civilization. You have seen—you will see—drama that is heart and soul of America today. It is drama that began nearly 400 years ago on this hallowed ground when intrepid souls set out from the mother country, England, in their tiny vessels, to found the dynamic civilization in freedom, which we now enjoy but, perhaps do not always appreciate.

This week marks the end of the 1961 season for the presentation of "The Lost Colony" pageant performed by its able and dedicated cast of actors, musicians, dancers, and choristers.

I must open my remarks with special recognition of the genius of Paul Green who felt the deeper meaning of the American dream—the American goal—by creating this tremendous outdoor symphony on this site some 25 years ago. Each year there has been some change—for he has sought to perfect this phase of his presentation of the meaning of the American heritage.

America's greatness has grown from its variety, and Paul Green has extended his vast talents to other historical phases of our national growth with such successes as "The Common Glory," now in its 15th season at Williamsburg, Va.; "Faith of Our Fathers," in the National Capital; "Wilderness Road," at Berea, Ky.; "The Founders," at Jamestown Island, Va.; and "The Confederacy," at Virginia Beach, Va.

In the light of all that, my friends, you must know that this is a night to remember, to feel deeply, and to cherish.

When I was asked not so long ago if I, as Congressman from this First District of North Carolina, would participate briefly in this seasonal closing of our State's historic drama, the news in Washington, D.C., was exceedingly grim. The world seemed beset by cold fire—interspersed here and there with brutal bursts of passion that did not—do not—make sense in a civilized world. The intervening weeks do not look any better.

Korea, though some 10 years behind, has left scars which may still pain many who are here tonight. The Suez crisis of 1955 and 1956 made a deep impact on the nations of the world as the Arab States went through pangs of extreme nationalism and flirtations with the untiring Communist powers, China and India reached serious crises over boundary matters. A President of the United States was advised not to visit one country because of the possibility of disorders which might threaten his safety. And later, he and the United States were outrageously affronted by the Premier of the Soviet Union at a meeting in Paris of top officials of the great world powers—the United States, Soviet Russia, the United Kingdom, and the Republic of France.

Today, we have one crisis on top of another. The West Germany/West Berlin situation is boiling and dangerous in light of the extreme measures which have been taken to seal off the unhappy East Germans from access to the West. The problems of the French in Algeria and between the French and the Tunisians, gravely, though indirectly, affect these shores. The turn of our near and formerly friendly neighbor, Cuba, to communism and Soviet domination is frightening. Recent developments in Brazil are mystifying. Africa is in a tremendous ferment. And who knows what has really happened in Laos and Vietnam?

These things are of great concern to us in Washington, D.C., at the seat of our Government.

I know they are to all of you.

National divisions, realinements, and inconsistencies seem to plague the world. We have a North Korea and a South Korea; we have a North and a South Vietnam, there is an East and West Germany—complicated by the city or cities of East and West Berlin located 110 miles within the World War II boundary of the Federal Republic of Germany. In the Union of South Africa we see the concept of apartheid, or white supremacy, carried to greater extremes than it has ever been in this country. In other parts of Africa the concept of black supremacy seems to be on the rise.

These are the things of today and of recent years. But let's go back to the times portrayed by Paul Green's pageant, the time when the English-speaking peoples asserted themselves on this continent.

Things were no different then than they are today. Not really.

History books have to cover time by recording the main events. They cannot give us the infinite details which we learn from our daily newspapers, radios, and television.

But those books do tell us that power struggles in Europe were then, as now, shaking the structure of the entire civilized world at the time our brave Roanoke Island colonists came to these shores.

We know that Spain had been in control of the seas for a hundred years or more. That the Portuguese were competitors. We know that the English were, through their ruling classes, in violent diplomatic and religious conflict with the rest of Europe. We know that the Dutch were straining to compete in the colonization of the unsettled areas of the world.

In the official souvenir program for tonight's entertainment—the one that costs 50 cents per copy—there appears a chronology of Pre-Colonial America, it tells about Columbus in 1492. It shows that England wasn't going to wait very long, and John Cabot discovered North America for England in 1497. It shows that an Italian explored the present North Carolina coast for France in 1524. And it shows the vigorous efforts of the English under the direction of Sir Walter Raleigh to establish a colony in the New World, at Roanoke Island—where we now stand.

The Colony was lost. Its fate is intriguing, and historians have been interested for more than 370 years in finding the answer to the disappearance of the sturdy, well-balanced and well-provisioned group of colonists. They brought families and produced English children. They had brought Christianity. They had established law and order in the wilderness. They had taken the first steps to move the Western World into the modern era.

In this great drama—Paul Green suggests an answer to the fate of the first brave groups to begin the history that becomes the cornerstone to English, then Anglo-American and then American heritage. His story of the lost colony is self-sufficient.

But I want to say in conclusion that as we look backward we must look forward. "The past is prolog."

There was a cold war then—between England and Spain. There was no declared war—but the Spanish Armada sailed against England—and was defeated. From that date English seapower was supreme all over the world—upholding the freedom of the seas for all nations who would use them for peaceful purposes. From those perilous times to the present perilous times man's indomitable spirit has pushed the frontiers of civilization and knowledge incredibly far.

Think of this analogy and feel a surge of hope for the future that lies ahead. Our faith in God and country may be summed up in the final beautiful lines of this great pageant:

"Let the wilderness drive us forth as wanderers across the earth, scatter our broken bones upon these sands * * * it shall not kill the purpose that brought us here. * * * The dream still lives. It lives * * * and shall not die."

Frances Slocum

EXTENSION OF REMARKS
OF
HON. J. EDWARD ROUSH
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 7, 1961

Mr. ROUSH. Mr. Speaker, Frances Slocum was a white woman who, after being kidnaped by the Indians at the age of 5, grew to be a highly respected member of the Indian nation in what is

now my district of Indiana. She lived happily among the Miami Indians for many years and she contributed greatly to the fine relationship which her tribe developed with the white settlers.

Ma-con-a-qua, as she was called by the Indians, married a war chief of her tribe and became a member of the influential circle of leadership of the Miamis during a time when the final settlements were made between these Indians and the U.S. Government. During her years of influence in the tribe, almost all of the important Miami treaties were signed. Frances Slocum became a great symbol of the peaceful relations of the Indians in the Midwest, and remains so today. She is honored by the Indians and the white people alike in my State as being a vital and helpful link between the two civilizations at a very critical period.

Ma-con-a-qua is buried in Wabash County, Ind., just 6 miles southeast of the city of Peru, Ind. She is buried in a part of a section of ground ceded to her two daughters by the treaty of 1838 along the banks of the Mississinewa River.
